FINANCE

**EarnUsdt (\$EUS)**

**BEP-20 Audit**

Performed at block **16515419**

PERFORMED BY DESSERT FINANCE  
FOR CONTRACT ADDRESS: **0x746C00Fe541E947F4E0533665d6E783808826B53**

## INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to an audit in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), remove liquidity slowly, sell off tokens, quit the project, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice. Dessert Finance does not endorse, recommend, support, or suggest any projects that have been audited. An audit is an informational report based on our findings, We recommend you do your own research, we will never endorse any project to invest in.

# DessertDoxxed

DessertDoxxed is a KYC service offered by Dessert Finance that allows projects to do a private face reveal matched with an I.D to allow founders / team members to privately Doxx themselves to Dessert Finance. **3 team members have completed DessertDoxxed.**

# Contract Code Audit – Token Overview

# BEP-20 Contract Code Audit – Overview

Dessert Finance was commissioned to perform an audit on EarnUsdt (\$EUS)

```
contract Contract {
    function msgSender() internal view virtual returns (address) {
        return msg.sender;
    }

    function msgData() internal view virtual returns (bytes memory) {
        // !!!; // silence state mutability warning without generating bytecode - see https://github.com/ethereum/solidity/issues/2691
        return msg.data;
    }
}

interface IUniswapV2Pair {
    event Approval(
        address indexed owner,
        address indexed spender,
        uint256 value
    );
    event Transfer(address indexed from, address indexed to, uint256 value);

    function name() external pure returns (string memory);
    function symbol() external pure returns (string memory);
    function decimals() external pure returns (uint8);
    function totalSupply() external view returns (uint256);
    function balanceOf(address owner) external view returns (uint256);
    function allowance(address owner, address spender)
        external
        view
        returns (uint256);
    function approve(address spender, uint256 value) external returns (bool);
    function transfer(address to, uint256 value) external returns (bool);

    function transferFrom(
        address from,
        address to,
        uint256 value
    ) external returns (bool);

    function DOMAIN_SEPARATOR() external view returns (bytes32);
    function PERMIT_TYPEHASH() external pure returns (bytes32);
    function nonces(address owner) external view returns (uint256);

    function permit(
        address owner,
        address spender,
        uint256 value,
        uint256 deadline,
        uint8 v,
        bytes32 r,
        bytes32 s
    ) external;
```

# BEP-20 Contract Code Audit – Vulnerabilities Checked

Vulnerability Tested	AI Scan	Human Review	Result
Compiler Errors	Complete	Complete	✓ Low / No Risk
Outdated Compiler Version	Complete	Complete	✓ Low / No Risk
Integer Overflow	Complete	Complete	✓ Low / No Risk
Integer Underflow	Complete	Complete	✓ Low / No Risk
Correct Token Standards Implementation	Complete	Complete	✓ Low / No Risk
Timestamp Dependency for Crucial Functions	Complete	Complete	✓ Low / No Risk
Exposed _Transfer Function	Complete	Complete	✓ Low / No Risk
Transaction-Ordering Dependency	Complete	Complete	✓ Low / No Risk
Unchecked Call Return Variable	Complete	Complete	✓ Low / No Risk
Use of Deprecated Functions	Complete	Complete	✓ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
State Variable Default Visibility (x1)	Complete	Complete	✓ Low Risk
Deployer Can Access User Funds	Complete	Complete	✓ Low / No Risk

The contract code is verified on BSCScan.

The vulnerabilities listed above were not found in the token's Smart Contract.

# Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

[0x206fbbc9ea3da82ebbd09698d39343f95b32b3d3](https://www.etherbase.net/etherbase/address/0x206fbbc9ea3da82ebbd09698d39343f95b32b3d3)

The address above has authority over the ownable functions within the contract.

This allows the owner to call certain functions within the contract. Any compromise to the owner wallet may allow these privileges to be exploited.

We recommend:

- Establishing a Time-Lock with reasonable latency
- Assignment of privileged roles to multi-signature wallets

# Contract Code Audit – Owner Accessible Functions

Function Name	Parameters	Visibility	Audit Notes
updateMaxWalletAmount	uint256 newNum	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateMaxAmount	uint256 newNum	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromMaxTransaction	address updAds, bool isEx	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
adminRescueTokens	address token, uint256 amount	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setWhiteListAMM	address ammAddress, bool isWhiteListed	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
enableTrading		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateSwapEnabled	bool enabled	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateSwapTokensAtAmount	uint256 newAmount	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateDividendTracker	address newAddress	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateUniswapV2Router	address newAddress	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateDividendUniswapV2Router	address newAddress	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromFees	address account, bool excluded	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromDividends	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
includeInDividends	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setAutomatedMarketMakerPair	address pair, bool value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setDefaultToken	address newdefault	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
removeLimits		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
disableTransferDelay		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.

