BEP-20 Audit

Performed at block 13874639

PERFORMED BY DESSERT FINANCE
FOR CONTRACT ADDRESS: 0x72d3882a31c7d9C5d5989AdE65E3C129E5A1717a

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to an audit in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), remove liquidity slowly, sell off tokens, quit the project, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

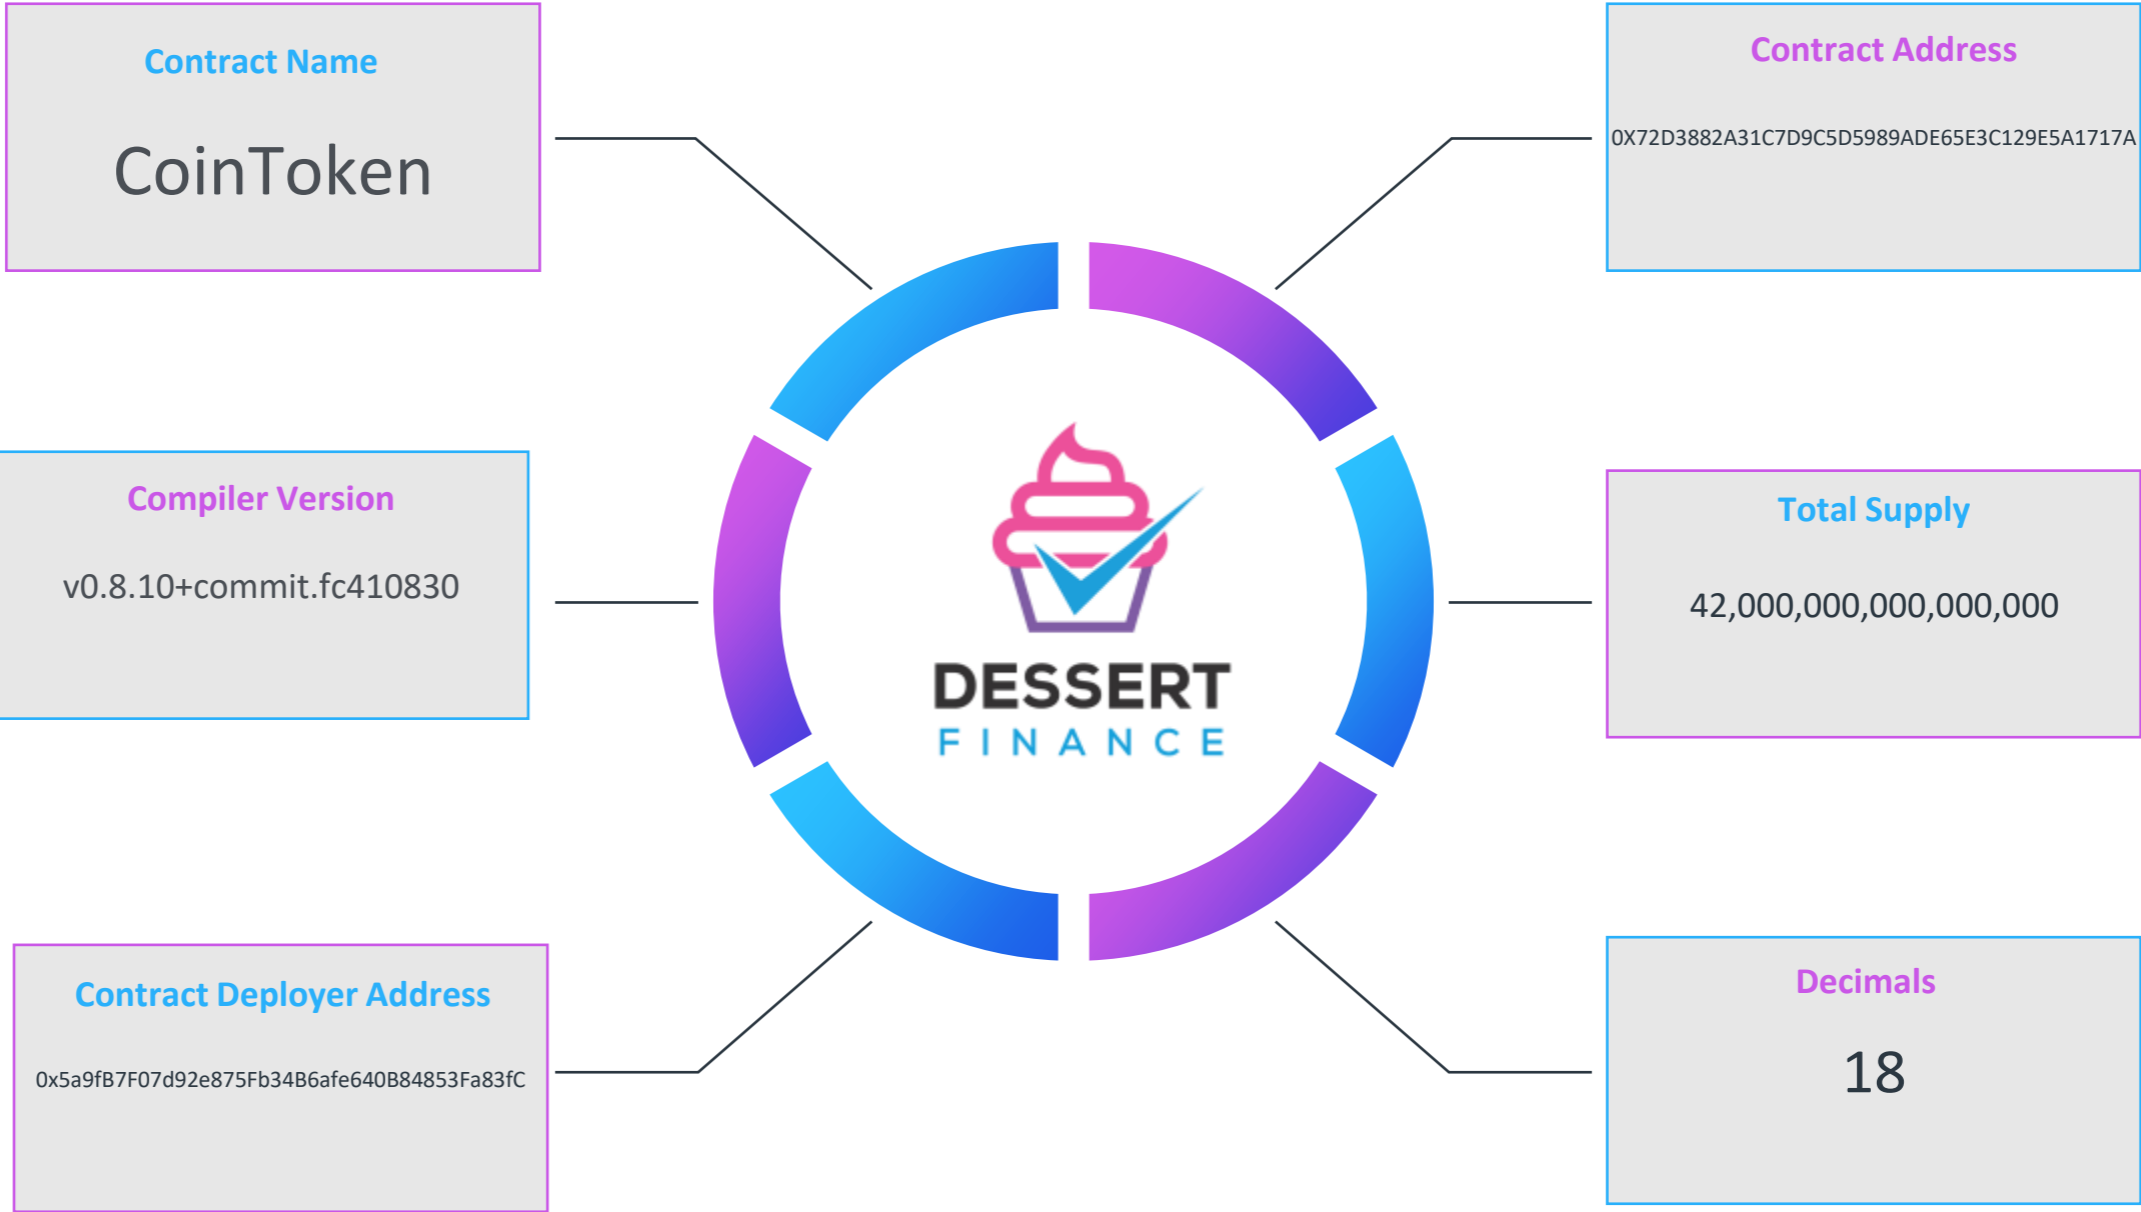

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice. Dessert Finance does not endorse, recommend, support, or suggest any projects that have been audited. An audit is an informational report based on our findings, We recommend you do your own research, we will never endorse any project to invest in.

