## INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

#This is the contract for SnowgeCoin. Following in the footsteps of Doge, Hoge, and SafeMoon.
#SnowgeCoin's contract is a fork of SafeMoon's, which is a fork of Bee's.
#V2 of Snowge's contract makes two more changes.
1. The total number of tokens has been upped from 1 million to 1 billion, so that users d
2. The randomizeFee() method was moved so that it does not overrule the takeFee logic - t
all of the tokens they pay for, instead of 92%, 94%, 96%, or 98%.

#V1 of Snowge's contract is very similar to SafeMoon, with two major changes:
1. The total number of tokens minted is 1000000, instead of a quadrillion.
2. Randomized Burn/Redistribution fee percentage, based on how hungry Snowge McFloofy is.
Burn percentages per transaction will be either 1%, 2%, 3%, or 4%. A matching percentage
This means that the total transaction fee will be 2%, 4%, 6%, or 8%, depending on your

# Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for the project. Social Media channels included Twitter, Telegram, Twitch, Reddit, Discord, Medium and YouTube. All social media channels had a healthy amount of activity.

It is important to note that the transaction fees are randomized (2%, 4%, 6%, or 8% transaction fee) and lower slippage may be rejected. Snowge also permanently burns liquidity tokens, and has renounced their contract ownership.

As this is a project with a charity aspect, we would like to see a letter from a charity providing proof of origination of donations made or a social media post mentioning the project from the charity as an added layer of transparency to let users know that their money is going where it should. At this time we have no reason to suspect any misuse of funds, this is simply suggested best practices for cryptocurrencies with charity aspects.

## Suggestions for Improvement

1. Create plan to receive a donation origination letter or social media post from charities that are being donated to
2. Update domain registration to 3+ years *✓ Fixed*

