CRC-20 Audit

Performed at block **2383780**

PERFORMED BY DESSERT FINANCE
FOR CONTRACT ADDRESS: **0x1BC42539e00F05aD5B7576Fa31814C9801f35bd1**

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to an audit in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), remove liquidity slowly, sell off tokens, quit the project, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice. Dessert Finance does not endorse, recommend, support, or suggest any projects that have been audited. An audit is an informational report based on our findings, We recommend you do your own research, we will never endorse any project to invest in.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on CronosScan.

CRC-20 Contract Code Audit – Vulnerabilities Checked

Vulnerability Tested	AI Scan	Human Review	Result
Compiler Errors	Complete	Complete	✓ Low / No Risk
Outdated Compiler Version	Complete	Complete	✓ Low / No Risk
Integer Overflow	Complete	Complete	✓ Low / No Risk
Integer Underflow	Complete	Complete	✓ Low / No Risk
Correct Token Standards Implementation	Complete	Complete	✓ Low / No Risk
Timestamp Dependency for Crucial Functions	Complete	Complete	✓ Low / No Risk
Exposed _Transfer Function	Complete	Complete	✓ Low / No Risk
Transaction-Ordering Dependency	Complete	Complete	✓ Low / No Risk
Unchecked Call Return Variable	Complete	Complete	✓ Low / No Risk
Use of Deprecated Functions	Complete	Complete	✓ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
State Variable Default Visibility	Complete	Complete	✓ Low / No Risk
Deployer Can Access User Funds	Complete	Complete	✓ Low / No Risk

The contract code is **verified** on CronosScan.

The vulnerabilities listed above were not found in the token's Smart Contract.

Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

[0xfd010af998ec4b10d12467ef0adb1fb8f5922e84](https://www.etherbase.net/etherbase-token/contract-ownership)

The address above has authority over the ownable functions within the contract.

This allows the owner to call certain functions within the contract. Any compromise to the owner wallet may allow these privileges to be exploited.

We recommend:

- Establishing a Time-Lock with reasonable latency
- Assignment of privileged roles to multi-signature wallets

Contract Code Audit – Owner Accessible Functions

Function Name	Parameters	Visibility	Audit Notes
launch		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
activateTrading		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
deactivateTrading		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
updateDividendTracker	address newAddress	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
allowTradingWhenDisabled	address account, bool allowed	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromFees	address account, bool excluded	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromDividends	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
includeInDividends	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromMaxWalletLimit	address account, bool excluded	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromMaxTxLimit	address account, bool excluded	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
blacklistAccount	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
unblacklistAccount	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setWallets	address payable newMarketingWallet, address payable newTeamWallet, address payable newRewardPoolWallet	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setMeerkatRouter	address newAddress	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setGasForProcessing	uint256 newValue	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setMaxWalletAmount	uint256 newValue	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setMaxTxAmount	uint256 newValue	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setMinimumTokensBeforeSwap	uint256 newValue	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setMinimumTokenBalanceForDividends	uint256 newValue	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setPresaleAddress	address presaleAddress	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setTaxBuy	uint256 _liquidity, uint256 _marketing, uint256 _team, uint256 _rewards, uint256 _rewardPool	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setTaxSell	uint256 _liquidity, uint256 _marketing, uint256 _team, uint256 _rewards, uint256 _rewardPool	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setTaxTransfer	uint256 _liquidity, uint256 _marketing, uint256 _team, uint256 _rewards, uint256 _rewardPool	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
toggleSwapAndLiquify	bool enable	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
claimCroOverflow		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
manualSwap		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
renounceOwnership		public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
transferOwnership	address newOwner	public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.

The functions listed above can be called by the contract owner.

If contract ownership has been renounced there is no way for the above listed functions to be called.

Liquidity Ownership – Locked / Unlocked

No locked liquidity information has been found.

This page will contain links to locked liquidity for the project if we are able to locate that information. Locked liquidity information was not found on the project's website.

Contract Code Audit – Mint Functions

This Contract Cannot Mint New KRO Tokens.

We do understand that sometimes mint functions are essential to the functionality of the project.

A mint function was not found in the contract code.

