BEP-20 Audit

Performed at block **11738958**

PERFORMED BY DESSERT FINANCE
FOR CONTRACT ADDRESS:

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

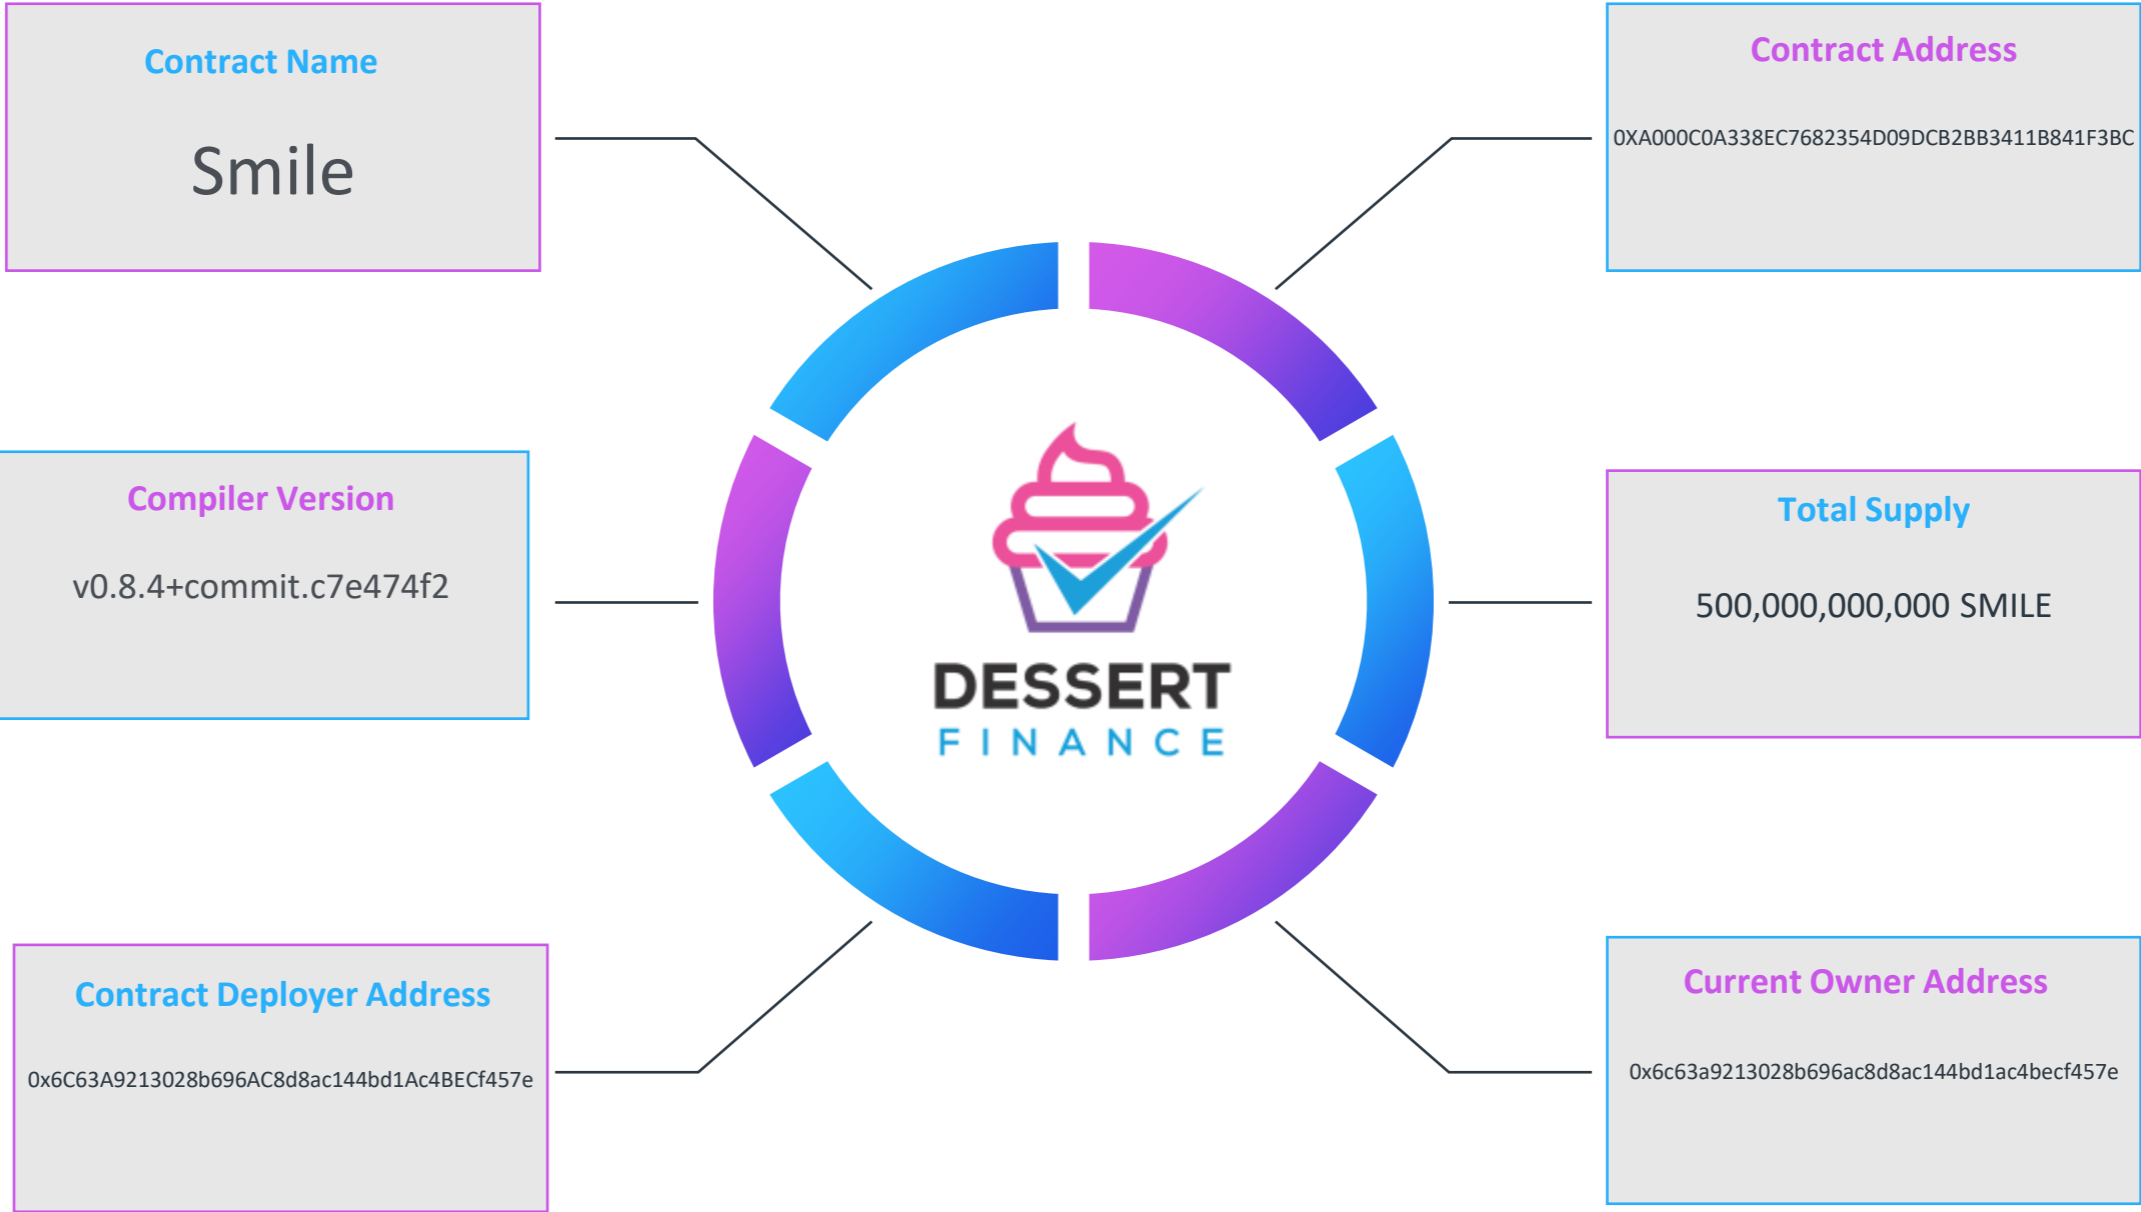

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Yes with 200 runs

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on BSCScan.

