INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for the project. Social Media channels included Twitter, Telegram, Telegram Channel, Medium and Instagram. All social media channels had a healthy amount of activity.

It is important to note that there is an 11% tax on EVERY transaction including buys and sells. 2% is distributed to token holders, 3% is sent back to the team to be used for project marketing and 6% is for automatic buy backs of tokens, these tokens are burned.

There is an additional function called “Call Police” this function is currently attached to project milestones but will eventually be controlled through a community-consensus-based dApp. We understand this function but to the average user we would like the team to provide clarity on the website of “all bought tokens” as this could appear that all holder bought tokens are also burned.

Suggestions for Improvement

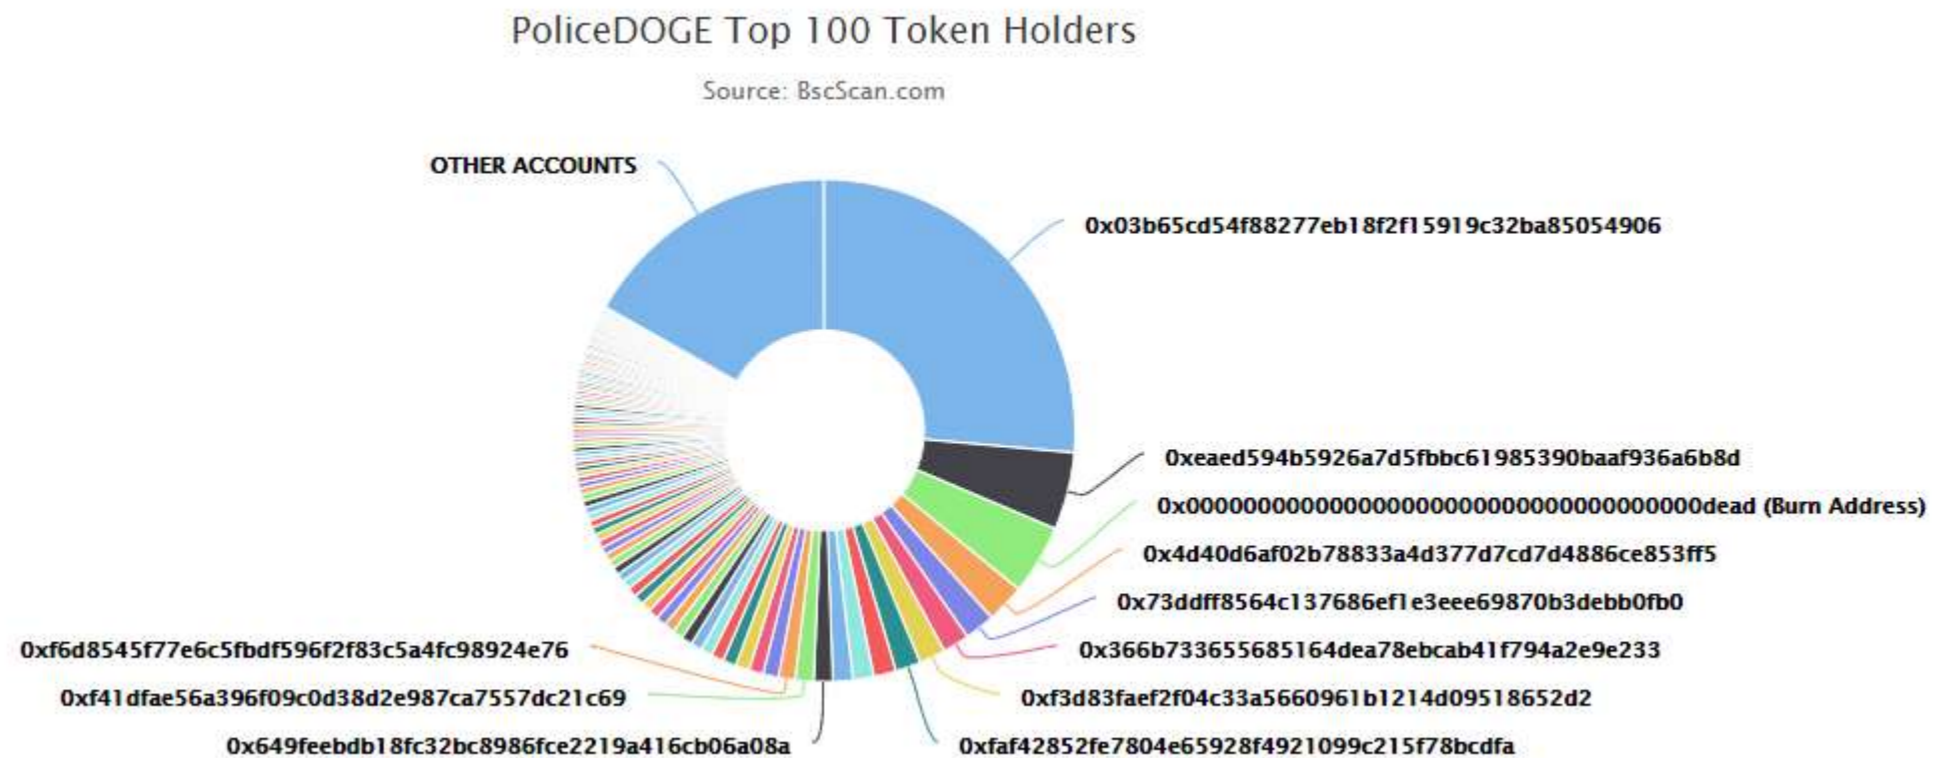

1. Update verbiage of Call Police function to clarify token holders tokens will not be burned.
2. Update domain registration to 3+ years

Top Token Holders

The top token holders at the time of the audit are shown below.
