INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove liquidity (“Rug Pull”), sell off tokens, or completely exit scam. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for the project. Twitter, Telegram, TikTok, Reddit, Discord, Facebook, Instagram, and Youtube were found.

As this is a project with a charity aspect, we would like to see a letter from a charity providing proof of origination of donations made as an added layer of transparency to let users know that their money is going where it should. At this time we have no reason to suspect any misuse of funds, this is simply suggested best practices for cryptocurrencies with charity aspects.

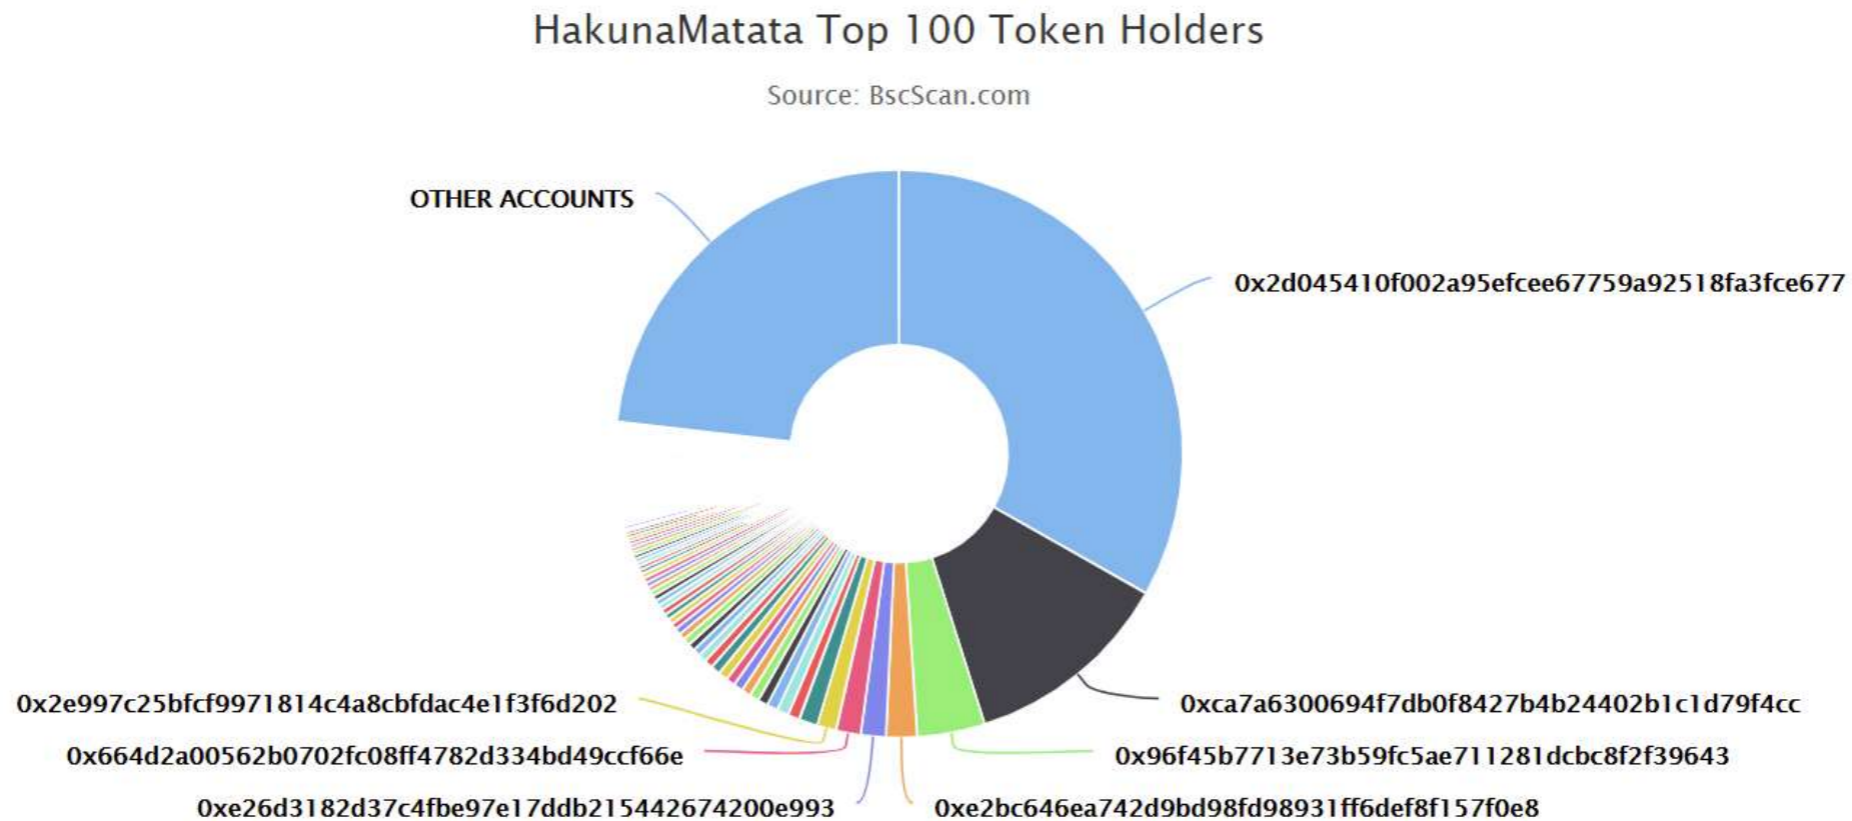

Suggestions for Improvement

1. Get contract code verified fully on BSCScan
2. Consider obtaining proof of origination of funds from a charity for added trust

Top Token Holders

The top token holders at the time of the audit are shown below.