BEP-20 Contract Code Audit – Vulnerabilities Checked

Vulnerability Tested	AI Scan	Human Review	Result
Integer Overflow	Complete	Complete	✓ Low / No Risk
Integer Underflow	Complete	Complete	✓ Low / No Risk
Correct Token Standards Implementation	Complete	Complete	✓ Low / No Risk
Timestamp Dependency for Crucial Functions	Complete	Complete	✓ Low / No Risk
Exposed _Transfer Function	Complete	Complete	✓ Low / No Risk
Transaction-Ordering Dependency	Complete	Complete	✓ Low / No Risk
Unchecked Call Return Variable	Complete	Complete	✓ Low / No Risk
Use of Deprecated Functions	Complete	Complete	✓ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
State Variable Default Visibility	Complete	Complete	✓ Low / No Risk
Deployer Can Access User Funds	Complete	Complete	✓ Low / No Risk

The contract code is **verified** on BSCScan.

The vulnerabilities listed above were not found in the token's Smart Contract.

Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

[0x6c63a9213028b696ac8d8ac144bd1ac4becf457e](https://etherscan.io/address/0x6c63a9213028b696ac8d8ac144bd1ac4becf457e)

Liquidity Ownership – Locked / Unlocked

No locked liquidity information has been found.

This page will contain links to locked liquidity for the project if we are able to locate that information. This project has not yet launched, this may change soon.

Contract Code Audit – Mint Functions

This Contract Cannot Mint New SMILE Tokens.

We do understand that sometimes mint functions are essential to the functionality of the project.

A mint function was not found in the contract code.

Contract Transaction Fees

At the time of Audit the transaction fees (“tax”) listed below are the fees associated with trading. These fees are taken from every buy and sell transaction unless otherwise stated.

TRANSACTION MODE

The currency of the transaction is mining, and the UNI rate of return is 9% written into the band mechanism at the same time. The handling fee of the person who operates the band will gradually increase, and all handling fees will be converted into UNI and sent to all token holders. 3% Burn directly.

In the future, holders of Smile Token can enjoy platform income dividends, etc. After Smile Token goes online on major global exchanges, the value and price have increased, and user income will continue to increase.

Website Part 1 – Overview

www.smile-token.com

Above images are actual snapshots of the current live website of the project.

Website was registered on 10/03/2021, registration expires 10/03/2022.

