

DESSERT
FINANCE

BOOBY TRAP (\$BBT)

BEP-20 Audit

Performed at block **14969785**

PERFORMED BY DESSERT FINANCE
FOR CONTRACT ADDRESS: **0x609b88f5a4aBB7A55bA0c6d255C3F1b1bC7A4D76**

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to an audit in no way guarantees that a team will not remove ***all*** liquidity (“Rug Pull”), remove liquidity slowly, sell off tokens, quit the project, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice. Dessert Finance does not endorse, recommend, support, or suggest any projects that have been audited. An audit is an informational report based on our findings, We recommend you do your own research, we will never endorse any project to invest in.

DessertDoxxed

DessertDoxxed is a service offered by Dessert Finance that allows projects to do a private face reveal matched with an I.D to allow founders / team members to privately Doxx themselves to Dessert Finance.

TokenTracker

BOOBY TRAP (\$BBT)

Contract Creator

0x2f0121c035a863a5de73f9db72ec7c4fbb46881b

Source Code

Contract Source Code Verified

Contract Name

BoobyTrap

Other Settings

default evmVersion, MIT

Compiler Version

v0.8.11+commit.d7f03943

Optimization Enabled

Yes with 200 runs

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on BSCScan.

BEP-20 Contract Code Audit – Vulnerabilities Checked

Vulnerability Tested	AI Scan	Human Review	Result
Compiler Errors	Complete	Complete	✓ Low / No Risk
Outdated Compiler Version	Complete	Complete	✓ Low / No Risk
Integer Overflow	Complete	Complete	✓ Low / No Risk
Integer Underflow	Complete	Complete	✓ Low / No Risk
Correct Token Standards Implementation	Complete	Complete	✓ Low / No Risk
Timestamp Dependency for Crucial Functions	Complete	Complete	✓ Low / No Risk
Exposed _Transfer Function	Complete	Complete	✓ Low / No Risk
Transaction-Ordering Dependency	Complete	Complete	✓ Low / No Risk
Unchecked Call Return Variable	Complete	Complete	✓ Low / No Risk
Use of Deprecated Functions	Complete	Complete	✓ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
State Variable Default Visibility	Complete	Complete	✓ Low / No Risk
Deployer Can Access User Funds	Complete	Complete	✓ Low / No Risk

The contract code is **verified** on BSCScan.

The vulnerabilities listed above were not found in the token's Smart Contract.

Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

[0x2f0121c035a863a5de73f9db72ec7c4fbb46881b](https://etherscan.io/address/0x2f0121c035a863a5de73f9db72ec7c4fbb46881b)

The address above has authority over the ownable functions within the contract.

This allows the owner to call certain functions within the contract. Any compromise to the owner wallet may allow these privileges to be exploited.

We recommend:

- Establishing a Time-Lock with reasonable latency
- Assignment of privileged roles to multi-signature wallets

Contract Code Audit – Owner Accessible Functions

Function Name	Parameters	Visibility	Audit Notes
setMoveBnbToWallets	bool state	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromReward	address account	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
includeInReward	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromFee	address account	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
includeInFee	address account	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setSwap	bool liq, bool swap	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setReflectionFee	uint buy, uint sell	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced. No Limiter in Place. Can be set to 100.
setBuybackFee	uint buy, uint sell	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced. No Limiter in Place. Can be set to 100.
setLiquidityFee	uint buy, uint sell	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced. No Limiter in Place. Can be set to 100.
setMarketingFee	uint buy, uint sell	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced. No Limiter in Place. Can be set to 100.
setMaxTxPercent	uint buy, uint sell	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
transferForeignToken	address _token, address _to, uint _value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
Sweep		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
withdrawExcessBNB	address _account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
MarketActive	bool _state	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.

The functions listed above can be called by the contract owner.

If contract ownership has been renounced there is no way for the above listed functions to be called.

