BSC/FTM Audit

Performed at block **11437133**

PERFORMED BY DESSERT FINANCE
FOR BSC CONTRACT ADDRESS: 0xE821FF93aCd958D8EF637ff9627217d28A5B6845
FOR FTM CONTRACT ADDRESS: 0X49894FCC07233957C35462CFC3418EF0CC26129F

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove ***all*** liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

DessertDoxxed

DessertDoxxed is a service offered by Dessert Finance that allows projects to do a private face reveal matched with an I.D to allow founders / team members to privately Doxx themselves to us. This allows an added layer of security to the projects team but also allows an added layer of confident to project supporters.

✓*The founder of this project has been DessertDoxxed*

BEP-20 Contract Code Audit – Overview

Dessert Finance was commissioned to perform an audit on **PtlkxObservatoryInitializable**

```
ubmitted for verification at FtmScan.com on 2021-09-20

gma solidity >=0.6.2 <0.8.0;

@dev Collection of functions related to the address type

rary Address {
 /**
  * @dev Returns true if `account` is a contract.
  *
  * [IMPORTANT]
  * ====
  * It is unsafe to assume that an address for which this function returns
  * false is an externally-owned account (EOA) and not a contract.
  *
  * Among others, `isContract` will return false for the following
  * types of addresses:
  *
  *  - an externally-owned account
  *  - a contract in construction
  *  - an address where a contract will be created
  *  - an address where a contract lived, but was destroyed
  * ====
  */
 function isContract(address account) internal view returns (bool) {
     // This method relies on extcodesize, which returns 0 for contracts in
     // construction, since the code is only stored at the end of the
     // constructor execution.

     uint256 size;
     // solhint-disable-next-line no-inline-assembly
     assembly { size := extcodesize(account) }
     return size > 0;
 }

 /**
  * @dev Replacement for Solidity's `transfer`: sends `amount` wei to
  * `recipient`, forwarding all available gas and reverting on errors.
  *
  * https://eips.ethereum.org/EIPS/eip-1884[EIP1884] increases the gas cost
  * of certain opcodes, possibly making contracts go over the 2300 gas limit
  * imposed by `transfer`, making them unable to receive funds via
  * `transfer`. {sendValue} removes this limitation.
  *
  * https://diligence.consensys.net/posts/2019/09/stop-using-soliditys-transfer-now/[Learn more].
  *
  * IMPORTANT: because control is transferred to `recipient`, care must be
  * taken to not create reentrancy vulnerabilities. Consider using
  * {ReentrancyGuard} or the

Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
State Variable Default Visibility	Complete	Complete	✓ Low / No Risk
Deployer Can Access User Funds	Complete	Complete	✓ Low / No Risk

The contract code is **verified** on BSCScan.

The vulnerabilities listed above were not found in the token's Smart Contract.

Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

Owner Address: 0x94fe90d2e416018f3d07266766b5877ed3a8373b

Contract Code Audit – Mint Functions

This Contract Can Mint New PTLKX Tokens.

We do understand that sometimes mint functions are essential to the functionality of the project. If a mint function is ever listed we will have the team clarify its use case for transparency purposes.

A mint function was found in the contract code with the onlyOwner modifier.

Contract Code Audit – LP/Token Locks

We were provided locking information by the team

1) 50% LP supply Lock
2) 17% team supply timelock

Contract Transaction Fees

At the time of Audit the transaction fees (“tax”) listed below are the fees associated with trading. These fees are taken from every buy and sell transaction unless otherwise stated.

