INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove all liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for the project. Social Media channels included Twitter, Telegram, Instagram and Reddit . All social media channels had a healthy amount of activity.

It is important to note that there is an 9% tax on EVERY transaction including buys and sells. 3% goes to providing liquidity, 3% is distributed to the token holders and 3% is distributed to the team for marketing.

Dessert Finance appreciates projects that self identify as meme coins without the need to solve a greater purpose as long as it is clearly stated as in the case with Daddy Doge.

Suggestions for Improvement

1. Consider adding links on the homepage to liquidity lock transactions/evidence **✓ Resolved** [DxSale Link](#)
