

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to an audit in no way guarantees that a team will not remove *all* liquidity ("Rug Pull"), remove liquidity slowly, sell off tokens, quit the project, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

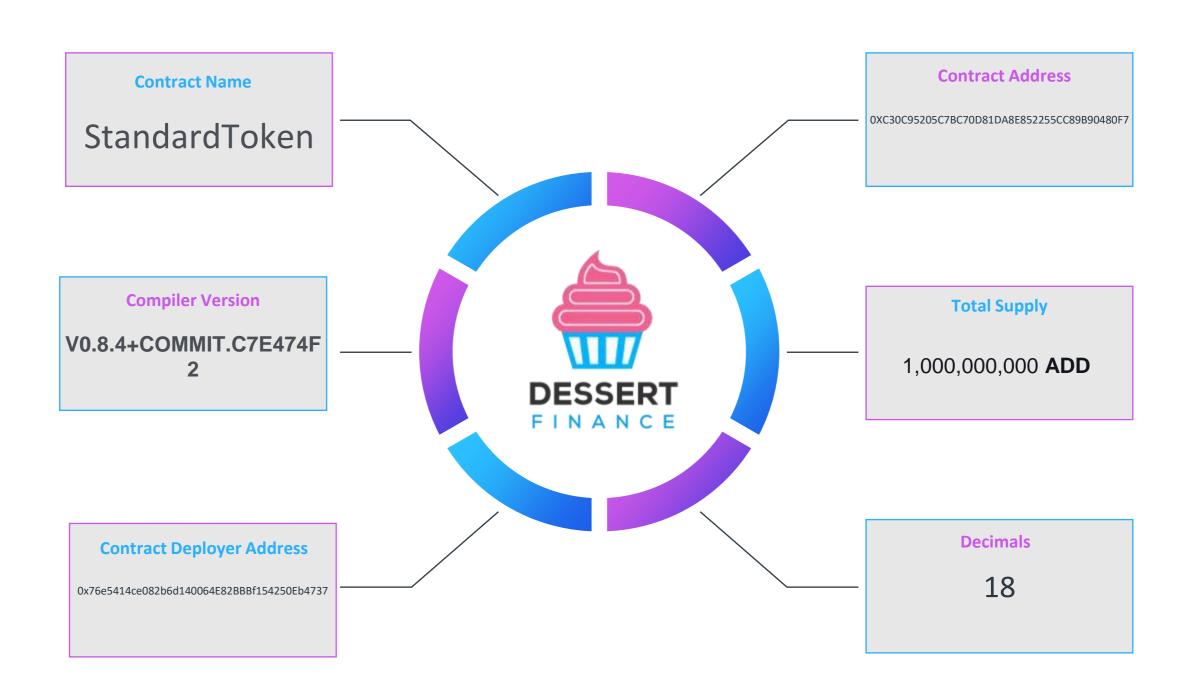

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice. Dessert Finance does not endorse, recommend, support, or suggest any projects that have been audited. An audit is an informational report based on our findings, We recommend you do your own research, we will never endorse any project to invest in.

