FINANCE

Little Rabbit (LTRBT)

BEP-20 Audit

Performed at block **20640364**

PERFORMED BY DESSERT FINANCE
FOR CONTRACT ADDRESS: **0x6C46422A0f7dbbAD9BEC3BbBC1189bfAf9794B05**

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to an audit in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), remove liquidity slowly, sell off tokens, quit the project, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice. Dessert Finance does not endorse, recommend, support, or suggest any projects that have been audited. An audit is an informational report based on our findings, We recommend you do your own research, we will never endorse any project to invest in.

Source Code

Contract Source Code Verified

Contract Name

LittleRabbit

Other Settings

default evmVersion, MIT

Compiler Version

v0.8.13+commit.abaa5c0e

Optimization Enabled

Yes with 200 runs

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on BSCScan.

BEP-20 Contract Code Audit – Vulnerabilities Checked

Vulnerability Tested	AI Scan	Human Review	Result
Compiler Errors	Complete	Complete	✓ Low / No Risk
Outdated Compiler Version	Complete	Complete	✓ Low / No Risk
Integer Overflow	Complete	Complete	✓ Low / No Risk
Integer Underflow	Complete	Complete	✓ Low / No Risk
Correct Token Standards Implementation	Complete	Complete	✓ Low / No Risk
Timestamp Dependency for Crucial Functions	Complete	Complete	✓ Low / No Risk
Exposed _Transfer Function	Complete	Complete	✓ Low / No Risk
Transaction-Ordering Dependency	Complete	Complete	✓ Low / No Risk
Unchecked Call Return Variable	Complete	Complete	✓ Low / No Risk
Use of Deprecated Functions	Complete	Complete	✓ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
State Variable Default Visibility	Complete	Complete	✓ Low / No Risk
Deployer Can Access User Funds	Complete	Complete	✓ Low / No Risk

The contract code is verified on BSCScan.

The vulnerabilities listed above were not found in the token's Smart Contract.

Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

[0xe44e3f7bf371f0ef20b5721ad0da8739655132fd](https://www.etherbase.io/etherscan/address/0xe44e3f7bf371f0ef20b5721ad0da8739655132fd)

The address above has authority over the ownable functions within the contract.

This allows the owner to call certain functions within the contract. Any compromise to the owner wallet may allow these privileges to be exploited.

We recommend:

- Establishing a Time-Lock with reasonable latency
- Assignment of privileged roles to multi-signature wallets

Contract Code Audit – Owner Accessible Functions

Function Name	Parameters	Visibility	Audit Notes
renounceOwnership		public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
transferOwnership	address newOwner	public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromReward	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
includeInReward	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setMoveBnbToWallets	bool state	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromFee	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
includeInFee	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
set_Fees	bool isBuy, uint reflection, uint marketing, uint development, uint nftreasury, uint bback	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setMinimumWeiForTokenomics	uint _value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
transferForeignToken	address _token, address _to, uint _value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
Sweep		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
betterTransferOwnership	address newOwner	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
ActivateMarket		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setLimits	uint maxTokenSellTX, uint maxTokenBuyTX, uint maxWalletz	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setMarketingAddress	address _value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setDevelopmentAddress	address _value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.

The functions listed above can be called by the contract owner.

If contract ownership has been renounced there is no way for the above listed functions to be called.

Contract Code Audit – Owner Accessible Functions

Function Name	Parameters	Visibility	Audit Notes
setNft_treasuryAddress	address _value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setNft_BuybackWalletAddress	address _value	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setSwapAndLiquify	bool _state, uint _intervalSecondsForSwap	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
editPowerUser	address _target, bool _status	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
editPremarketUser	address _target, bool _status	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
editExcludedFromFees	address _target, bool _status	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
editBatchExcludedFromFees	address[] memory _address, bool _status	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
editAutomatedMarketMakerPairs	address _target, bool _status	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
KKMigration	address[] memory _address, uint256[] memory _amount	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.

The functions listed above can be called by the contract owner.

If contract ownership has been renounced there is no way for the above listed functions to be called.

Liquidity Ownership – Locked / Unlocked

Locked liquidity information has been found.

This page will contain links to locked liquidity for the project if we are able to locate that information.