Contract Transaction Fees

At the time of Audit the transaction fees (“tax”) listed below are the fees associated with trading. These fees are taken from every buy and sell transaction unless otherwise stated.

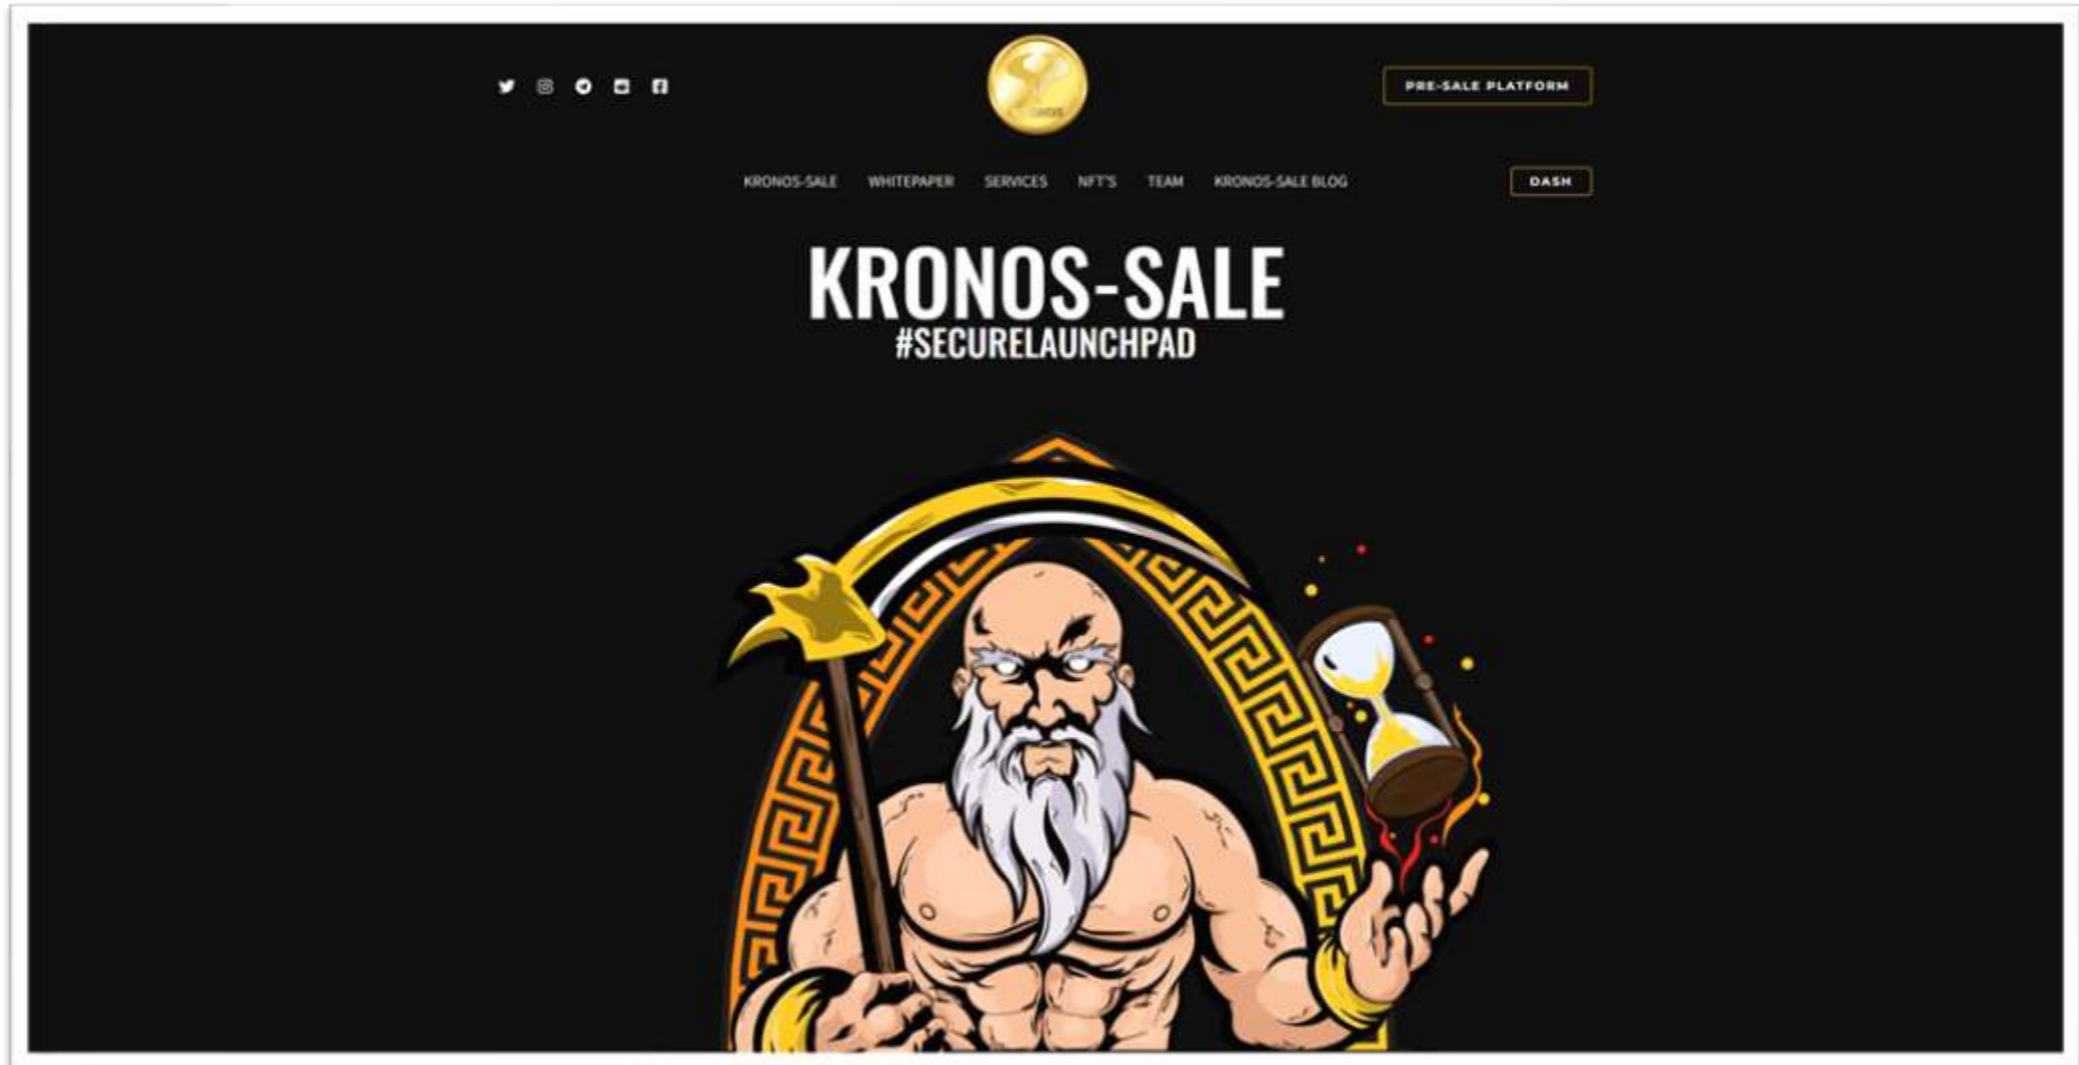

TOKENOMICS
10% BUY & SELL TAX

- 2% Liquidity Pool
- 5% Marketing
- 1% Dividend
- 1% Development
- 1% Team

Website Part 1 – Overview

www.kronossale.com/

Above images are actual snapshots of the current live website of the project.

Website was registered on 02/09/2022, registration expires 02/09/2024.