Buy Tax

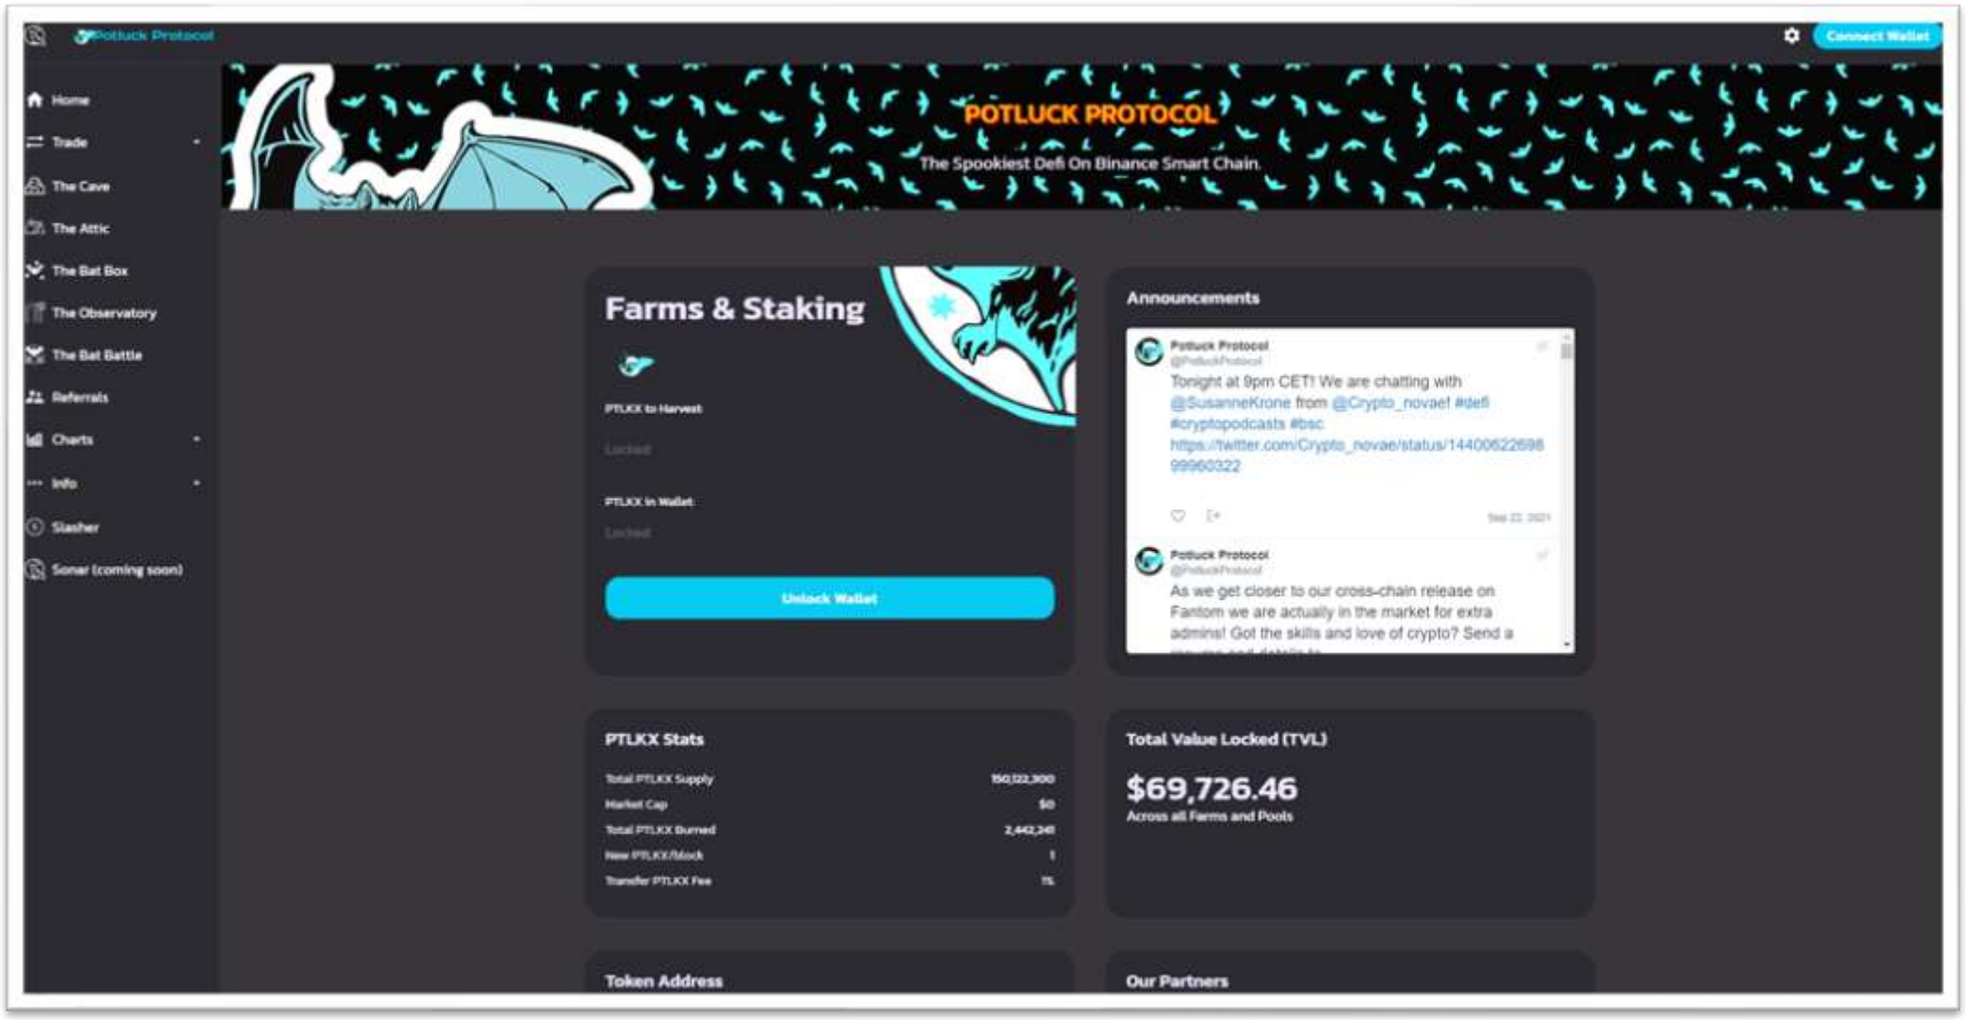
.5%	.5%
LIQUIDITY POOL	BURN

Sell Tax

.5%	.5%
LIQUIDITY POOL	BURN

Website Part 1 – Overview