Contract Code Audit – Owner Accessible Functions

Function Name	Parameters	Visibility	Audit Notes
BlockMultiBuys	bool _state	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
LimitSells	bool _state	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced. Owner can set max sell limit
LimitBuys	bool _state	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced. Owner can set max buy limit
setmarketingAddress	address _value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setbuybackAddress	address _value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setMaxSellTxAmount	uint _value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setMaxBuyTxAmount	uint _value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setSwapAndLiquify	bool _state, uint _minimumTokensBeforeSw ap	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
editPremarketUser	address _target, bool _status	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced. Owner can whitelist users who are allowed to trade before trading is enabled.
editExcludedFromFees	address _target, bool _status	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
editAutomatedMarketMakerP airs	address _target, bool _status	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
renounceOwnership		public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
transferOwnership	address newOwner	public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.

The functions listed above can be called by the contract owner.

If contract ownership has been renounced there is no way for the above listed functions to be called.

Liquidity Ownership – Locked / Unlocked

No locked liquidity information has been found.

This page will contain links to locked liquidity for the project if we are able to locate that information. Locked liquidity information was not found on the project's website.

Contract Code Audit – Mint Functions

This Contract Cannot Mint New BBT Tokens.

We do understand that sometimes mint functions are essential to the functionality of the project.

A mint function was not found in the contract code.

