

## **INITIAL DISCLAIMER**

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity ("Rug Pull"), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

## DessertDoxxed

DessertDoxxed is a service offered by Dessert Finance that allows projects to do a private face reveal matched with an I.D to allow founders / team members to privately Doxx themselves to us. This allows an added layer of security to the projects team but also allows an added layer of confident to project supporters.

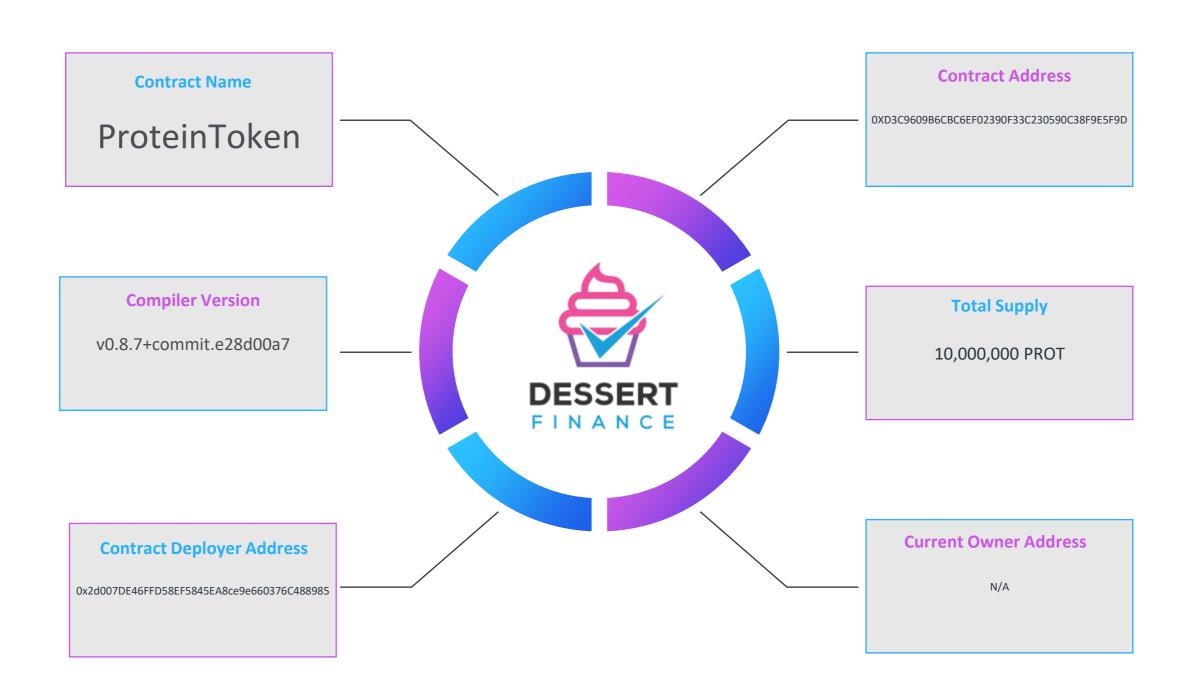

√ The founder of this project has been DessertDoxxed

Protein (PROT)

#### **Contract Creator**

0x2d007de46ffd58ef5845ea8ce9e660376c488985

#### **Source Code**

Contract Source Code Verified

#### **Contract Name**

ProteinToken

#### **Other Settings**

default evmVersion, GNU GPLv3

#### **Compiler Version**

v0.8.7+commit.e28d00a7

#### **Optimization Enabled**

Yes with 200 runs

Code is truncated to fit the constraints of this document. The code in its entirety can be viewed here.

# **BEP-20 Contract Code Audit – Vulnerabilities Checked**

Vulnerability Tested	Al Scan	Human Review	Result
Integer Overflow	Complete	Complete	√ Low / No Risk
Integer Underflow	Complete	Complete	√ Low / No Risk
Correct Token Standards Implementation	Complete	Complete	√ Low / No Risk
Timestamp Dependency for Crucial Functions	Complete	Complete	√ Low / No Risk
Exposed _Transfer Function	Complete	Complete	√ Low / No Risk
Transaction-Ordering Dependency	Complete	Complete	√ Low / No Risk
Unchecked Call Return Variable	Complete	Complete	√ Low / No Risk
Use of Deprecated Functions	Complete	Complete	√ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	√ Low / No Risk
State Variable Default Visibility	Complete	Complete	√ Low / No Risk
Deployer Can Access User Funds	Complete	Complete	√ Low / No Risk

The contract code is **verified** on BSCScan.

The vulnerabilities listed above were not found in the token's Smart Contract.

# **Contract Code Audit – Contract Ownership**

This is not an ownable token.

# **Liquidity Ownership – Locked / Unlocked**

No locked liquidity information has been found.

This page will contain links to locked liquidity for the project if we are able to locate that information. Locked liquidity information was not found on the project's website.