www.potluckprotocol.com

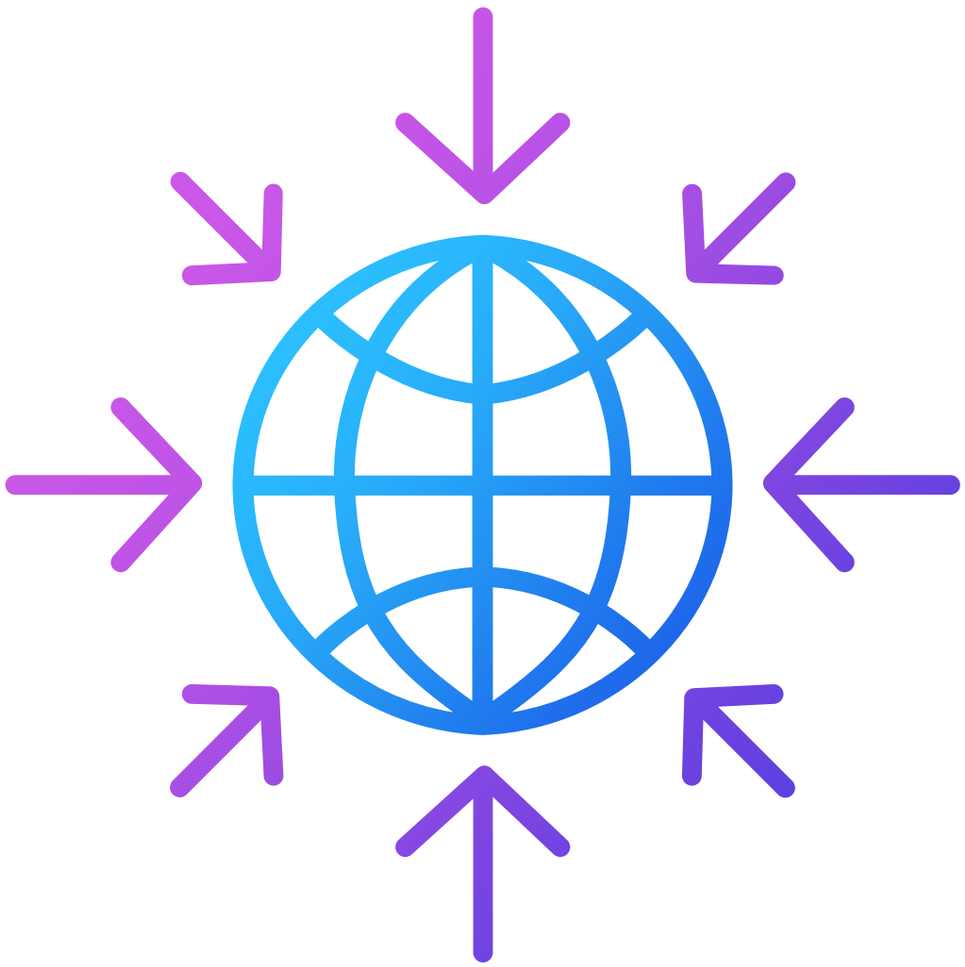


Above images are actual snapshots of the current live website of the project.