Pinksale

<https://www.pinksale.finance/pinklock/detail/0x6C46422A0f7dbbAD9BEC3BbBC1189bfAf9794B05?chain=BSC>

Contract Code Audit – Mint Functions

This Contract Cannot Mint New LTRBT Tokens.

We do understand that sometimes mint functions are essential to the functionality of the project.

A mint function was not found in the contract code.

Contract Transaction Fees

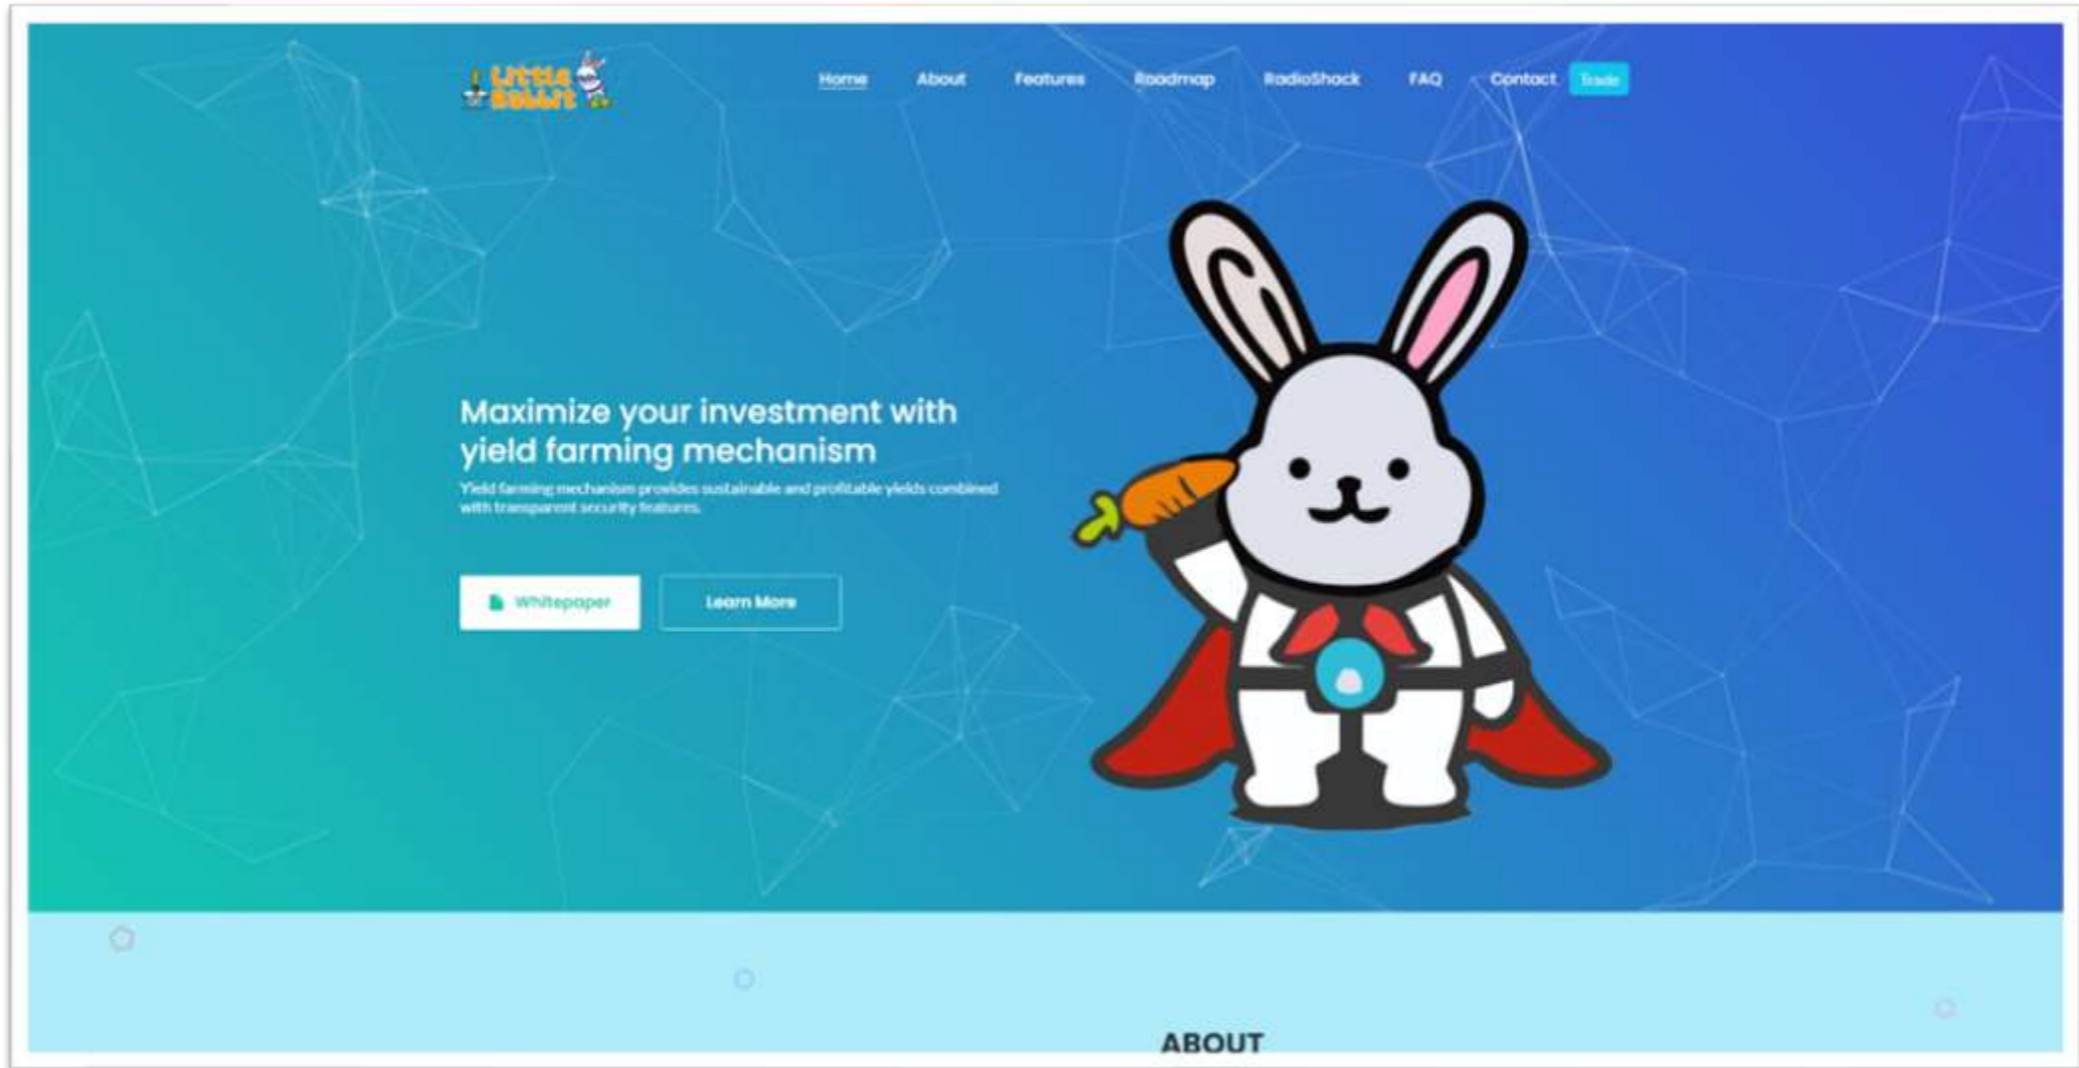

At the time of Audit the transaction fees (“tax”) listed below are the fees associated with trading. These fees are taken from every buy and sell transaction unless otherwise stated.

The infographic is divided into four quadrants, each with a distinct icon and title. The top-left quadrant features a dollar sign icon and is titled 'Selling Fee', listing various percentages for sell fee, buyback, marketing, development, reflections, and NFT treasure. The top-right quadrant features a circle icon and is titled 'Buying Fee', listing percentages for buy fee, buyback, marketing, development, reflections, and NFT treasure. The bottom-left quadrant features a coin icon and is titled 'What does Holders gain by holding?', explaining that a 1% fee is used for reflections to all holders. The bottom-right quadrant features a bookmark icon and is titled 'Ownership Restriction', specifying a maximum buy/sell percentage and a total supply limit.

