INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

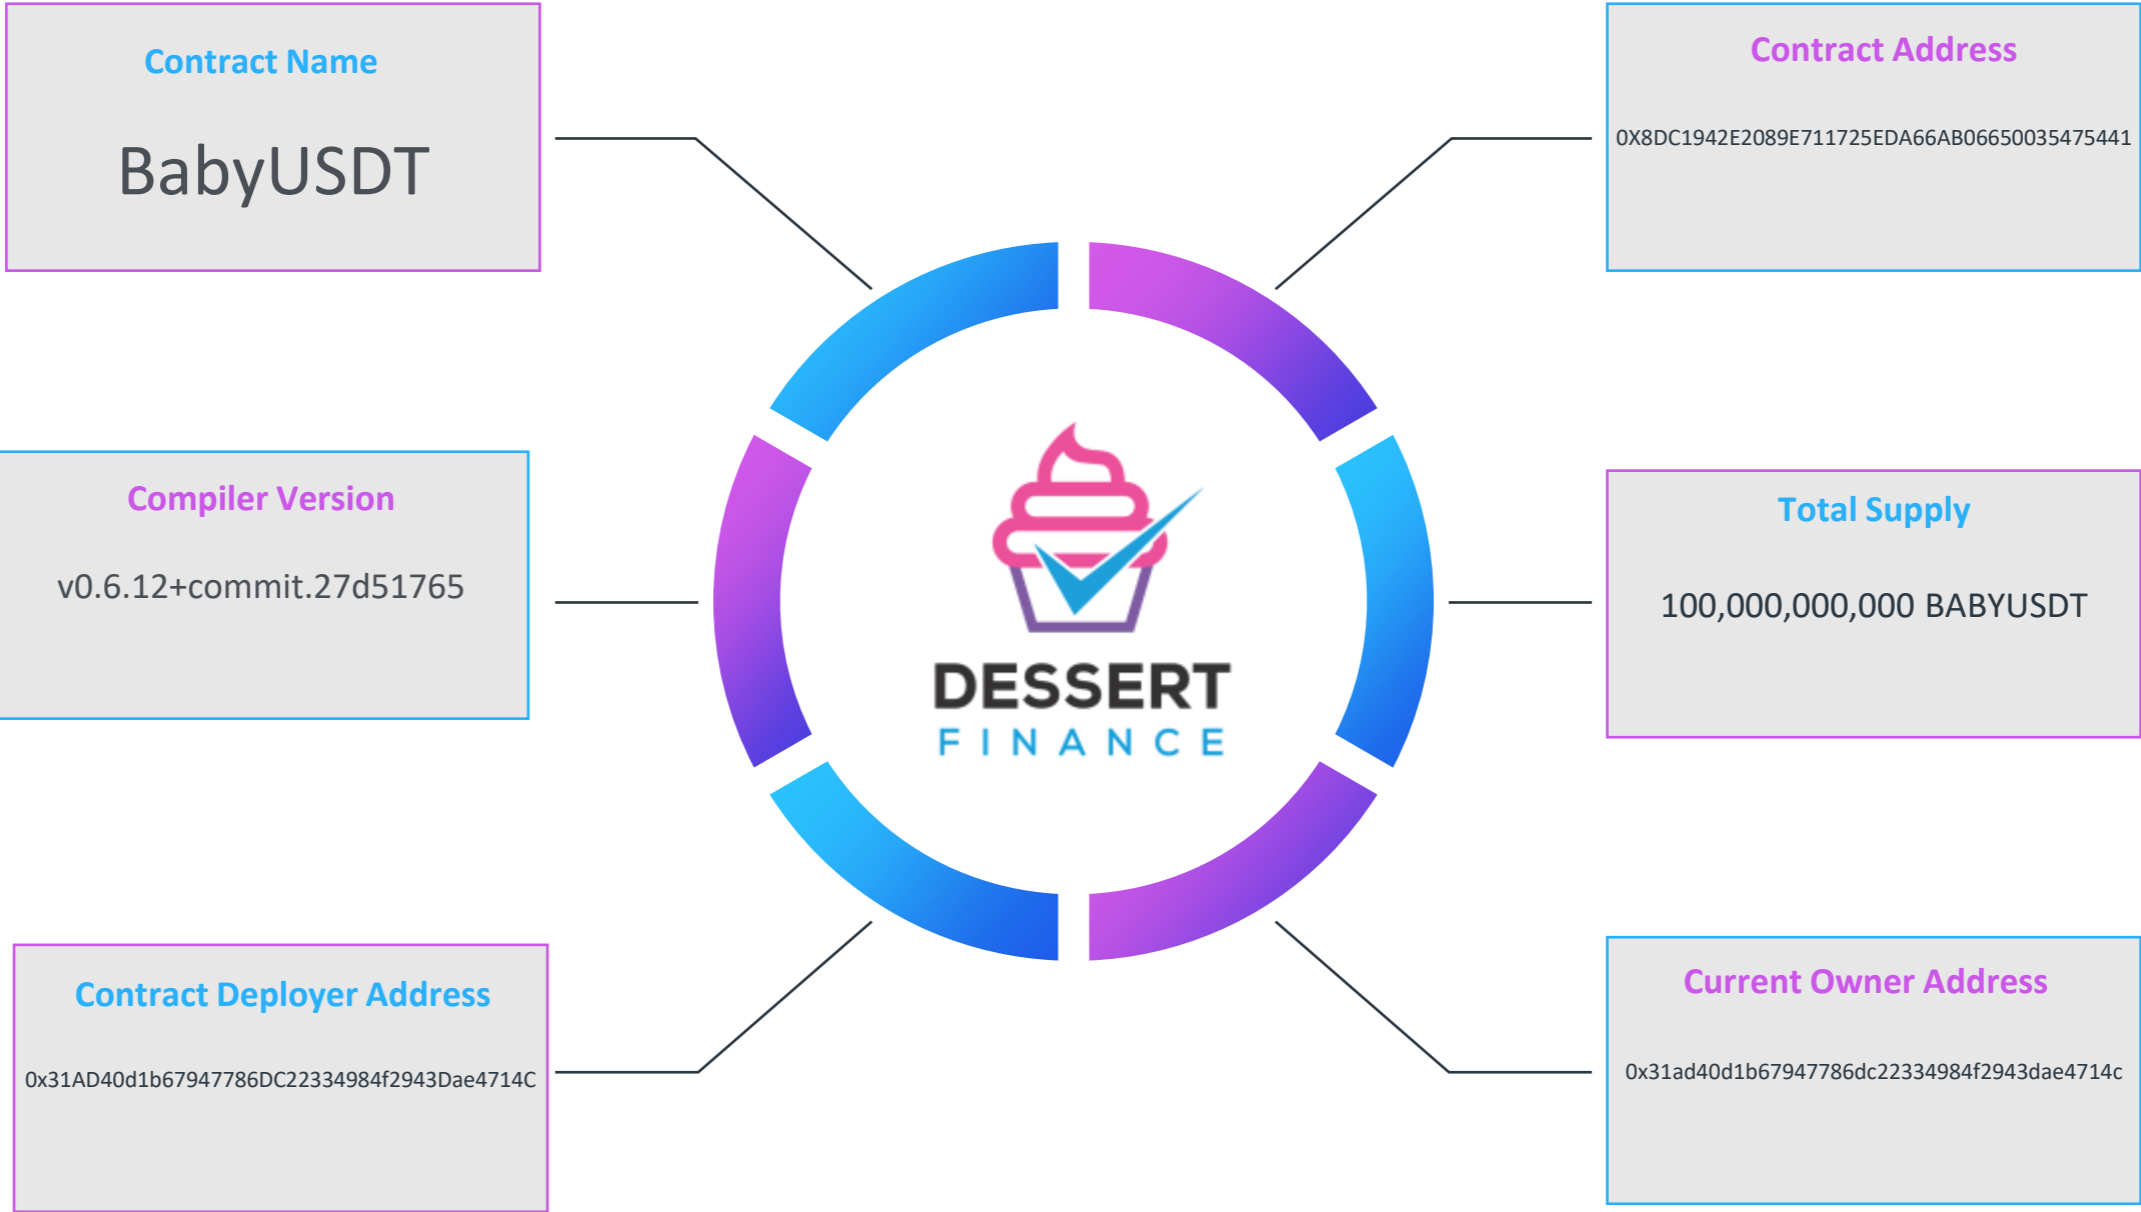

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Contract Code Audit – Mint Functions

This Contract Cannot Mint New BABYUSDT Tokens.

We do understand that sometimes mint functions are essential to the functionality of the project.

A mint function was not found in the contract code.

