Performed at block **13164450**

PERFORMED BY DESSERT FINANCE
FOR CONTRACT ADDRESS: **0xB872057eE478B3eb77E74c9aA7B50Fe4Ed650e58**

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

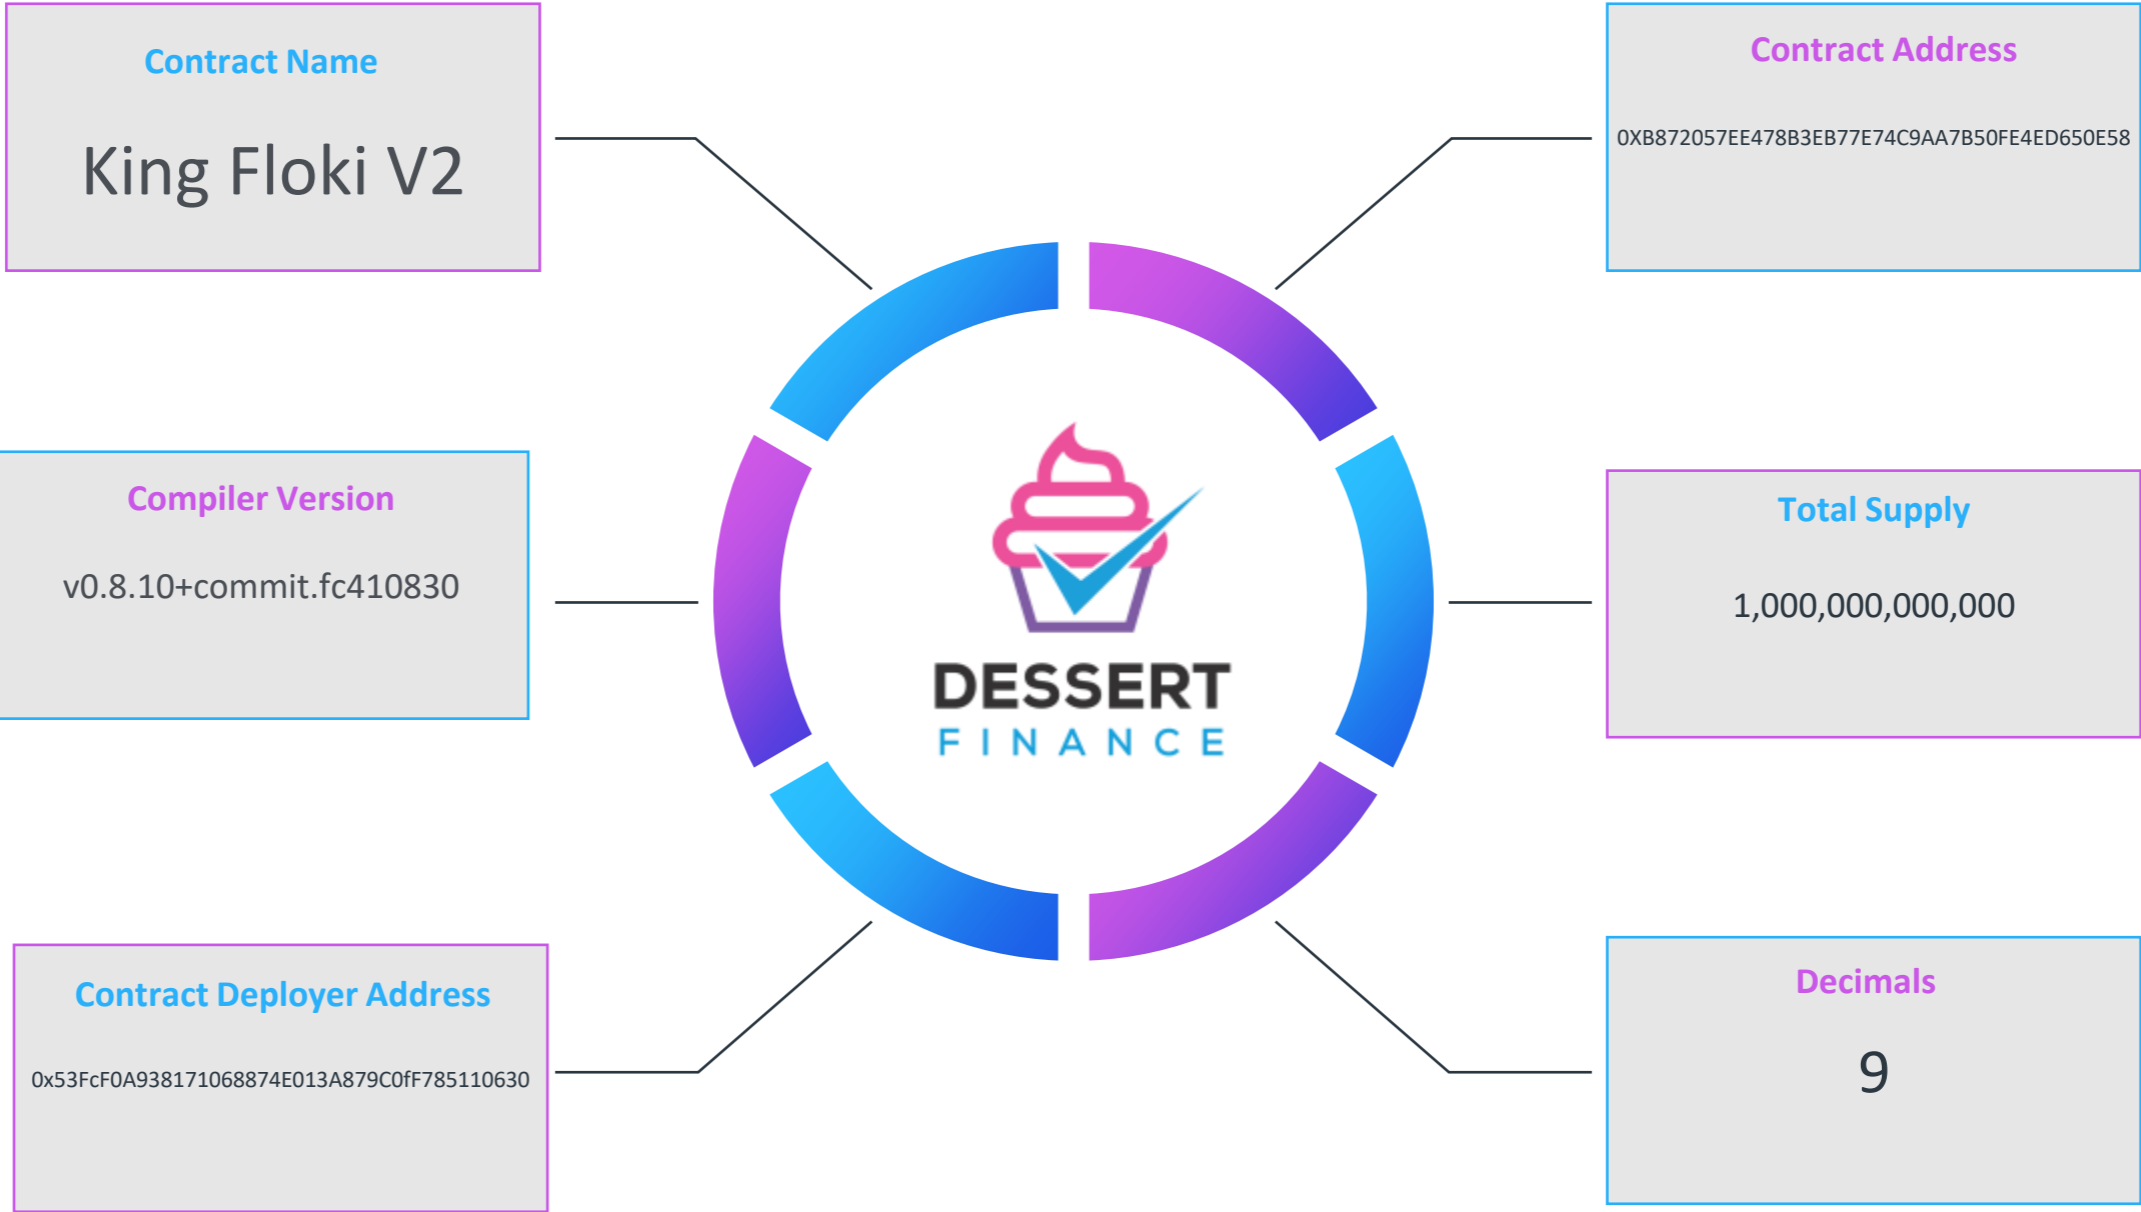

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Contract Code Audit – Token Overview