## **Contract Code Audit – Mint Functions**

**This Contract Cannot Mint New PROT Tokens.** 

We do understand that sometimes mint functions are essential to the functionality of the project.

A mint function was not found in the contract code.

# Website Part 1 – Overview <a href="https://www.armzlegends.com">www.armzlegends.com</a>

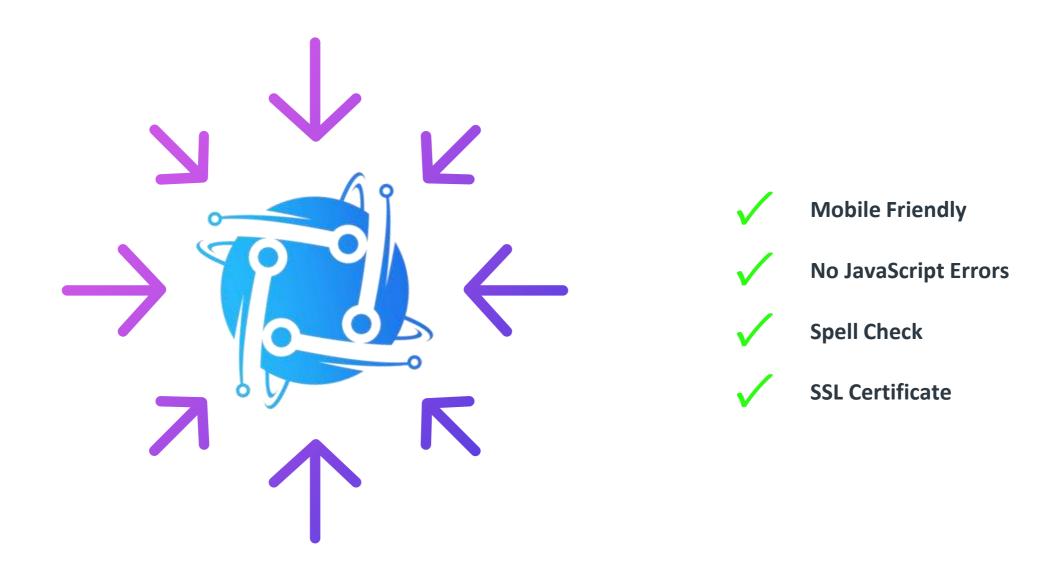

Above images are actual snapshots of the current live website of the project.

Website was registered on 09/28/2021, registration expires 09/28/2023.

X This does not meet the 3 year minimum we like to see on new projects.

## **Website Part 2 – Checklist**

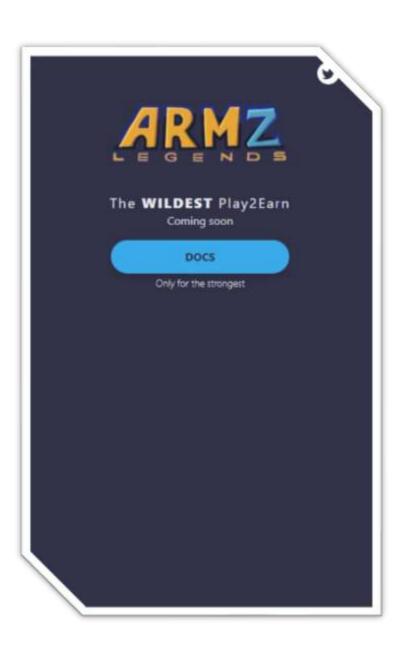

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

# Website Part 3 – Responsive HTML5 & CSS3

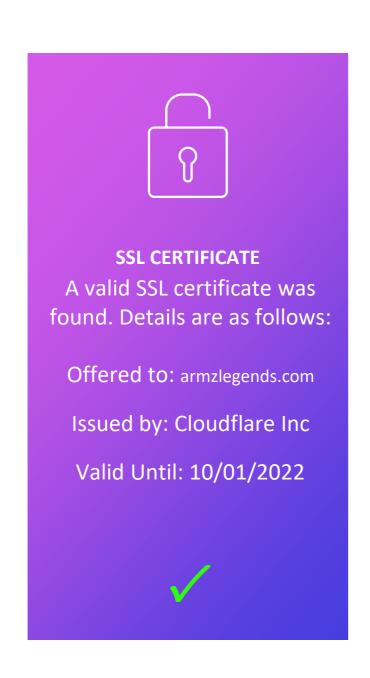

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

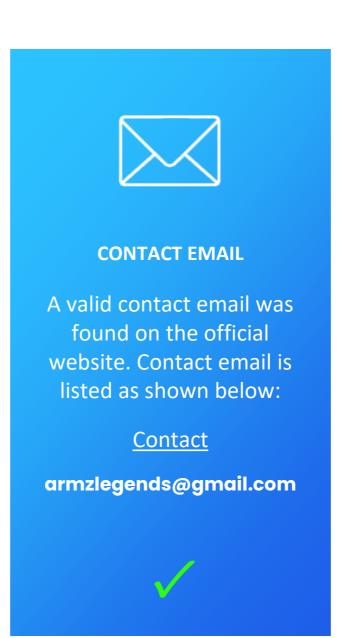

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.