Contract Code Audit – Token Overview

BEP-20 Contract Code Audit – Overview

Dessert Finance was commissioned to perform an audit on ADD FINANCE (ADD)

```
Dependency file: @openzeppelin/contracts/token/ERC20/IERC20.sol
 progma solidity "0.8.0;
 Sdev Interface of the ERC20 standard as defined in the EIP.
nterface IERC20 (
     * @dev Returns the amount of tokens in existence
   function totalSupply() external view returns (uint256);
   function balanceOf(address account) external view returns (uint256);

    # @dev Moves "amount" tokens from the caller's account to "recipient".

    * Meturns a boolean value indicating whether the operation succeeded.
   function transfer(address recipient, wint256 amount) external returns (bool);

    @dev Returns the remaining number of tokens that 'spender' will be
    allowed to spend on behalf of 'owner' through {transferFrom}. This is

    * This value changes when (approve) or (transferFrom) are called.
   function allowance (address owner, address spender) external view returns (wint256
    * @dev Sets 'amount' as the allowance of 'spender' over the caller's tokens.

    transaction ordering. One possible solution to mitigate this race
    condition is to first reduce the spender's allowance to 0 and set the

Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

0x76e5414ce082b6d140064e82bbbf154250eb4737

The address above has authority over the ownable functions within the contract.

This allows the owner to call certain functions within the contract. Any compromise to the owner wallet may allow these privileges to be exploited.

We recommend:

- -Establishing a Time-Lock with reasonable latency
- -Assignment of privileged roles to multi-signature wallets

Contract Code Audit – Owner Accessible Functions

Function Name	Parameters	Visibility	Audit Notes
renounceOwnership		public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
