FINANCE

Devious Licks Gold (dGOLD)

BEP-20 Audit

Performed at block **14663023**

PERFORMED BY DESSERT FINANCE
FOR CONTRACT ADDRESS: **0x9e545b66AfAd4836656601B0A6C6C4508B33e2c4**

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to an audit in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), remove liquidity slowly, sell off tokens, quit the project, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

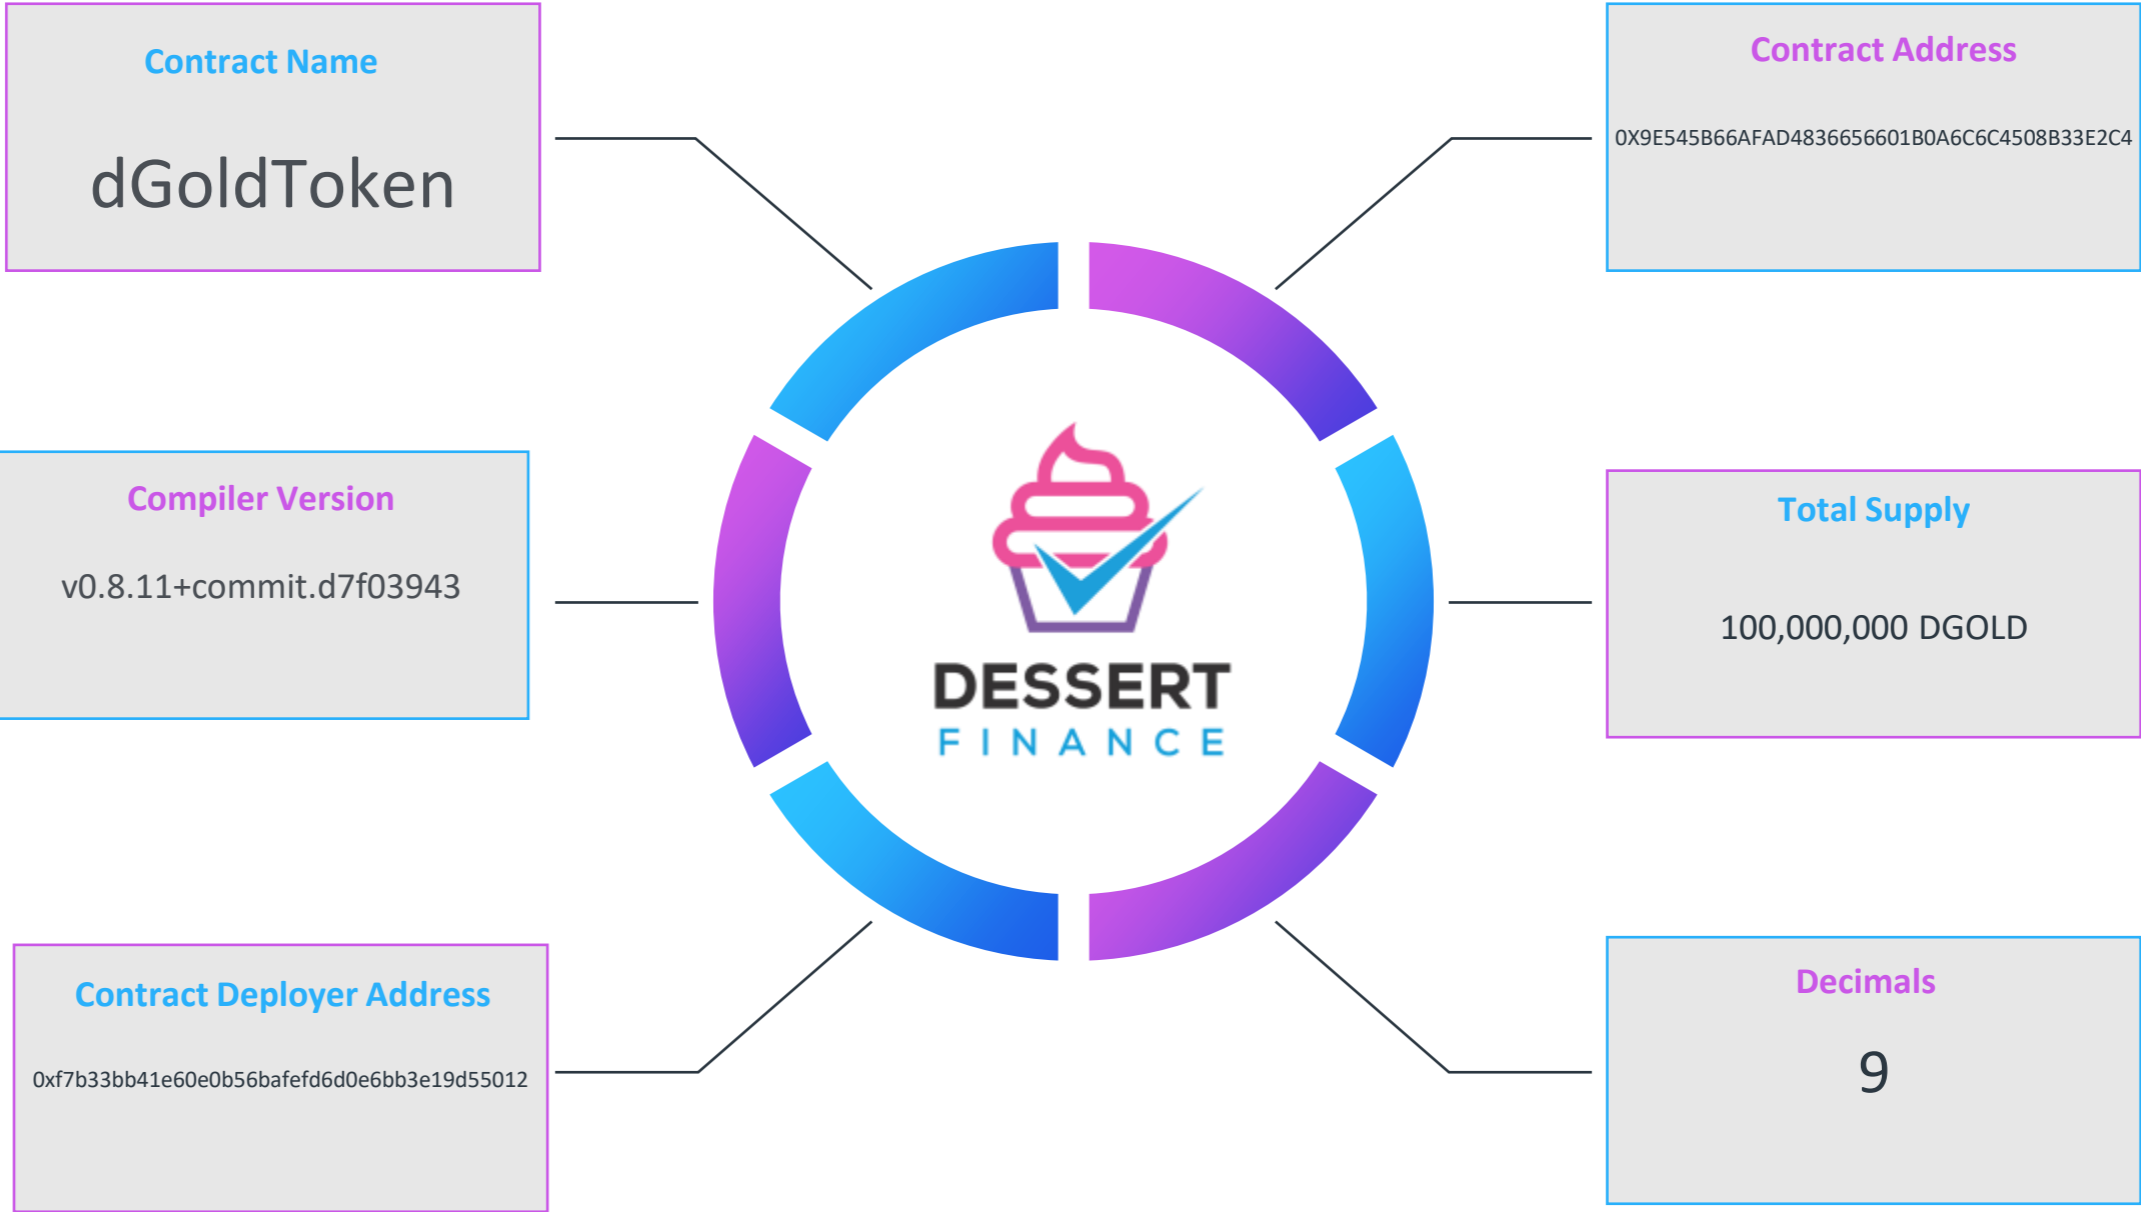

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice. Dessert Finance does not endorse, recommend, support, or suggest any projects that have been audited. An audit is an informational report based on our findings, We recommend you do your own research, we will never endorse any project to invest in.

