BEP-20 Audit

Performed at block 6489097

PERFORMED BY DESSERT FINANCE

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove liquidity (“Rug Pull”), sell off tokens, or completely exit scam. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Website Part 1 – Bingus Token

www.bingus.finance

Website Preview & Mobile Test

Above images are actual snapshots of the current live website of the project.

Website was registered on 03/31/2021, registration expires 03/31/2022.

This is a possible flag. We generally like to see registrations for 3 years minimum for the longevity commitment of a team to a project. We would like to see this updated in the near future.

Website Part 2 – Checklist

www.bingus.finance

- ✓ Responsive
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

The website contained no JavaScript errors, typos, or grammatical errors and we found a valid SSL certificate allowing for access via https.

No issues were found on the website.

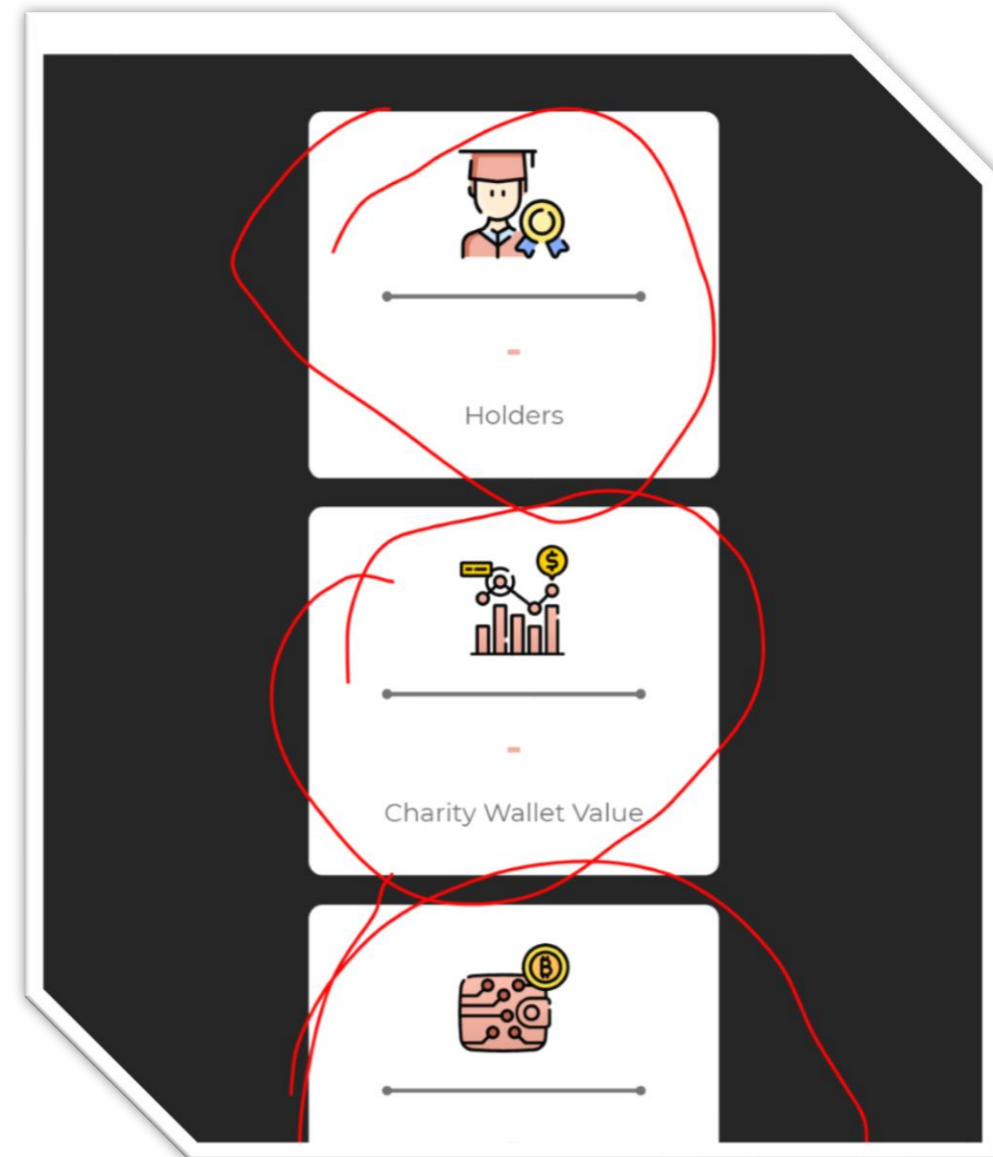

Website Part 3 – Responsive HTML5 & CSS3

www.bingus.finance

No issues were found on the responsive check for the website. All elements loaded properly and browser resize was not an issue. Bingus Token has put a considerable amount of thought and effort into making sure their website looks great on all screens.

We did encounter a minor issue where numerical values were not being loaded properly in some of the analytics elements as shown to the right.

Console check for any severe JavaScript errors came back clean. No issues with loading elements, code, or stylesheets.

Social Media – Final Thoughts & Suggestions for Improvement

Overall the team seems to be active across multiple social media platforms. We found a healthy amount of activity on Twitter, Reddit, and Telegram.

The team appears to be regularly conducting AMAs on discord, providing for healthy interaction with supporters.

The team appears to be donating money to multiple charities. While we have no reason to believe that the funds are being misused at the moment, in the future we would like to see a proof of origination of donation from one of the charities the project has donated to for further evidence of the flow of charitable contributions.

Suggestions for Improvement

1. Consider hotlinking QR codes on homepage to direct links for proof of donations so it does not have to be scanned.
2. Consider adding a Bingus Token Facebook page
3. Consider reaching out to charities that were donated to for a document detailing confirmation of funds via BTC. This will add to community trust.

Top Token Holders

At the block number indicated on the cover page of this report, 5% of the supply appears to be burned. The largest holder is the PancakeSwap liquidity pool,

The top token holders at the time of the audit are shown as above.

Location Audit

The project location could not be identified at this time based on the information provided on the website or social media channels.

Team Overview

While there is no overview of the team posted at the moment, we were able to confirm that MJ, one of the founders of the team has done a face reveal and continues to post his face publicly on AMAs in discord.

This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.