Contract Code Audit – Token Overview

BEP-20 Contract Code Audit – Overview

Dessert Finance was commissioned to perform an audit on Shiba Surfer (SURF)

```
Submitted for verification at BscScan.io on 2021-12-29
// SPDX-License-Identifier: MIT

pragma solidity ^0.8.9;

/**
 * @dev Interface of the ERC20 standard as defined in the EIP.
 */
interface ERC20 {
    /**
     * @dev Returns the amount of tokens in existence.
     */
    function totalSupply() external view returns (uint256);

    /**
     * @dev Returns the amount of tokens owned by 'account'.
     */
    function balanceOf(address account) external view returns (uint256);

    /**
     * @dev Moves 'amount' tokens from the caller's account to 'recipient'.
     * Returns a boolean value indicating whether the operation succeeded.
     * Emits a (Transfer) event.
     */
    function transfer(address recipient, uint256 amount) external returns (bool);

    /**
     * @dev Returns the remaining number of tokens that 'spender' will be
     * allowed to spend on behalf of 'owner' through {transferFrom}. This is
     * zero by default.
     * This value changes when {approve} or {transferFrom} are called.
     */
    function allowance(address owner, address spender) external view returns (uint256);

    /**
     * @dev Sets 'amount' as the allowance of 'spender' over the caller's tokens.
     * Returns a boolean value indicating whether the operation succeeded.
     *
     * IMPORTANT: Beware that changing an allowance with this method brings the risk
     * that someone may use both the old and the new allowance by unfortunate
     * transaction ordering. One possible solution to mitigate this race
     * condition is to first reduce the spender's allowance to 0 and set the
     * desired value afterwards.
     * See https://github.com/ethereum/EIPs/issues/20#issuecomment-263524729
     * Emits an (Approval) event.
     */
    function approve(address spender, uint256 amount) external returns (bool);

    /**
     * @dev Moves 'amount' tokens from 'spender' to 'recipient' using the
     * allowance mechanism. 'amount' is then deducted from the caller's
     * allowance.
     * Returns a boolean value indicating whether the operation succeeded.
     */
}
```

Compiler Version

v0.8.10+commit.fc410830

Optimization Enabled

Yes with 200 runs

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on BSCScan.

BEP-20 Contract Code Audit – Vulnerabilities Checked

Vulnerability Tested	AI Scan	Human Review	Result
Compiler Errors	Complete	Complete	✓ Low / No Risk
Outdated Compiler Version	Complete	Complete	✓ Low / No Risk
Integer Overflow	Complete	Complete	✓ Low / No Risk
Integer Underflow	Complete	Complete	✓ Low / No Risk
Correct Token Standards Implementation	Complete	Complete	✓ Low / No Risk
Timestamp Dependency for Crucial Functions	Complete	Complete	✓ Low / No Risk
Exposed _Transfer Function	Complete	Complete	✓ Low / No Risk
Transaction-Ordering Dependency	Complete	Complete	✓ Low / No Risk
Unchecked Call Return Variable	Complete	Complete	✓ Low / No Risk
Use of Deprecated Functions	Complete	Complete	✓ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
State Variable Default Visibility	Complete	Complete	✓ Low / No Risk
Deployer Can Access User Funds	Complete	Complete	✓ Low / No Risk

The contract code is verified on BSCScan.

The vulnerabilities listed above were not found in the token's Smart Contract.

Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

[0x5a9fb7f07d92e875fb34b6afe640b84853fa83fc](https://etherscan.io/address/0x5a9fb7f07d92e875fb34b6afe640b84853fa83fc)

The address above has authority over the ownable functions within the contract.

This allows the owner to call certain functions within the contract. Any compromise to the owner wallet may allow these privileges to be exploited.

We recommend:

- Establishing a Time-Lock with reasonable latency
- Assignment of privileged roles to multi-signature wallets

Contract Code Audit – Owner Accessible Functions

Function Name	Parameters	Visibility	Audit Notes
renounceOwnership		public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced. This function has not been called.
transferOwnership	address newOwner	public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
triggerTax		public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
pause		public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced. This allows for the contract to be paused.
unpause		public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
burn	uint256 amount	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
enableBlacklist	address account	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
disableBlacklist	address account	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
exclude	address account	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
removeExclude	address account	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setBuyTax	uint256 dev, uint256 marketing, uint256 liquidity, uint256 charity	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced. No limiter in place, fees can be set to 100
setSellTax	uint256 dev, uint256 marketing, uint256 liquidity, uint256 charity	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced. No limiter in place, fees can be set to 100
setTaxWallets	address dev, address marketing, address charity	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
enableTax		public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
disableTax		public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.

The functions listed above can be called by the contract owner. Notes may or may not be available for

If contract ownership has been renounced there is no way for the above listed functions to be called.

Liquidity Ownership – Locked / Unlocked

Locked liquidity information has been found.

This page will contain links to locked liquidity for the project if we are able to locate that information.

DxSale

<https://dxsale.app/app/v3/dxlockview?id=0&add=0x5a9fB7F07d92e875Fb34B6afe640B84853Fa83fC&type=lplock&chain=BSC>

Contract Code Audit – Mint Functions

This Contract Cannot Mint New SURF Tokens.

We do understand that sometimes mint functions are essential to the functionality of the project.

A mint function was not found in the contract code.

Website Part 1 – Overview

www.shibasurfers.com

Above images are actual snapshots of the current live website of the project.