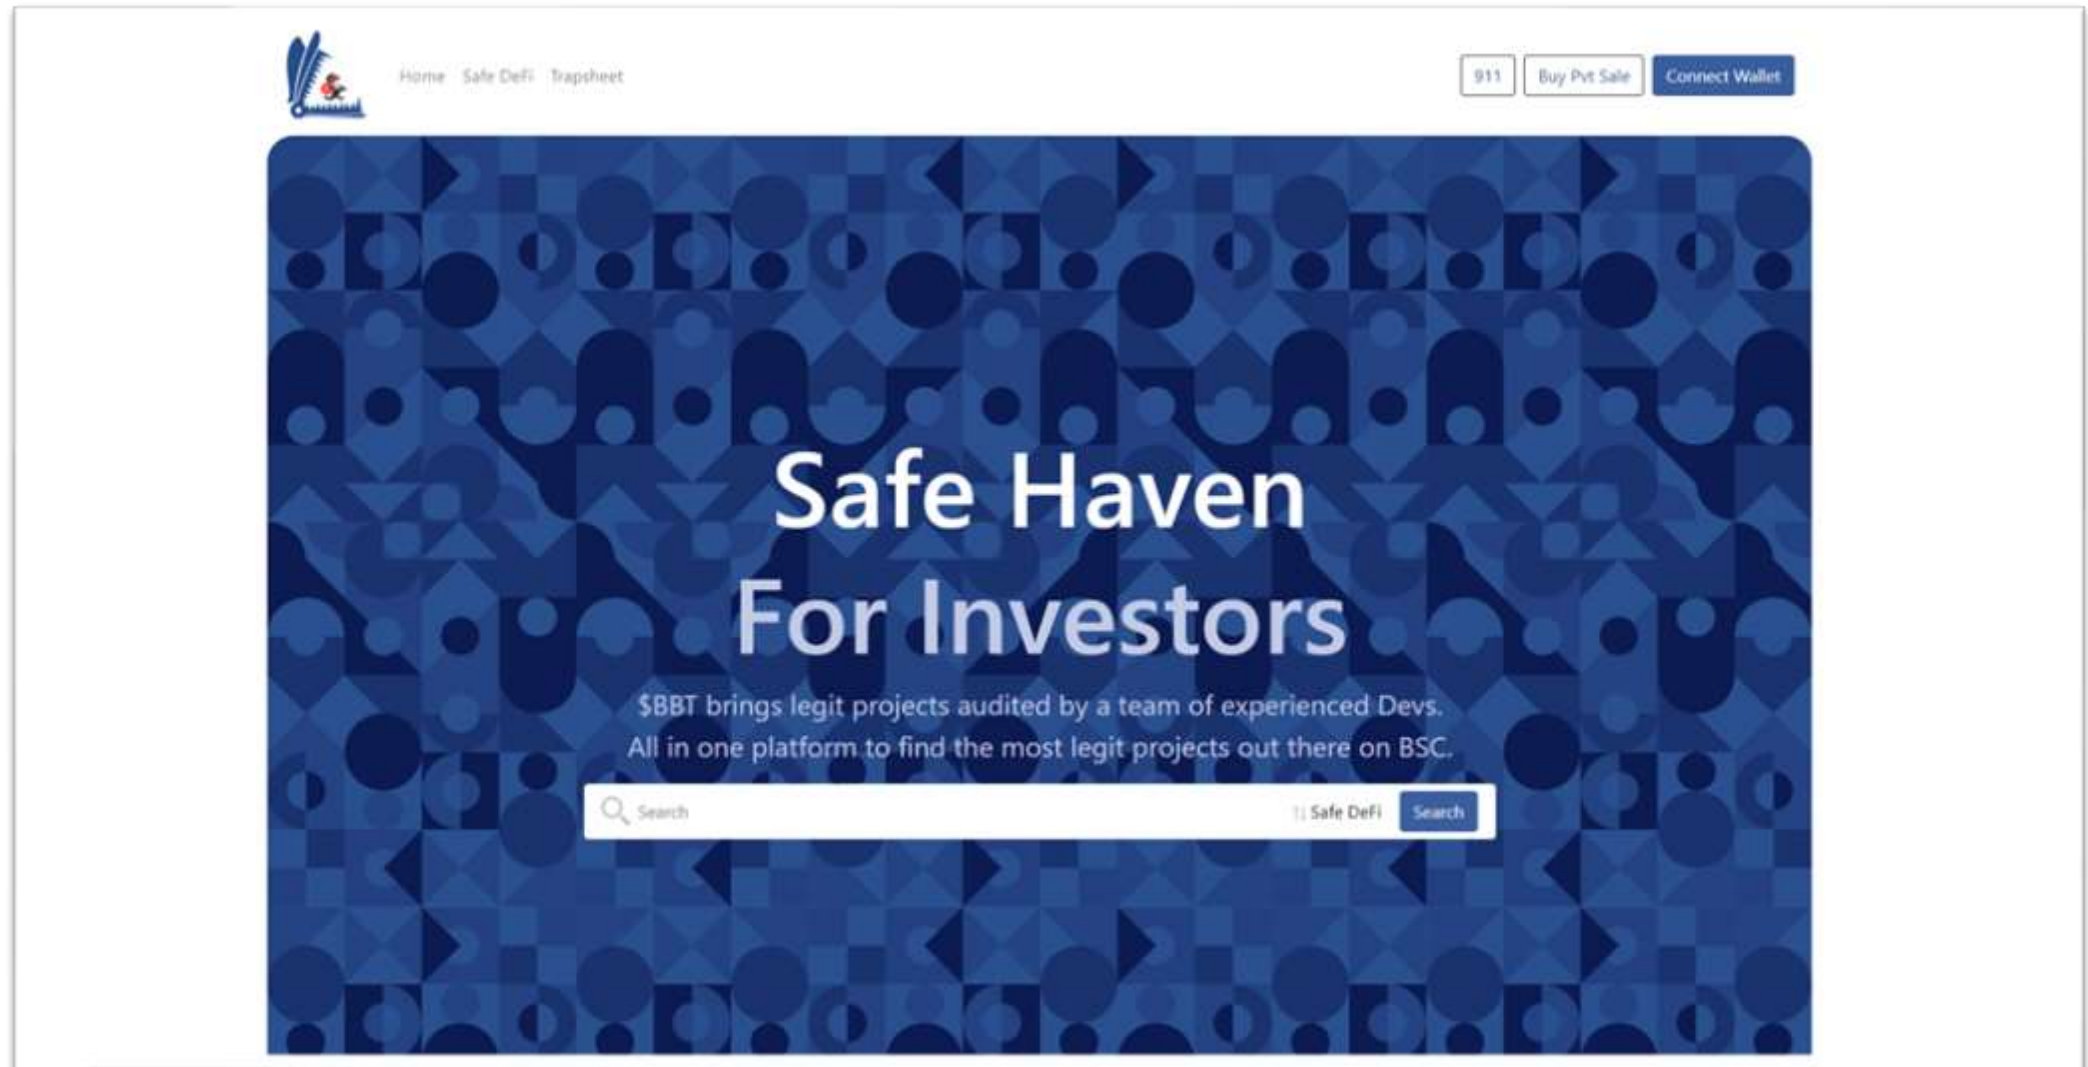

Contract Transaction Fees

At the time of Audit the transaction fees (“tax”) listed below are the fees associated with trading. These fees are taken from every buy and sell transaction unless otherwise stated.