X This does not meet the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

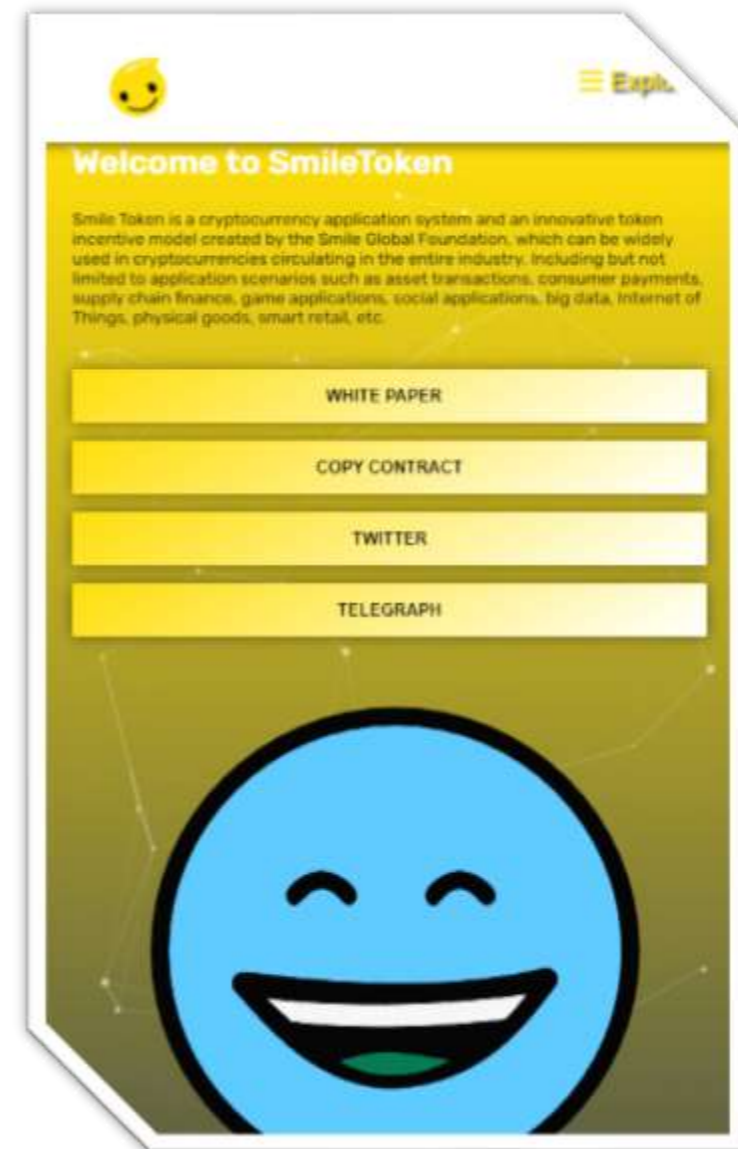

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: smile-token.com

Issued by: cPanel, Inc

Valid Until: 01/07/2022

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

Contact

N/A

SPAM / MALWARE / POPUPS

No malware found

No injected spam found

No internal server errors

No popups found

Domain is marked clean by Google, McAfee, Sucuri Labs, & ESET

Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

[Twitter](#)

[Telegram](#)

X At least 3 social media networks were found.

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.

Team Overview

We were able to locate the following information on the Team.

TEAM

Jimmy Wong

Bachelor of Science in Finance from the University of Toronto, Canada, and has worked in Hongshang Asset Management Co., Ltd., Alibaba, etc. Focus on industry research and business analysis. Have in-depth research and unique insights on the business operation model. Have professional financial knowledge and complete experience.

Justin Drake

Technology Development Manager and Software Engineer, graduated from the University of New Zealand with a BA. More than 3 years of experience in major software and game development in New Zealand. I entered the world of Ethereum 2 years ago. The current work is to program using the Solidity, Python, C/C++ and C# language and lead more than 10 people to write the blockchain source code.

Richard Maaghul

Advispassword companies, password startups, venture funds and international decision makers on blockchain solutions. Director of the Private Investment Fund Research Institute (PIFI). Previously, he had worked with Cravath, Swain & Moore LLP (New York) and Goldman Sachs (London). Currently serving as a financial operation consultant, 30 years of financial experience can help Smile cryptocurrency projects understand the actual needs of users.

Wesley

He is proficient in the principle and implementation of mainstream blockchain technologies such as Bitcoin, Ethereum and HyperLedger, and has a deep understanding and rich practice of blockchain consensus mechanism, intelligent contract, cross-chain technology, side chain technology, privacy protection, etc. The blockchain network it has built has been in stable operation for many years, and now carries hundreds of thousands of transactions per day, with a monthly transaction amount of more than one billion yuan.

Donahue

Blockchain and 5G technical experts, long engaged in large system engineering development, working in the top international companies such as Qualcomm. Visiting Professor of Data Engineering at Columbia University, and a renowned scholar of blockchain.

Montague

A master's degree of Computer Science from Harvard University and a famous blockchain software development engineer. He is responsible for mining algorithm cross-platform transplantation of Bitcoin, ETH and other virtual currencies and mining machine software development management. Rich experience in virtual digital currency wallet and virtual digital exchange technology architecture.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

DEVELOPMENT ROADMAP

- 1 In September 2019, the Smile Token project was established to build the Smile Token project. Company, organizational structure, integration of blockchain industry and technical resources, and acquisition of big data;
- 2 In 2020, Smile completes the overall project planning and begins to enter the implementation stage, and the ecological version 1.0 is available on the market;
- 3 In March 2021, the Smile project team was formed to set up a blockchain laboratory to promote the research laboratory of the token ecosystem;
- 4 In September 2021, the Smile Foundation was established, the global strategic plan was officially deployed, and strategic partners were connected;
- 5 In October 2021, the official Smile Token platform and APP will be launched; the BSC ecological chain will be launched, and exchanges such as CMC, Coinbase, and BitMEX will be launched overseas.
- 6 In December 2021, the main chain of Smile Token will be launched; mainstream exchanges such as Binance, okex, and China currency will be launched
- 7 In April 2022, Smile Token independent wallet internal test, supporting cross-chain technology;
- 8 In September 2022, the Smile Token independent wallet was launched and the mapping was completed;
- 9 In 2023, Smile Token began to develop the side chain to complete the main chain interaction.
- 10 In 2024, Smile Token will become the world's mainstream digital currency.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank
You

DESSERT FINANCE PROJECT AUDIT HAS BEEN COMPLETED FOR SMILE (SMILE) 1 DSRT HAS BEEN SENT TO AUDITED PROJECT'S CONTRACT ADDRESS FOR VERIFICATION OF THIS AUDIT AT BLOCK NUMBER: **11738958**