Contract Transaction Fees

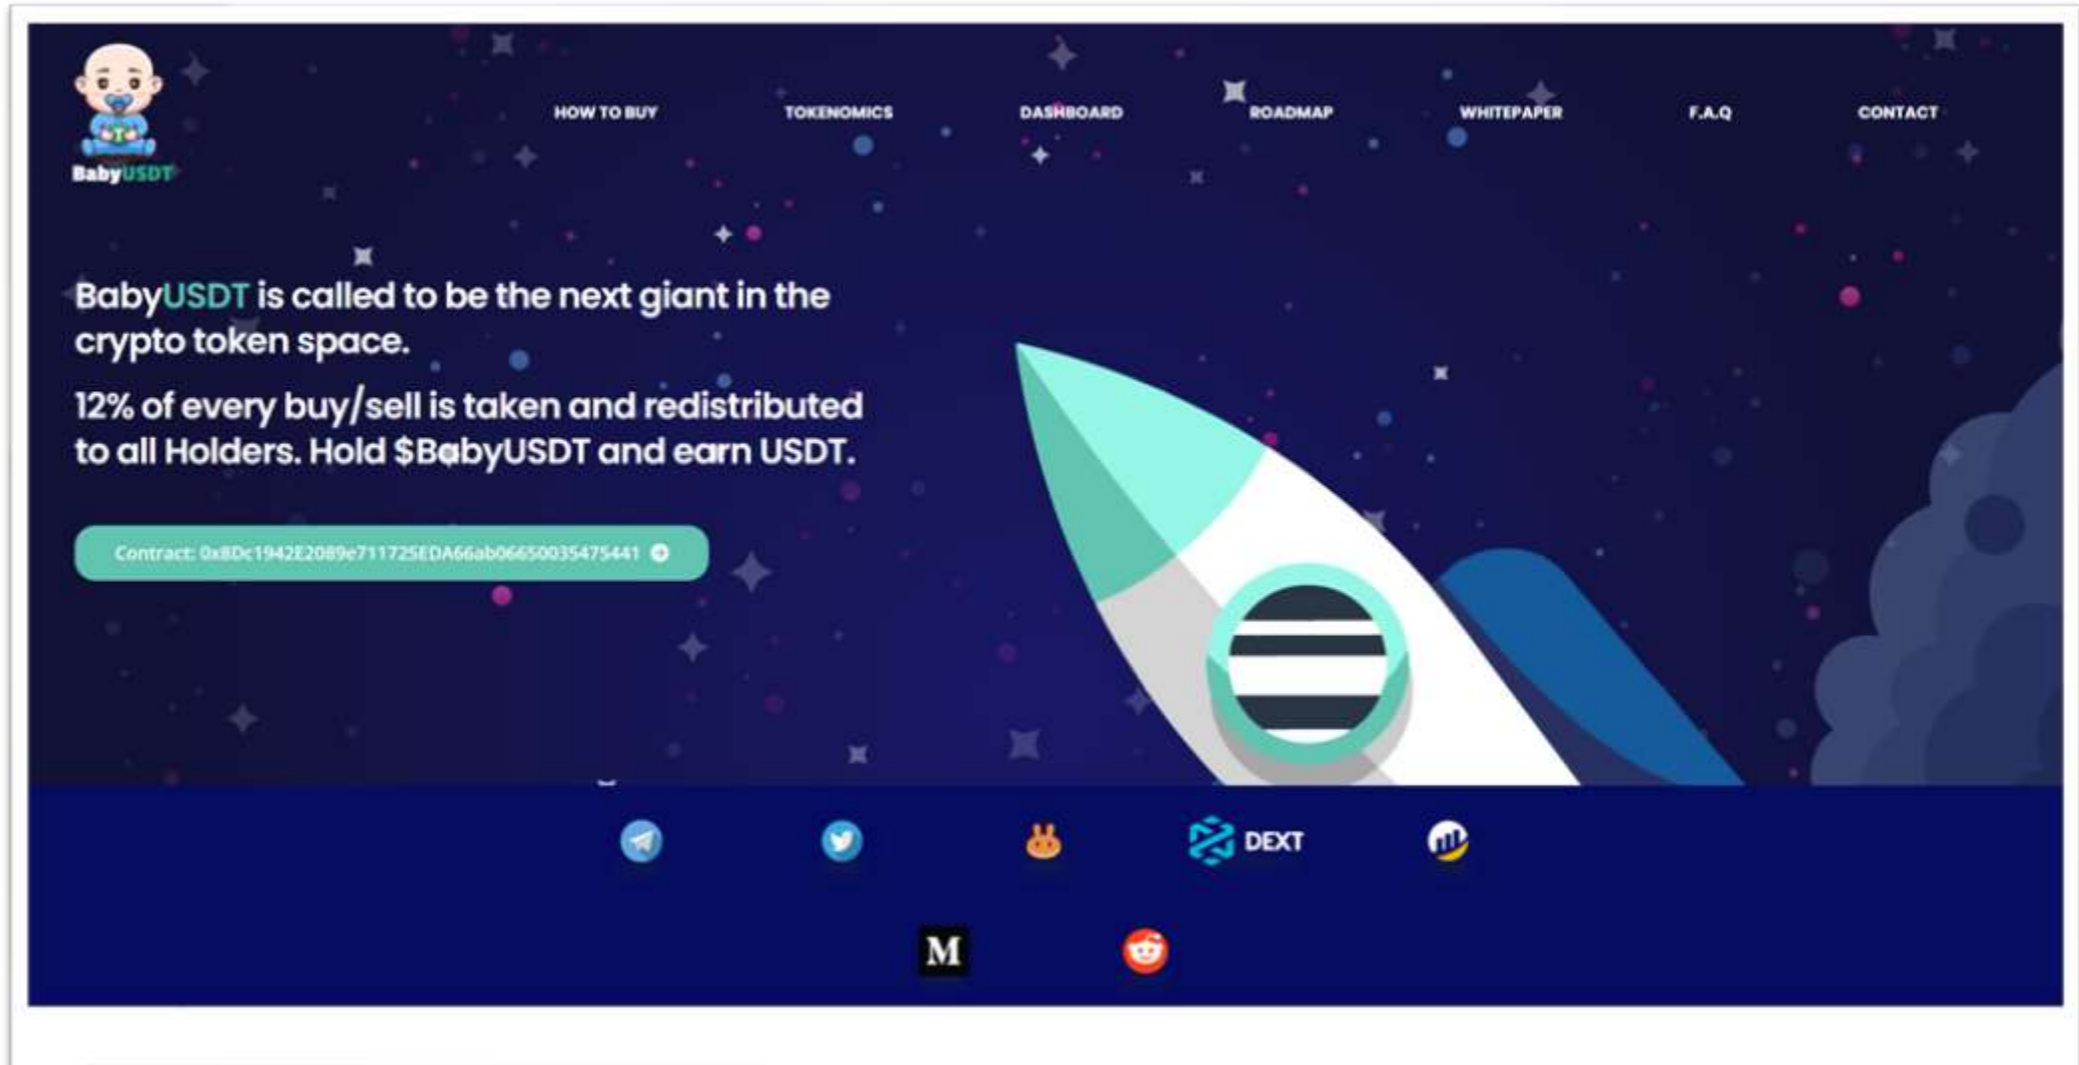

At the time of Audit the transaction fees (“tax”) listed below are the fees associated with trading. These fees are taken from every buy and sell transaction unless otherwise stated.

The infographic is set against a dark blue background with light blue and purple wavy patterns and small white star-like icons. Each category is represented by a circular icon at the top, followed by a title and a descriptive paragraph.

- 12% Redistribution In USDT** (Icon: Green circle with a white 'T'): 12% of every buy/sell is taken and redistributed to all holders. Hold \$BabyUSDT tokens, earn USDT. Minimum 200,000 tokens.
- Auto Paid Every 60 Minutes** (Icon: Blue circle with a white clock): You don't need to claim your earned USDT. It's automatically sent to your wallet every 60 minutes. Note: in periods of lower volume this may take longer, but you always get your USDT.
- 2% Auto Liquidity Pool** (Icon: Green circle with a white dollar sign and a coin): 2% of every transaction is transformed into liquidity for Pancakeswap. It's automatic and helps create a price floor (stability).
- 1% Sell Fee** (Icon: Yellow hand holding a coin with a dollar sign): Extra 1% fee is applied to all sells. This will allow us to reduce swing-trading and break whales' control.
- Secured By Design** (Icon: Yellow padlock with a green checkmark): Initial Liquidity Provided will be locked with DXLock. The contract will be audited by Certik.
- Massive Marketing Plan** (Icon: Blue smartphone with a lightbulb and a coin): 5% of every transaction is allocated to Marketing in USDT (swapped to USDT in real time to avoid dumps). So we can fuel the most ambitious projects and reward our active community.