This does not meet the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: kronossale.com

Issued by: cPanel, Inc

Valid Until: 05/10/2022

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

[Contact](mailto:info@kronossale.com)

info@kronossale.com

SPAM / MALWARE / POPUPS

No malware found

No injected spam found

No internal server errors

No popups found

Domain is marked clean by Google, McAfee, Sucuri Labs, & ESET

Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

[Twitter](#)

[Telegram](#)

[Reddit](#)

[Discord](#)

[Facebook](#)

[Instagram](#)

✓ **At least 3 social media networks were found.**

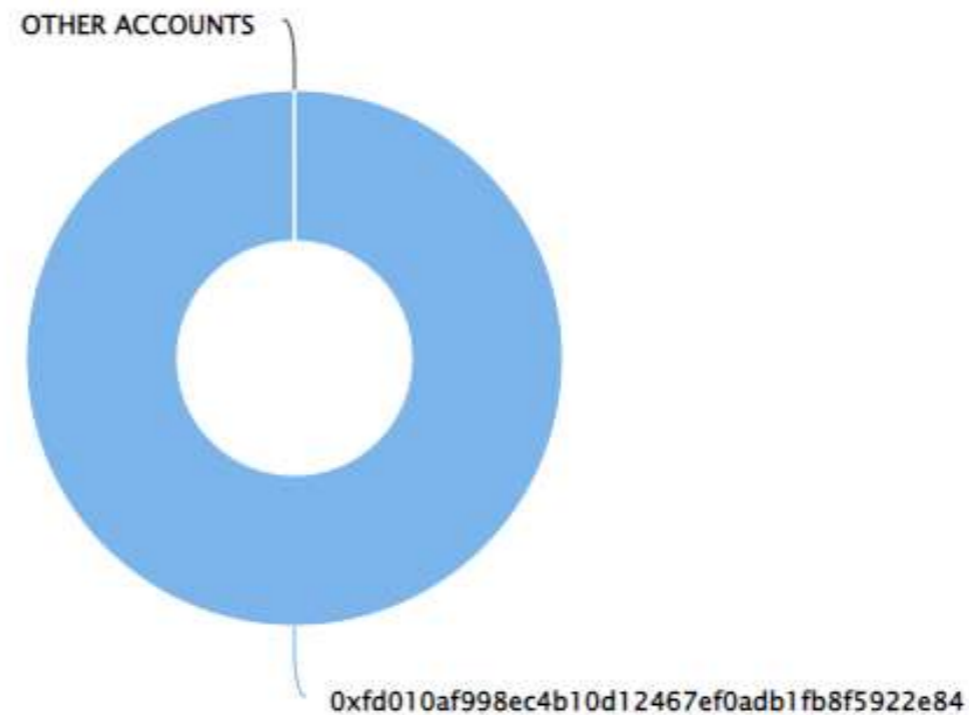

Top Token Holders

The entire supply was in one wallet at the time of audit. We expect this to change as the project goes through initial distribution phases. Please use the link below to view the most up-to-date holder information.

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.

Team Overview

The following information about the team has been found on the projects website.

SKYE - FOUNDER

SKYE is a highly successful professional head-hunter with a decade of experience in talent acquisition. This in conjunction with his experience as a leader and life coach providing the unique skillset that only Skye can offer his clients. Skye has found talent in every industry, but he excels in finding the very best talents in software development and blockchain technologies. Skye brings years of sales, business acumen, networking, and finding the right people for the right projects. He's been learning about Crypto for nearly 3 years, and like many others on the Kronos team he dove in and began understanding the technology and how he could make a positive impact. It didn't take long to realize his talents are best used when working to provide a safer atmosphere free of rug pulls and scam artist.

KAYZAK - FOUNDER

As a business development manager Kayzak manages and ensures all the latest telecom products are ready for launch worldwide. He successfully collaborates and manages every department in this large corporation ensuring their next product release is on time and under budget. Kayzak's coworkers often express his exceptional sales & communications skills by letting us know that he could sell sand to a dehydrated person in the Sahara desert. Kayzak has been in crypto for less than a year and already has a successful career with a very popular crypto AMA business. Thoroughly vetting millions of Crypto Projects and then sharing that Alpha with hundreds of thousands of his followers provide a value that's unrivaled and unmatched in this space. Kayzak's experience in business, crypto research, and his keen eye for great projects make him vital to the Kronos team.