// File: @openzeppelin/contracts/utils/structs/EnumerableSet.sol
// @openzeppelin/contracts v4.3.1 (@openzeppelin/contracts)
pragma solidity ^0.8.0;

/**
 * @dev Library for managing
 * https://en.wikipedia.org/wiki/Set_(abstract_data_type){sets} of primitive
 * types.
 * Sets have the following properties:
 * - Elements are added, removed, and checked for existence in constant time
 * (O(1)).
 * - Elements are enumerated in O(n). No guarantees are made on the ordering.
 *
 * ..
 * contract Example {
 *   // Add the library methods
 *   using EnumerableSet for EnumerableSet.AddressSet;
 *   // Declare a set state variable
 *   EnumerableSet.AddressSet private mySet;
 * }
 * ..
 * As of v1.3.0, sets of type 'bytes32' ('bytes256'), 'address' ('AddressSet')
 * and 'uint256' ('UintSet') are supported.
 */
library EnumerableSet {
    // To implement this library for multiple types with as little code
    // repetition as possible, we write it in terms of a generic set type with
    // bytes32 values.
    // The Set implementation uses private functions, and user-facing
    // implementations (such as AddressSet) are just wrappers around the
    // underlying Set.
    // This means that we can only create new EnumerableSets for types that fit
    // in bytes32.

    struct Set {
        // Storage of set values
        bytes32[] _values;
        // Position of the value in the 'values' array, plus 1 because index 0
        // means a value is not in the set.
        mapping(bytes32 => uint256) _indexes;
    }
}
```

Other Settings

default evmVersion, MIT

Compiler Version

v0.8.11+commit.d7f03943

Optimization Enabled

Yes with 200 runs

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on BSCScan.

BEP-20 Contract Code Audit – Vulnerabilities Checked

Vulnerability Tested	AI Scan	Human Review	Result
Compiler Errors	Complete	Complete	✓ Low / No Risk
Outdated Compiler Version	Complete	Complete	✓ Low / No Risk
Integer Overflow	Complete	Complete	✓ Low / No Risk
Integer Underflow	Complete	Complete	✓ Low / No Risk
Correct Token Standards Implementation	Complete	Complete	✓ Low / No Risk
Timestamp Dependency for Crucial Functions	Complete	Complete	✓ Low / No Risk
Exposed _Transfer Function	Complete	Complete	✓ Low / No Risk
Transaction-Ordering Dependency	Complete	Complete	✓ Low / No Risk
Unchecked Call Return Variable	Complete	Complete	✓ Low / No Risk
Use of Deprecated Functions	Complete	Complete	✓ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
State Variable Default Visibility (x5)	Complete	Complete	✓ Low Risk
Deployer Can Access User Funds	Complete	Complete	✓ Low / No Risk

The contract code is verified on BSCScan.

The vulnerabilities listed above were not found in the token's Smart Contract.

Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

[0xf7b33bb41e60e0b56bafefd6d0e6bb3e19d55012](https://www.etherbase.net/etherbase/address/0xf7b33bb41e60e0b56bafefd6d0e6bb3e19d55012)

The address above has authority over the ownable functions within the contract.

This allows the owner to call certain functions within the contract. Any compromise to the owner wallet may allow these privileges to be exploited.

We recommend:

- Establishing a Time-Lock with reasonable latency
- Assignment of privileged roles to multi-signature wallets

Contract Code Audit – Owner Accessible Functions

Function Name	Parameters	Visibility	Audit Notes
clearRewardAccounts		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setRewardAccount	address account, uint percent, bool isBuying	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setswapThreshold	uint256 amount, bool isBuying	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setExpireAccountForTax	address account, bool isBuying	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
burnTokens	uint256 amount	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setreflectExempt	address account, bool value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
removeHolder	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setTaxExempt	address account, bool isExempt	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setTxLimitExemptAddress	address account, bool isTxExempt	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
switchTax	bool _v	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
_enableTxLimit	bool _v	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
withdraw		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
renounceOwnership		public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
transferOwnership	address newOwner	public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
lock	uint256 time	public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.

The functions listed above can be called by the contract owner.

If contract ownership has been renounced there is no way for the above listed functions to be called.

Liquidity Ownership – Locked / Unlocked

No locked liquidity information has been found.