The functions listed above can be called by the contract owner.

If contract ownership has been renounced there is no way for the above listed functions to be called.

# Contract Code Audit – Owner Accessible Functions

Function Name	Parameters	Visibility	Audit Notes
updateLiquidityWallet	address newLiquidityWallet	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateOperationsWallet	address newOperationsWallet	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateInvestorWallet	address newWallet	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateMarketingWallet	address newWallet	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
rescueBNB	uint256 weiAmount	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateBuyFees	uint256 _operationsFee, uint256 _rewardsFee, uint256 _liquidityFee, uint256 _buybackFee, uint256 _investorFee, uint256 _marketingFee	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateSellFees	uint256 _operationsFee, uint256 _rewardsFee, uint256 _liquidityFee, uint256 _buybackFee, uint256 _investorFee, uint256 _marketingFee	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateGasForProcessing	uint256 newValue	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateClaimWait	uint256 claimWait	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setWhitelistToken	address tokenAddress, bool isWhitelisted	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
addPresaleAddressForExclusions	address _presaleAddress, address _presaleRouterAddress	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
buyBackTokens	uint256 bnbAmountInWei	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
renounceOwnership		public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
transferOwnership	address newOwner	public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.

The functions listed above can be called by the contract owner.

If contract ownership has been renounced there is no way for the above listed functions to be called.

# Liquidity Ownership – Locked / Unlocked

No locked liquidity information has been found.

This page will contain links to locked liquidity for the project if we are able to locate that information. Locked liquidity information was not found on the project's website.

# Contract Code Audit – Mint Functions

This Contract Cannot Mint New EUS Tokens.