Website was registered on 12/03/2021, registration expires 12/03/2024.

✓ This meets the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✗ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

The website contained two JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

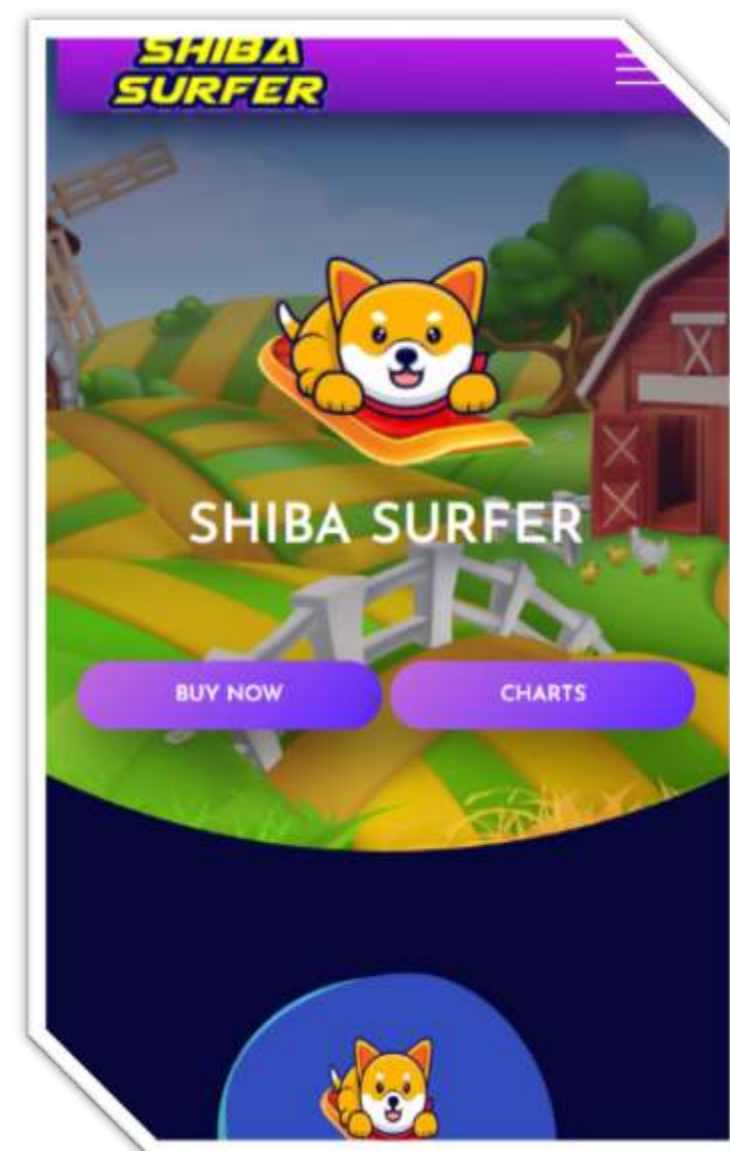

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

Two minor JavaScript errors were found and shown below. No issues with loading elements, code, or stylesheets.

```
✖ Uncaught TypeError: Cannot read app.js:292
  properties of undefined (reading 'className')
    at showSlides (app.js:292)
    at app.js:271

✖ Failed to load resource: the howtobuy.mp4:1
  server responded with a status of 404 ()
```

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: shibasurfers.com

Issued by: cPanel

Valid Until: 03/26/2022

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

[Contact](mailto:support@shibasurfers.com)

support@shibasurfers.com

SPAM / MALWARE / POPUPS

No malware found

No injected spam found

No internal server errors

No popups found

Domain is marked clean by Google, McAfee, Sucuri Labs, & ESET

Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

[Twitter](#)

[Telegram](#)

[GitHub](#)

[Reddit](#)

[Discord](#)

✓ At least 3 social media networks were found.

Top Token Holders

The top token holders at the time of the audit are shown below.

[Click here to view the most up-to-date list of holders](#)

Rank	Address	Quantity (Token)	Percentage
1	Null Address: 0x000...dEaD	10,000,000,000,000,000	23.8095%
2	0x22671187b9039a94f3f3b05effda6853adb8c702 (PancakeSwap Liquidity Pool)	4,555,383,749,897,980.121998355 476789891	10.8462%
3	0x5a9fb7f07d92e875fb34b6afe640b84853fa83fc	2,183,317,322,515,330.211936915 127809789	5.1984%
4	0x89fd36fbfdd51fae935c80c078d7038934d37653	378,787,836,429,356	0.9019%
5	0x750fa62773c11675c272338c370a152e4048d1e3	378,787,836,429,356	0.9019%

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.

Team Overview

We are unable to find any information about the team on the website at this time. Projects may choose to stay anonymous for a myriad of reasons.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You
