INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove liquidity (“Rug Pull”), sell off tokens, or completely exit scam. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for HappyCoin. Social Media channels included Twitter, Telegram, Instagram, Medium, and Discord. All social media channels had a healthy amount of activity.

As this is a charity coin, we would like to see a document provided by a charity with proof of origination of funds citing HappyCoin in the near future.

The domain name is set to expire in 2025 which exceeds our minimum recommendation for new projects.

Suggestions for Improvement

1. Receive letter from charity citing HappyCoin as a source of funds for recent donations.
2. Add links to social media networks to the website. ✓ *Fixed by the team*

Top Token Holders

At the block number indicated on the cover page of this report, 34.5% of the supply appears to be burned. The largest holder is the dead wallet of burned tokens.

[0x0000000000000000000000000000000000000000000000000000000000000000dead](#) – 34.5% of the supply was in the top wallet at the time of audit. This is a dead wallet which means 34.5% of the supply was burned at the time of audit.

[PancakeSwap: HAPPY 3](#) – 4.3% of the supply was found in the PancakeSwap Liquidity Pool which is the 2nd largest holder of HAPPY.

[0xc143e923ffc2db41b89cc45f306e6c962f86a410](#) – 2.17% of the supply was found in the 3rd largest wallet. We are told by the team that this is an early pre-sale investor who is considering partial donation to the charity wallet.

The top token holders at the time of the audit are shown as above.

Location Audit

The project location could not be identified at this time based on the information provided on the website or social media channels.

Team Overview

We are unable to find any information about the team on the website at this time. Projects may choose to stay anonymous for a myriad of reasons.

One of the team members has shown their face in an AMA on Discord. We are told the recording will be uploaded to YouTube.

Potential Signs of Risk

Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.