This page will contain links to locked liquidity for the project if we are able to locate that information. Locked liquidity information was not found on the project's website.

Contract Code Audit – Mint Functions

This Contract Cannot Mint New dGOLD Tokens.

We do understand that sometimes mint functions are essential to the functionality of the project.

A mint function was not found in the contract code.

Contract Transaction Fees

At the time of Audit the transaction fees (“tax”) listed below are the fees associated with trading. These fees are taken from every buy and sell transaction unless otherwise stated.

5% Tax on buys and transfers:

- 2% to Holders
- 0.5% to Marketing
- 0.5% to Staking Pool
- 2% **BURN**

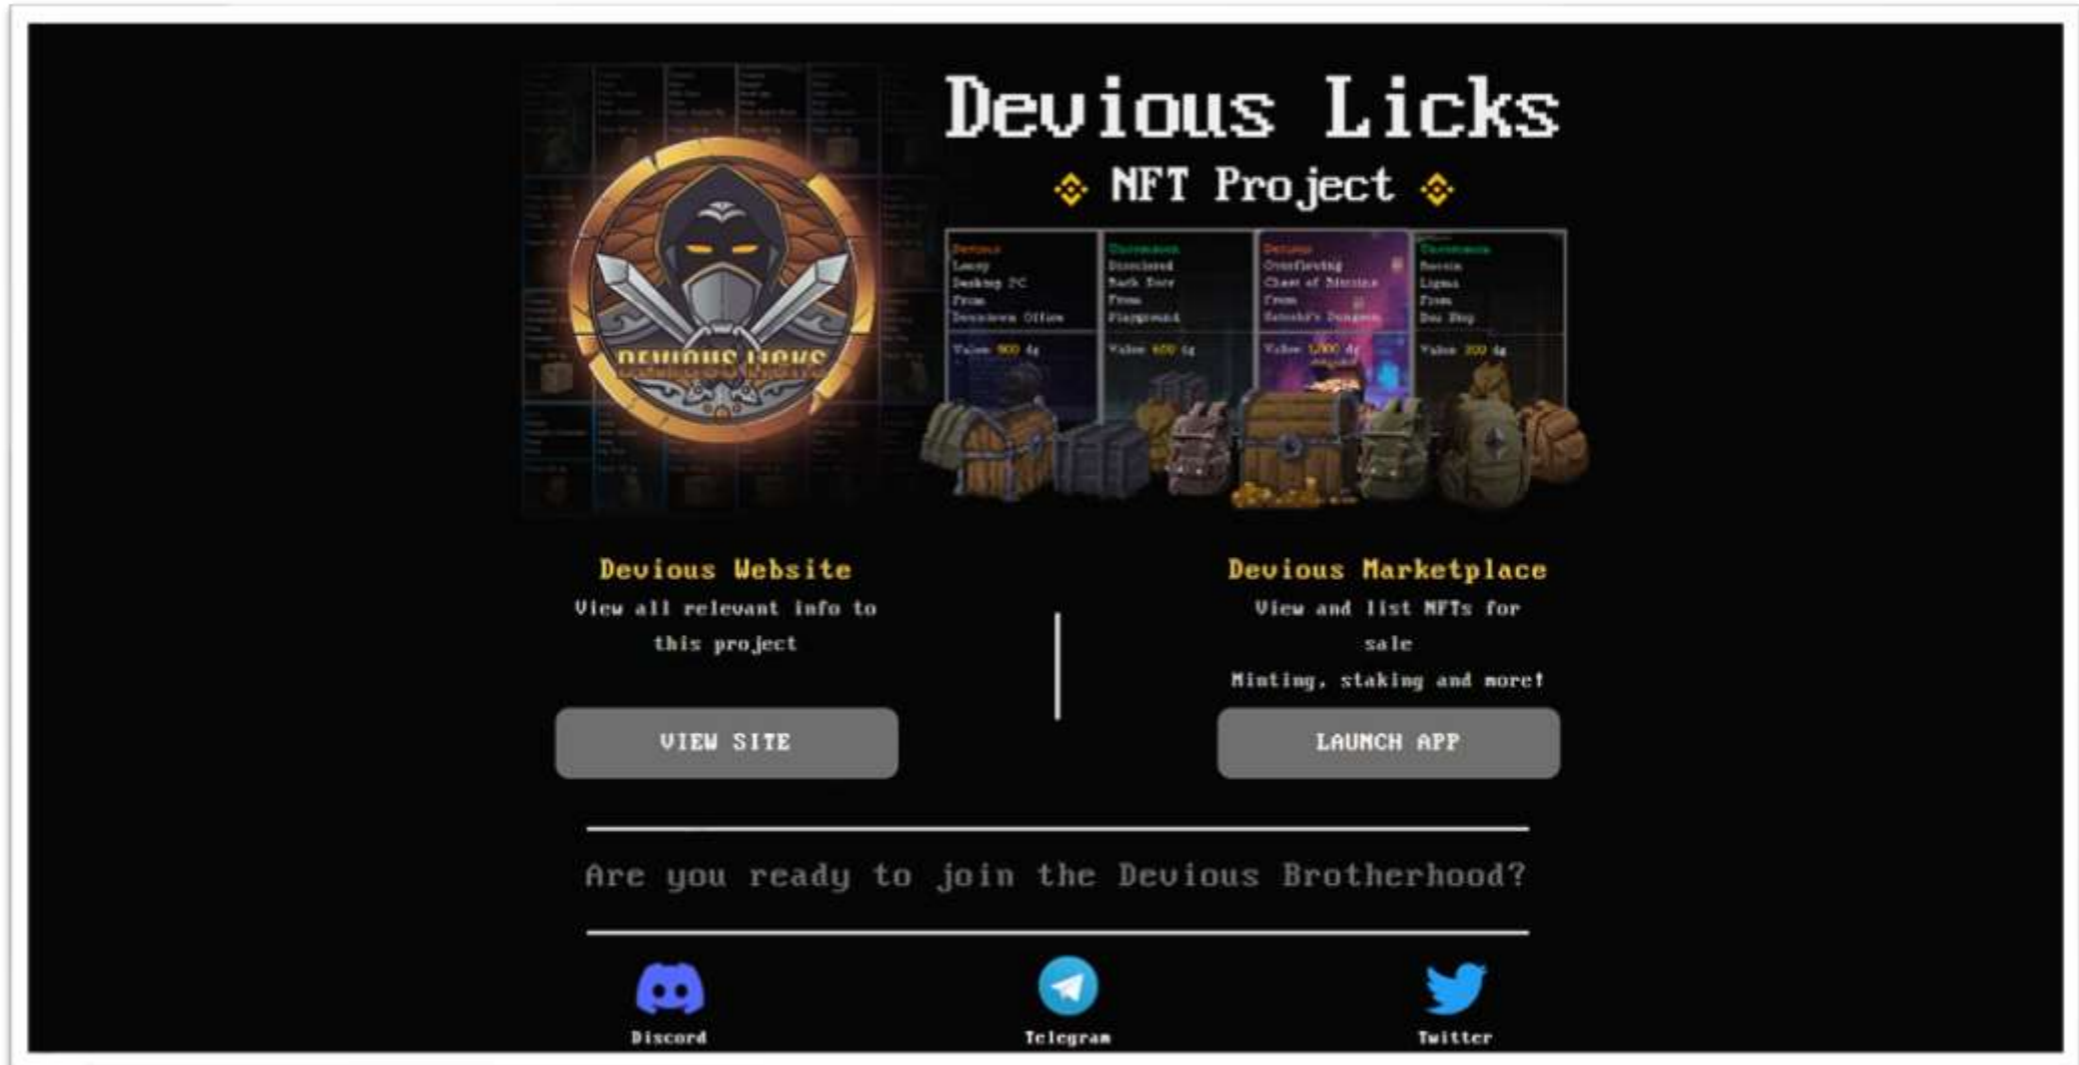

15% Tax on sells:

- 5% to Liquidity
- 6% to Holders
- 0.5% to Marketing
- 1.5% to Staking Pool
- 2% **BURN**

Website Part 1 – Overview

www.deviouslicks.io

Above images are actual snapshots of the current live website of the project.

Website was registered on 09/15/2021, registration expires 09/15/2022.