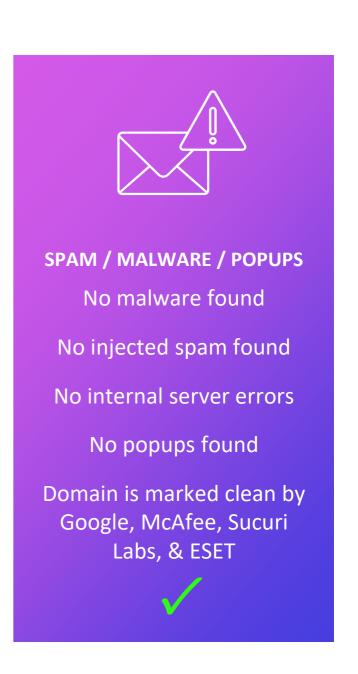

# Website Part 4 (GWS) - General Web Security

# **Social Media**

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

**X** At least 3 social media networks were found.

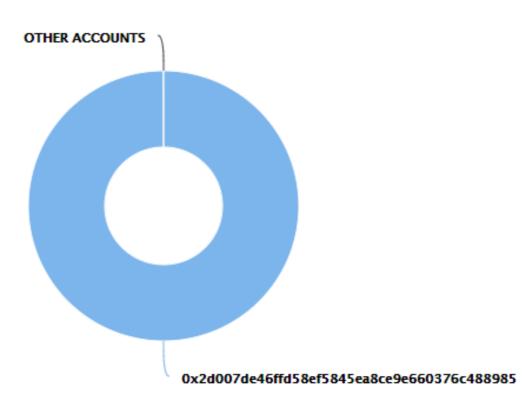

## **Top Token Holders**

The entire supply was in one wallet at the time of audit. We expect this to change as the project goes through initial distribution phases. Please use the link below to view the most up-to-date holder information.

# **Location Audit**

We were unable to identify a primary location for the project at this time or a location has not been declared.

## **Team Overview**

We were able to locate the following information about the projects team:

## William - CEO

Originally a developer, William has launched several successful companies as CEO, particularly in the mobile apps.

Passionate about blockchain and cryptos since 2012, he recently decided to marry his two passions to launch projects on blockchain.

Inveterate gamer, having invested and played all the latest games on BSC (CryptoBlades, CryptoZoon, MyDefiPet, ...), he gathered around him a team to design the game he would have liked to see: Innovative and intelligent tokenomics on a crazy game.

## Matteo - CTO

Matteo is the CTO of most of William's projects.

When William asked him to join him in this new adventure, he immediately said yes and took the lead on the Frontend and Blockchain parts.

## Max - CMO

He worked in the marketing department of this first travel company for 3 years.

A crypto investor since 2018, he was looking to get an opportunity to work on a game in blockchain.

He is looking forward to making ArmzLegends a huge success!

## Zachary - Web3 Developer

An experienced blockchain developer, he has worked on several Ethereum projects, mainly in NFT and DeFi.

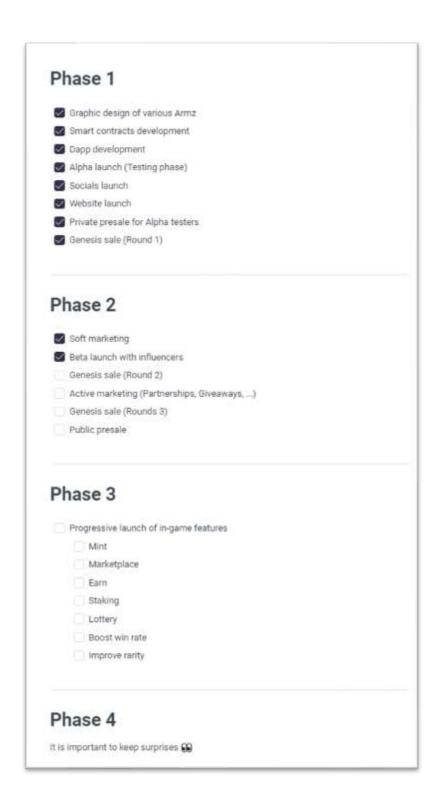

## Naoki - Artist

A talented draughtsman, without his pencil stroke, ArmzLegends would certainly not be as visually successful!

And it has not finished making us dream.

# Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

## Disclaimer

The opinions expressed in this document are for general informational purposes only and are not intended to provide specific advice or recommendations for any individual or on any specific investment. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.
