

Otaku Token (OTKU)

BEP-20 Audit

Performed at block **8938606**

PERFORMED BY DESSERT FINANCE

FOR CONTRACT ADDRESS: **0x5386D3862Df993756CB7479C2Ebe34EecE983Ab1**

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Website Part 1 – Overview

www.otaku-token.io

Above images are actual snapshots of the current live website of the project.

Website was registered on 05/25/2021, registration expires 05/25/2024, previously 05/25/2022

✓ This meets meet the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

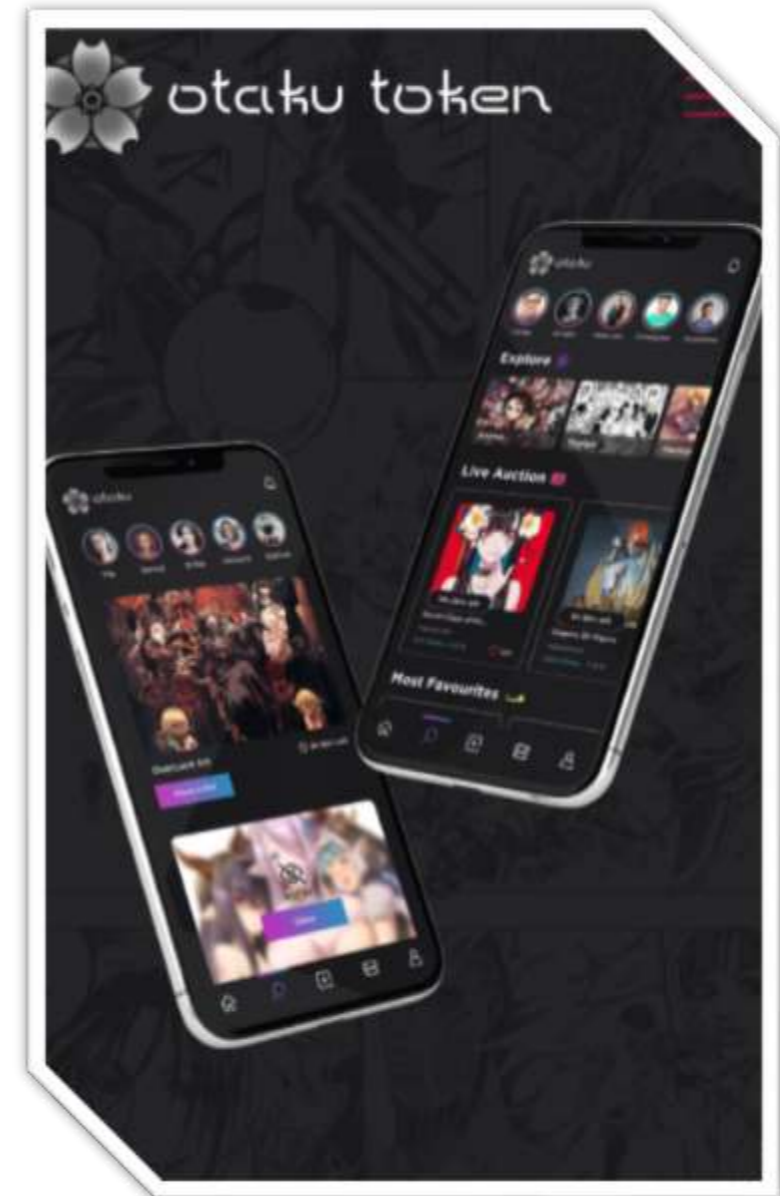

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

No JavaScript errors were found. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: otaku-token.io

Issued by: Amazon

Valid Until: 07/16/2022

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

[Contact](mailto:Support@Otaku-Token.io)

// SPDX-License-Identifier: Unlicensed
pragma solidity ^0.4.18;