BEP-20 Contract Code Audit – Overview

Dessert Finance was commissioned to perform an audit on King Floki V2 (KING)

```
function processDividendTracker(uint256 gas) external onlyOwner {
    (uint256 busdIterations, uint256 busdClaims, uint256 busdLastProcessedIndex) = busdDividendTracker.process(gas);
    emit ProcessedBusdDividendTracker(busdIterations, busdClaims, busdLastProcessedIndex, false, gas, tx.origin);
}

function claim() external {
    busdDividendTracker.processAccount(msg.sender, false);
}

function getLastBusdDividendProcessedIndex() external view returns(uint256) {
    return busdDividendTracker.getLastProcessedIndex();
}

function getNumberOfBusdDividendTokenHolders() external view returns(uint256) {
    return busdDividendTracker.getNumberOfTokenHolders();
}

function _transfer(
    address from,
    address to,
    uint256 amount
) internal override {
    require(from != address(0), "ERC20: transfer from the zero address");
    // tx utility vars
    //uint
    uint256 trade_type = 0;
    uint256 contractTokenBalance = balanceOf(address(this));
    //bool
    bool overMinimumTokenBalance = contractTokenBalance >= minimumTokensBeforeSwap;
    bool canSwap = contractTokenBalance >= swapTokensAtAmount;
    // market status flag
    if(!marketActive) {
        require(premarketUser[from], "cannot trade before the market opening");
    }
    // normal transaction
    if(!isInternalTransaction) {
        // tx limits & tokenomics
        //this
    }
}
```

The contract code is verified on BSCScan.

The vulnerabilities listed above were not found in the token's Smart Contract.

Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

[0x59048fa150334758ea7a4c3b6153bdfcd8f9459e](https://www.etherbase.io/etherscan/address/0x59048fa150334758ea7a4c3b6153bdfcd8f9459e)

Liquidity Ownership – Locked / Unlocked

Locked liquidity information has been found.

This page will contain links to locked liquidity for the project if we are able to locate that information.

Dxsale

<https://dxsale.app/app/v3/dxlockview?id=0&add=0x59048fA150334758EA7A4c3b6153bdfcd8f9459e&type=lplock&chain=BSC>

Contract Code Audit – Mint Functions

This Contract Cannot Mint New KING Tokens.

We do understand that sometimes mint functions are essential to the functionality of the project.

A mint function was not found in the contract code.

Contract Transaction Fees

At the time of Audit the transaction fees (“tax”) listed below are the fees associated with trading. These fees are taken from every buy and sell transaction unless otherwise stated.

The tokenomics are as follows:

11% Buy Tax

2% Redistribution in \$KING

3% Sent to the marketing wallet to ensure the project is continuing the best marketing push possible.

3% Lotto Wallet (Winners weekly, holders will gain 1 ticket for every 0.25 BNB of \$KING they hold)

