

New Guinea Singing Dog Inu (NEWINU)

ERC-20 Audit

Performed at block 9605346

PERFORMED BY DESSERT FINANCE
FOR CONTRACT ADDRESS: 0X1997830B5BEB723F5089BB8FC38766D419A0444D

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC and ERC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove liquidity (“Rug Pull”), sell off tokens, or completely exit scam. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Website Part 1 – Overview

www.newinu.org

Website Preview & Mobile Test

Above images are actual snapshots of the current live website of the project.

Website was registered on 05/10/2021, registration expires 05/10/2022.

This is a possible flag. The minimum registration length we like to see for domains is 3 years.

Website Part 2 – Checklist

- ✓ Responsive
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

The website contained a no minor JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the responsive check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

Console check for any severe JavaScript errors came back clean. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: newinu.org

Issued by: R3

Valid Until: 08/07/2021

CONTACT EMAIL

A valid contact email was not found on the official website. Contact email is listed as shown below:

ERC-20 Contract Audit – Common Vulnerabilities

```
pragma solidity ^0.8.0;

abstract contract Context {
    function _msgSender() internal view virtual returns (address payable) {
        return msg.sender;
    }

    function _msgData() internal view virtual returns (bytes memory) {
        return msg.data;
    }
}

interface ERC20 {
    // Returns the amount of tokens in existence.
    function totalSupply() external view returns (uint256);

    // Returns the amount of tokens owned by 'account'.
    function balanceOf(address account) external view returns (uint256);

    // Returns 'amount' tokens from the caller's account to 'recipient'.
    // Returns a boolean value indicating whether the operation succeeded.
    // Emits a 'Transfer' event.
    function transfer(address recipient, uint256 amount) external returns (bool);

    // Returns the remaining number of tokens that 'spender' will be
    // allowed to spend on behalf of 'owner' through 'transferFrom'. This is
    // zero by default.
    // This value changes when 'approve' or 'transferFrom' are called.
    function allowance(address owner, address spender) external view returns (uint256);

    // Approve 'spender' to be allowed to spend 'amount' ether for the caller's tokens.
    // Returns a boolean value indicating whether the operation succeeded.
    // WARNING: Allowance granted by this method is not enforceable.
}
```

- ✓ Integer Underflow
- ✓ Integer Overflow
- ✓ Callstack Depth Attack
- ✓ Timestamp Dependency
- ✓ Parity Multisig Bug
- ✓ Transaction-Ordering Dependency

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is verified on Etherscan.

Common vulnerabilities were not found in the token's Smart Contract as shown above.

Social Media

We were able to locate a variety of Social Media networks for the project including Twitter, Telegram, and Reddit. All links have been conveniently placed below.

[@newinu_official](https://twitter.com/newinu_official)

[@NewGuineaSingingDog](https://t.me/NewGuineaSingingDog)

[/r/newinu](https://www.reddit.com/r/newinu)

Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media platforms with a healthy amount of activity on all of them. We found a Twitter, and Subreddit.

Our only suggestion to the project would be to clear up the verbiage about the 2% transaction fee which is distributed to the holders. Part of that transaction fee is sent to the burn wallet as it is a holder but the website may make it seem like there is a 4% transaction fee to some users.

It is important to note that there is a 2% tax on EVERY transaction including buys and sells. The majority goes to its holders and a small amount goes to the burn wallet.

Suggestions for Improvement

1. Add contact email to main website.
2. Consider adding more content to the homepage.
3. Clear up verbiage about amount that goes to burn address.

Top Token Holders

At the time of audit, the top holder was the Burn Address – holding 39.5% of the entire token supply. The top token holders at the time of the audit are shown below.

New Guinea Singing Dog Inu Top 100 Token Holders

Source: Etherscan.io

1. [0x00dead](#) – Dead Wallet – burned tokens that will be removed from circulation forever. (39.5%)
2. [0xa31f7a24cb4b353839009d209ff1dc2a496e72ad](#) – 5.74% of the total supply is in the 2nd largest holder’s wallet. We are told that this is an early purchaser of the token.
3. [0xedfda531b7c7994cf0c9732e1abb37da99f2f1b4](#) – 5.74% of the total supply is in the 3rd largest holder’s wallet. We are told that this is an early purchaser of the token.

Location Audit

We are unable to identify a central location for the project at this time.

Team Overview

We are unable to find any specific information about the team on the website at this time. Projects may choose to stay anonymous for a myriad of reasons.

Potential Signs of Risk

NO CONTACT EMAIL ON
WEBSITE

TX FEE VERBIAGE MAY BE CONFUSING
FOR SOME

PROJECT HAS COMMON USE-CASE
(REFLECT TOKEN)

The above listed are the top 3 risk indicators of the project. These are by no means assigning the project as a risky project. Every project will have the top risk indicators posted. It is crucial to note that some may be more important than others.

Potential Signs of Confidence

1

PROJECT IS RECEPTIVE TO
CRITICISM

2

PROJECT IS TRANSPARENT ABOUT
BEING A MEME TOKEN

3

CLEAR TOKENOMICS

4

CONTRACT CODE FOUND AND
VALIDATED ON ETHERSCAN

5

SSL CERTIFICATE WAS
FOUND AND VALID

6

LARGE STARTUP CAPITAL
REQUIRED FOR NEW ERC-20
TOKENS

The above listed are the top 6 confidence indicators of the project. These are by no means assigning the project as a confident project. Every project will have the top 6 confidence indicators posted. It is crucial to note that some may be more important than others.

Roadmap

A roadmap was not found on the official website.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You