Website was registered on 03/20/2021, registration expires 03/20/2022.

✗ This does not meet the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist



- ✓ Mobile Friendly
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

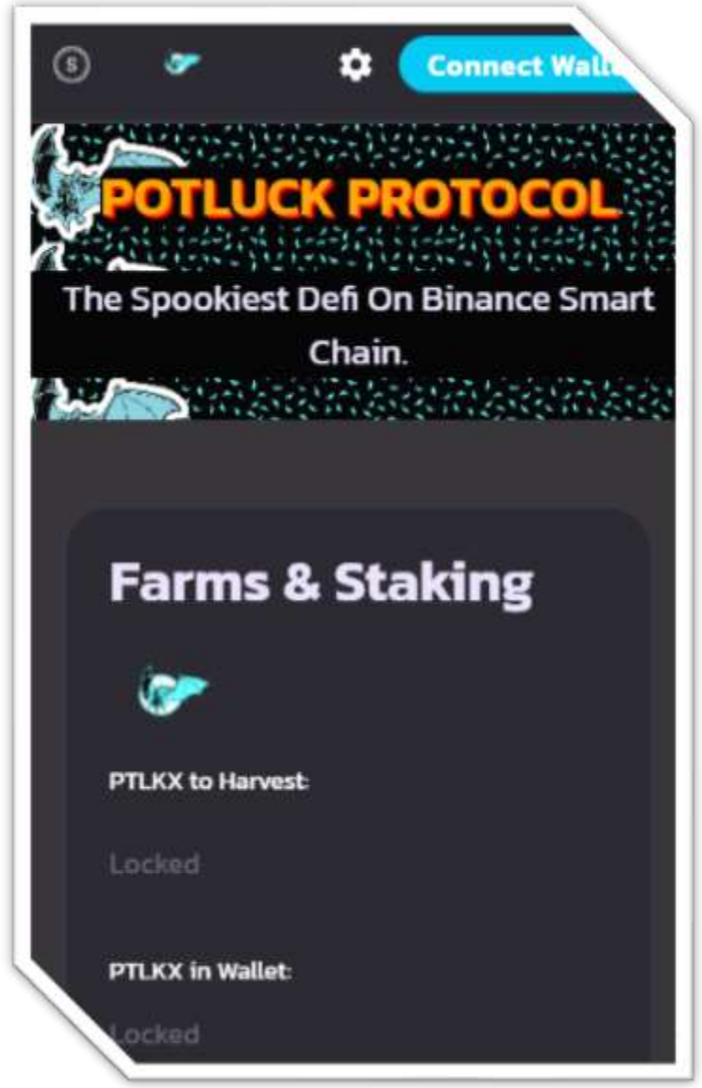
The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.



Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: potluckprotocol.com

Issued by: GlobalSign Atlas R3

Valid Until: 12/25/2021

✓