3% Added back to the liquidity pool

15% Sell Tax

3% Redistribution in \$KING

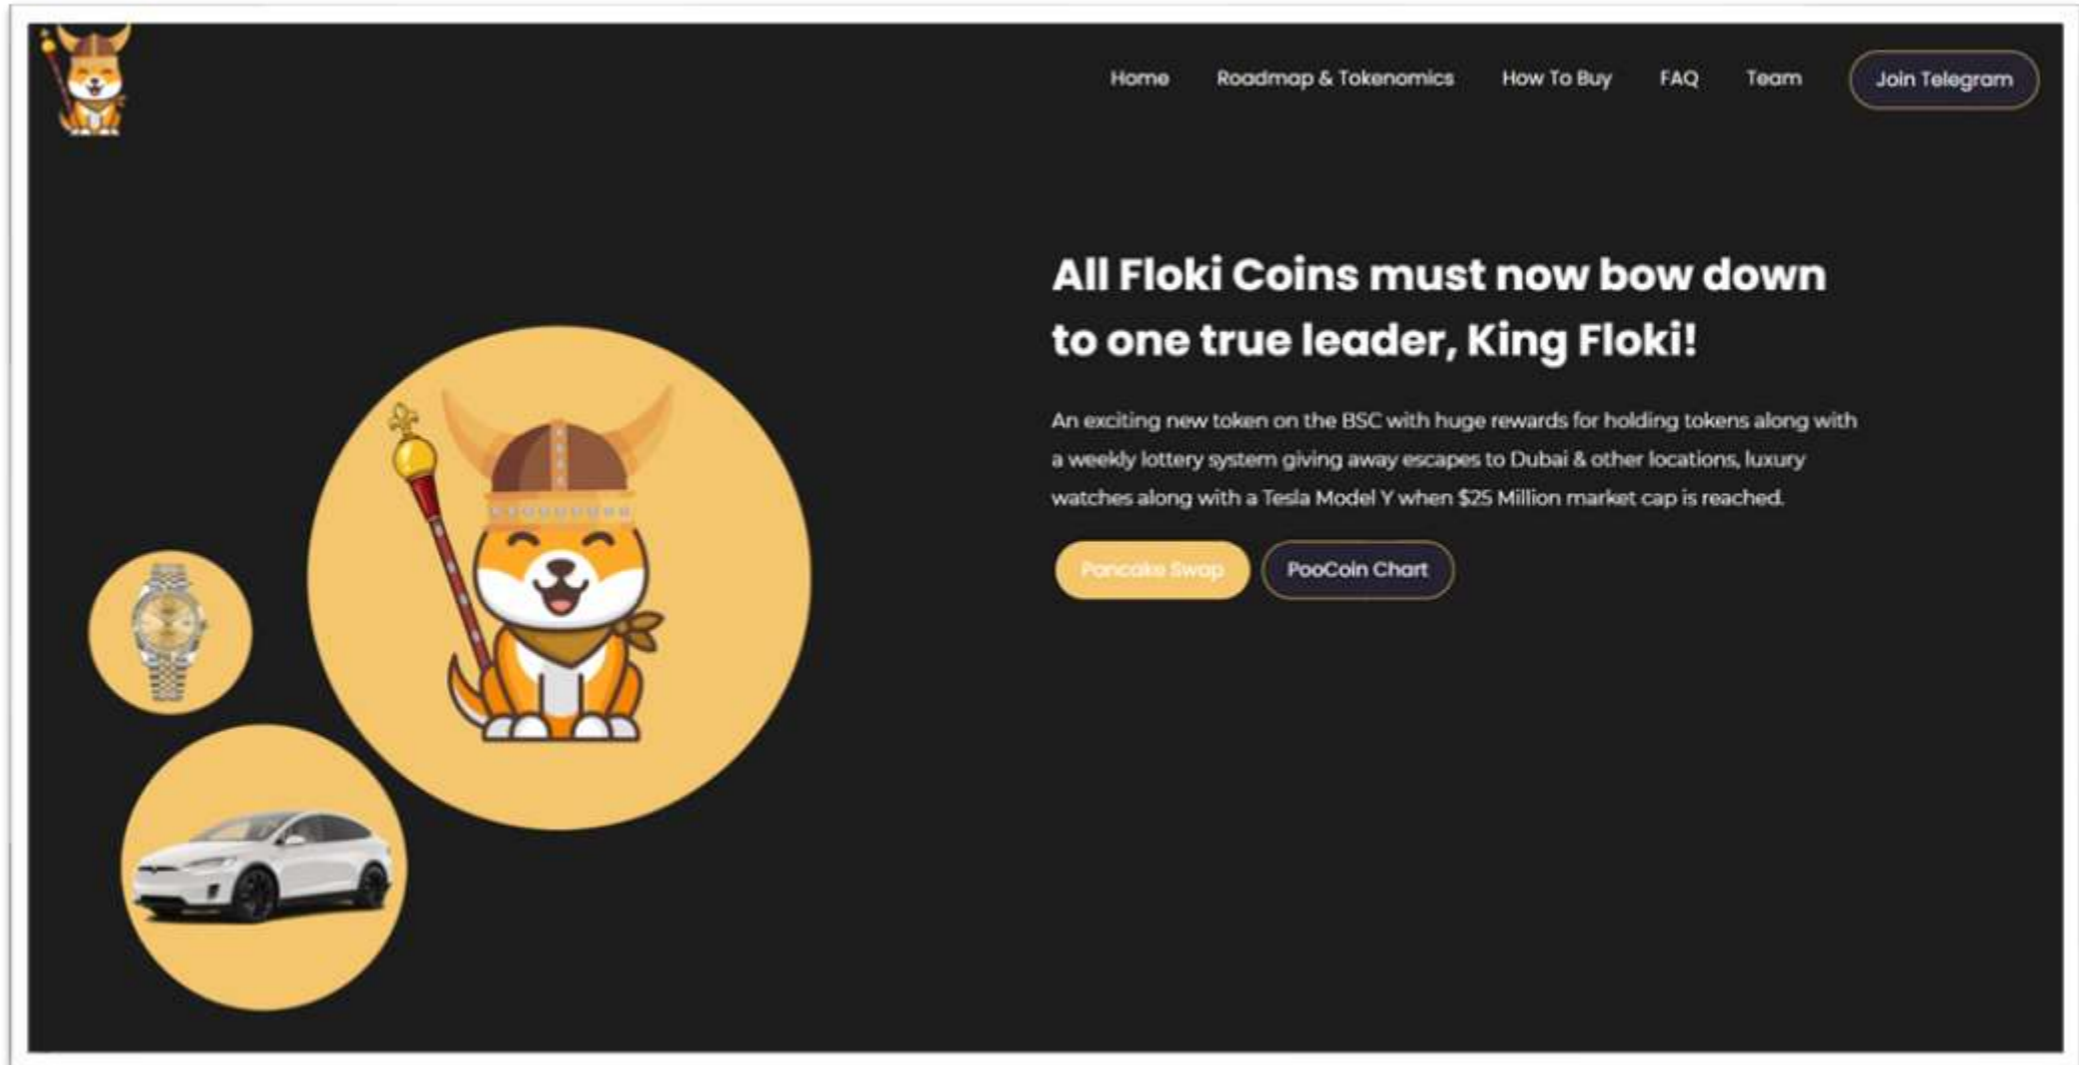

4% Added back to the liquidity pool

4% Lotto Wallet (Winners weekly, holders will gain 1 ticket for every 0.25 BNB of \$KING they hold)

4% Sent to the marketing wallet to ensure the project is continuing the best marketing push possible.

Website Part 1 – Overview

www.kingfloki.io

Above images are actual snapshots of the current live website of the project.

Website was registered on 11/07/2021, registration expires 11/07/2022.

X This does not meet the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✗ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

The website contained two minor JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

