INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

BEP-20 Contract Code Audit – Overview

Dessert Finance was commissioned to perform an audit on Aqua Goat (AQUAGOAT)

```
Submitted for verification at BscScan.com on 2021-09-08
}

/**
 * The new and improved Aquadart V2.
 * Improved Tokenomics, Lower Supply, A Fresh Start for All
 * The original yield-generating ocean-saving cryptocurrency.
 * The next generation of Aquadart is here.
 * Code forked from a SafeMoon fork(Forkception), adjusted and built for Aquadart.
 */

pragma solidity ^0.6.12;

// SPDX-License-Identifier: Unlicensed
interface BEP20 {
    function totalSupply() external view returns (uint256);
    /**
     * @dev Returns the amount of tokens owned by "account".
     */
    function balanceOf(address account) external view returns (uint256);
    /**
     * @dev Moves "amount" tokens from the caller's account to "recipient".
     * Returns a boolean value indicating whether the operation succeeded.
     * Emits a [Transfer] event.
     */
    function transfer(address recipient, uint256 amount) external returns (bool);
    /**
     * @dev Returns the remaining number of tokens that "spender" will be
     * allowed to spend on behalf of "owner" through [transferFrom]. This is
     * zero by default.
     * This value changes when [approve] or [transferFrom] are called.
     */
    function allowance(address owner, address spender) external view returns (uint256);
    /**
     * @dev Sets "amount" as the allowance of "spender" over the caller's tokens.
     * Returns a boolean value indicating whether the operation succeeded.
     * IMPORTANT: Beware that changing an allowance with this method brings the risk
     * that someone may use both the old and the new allowance by unfortunate
     * transaction ordering. One possible solution to mitigate this race
     * condition is to first reduce the spender's allowance to 0 and set the
     * desired value afterwards.
     * https://github.com/ethereum/EIPs/issues/20#issuecomment-263524729
     */
    function approve(address spender, uint256 amount) external returns (bool);
    /**
     * @dev Moves "amount" tokens from "sender" to "recipient" using the
     * allowance mechanism. "amount" is then deducted from the caller's
     * allowance.
     */
}
```

5%

LIQUIDITY
POOL

1%

CHARITY WALLET

Website Part 1 – Overview

www.aquagoat.finance

Above images are actual snapshots of the current live website of the project.

Website was registered on 04/08/2021, registration expires 04/08/2022.