Website Part 1 – Overview

www.boobytrap.live

Above images are actual snapshots of the current live website of the project.

Website was registered on 11/23/2021, registration expires 11/23/2022.

X This does not meet the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

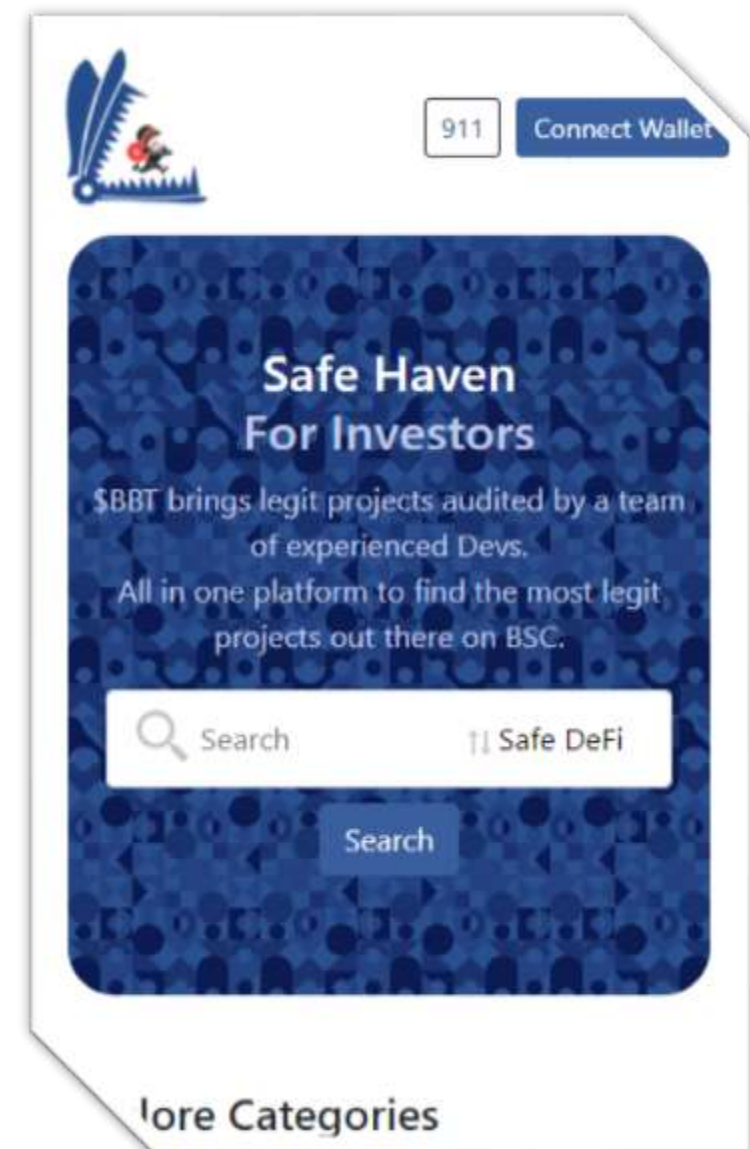

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: boobytrap.live

Issued by: Sectigo RSA

Valid Until: 11/23/2022

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

[Contact](mailto:info@boobytrap.live)

info@boobytrap.live

SPAM / MALWARE / POPUPS

No malware found

No injected spam found

No internal server errors

No popups found

Domain is marked clean by Google, McAfee, Sucuri Labs, & ESET

Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

[Twitter](#)

[Telegram](#)

[Instagram](#)

