

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity ("Rug Pull"), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

DessertDoxxed

DessertDoxxed is a service offered by Dessert Finance that allows projects to do a private face reveal matched with an I.D to allow founders / team members to privately Doxx themselves to Dessert Finance. This allows an added layer of security to the projects team but also allows an added layer of confident to project supporters.

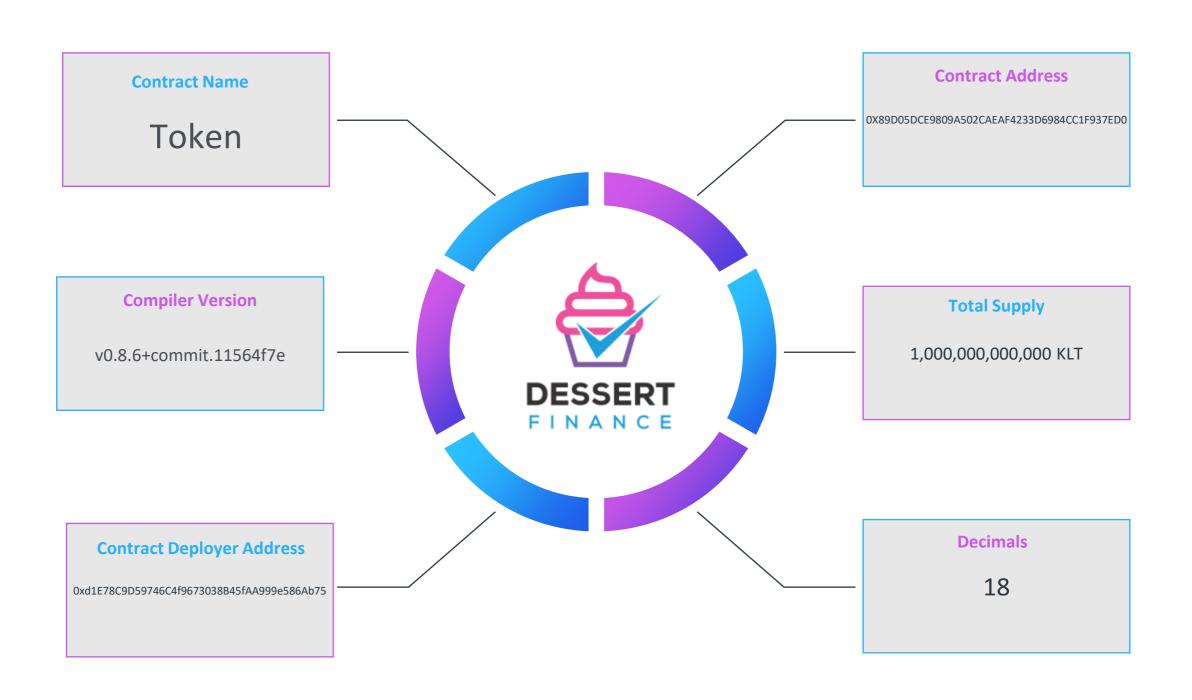

√ The founder of this project has been DessertDoxxed

Contract Code Audit – Token Overview

BEP-20 Contract Code Audit – Overview

Dessert Finance was commissioned to perform an audit on King Lion Technology (KLT)

```
ragma solidity 0.8 🐞
   function totalSupply() external view returns (uint256);
     function transfer(address recipient, wint255 amount) external returns (bool);

    #dev Neturns the remaining number of tokens that 'spender' will be
    # allowed to spend on behalf of 'owner' through (transferfrom). This is
    # zero by default.

    that someone may use both the old and the new allowance by unfortunat
    transaction ordering. One possible solution to mitigate this race
    condition is to first reduce the spender's allowance to 0 and set the

          desired value afterwards:
* https://github.com/ethareum/EIPs/issues/20#issuecomment-263524729
     function approve(address spender, wint256 amount) external returns (bool);
           Aday Moves amount tokens from sender to recipient using the allowance mechanism, amount is then deducted from the caller's
```

Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

0xc2e2ad60127f2df41be22d3a80ee73ef1939e8c6

Liquidity Ownership – Locked / Unlocked

No locked liquidity information has been found.