Category	Item	Percentage
Selling Fee	Sell fee	8%
	Buyback	2%
	Marketing	3%
	Development	1%
	Reflections	1%
	NFT treasure	1%
Buying Fee	Buy fee	7%
	Buyback	1%
	Marketing	3%
	Development	1%
	Reflections	1%
	NFT treasure	1%
What does Holders gain by holding?	Fee used for reflections to all holders	1%
Ownership Restriction	Max buy/sell of total supply	10% / 0.5%
Ownership Restriction	Total supply limit	1,000,000,000,000 LTRBT

Website Part 1 – Overview

www.littlerabbitproject.com

Above images are actual snapshots of the current live website of the project.

Website was registered on 06/26/2022, registration expires 06/26/2023.

X This does not meet the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

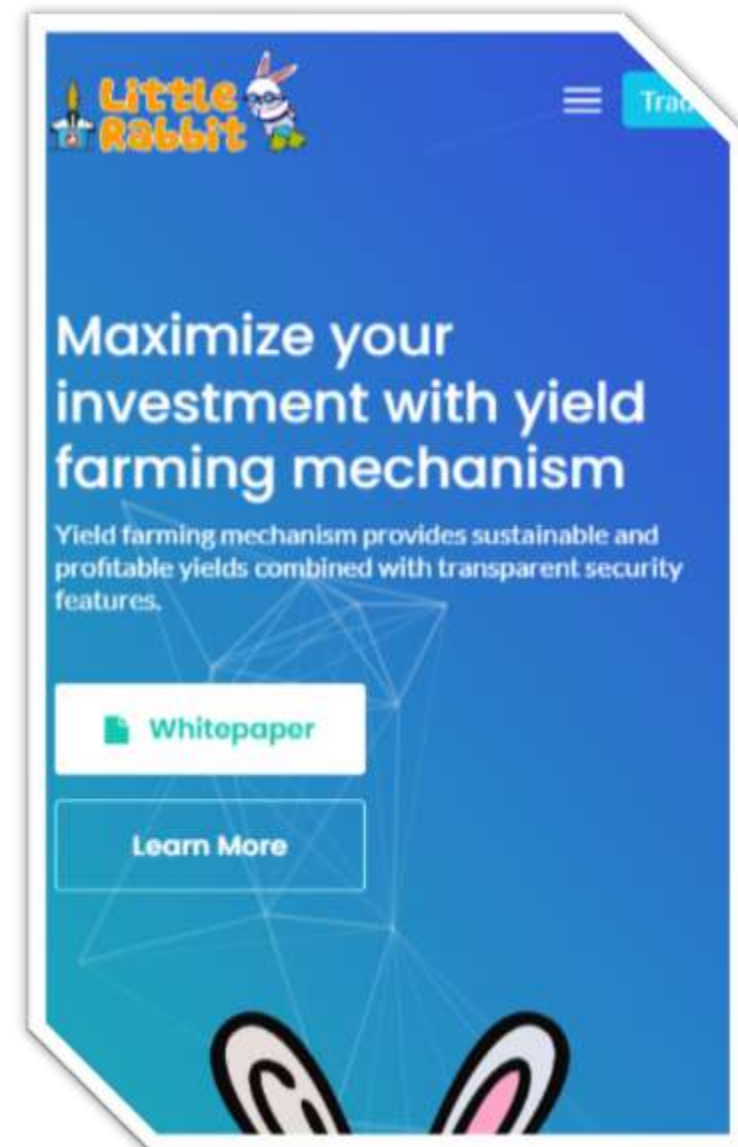

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: littlerabbitproject.com

Issued by: R3

Valid Until: 09/24/2022

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

[Contact](mailto:contact@littlerabbitproject.com)

contact@littlerabbitproject.com

SPAM / MALWARE / POPUPS

No malware found

No injected spam found

No internal server errors

No popups found

Domain is marked clean by Google, McAfee, Sucuri Labs, & ESET

Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

5	0xafcf98edabadb25ebbbe0fd7881932b092bb934	4,000,000,000,000	0.4000%

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.

Team Overview

We are unable to find any information about the team on the website at this time. Projects may choose to stay anonymous for a myriad of reasons.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You
