INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for the project. Social Media channels included Twitter, Telegram, and Instagram. All social media channels had a healthy amount of activity.

It is important to note that there is an 10% tax on EVERY transaction including buys and sells. 4% goes to providing liquidity, 4% is distributed to the token holders, and 2% is burned.

The first question supporters of this project may have is whether or not the ambassadors are real people. We were able to track down multiple videos of ambassadors of the project explicitly mentioning ***Pornstar Finance*** on Instagram. The links have been posted below:

Suggestions for Improvement

1. Update domain registration to 3+ years

Top Token Holders

The entire supply was found in 3 wallets at the time of audit, with 20% being in the burn wallet. We expect this to change dramatically as the token goes through any presale or distribution phases. Please find the most up-to-date list of token holders below.

Unlimited Possibilities for Creators

CREATORS DO NOT NEED A DEGREE TO CREATE NFT'S!

Creating and listing NFT's can be complicated for most. From learning blockchain development to understanding the features, internal workings, and strings of code. The PornStar team is in the process of developing an easy, user-friendly API that can be implemented in new and existing adult platforms. Enabling users of all skill sets to create NFT's with just a few clicks. Our API also offers multiple customization options for creators to spice things up a bit. Once we have launched the BETA application and it is a success, we will continue with weekly updates adding new and exciting features.

API WILL BE AVAILABLE TO ALL PLATFORMS

The Pornstar API will be available to all platforms, including but not limited to live cams, tube sites, dating, adult gaming, and much more.

PORNSTAR (STAR) PAYMENT GATEWAY

The PornStar token (STAR) will be offered as a payment option to all existing and new adult websites that incur high processing fees from centralized payment processors like Epoch, PayPal, and many others.

This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.