X This does not meet the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

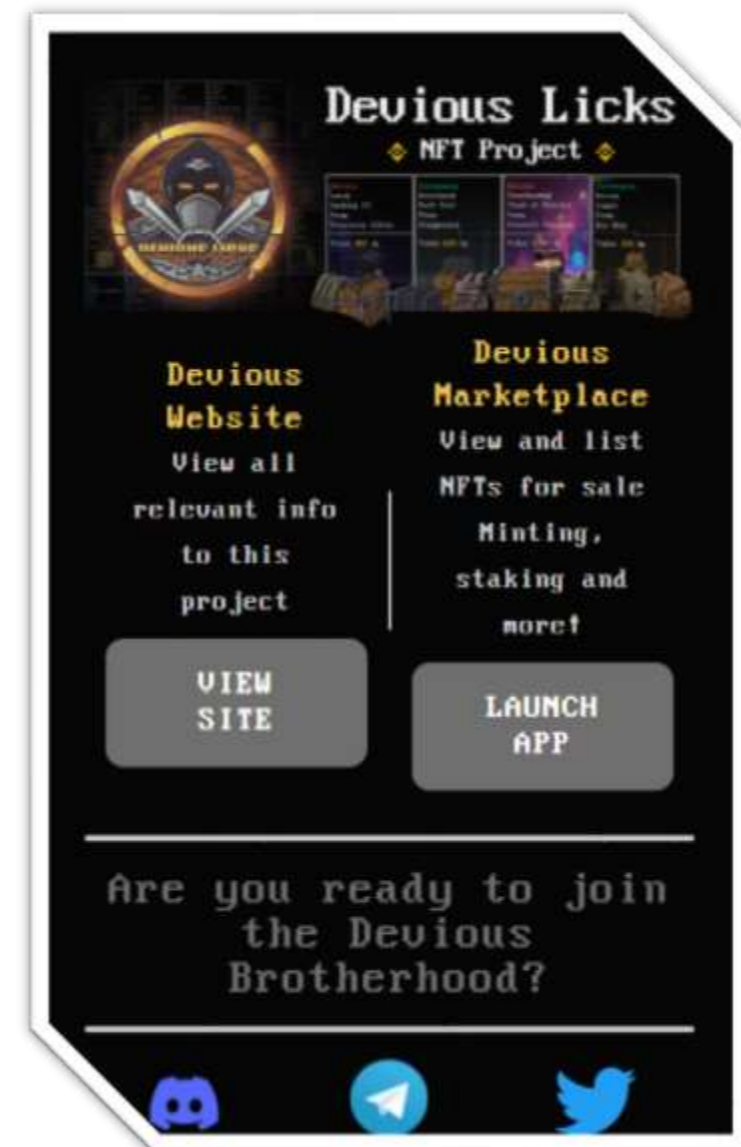

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: deviouslicks.io

Issued by: cPanel

Valid Until: 03/10/2022

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

[Contact](mailto:info@deviouslicks.io)

info@deviouslicks.io

SPAM / MALWARE / POPUPS

No malware found

No injected spam found

No internal server errors

No popups found

Domain is marked clean by Google, McAfee, Sucuri Labs, & ESET

Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

[Twitter](#)

[Telegram](#)

[Discord](#)

✓ **At least 3 social media networks were found.**

Top Token Holders

The entire supply was in one wallet at the time of audit. We expect this to change as the project goes through initial distribution phases. Please use the link below to view the most up-to-date holder information.

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.

Team Overview

We were able to find the following information about the team on the project's website.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

The screenshot shows a roadmap for NFTs, divided into two main sections: Tier 1 (Q4 2021) and Tier 2 (Early 2022).

Tier 1 - Q4 2021

- Launch our tier 1 NFTs with a presale for whitelisted members followed by a public sale.
- Reveal upon public sale

Public Sale:

- 10% Minted
- 25% Minted
- 50% Minted
- 75% Minted
- 100% Minted

--When 100% have been minted--

- We will host a giveaway for any of the 88 remaining team tokens.
- 10 Lucky minters will receive their BNB back!
- Giveaways for our community with over \$100k in prizes!

Common	Uncommon	Rare
Mint HR Manager From Cemetery	Ugly Floor Boards From Devoteva Office	Buzzin Catalytic Converters From City Bus
Value: 400 dg	Value: 250 dg	Value: 400 dg
		
Rare	Devoted	Common
Tarnished Case of Covid-19 From Demos Mansion	Overflowing Chest of Bitcoins From Satoshi's Dungeon	Shiny Box of RTX 3090s From Crypto Market HQ
Value: 750 dg	Value: 1,000 dg	Value: 250 dg
		

Tier 2 - Early 2022

dGold

The successful launch of our **dGold** token. Also included will be:

- Inhouse NFT Marketplace
- Members only web portal
- dGold airdrop and purchasing
- NFT staking for **dGold** and **Affinity**
- Secondary sales rewards to holders

Keep your Licks close, and hoard that dGold!

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You
