## INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC and ETH projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove liquidity (“Rug Pull”), sell off tokens, or completely exit scam. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

## Website Preview & Mobile Test

Above images are actual snapshots of the current live website of the project.

Website was registered on 04/05/2021, registration expires 04/05/2022.

This is a possible flag. We generally like to see registrations for 3 years minimum for the longevity commitment of a team to a project. We would like to see this updated in the near future.

**✓ Team has updated domain registration. It now expires 04/05/2024**

# Website Part 2 – Checklist

- ✓ Responsive
- ✗ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

The website contained a few JavaScript errors. No typos, or grammatical errors and we found a valid SSL certificate allowing for access via https.

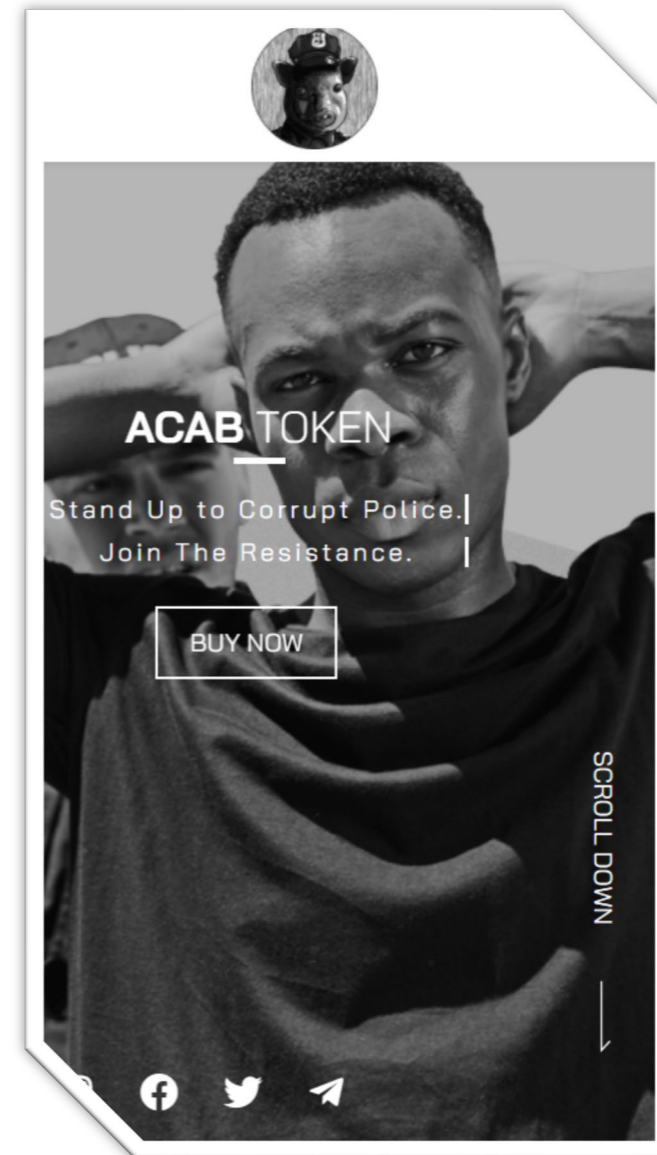

# Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the responsive check for the website. All elements loaded properly and browser resize was not an issue. The project has put a considerable amount of thought and effort into making sure their website looks great on all screens.

Console check came back with 2 status 500 errors and 3 404 errors which may be missing or inaccessible files (that may or may not be necessary for the project needs).

## Javascript Console Errors:

```

# Social Presence - Final Thoughts & Suggestions for Improvement

We were able to track down multiple of social media profiles for the project. ACAB Token had Twitter, Telegram, Facebook, and Instagram profiles, all which appear to have a healthy amount of activity.

It is important to note that this is a reflect project with a 1.2% split of every transaction going to the current token holders, 1.2% being removed from circulation, and 1.2% going to a wallet to be used for charity donations. There is a 3.6% total tax on every transaction including buys, sells, and transfers.

There appears to be active dev engagement in the telegram and recent posts Twitter, Facebook, and Instagram however we found the “bios” on Instagram and Facebook to be a bit lacking with more details about the project.

## Suggestions for Improvement

1. Update Instagram bio with more details about the project. ✓ *Fixed*
2. Update Facebook page’s “about” information to include more details about the project. ✓ *Fixed*
3. Add an official contact email to the homepage of the website. ✓ *Fixed*