BRAD - FOUNDER

Brad started in construction and quickly realized he was a talented leader and businessman. Brad built several successful companies from his first carpentry business to today where he runs a successful Barbecue Restaurant. His decades of experience, business acumen, and excellent leadership solidified his position as an entrepreneur and today he brings that know-how to Crypto and the Kronos team. It was a single trade with 10X gains placing Brad on his Cryptocurrency journey. It wasn't long after he recognized scam artists running rampant and projects with wonderful ideas but a lack of necessary experience to get a project off the ground. Brad's power is his ability to see the potential in a project regardless of its current state.

JAY - FOUNDER

Jay is a marketing expert with strengths in branding, messaging, website design, and social media management. Before he found his calling in Marketing Jay was a project manager, a carpenter, a personal trainer, a sports therapist, sales management, and more recently Construction management. He's that guy you heard about capable of picking up any skill needed with a little time and effort and ready to turn that into something amazing. Jay has been in Crypto for 3 years and just recently went full-time trading. Jay has helped build and manage several Crypto projects though Kronos is something he is extremely excited to get off the ground.

Team Overview

The following information about the team has been found on the projects website.

DAVID - CORE TEAM

David is a Marketing & Operation VP with a background in Automation Engineering. He has traveled the world consulting, designing, and integrating robotics and automation for distribution & manufacturing warehouses of many fortune 500 companies. David holds several patents pertaining to Automation products and he's is eager and looking to add more in the cryptocurrency space. David started his journey in cryptocurrencies nearly 2 years ago trading on Coinbase where he quickly realized that most gains are earned in DeFi. David brings a unique blend of experience in branding and messaging strategies, company processes and streamlined workflows, and overall general business administration.

AUSSIE BOOMER - CORE TEAM

Boomer is a successful chef on the beautiful island of Tasmania. Much like an artist painting his masterpiece on a blank canvas, Boomer is known to create delicious masterpieces that are admired for seconds before devoured in minutes by patrons. Boomer has also excelled in Search in Optimization and creating the social weight you need to put your landing pages number 1. Boomer has been genuinely interest in Crypto for many years, but didn't really sit down and explore until the Covid Lockdown. It was during this time he saw awesome opportunities with bringing his SEO Expertise to the Crypto Project that need to be found. His training, research, and experience in SEO ensures your project is always only a click away from that next investor.

JACK CHARLTON - CORE TEAM

Jack is an expert and full time digital artist and entrepreneur. He has beautiful work that's been displayed over the world and most recently some of his best work showed up on the New York City Time Square Billboard. Jack has also done a lot of work in the crypto space for projects such as Fegnomics, BNBHeroes, BUSDX, AutomaticUP and many others. Jack first experience with crypto was a casual meeting with several high profile altcoins back in 2017. After the defi boom really took hold near the beginning of 2021 he was already heavily invested in some of the most profitable crypto known and that's when he realized his passion and skills are all he's ever needed to succeed in this industry.

ADAM - CORE TEAM

Adam is an accomplished retired U.S. Marine with 21 plus years of dedicated service. He's a veteran of OEF and Safety expert when it comes to Radiation. Adam is uniquely experienced and has taught many others in the study of precision measurements and calibration tools. This is certainly a skill you want when you're an Officer of Radiation Safety tool Adam is the lead developer on several high profile Alt Crypto projects because he's an accomplished Solidity programmer and well versed in database management. Projects such as FlokiPulse v2, and ADABoy are just a couple of his success stories with many others he's consulted or helped. Adam is also the founder and CEO of CryptoMatch, the Tinder of crypto and who doesn't need an app to tell you which Alt Coin is best to you.

SETH - CORE TEAM

Seth was born and raised in Seattle and has worked "Online" in some capacity his entire career. The younger "MidKnighter" ran countless communities going back to the AOL days and even founded the worlds # 3 Ranked Age of Empires clan. After a brief time of running his own construction business Seth came back to the digital online world to take a deeper dive into Crypto. He quickly made a name for himself by calling out the many different scam projects until he came to the realization that the safest and most successful project is lively one he is leading, developing, or consulting. It's apparent Seth is born to lead, but he's also extremely tech savvy and an accomplished developer with several successful projects. Stockbank, MottaVerse and perhaps the most well known project "TrueBurn" are just a few of his projects he developed. Kronos is lucky to have Seth on board providing his expert development services and his leadership abilities to help in building CRO's best and safest launchpad.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You