This page will contain links to locked liquidity for the project if we are able to locate that information. Locked liquidity information was not found on the project's website.

Contract Code Audit – Mint Functions

This Contract Cannot Mint New KLT Tokens.

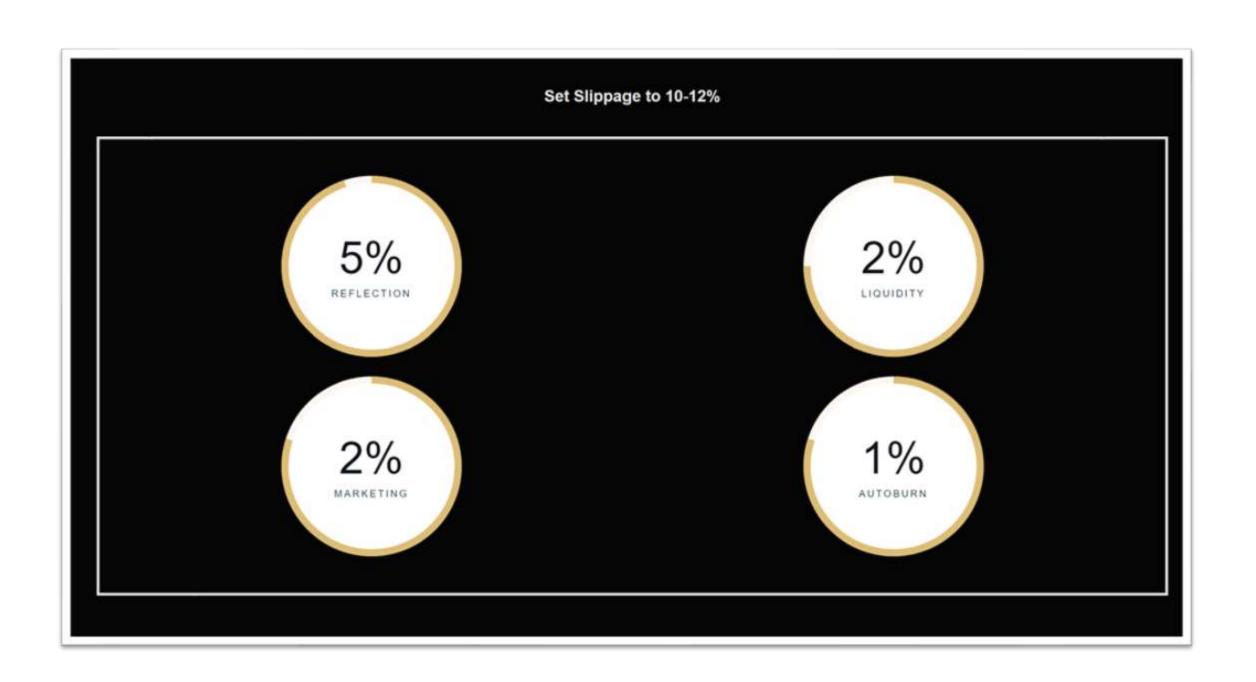

We do understand that sometimes mint functions are essential to the functionality of the project.