transferOwnership	address newOwner	public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.

The functions listed above can be called by the contract owner.

Liquidity Ownership – Locked / Unlocked

Locked liquidity information has been found.

This page will contain links to locked liquidity for the project if we are able to locate that information.

Pinksale

https://www.pinksale.finance/pinklock/detail/0xDd299360d477b2F5FaC804d7a9515F9E 9b7923cD?chain=BSC

Contract Code Audit – Mint Functions

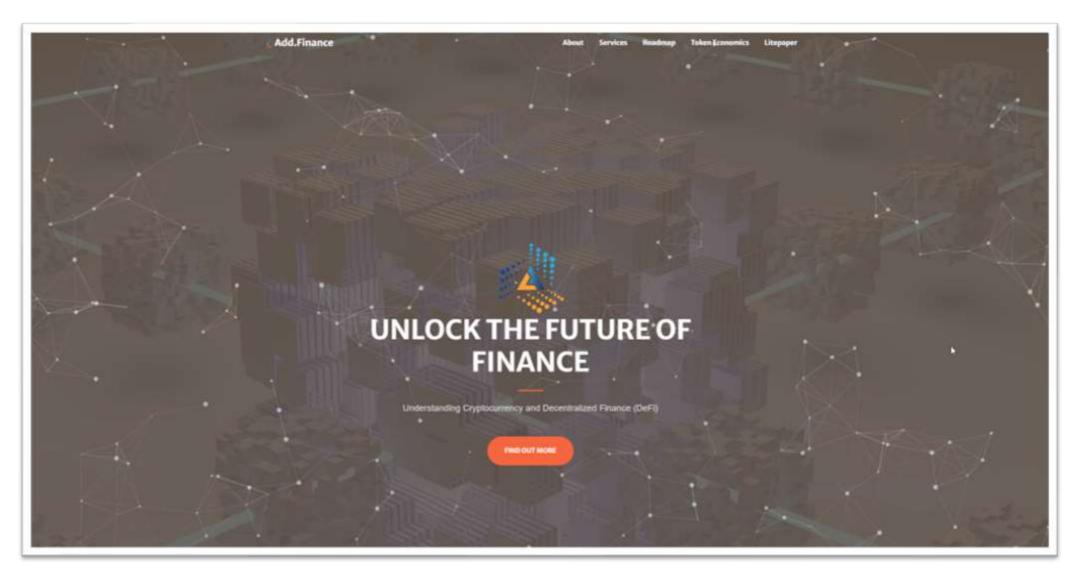

This Contract Cannot Mint New ADD Tokens.

We do understand that sometimes mint functions are essential to the functionality of the project.

A mint function was not found in the contract code.

Website Part 1 – Overview add.finance

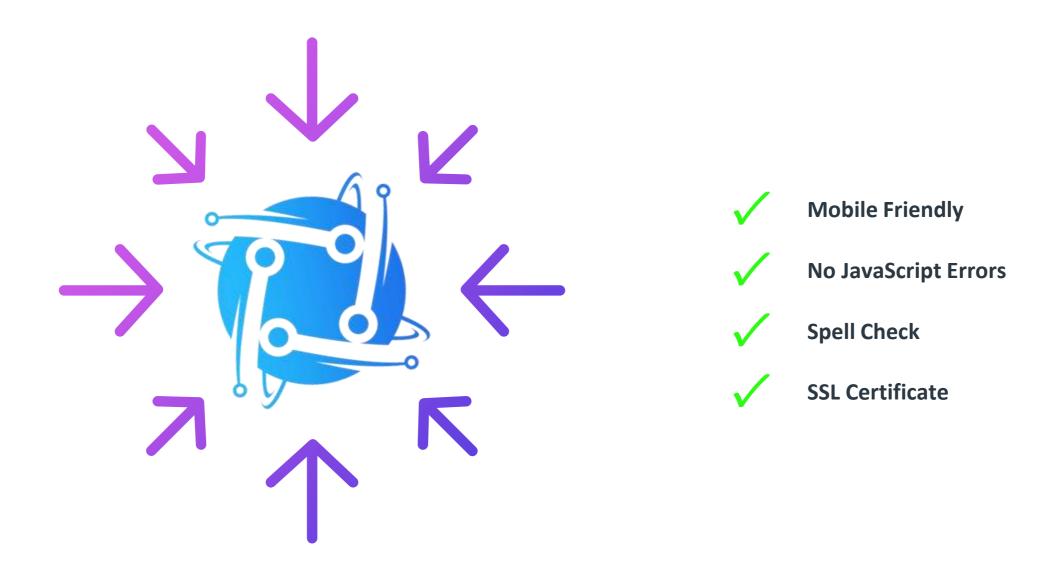

Above images are actual snapshots of the current live website of the project.

Website was registered on 03/29/2023, registration expires 03/29/2028.

✓ This meets the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

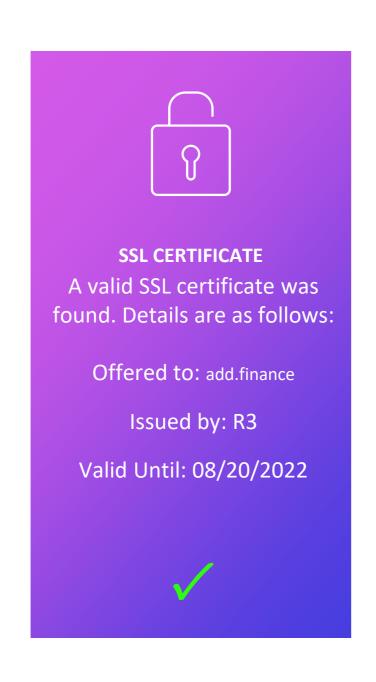

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

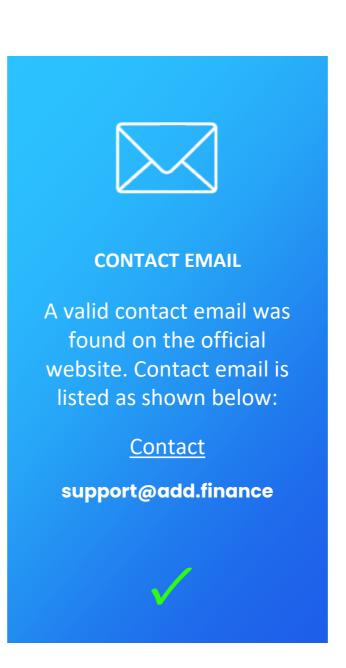

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) - General Web Security

Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

At least 3 social media networks were found.

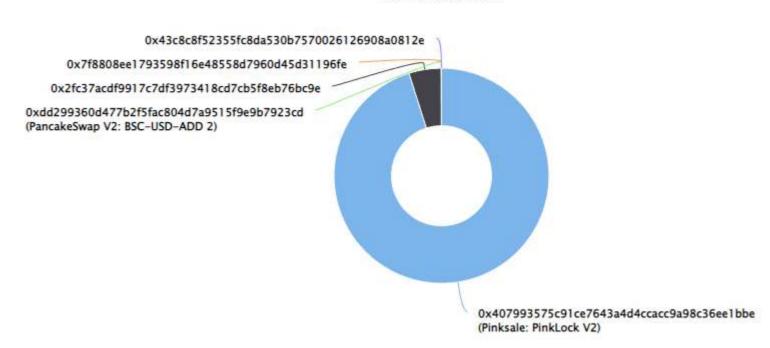

Top Token Holders

The top token holders at the time of the audit are shown below.

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.

Team Overview

We are unable to find any information about the team on the website at this time. Projects may choose to stay anonymous for a myriad of reasons.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are not intended to provide specific advice or recommendations for any individual or on any specific investment. It is only intended to provide education and public knowledge regarding projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.