X This does not meet the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

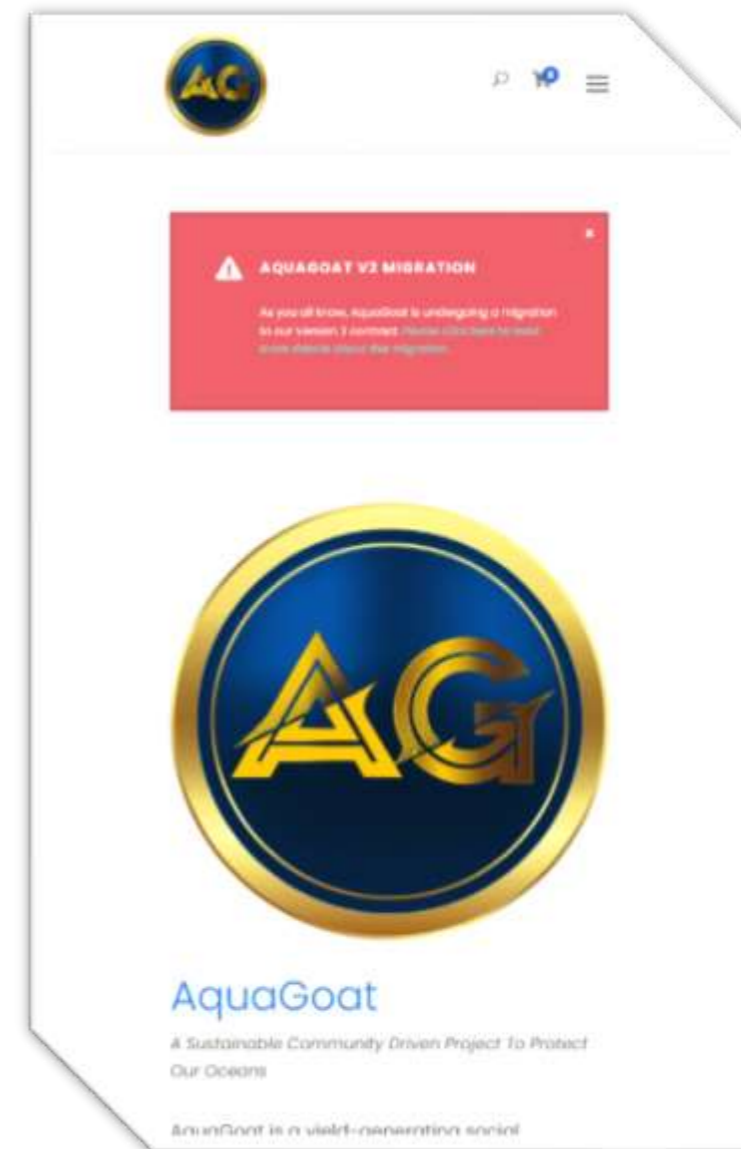

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: aquagoat.finance

Issued by: Go Daddy

Valid Until: 05/21/2022

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

[Contact](mailto:support@AquaGoat.Finance)

support@AquaGoat.Finance

SPAM / MALWARE / POPUPS

No malware found

No injected spam found

No internal server errors

No popups found

Domain is marked clean by Google, McAfee, Sucuri Labs, & ESET

Social Media

We were able to locate a variety of Social Media networks for the project including Twitter, Telegram, Reddit, Discord, Facebook, Instagram and Medium. All links have been conveniently placed below.

[Twitter](#)

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.

Team Overview

We were able to locate a team page on the official website. The image below will link directly to the team page with links to everyone's social media profiles.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

The Big Announcement! Aquagoat is unleashing its full potential with a new and improved Version 2 Contract

AQUAGOAT MIGRATION

[How to Migrate your Tokens](#)

Greetings Goats,

If you did not know yet, AquaGoat will be migrating over to a new and improved V2 contract with attractive features that will provide long term benefit for our project;

- **Lower Supply;** We will reduce initial supply from 100 Quadrillion to 1 Quadrillion
- **Better Tokenomics;** 5% liquidity and 4% for holders on every transaction
- **Hard-coded Charity Tax;** 1% of every transaction is sent to our charity wallet for charitable use and partnership funding
- **Exchange Tokenomics;** It is now fair for all holders, whether holding in a wallet or a Tokenomics Supporting exchange, to receive reflections
- **Contract Ownership;** This allows us to utilize contract functions for community benefit, such as whitelisting exchange hot wallets to support tokenomics.
- **SafeMoon Integration;** As we are supported in the integration into the SafeMoon Wallet, we want to prepare for our exposure to their large investor base with a familiar but still unique token.
- **A Fresh Start;** An attractive new chart without the past of V1 price action. This gives us a fresh start and makes us more attractive to new investors, especially those we will be meeting at the upcoming Oceans Conference and other events we will be attending.

Due to our renounced contract ownership and lack of access to liquidity with Version 1, we can not do a typical migration of freezing transactions, taking a snapshot, sending an equivalent amount of tokens, and pulling liquidity from the V1 contract to start liquidity on the V2 contract.

This is why we are currently running a unique token migration programme as a substitute. We ask that the community send in their tokens to our wallet address below to take part in the migration. Participants in this token migration will receive the dollar value of their tokens at time of sending plus 10 percent as an added reward. The tokens sent will be used to help fund our future liquidity.

Wallet address to send to:

0x32935d0b5560AEBD2D2D5a81560A76d6558C5E2E

We have already begun a security audit of the new token to highlight and change any errors, and have contacted our partners and exchanges to support us in our move to the new contract. We are also going through the process of integrating our new token into our upcoming Swap platform, and things appear to remain on schedule.

We hope to take all of our loyal Goats with us as we make the move to the next stage of a new and improved AquaGoat.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You