interface ERC20 {
    function totalSupply() external view returns (uint256);
    /**
     * @dev Returns the amount of tokens owned by 'account'
     */
    function balanceOf(address account) external view returns (uint256);
    /**
     * @dev Moves 'amount' tokens from the caller's account to 'recipient'.
     * Returns a boolean value indicating whether the operation succeeded.
     * Emits a {Transfer} event.
     */
    function transfer(address recipient, uint256 amount) external returns (bool);
    /**
     * @dev Returns the remaining number of tokens that 'spender' will be
     * allowed to spend on behalf of 'owner' through {transferFrom}. This is
     * zero by default.
     * This value changes when {approve} or {transferFrom} are called.
     */
    function allowance(address owner, address spender) external view returns (uint256);
    /**
     * @dev Sets 'amount' as the allowance of 'spender' over the caller's tokens.
     * Returns a boolean value indicating whether the operation succeeded.
     * IMPORTANT: Beware that changing an allowance with this method brings the risk
     * that someone may use both the old and the new allowance by unfortunate
     * transaction ordering. One possible solution to mitigate this race
     * condition is to first reduce the spender's allowance to 0 and set the
     * desired value afterwards.
     * https://github.com/ethereum/EIPs/issues/20#issuecomment-261191229
     */
    function approve(address spender, uint256 amount) external returns (bool);
    /**
     * @dev Moves 'amount' tokens from 'spender' to 'recipient' using the
     * allowance mechanism. 'amount' is then deducted from the caller's
     * allowance.
     * Returns a boolean value indicating whether the operation succeeded.
     * Emits a {Transfer} event.
     */
    function transferFrom(address sender, address recipient, uint256 amount) external returns (bool);
}
```

- ✓ Integer Underflow
- ✓ Integer Overflow
- ✓ Correct Token Standards Implementation
- ✓ Timestamp Dependency for Randomness
- ✓ Unexposed Private Transfer Function
- ✓ Transaction-Ordering Dependency

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on BSCScan.

Common vulnerabilities were not found in the token's Smart Contract as shown above.

Social Media

We were able to locate a vast variety of Social Media networks for the project including Twitter, Telegram, Reddit, Discord, Facebook, and YouTube. All links have been conveniently placed below.

[Twitter](#)

[Telegram](#)

[Reddit](#)

[Discord](#)

[Facebook](#)

[YouTube](#)

✓ **At least 3 social media networks were found.**

Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for the project. Social Media channels included Twitter, Telegram, Reddit, Discord, Facebook and YouTube. All social media channels had a healthy amount of activity.

It is important to note that there is an 10% tax on EVERY transaction including buys and sells. 4% distributed to all holders, 2% is burned, 2% is added to liquidity and 2% is sent back to the team for development and marketing.

The website also shows 5% of tokens allocated for surprise rewards. ✓ **Resolved**
The team has clarified that these will be taken out of the marketing or dev wallets.

We were unable to find an email address listed on the website. We navigated to Twitter, then to the pinned LinkTree and we were able to uncover a contact email as well as a TikTok account and Instagram account not listed on the main website. ✓ **Resolved**

Suggestions for Improvement

1. Clarify where the 5% of tokens for surprise rewards will be coming from clearly on the website/token distribution chart. ✓ **Resolved**