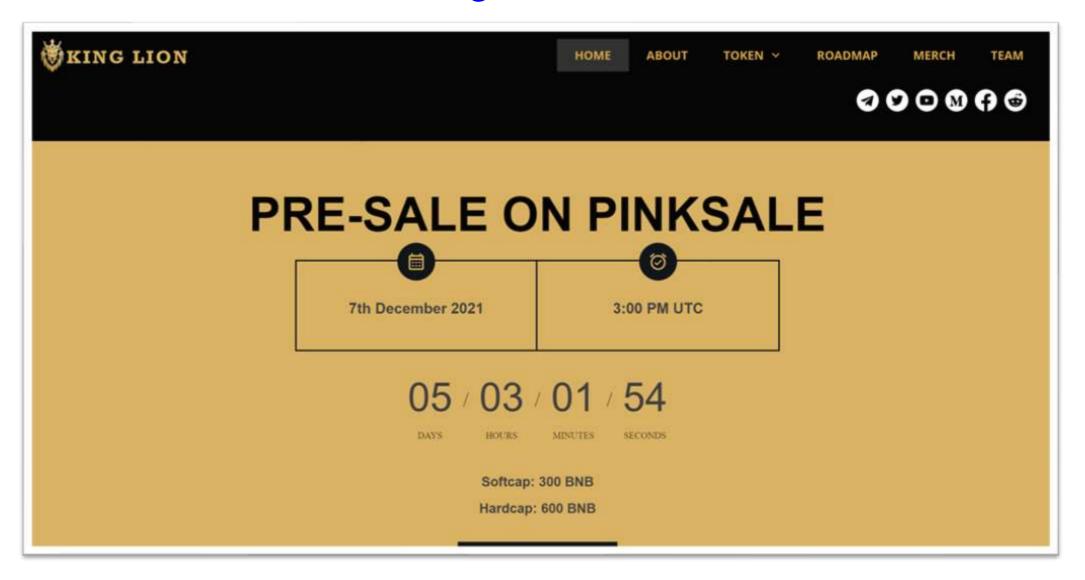

A mint function was not found in the contract code.

Contract Transaction Fees

At the time of Audit the transaction fees ("tax") listed below are the fees associated with trading. These fees are taken from every buy and sell transaction unless otherwise stated.

Website Part 1 – Overview www.kingliontoken.com

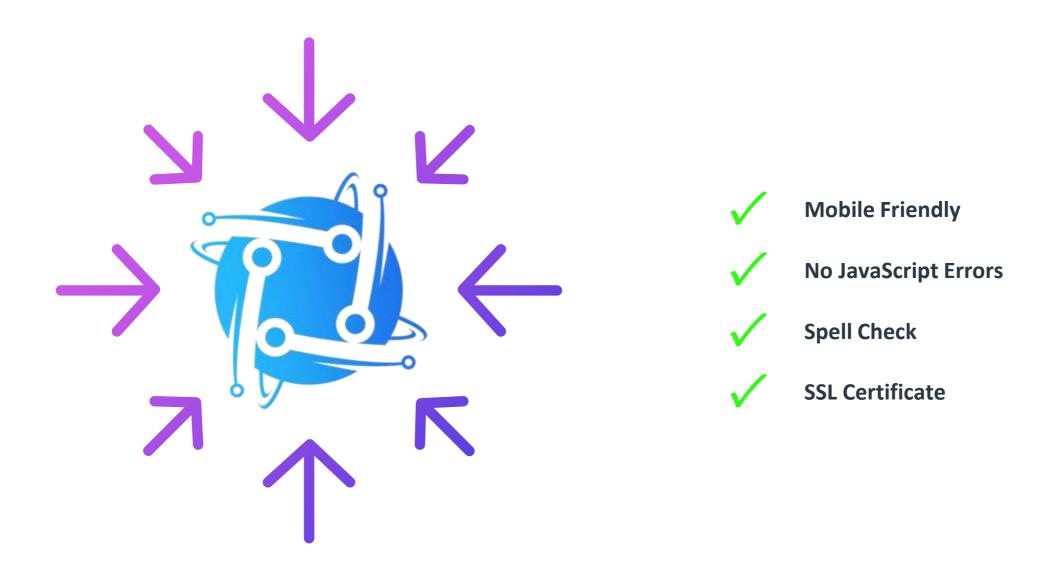

Above images are actual snapshots of the current live website of the project.

Website was registered on 08/07/2021, registration expires 08/07/2022.