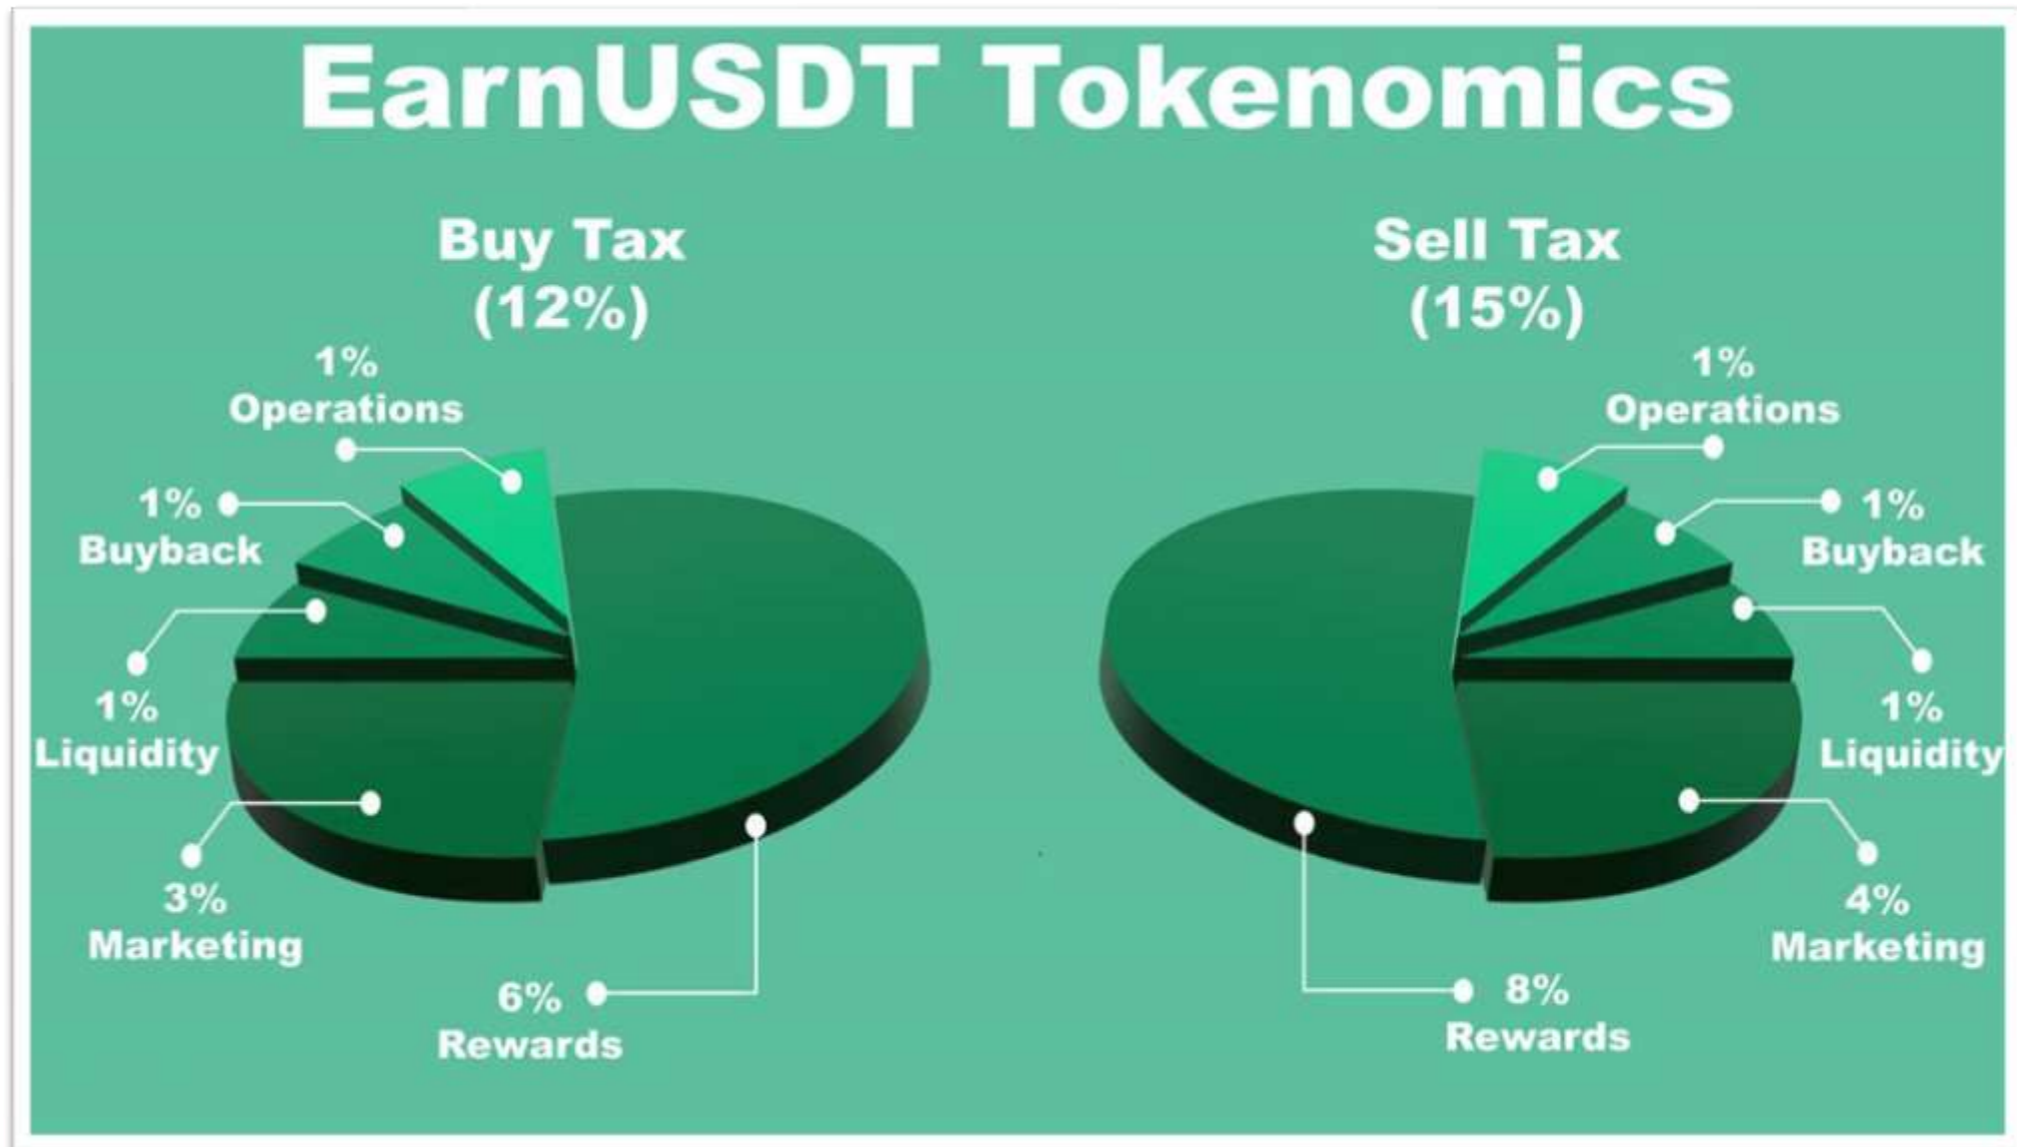

We do understand that sometimes mint functions are essential to the functionality of the project.