2. Update domain registration to 3+ years ✓ **Resolved**
3. Update the website with a clear contact email and consider adding links to existing Instagram and Tiktok ✓ **Resolved**

Top Token Holders

The entire supply was in one wallet at the time of audit. As this project has not launched yet, we expect this to change very quickly. Please visit the link below to view the most up-to-date list of holders on BSCScan.

OTHER ACCOUNTS

0x2c8a306949b90c030050b979dc1e995dc11b7293

Location Audit

The team has identified the primary project location as Singapore.

Team Overview

Team information was found in the whitepaper and has been shown below.

✓ **The Head of Product at the project has been DessertDoxxed with a valid ID.**

We are an international team of cryptocurrency enthusiasts that came together over our shared passion in the Anime and Manga world. We each bring specific skills to the table, as highlighted in more detail below. We are 'soft-doxxing' in order to show our accountability and commitment to the project, as well as highlight our credibility, without losing our complete right to privacy while we are in the higher risk launch phases of the project.

As we move from phase 1 into the Phase 2 (the product phase), we fully anticipate to require more expertise from within the technology (cloud) and the fintech industry within the jurisdiction we intend to operate within, and at that point of hire, we will be fully doxing the entire team. We wouldn't want to invest in a completely anonymous project, and we don't expect you to either. However we hope you can appreciate our right to a degree of privacy while we launch this project as some members of the team still have careers running in tandem until we are in the stabilizing phase of Phase 1.

Potential Signs of Risk

1 YEAR DOMAIN REGISTRATION

✓ Resolved

PROJECT DOES NOT HAVE A CONTACT EMAIL LISTED ON WEBSITE

✓ Resolved

PROJECT HAS COMMON USE-CASE (REFLECT TOKEN)***

***Platform currently under development

The above listed are the top 3 risk indicators of the project. These are by no means assigning the project as a risky project. Every project will have the top risk indicators posted. It is crucial to note that some may be more important than others.

Potential Signs of Confidence

TEAM HAS BEEN VERY RESPONSIVE IN ADDRESSING QUESTIONS

TRANSPARENT FEE STRUCTURE

PLANNED DXSALE LIQUIDITY LOCK

TRANSPARENT TOKEN ALLOCATION

SSL CERTIFICATE WAS FOUND AND VALID

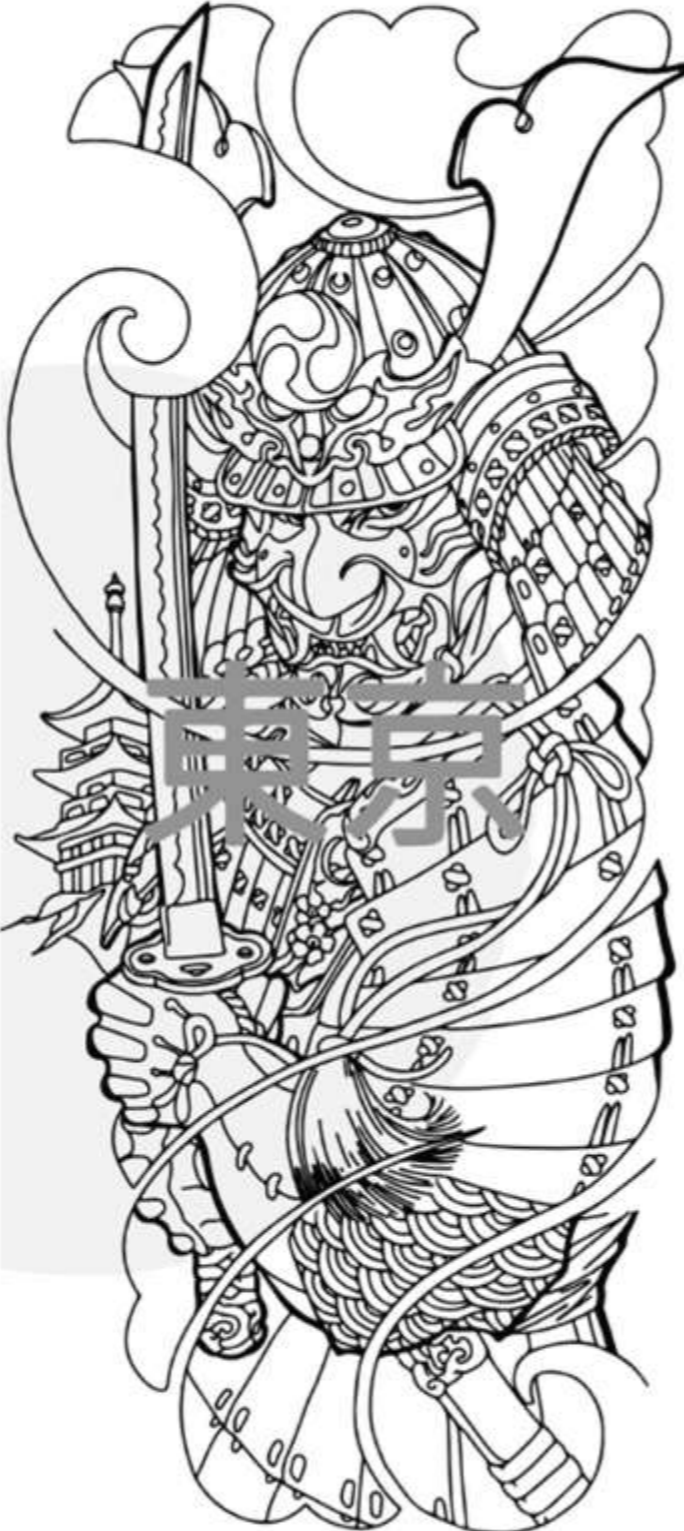

ACTIVE SOCIAL MEDIA PRESENCE

The above listed are the top 6 confidence indicators of the project. These are by no means assigning the project as a confident project. Every project will have the top 6 confidence indicators posted. It is crucial to note that some may be more important than others.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

Q3 2021, Phase 1

- Concept creation
- Contract development
- Contract pre-launch audit
- Marketing
- TOKEN LAUNCH
- Coingecko listing
- Coinmarket cap listing
- Manual burn
- Partnerships with manga creators

Q4 2021, Phase 2

- Otaku-Token NFT Platform prototype
- CEX exchange listings
- Manga / Anime Production partnerships
- Manual burn

Q1 2021, Phase 3

- Otaku-Token NFT Platform BETA
- Global Marketing
- Affiliation with COMIC-Con
- Partnerships with more Publishers / Creators
- Manual burn

Q2 2022, Phase 4

- CERTIK Audit
- Otaku-Token NFT Platform Live
- Otaku Wallet BETA
- Binance Listing
- Bitmart Listing

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You