# Top Token Holders

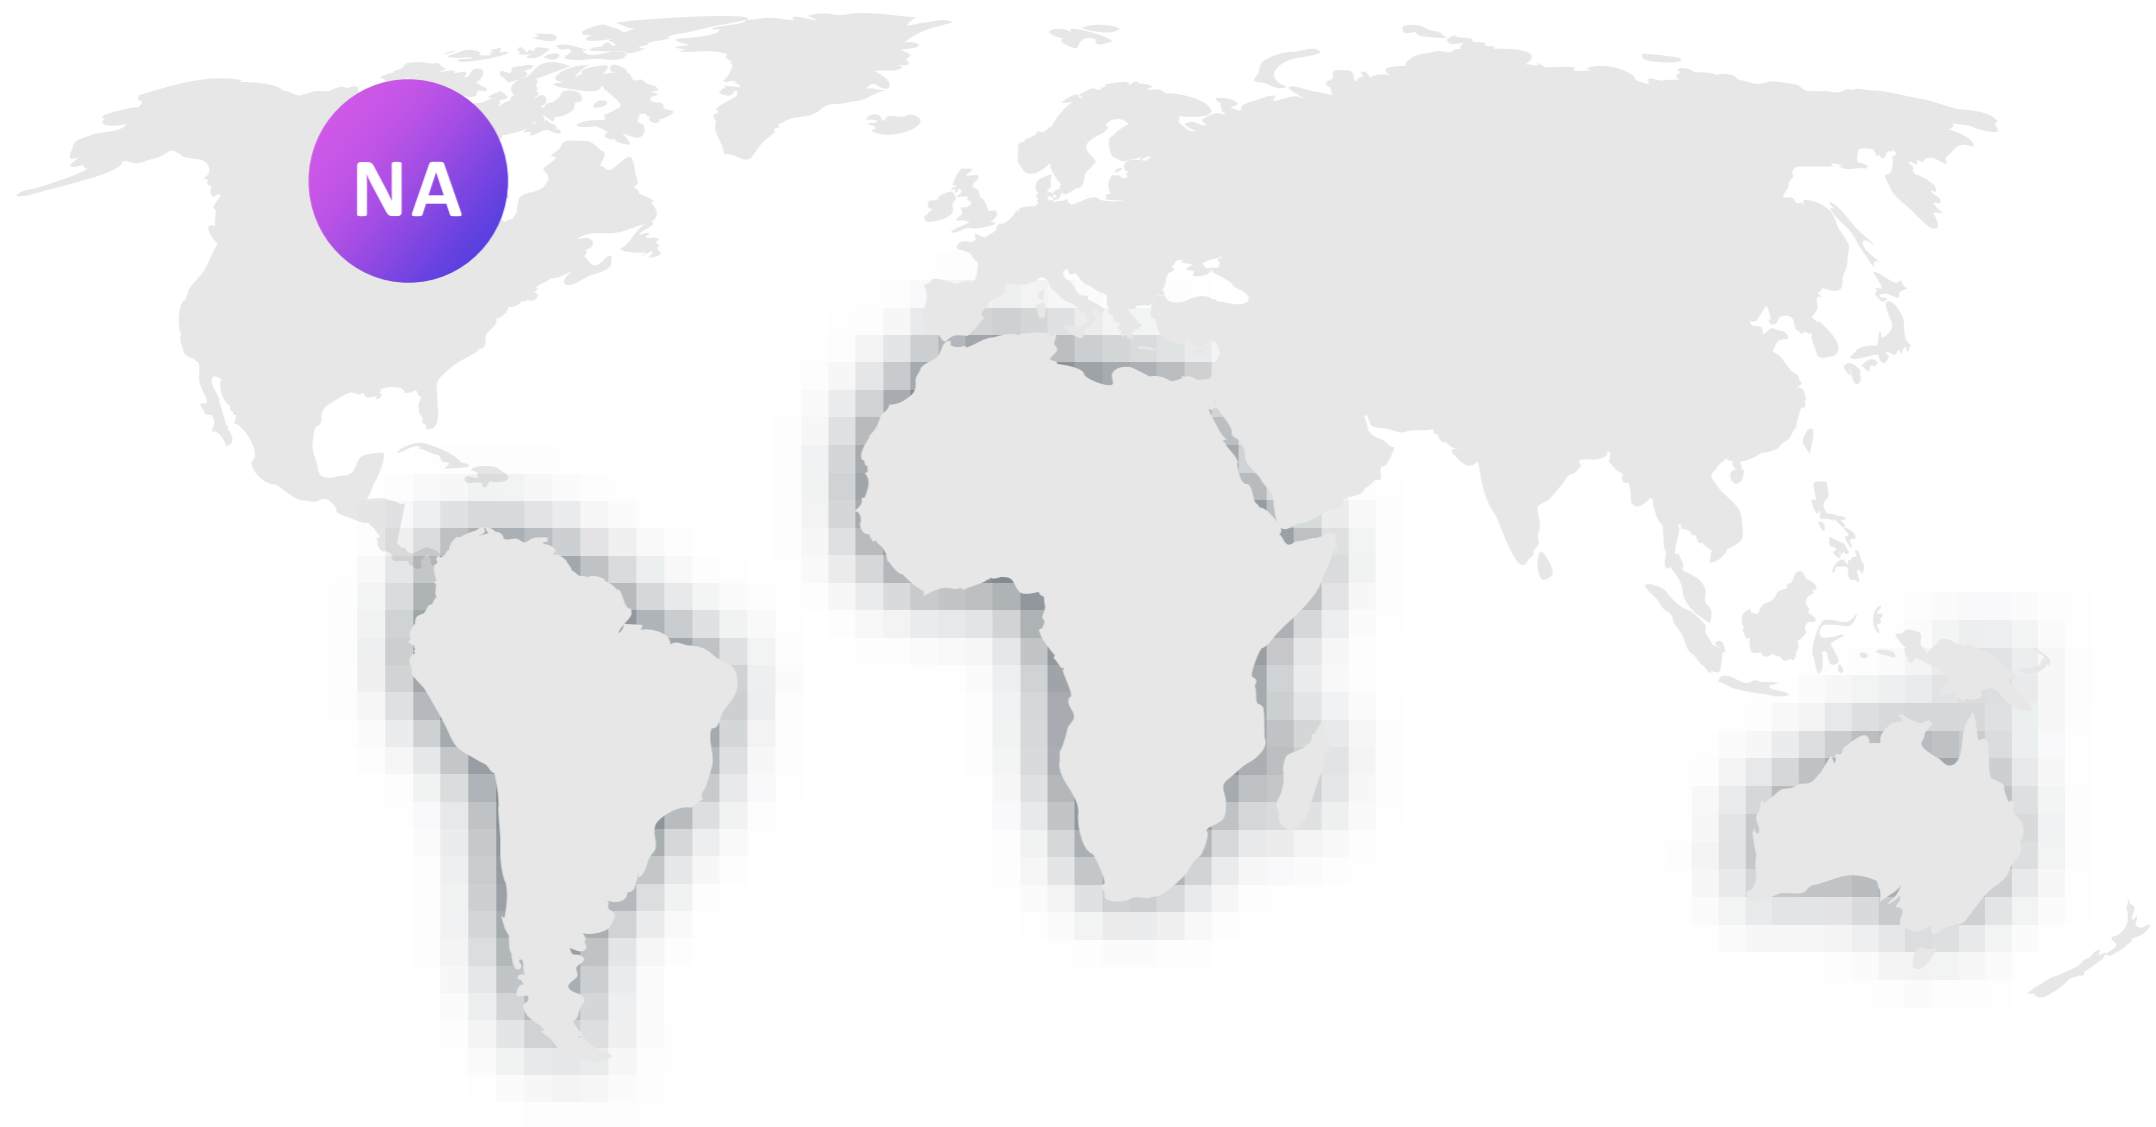

The top token holders at the time of the audit are shown below.