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

Contact

N/A

✗

SPAM / MALWARE / POPUPS

No malware found

No injected spam found

No internal server errors

No popups found

Domain is marked clean by Google, McAfee, Sucuri Labs, & ESET

✓

Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

Twitter

Telegram
Telegram

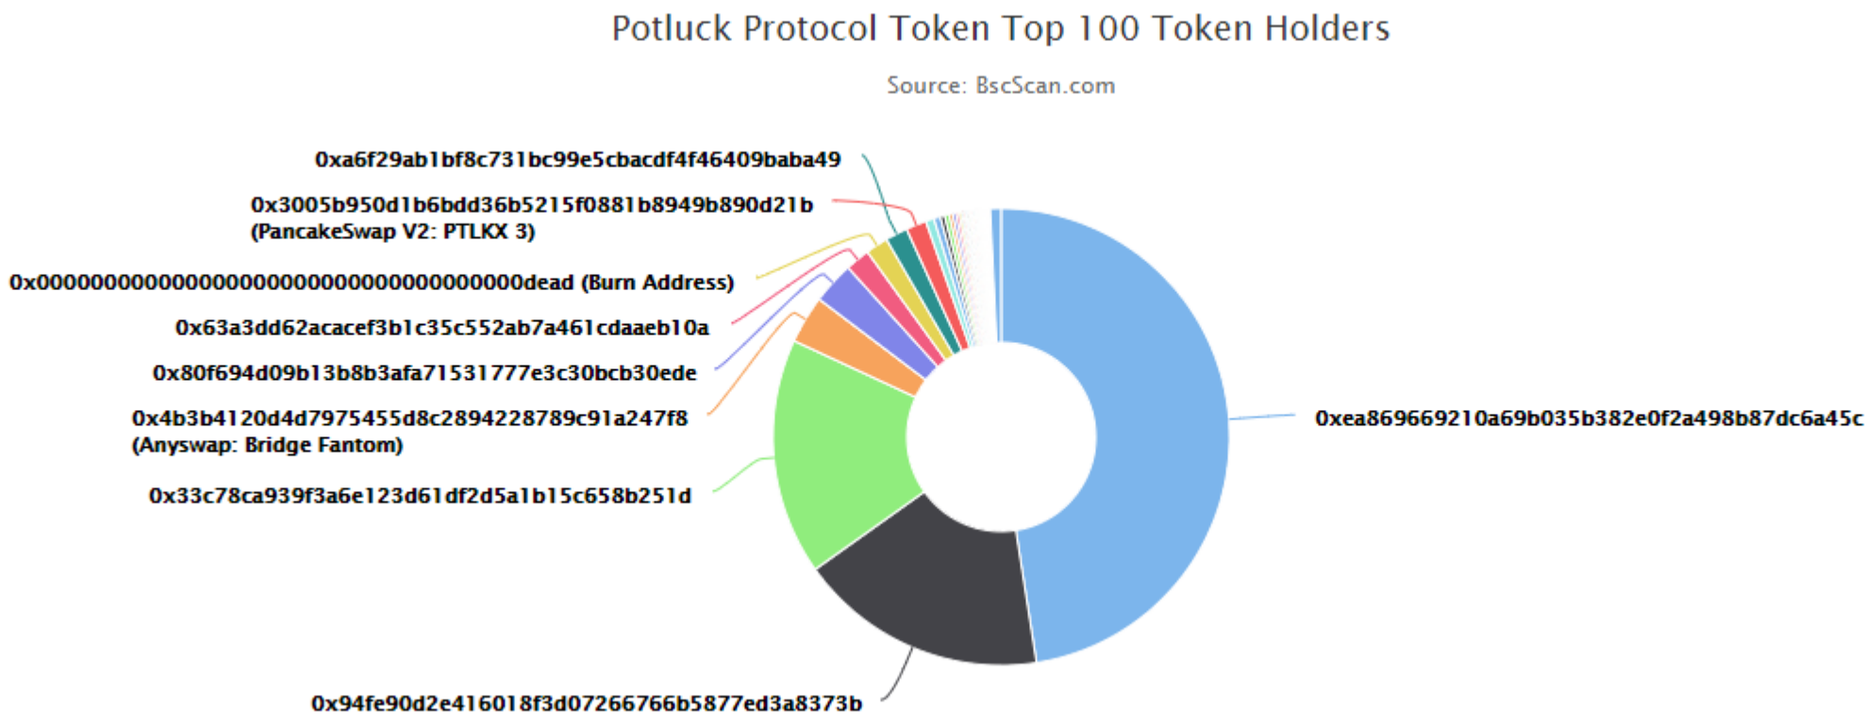
Medium

✓ **At least 3 social media networks were found.**

Top Token Holders

The top token holders at the time of the audit are shown below.