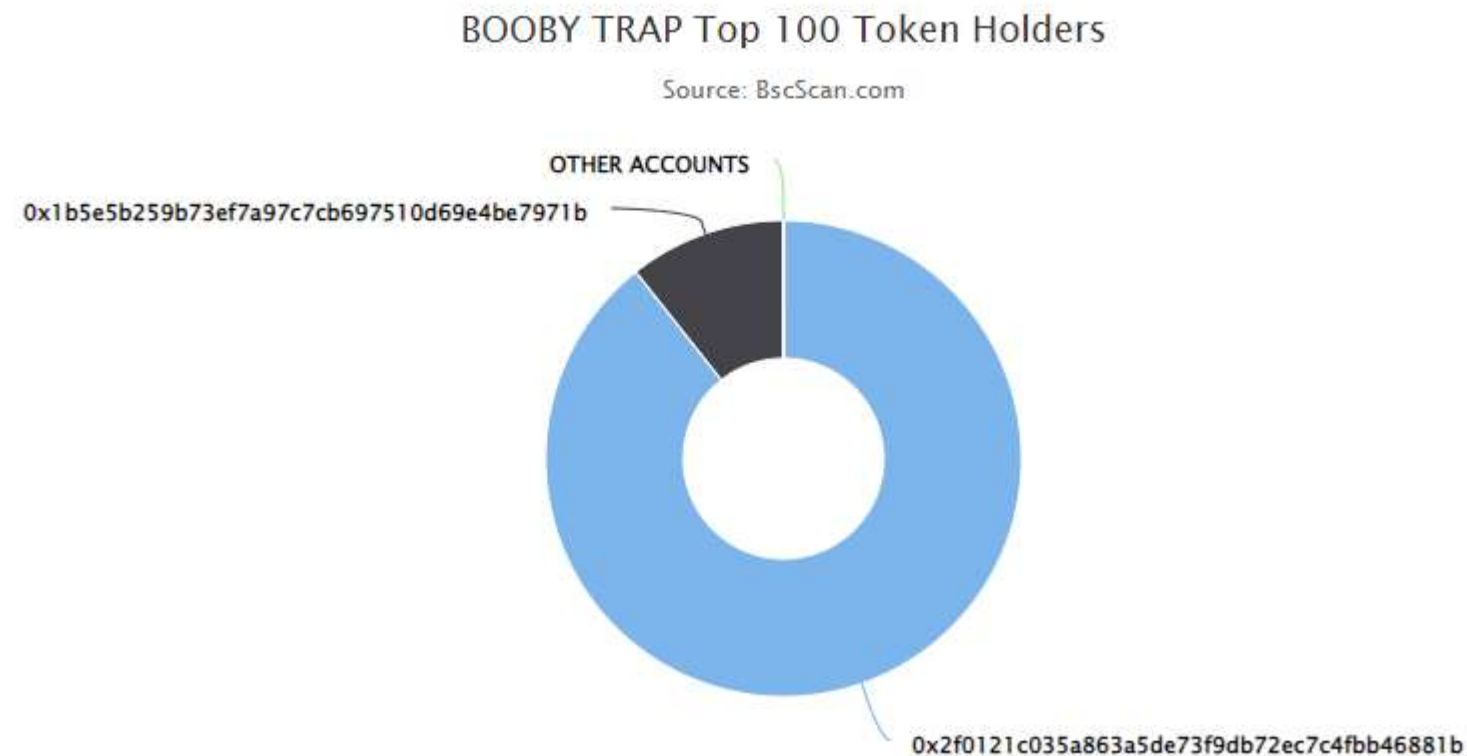

[TikTok](#)

✓ At least 3 social media networks were found.

Top Token Holders

The entire supply was in two wallets at the time of audit. We expect this to change as the project goes through initial distribution phases. Please use the link below to view the most up-to-date holder information.

[Click here to view the most up-to-date list of holders](#)

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.

Team Overview

Fully Doxxed & KYC'ed team

\$BBT believes in keeping DeFi transparent, hence our team members have been KYC'ed with Dessert Finance

KYC Info

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You