**A mint function was not found in the contract code.**

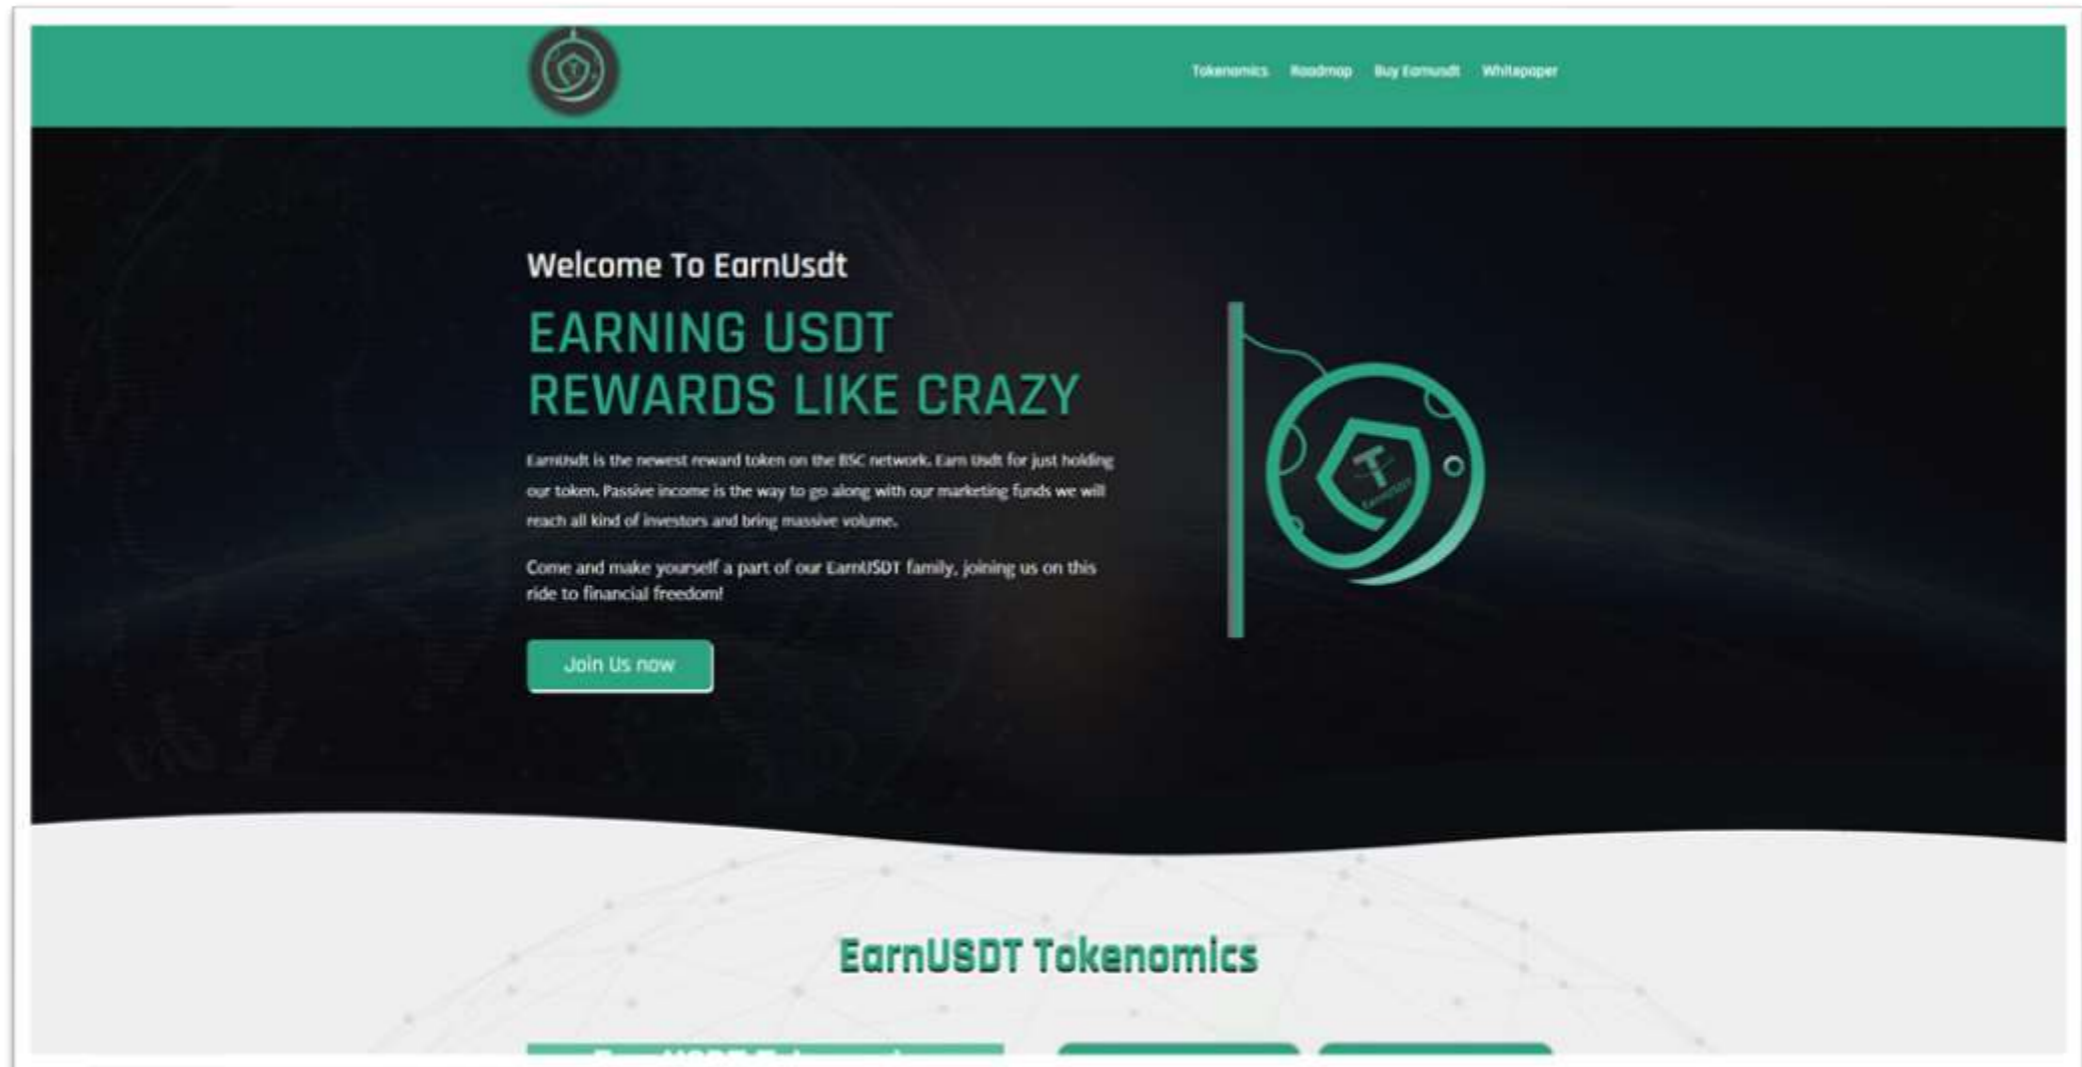

# Contract Transaction Fees

At the time of Audit the transaction fees (“tax”) listed below are the fees associated with trading. These fees are taken from every buy and sell transaction unless otherwise stated.

# Website Part 1 – Overview

[www.earnusdt.net](http://www.earnusdt.net)

Above images are actual snapshots of the current live website of the project.

Website was registered on 03/13/2022, registration expires 03/12/2023.

