## INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

✓ At least 3 social media networks were found.

# Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for the project. Social Media channels included Twitter, Telegram and Instagram. All social media channels had a healthy amount of activity.

It is important to note that the transaction fees are 7% and lower slippage may be rejected.

Best practices for mobile are vertical scrolling, not horizontal. There are some elements within the mobile website that have horizontal scrolling which may not feel intuitive to users allowing them to miss important information.

The project appears to have goals to create NFTs that are redeemable for meetings with PornHub stars. The NFTs aim to serve multiple purposes. First, they will provide liquidity with half of the funds required to purchase then, second, they will provide payment to the corresponding star who's persona is being used in the NFT. At the time of audit, the NFT platform was not live.

## Suggestions for Improvement

1. Create a vertical roadmap for mobile for a better mobile experience
2. Update domain registration to 3+ years
3. Fix minor JavaScript errors on the website