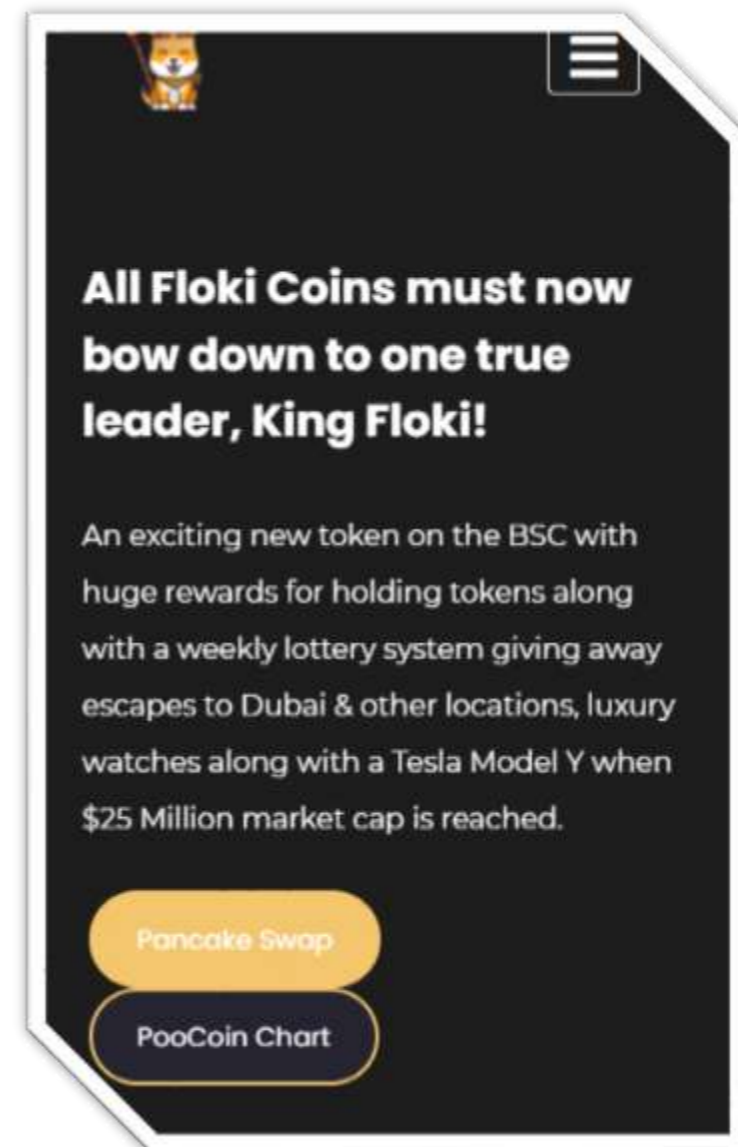

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

Two minor JavaScript errors were found and shown below. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: kingfloki.io

Issued by: Encryption Everywhere

Valid Until: 11/06/2022

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

Contact

N/A

SPAM / MALWARE / POPUPS

No malware found

No injected spam found

No internal server errors

No popups found

Domain is marked clean by Google, McAfee, Sucuri Labs, & ESET

Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.

Team Overview

Team

Meet The Team Behind \$KING

Daniel Dunne

Daniel is from just outside of London and has recently finished his A-Levels he studied Business, Finance and ICT therefore giving him a wide range of skills to apply for this project, he also studies a social media marketing course online which he plans to apply to this project.

Harrison Wheatley

Harrison is from just outside of London who is currently studying Business at College on the course he partakes in activities which include building digital marketing strategies and putting them into practice along with building strength in a business administration role adding even more value to the project.

Waleed Baig

Waleed is from Leeds, he is currently in his second year of university studying Accountancy and Finance which gives him a broad spectrum of skills such as integrity and adaptability. He has his own business in the marketing Industry and therefore can apply what he knows to the project.

Kai Skeggs

Kai is from just outside of London who has recently finished his A-Levels he studied Business, Finance & Media which means he has a wide range of skills he is able to apply to the project, the media part comes in very helpful with social media since his coursework was to create a social media campaign.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

- 1. Initial Marketing & Presale Via Pinksale**
Up until the 30th November at 5PM UTC our whitelisted sign up will take place. Please fill the form out at the bottom of our website for a chance to be selected for this, upon being selected you will receive an email (from a kingfisher address) informing you that your wallet has been chosen. On the 30th November at 8PM UTC you will have the chance to participate in the presale (50 BNB SoftCap, 300 BNB HardCap, 0.1 BNB Minimum & 2 BNB Max contributors). After 10 minutes if the 300 BNB hard cap isn't full we will open to the public.
- 2. Launch Via PancakeSwap**
On the 20th of November 2023 at 7PM UTC we will be going live on PancakeSwap after our presale being filled the day before, any changes to this will be stated in the telegram in good time before launch. Please only purchase from the contract on this website or the pinned posts in the telegram.
- 3. Audit**
If an audit is not completed before release we will have one completed within a week of launch. We understand that this is very important to our investors and future investors aswell. -AUDIT COMPLETED VIA [HERE](#)
- 4. Multiple Different Listings Such As CoinMarketCap Etc.**
Within the first day of launching we will be applying to multiple listing websites such as CoinMarketCap & CoinGecko, we believe we will be able to get listed within a week, after that we will make sure to continue to broaden out onto other platforms.
- 5. Reach \$25 Million Market Cap**
A Mid to long term goal for us would be to be able to reach the \$25 million market cap, obviously after this the sky is the limit however reaching this would enable us to be able to conduct our Tesla Model X giveaway which would be an amazing act to do for holders of our token!
- 6. Release Our Own NFT Marketplace**
Despite us being a Binance Smart Chain project that doesn't mean to say we do not have a future and want to broaden out. In the future we are very interested in making our own NFT Marketplace since we believe the current ones out there are not upto par and have ridiculous fees for their not so great service, we want to make a marketplace with the perfect balance.
- 7. Release Debit Cards, Using Tokens To Make Purchases.**
This is most likely a long to very long term goal, however our plans are eventually to be able to release prepaid MasterCard debit cards which are prepaid via \$KING tokens. Essentially you would deposit \$KING into your account, upon making a purchase with the card it will make the transaction using your \$KING balance. This is obviously a long term goal for the team and we do not know the most about the partnerships which can be made with MasterCard however when we feel the time is right we will begin to work on this project.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You