**X** This does not meet the 3 year minimum we like to see on new projects.

## Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

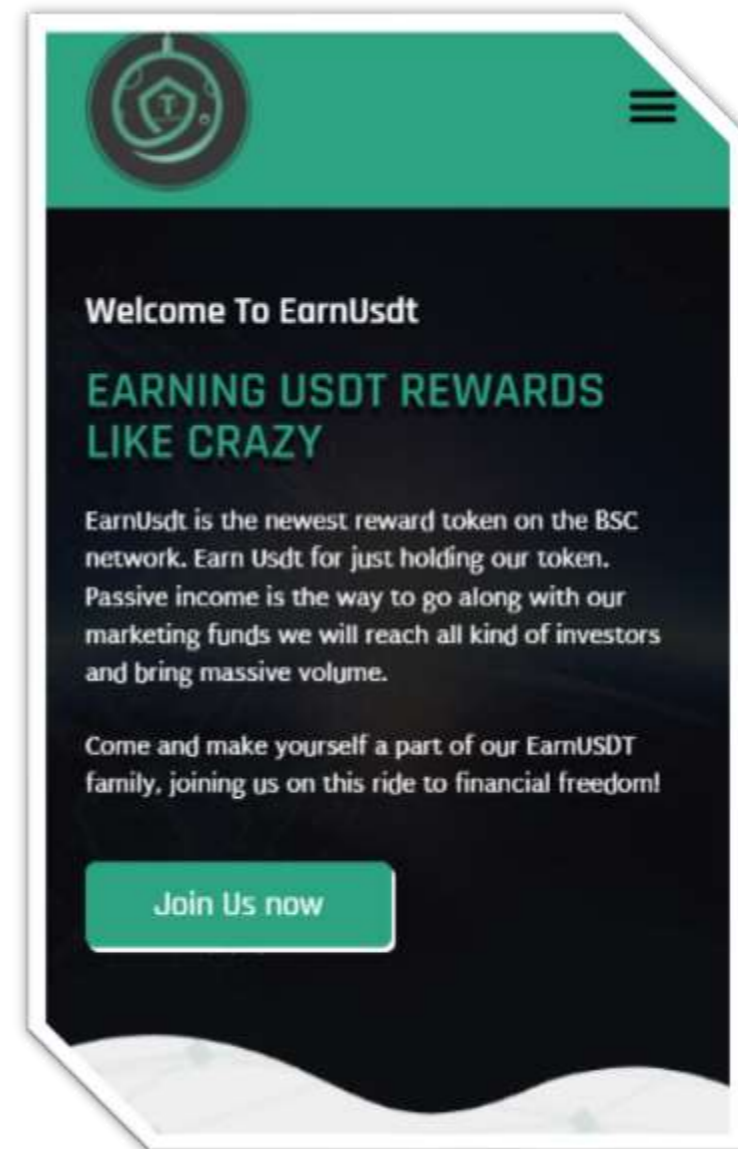

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

# Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.

# Website Part 4 (GWS) – General Web Security

## SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: `earnusdt.net`

Issued by: R3

Valid Until: 06/17/2022

## CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

[Contact](mailto:earnusdt@earnusdt.net)

**`earnusdt@earnusdt.net`**

## SPAM / MALWARE / POPUPS

No malware found

No injected spam found

No internal server errors

No popups found

Domain is marked clean by Google, McAfee, Sucuri Labs, & ESET

# Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

[Twitter](#)

[Telegram](#)

[Discord](#)

✓ At least 3 social media networks were found.

# Top Token Holders

The entire supply was in one wallet at the time of audit. We expect this to change as the project goes through initial distribution phases. Please use the link below to view the most up-to-date holder information.

[Click here to view the most up-to-date list of holders](#)

## EarnUsdt Top 100 Token Holders

Source: BscScan.com

# Location Audit

The primary location for the project has been identified as the USA.

# Team Overview

The following information about the team has been found in the project's whitepaper.

## HypeQueen

She has worked with larger projects in the past as a community manager and as a dev. She was a part of a charity project that went to 28mill ATH and another gaming project she did went to 6mill on day 1 of launch. She runs a call group named Queens\_Scam\_Detective, in this group she calls out projects based on the facts whether they be good or bad. She believes in being 100% honest and transparent. She owns KittElon which started at \$300 mc and grew to 151k with 100% organic growth and is still pushing forward.

## Zen

He has been in crypto since 2018, helped many projects to marketeer their products, more oriented in marketing and community building

## Ant

He has been in crypto since 2019 and started investing in many of the blue-chip coin, we are all familiar with. He decided to take the dive into defi mid-2019 and hasn't looked back since. He started as a mod for a few projects then decided to start his own group to help new investors invest in the right projects.

# Roadmap

*A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.*

# Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

# Thank You