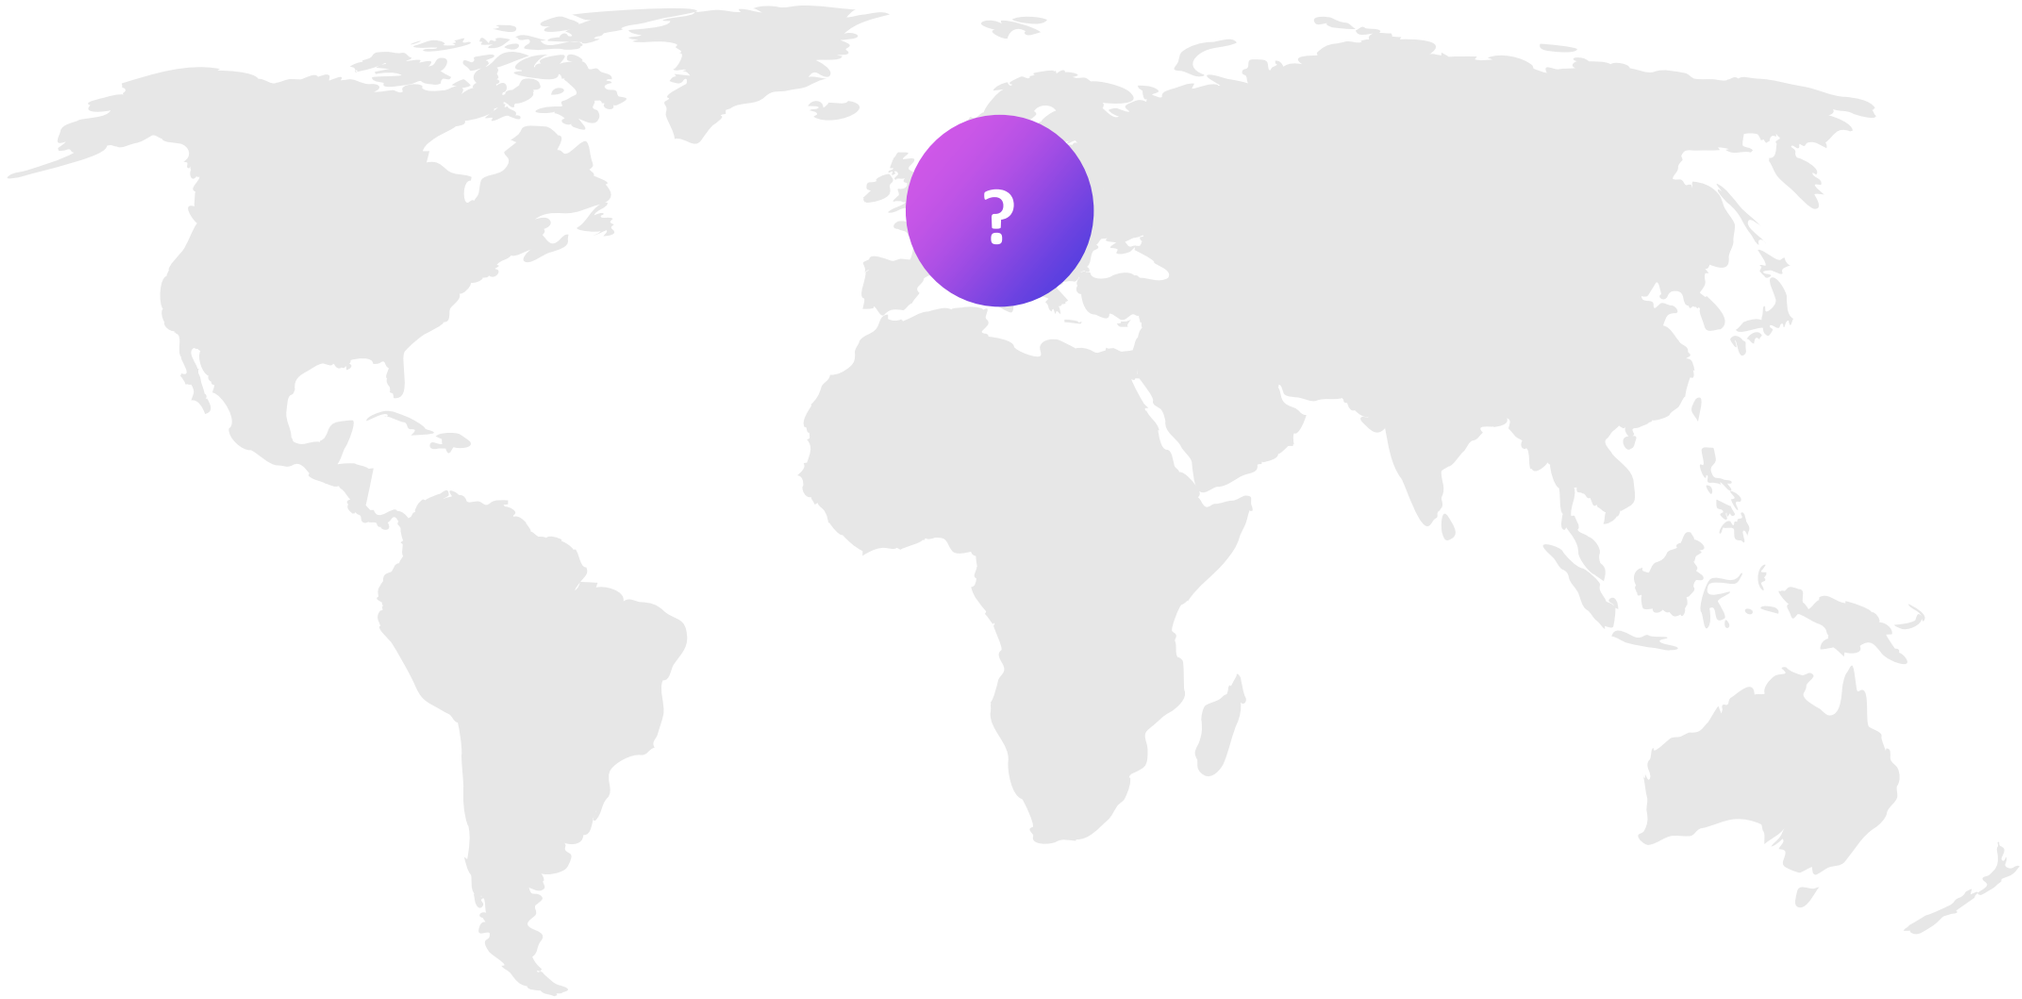
[Click here to view the most up-to-date list of holders]



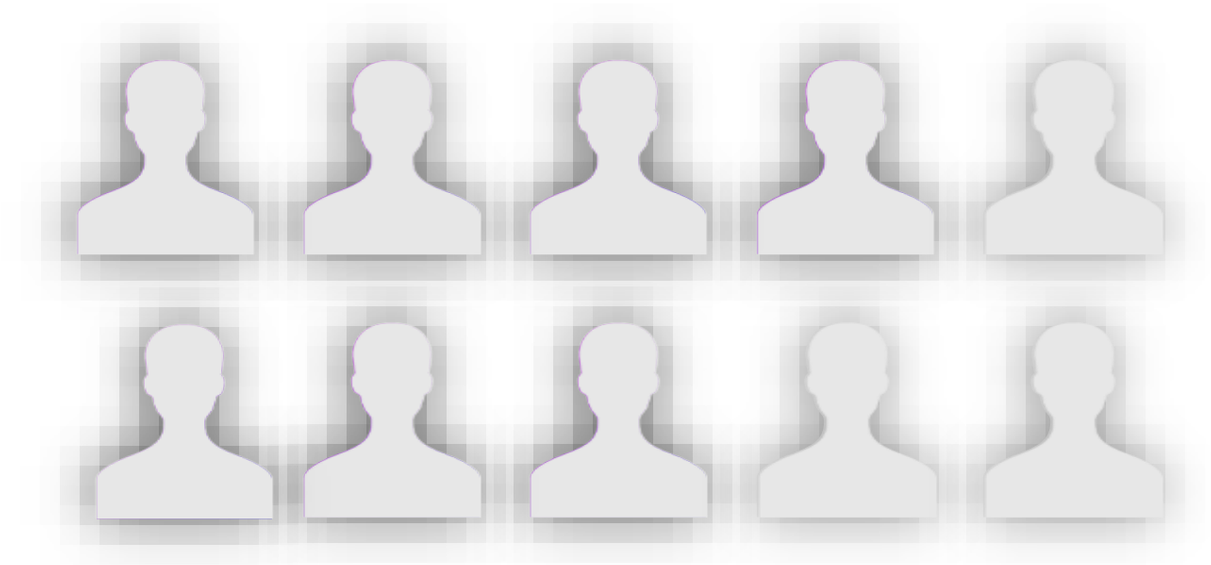
Rank	Address	Quantity (Token)	Percentage
1	0xea869669210a69b035b382e0f2a498b87dc6a45c	72,526,551.080686758762936738	47.5383%
2	0x94fe90d2e416018f3d07266766b5877ed3a8373b	26,912,424.982246134926889435	17.6400%
3	0x33c78ca939f3a6e123d61df2d5a1b15c658b251d	25,541,650	16.7415%

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.



Team Overview



We are unable to find any information about the team on the website at this time. Projects may choose to stay anonymous for a myriad of reasons.

✓*The founder of this project has been DessertDoxxed*

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You