✓ This **exceeds** the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

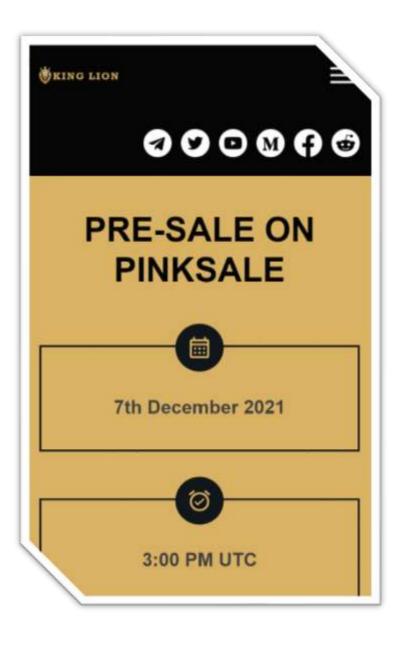

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

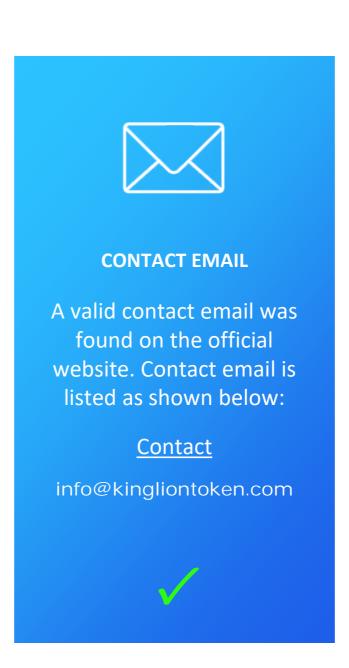

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) - General Web Security

Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

At least 3 social media networks were found.

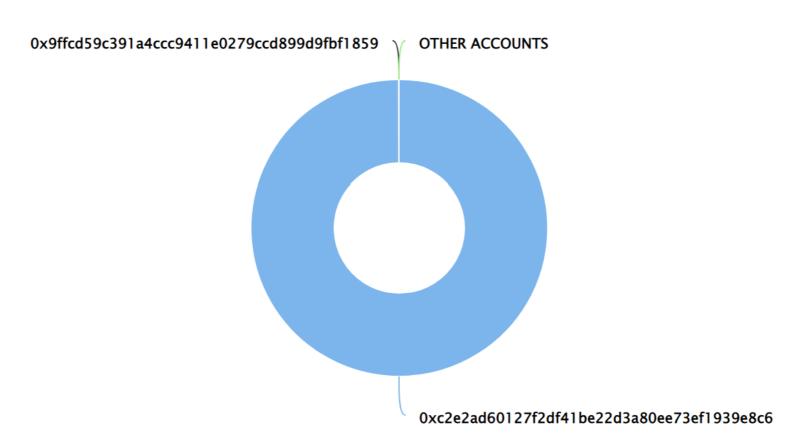

Top Token Holders

The entire supply was in one wallet at the time of audit. We expect this to change as the project goes through initial distribution phases. Please use the link below to view the most up-to-date holder information.

Location Audit

The primary location for the project has been identified as the USA.

Team Overview

Team information has been found and is shown below.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

AUGUST 2021 SEPTEMBER 2021 Team Formation · Development of SAAS Application · Planning of Technology · Testing of Site and Application · Website Blueprint · Internal Pre-Sale OCTOBER 2021 **NOVEMBER 2021** · Website Completion · Marketing Campaigns · Create Social Media (Twitter) · Website Launch · Optimize SAAS Application · Initial Marketing Campaigns **DECEMBER 2021** JANUARY 2022 · Marketing Campaigns · Marketing Campaigns . \$10 Million Market Cap · Pre-Sale · Public Launch . Expand Customer Base · \$1 Million Market Cap · Premium Token Listing Exchanges CoinGecko Listing · CoinMarket Cap Listing

Disclaimer

The opinions expressed in this document are for general informational purposes only and are not intended to provide specific advice or recommendations for any individual or on any specific investment. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.