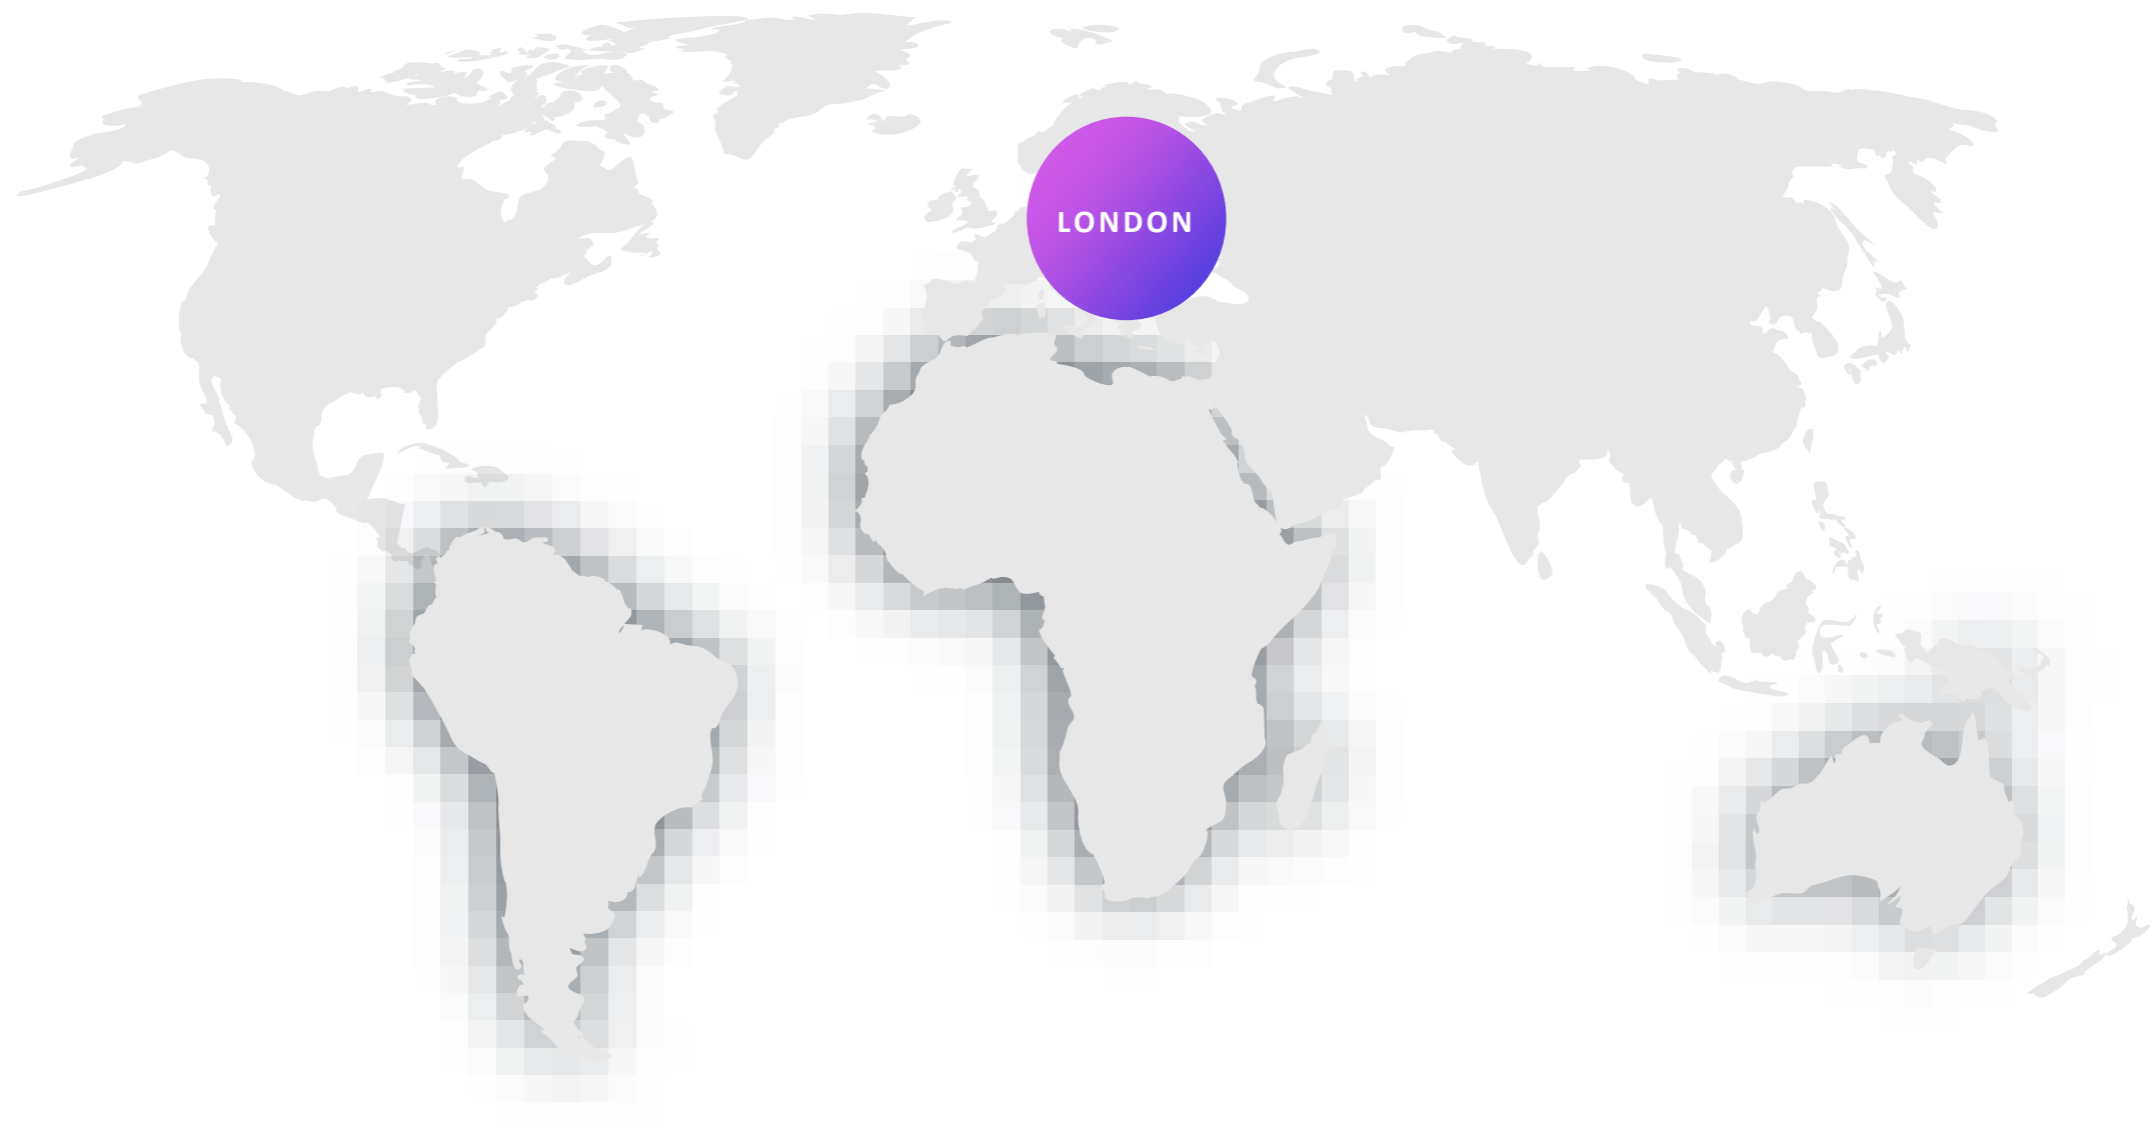

The first largest holder was the DXLocker Contract which includes the burn wallet, marketing wallet, and charity wallets.

The 2nd largest holder was found to be the PancakeSwap liquidity pool.

The 3rd largest holder was the TX fee wallet which is used for charity, marketing, and liquidity.

Location Audit

We have identified the primary location for the project to be in London.
