BEP-20 Audit**

Performed at block **9248790**

PERFORMED BY DESSERT FINANCE
FOR CONTRACT ADDRESS: **0x5c4137ac4f0af3830fd3e2276e44e4a6e02f00b8**

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Website Part 1 – Overview

www.sugardaddydoge.com

Above images are actual snapshots of the current live website of the project.

Website was registered on 07/06/2021, registration expires 07/06/2022.

X This does not meet the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✗ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

Some minor JavaScript errors were found. No issues with loading elements, code, or stylesheets.

```
416 ▶ Uncaught TypeError: Cannot read property 'classList' of null  
    at main.js:40  
    at NodeList.forEach (<anonymous>)

BEP-20 Contract Audit – Common Vulnerabilities

```
pragma solidity ^0.4.24;
import './DividendPayingToken.sol';
import './SafeMath.sol';
import './IterableMapping.sol';
import './Ownable.sol';
import './UniswapV2Pair.sol';
import './UniswapV2Factory.sol';
import './UniswapV2Router.sol';

contract SugarDaddyDoge is ERC20, Ownable {
    using SafeMath for uint256;

    UniswapV2Router02 public uniswapV2Router;
    address public immutable uniswapV2Pair;

    address payable marketingWallet = 0xD9036079476c44d0f1A050a43f180cA117701b4;
    address payable buybackWallet = 0x5a00d1954965c8277772d0118f70e2c54016;

    bool private swapping;

    SugarDaddyDogeDividendTracker public dividendTracker;
    address public liquidityWallet;

    uint256 public swapTokensAtAmount = 5000000000 * (10**18);

    uint256 public BBRewardsFee = 7;
    uint256 public liquidityFee = 3;
    uint256 public marketingFee = 3;
    uint256 public buybackFee = 7;
    uint256 public totalFees = BBRewardsFee.add(liquidityFee).add(marketingFee).add(buybackFee);

    // use by default 300,000 gas to process auto-claiming dividends
    uint256 public gasForProcessing = 300000;

    // exclude from fees and see transaction amount
    mapping (address => bool) private _isExcludedFromFees;

    // store addresses that a automatic market maker pairs. Any transfer *to* these addresses
    // could be subject to a maximum transfer amount
    mapping (address => bool) public automatedMarketMakerPairs;

    event UpdateDividendTracker(address indexed newAddress, address indexed oldAddress);
    event UpdateUniswapV2Router(address indexed newAddress, address indexed oldAddress);
    event ExcludeFromFees(address indexed account, bool isExcluded);
    event ExcludeMultipleAccountsFromFees(address[] accounts, bool isExcluded);
    event SetAutomatedMarketMakerPair(address indexed pair, bool indexed value);
    event LiquidityWalletUpdated(address indexed newLiquidityWallet, address indexed oldLiquidityWallet);
}
```

- ✓ Integer Underflow
- ✓ Integer Overflow
- ✓ Correct Token Standards Implementation
- ✓ Timestamp Dependency for Randomness
- ✓ Unexposed Private Transfer Function
- ✓ Transaction-Ordering Dependency

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on BSCScan.

Common vulnerabilities were not found in the token's Smart Contract as shown above.

Social Media

We were able to locate a variety of Social Media networks for the project including Twitter, Telegram, Reddit, Discord and Facebook. All links have been conveniently placed below.

[Twitter](#)

[Telegram](#)

[Reddit](#)

[Discord](#)

[Facebook](#)

✓ **At least 3 social media networks were found.**

Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for the project. Twitter, Telegram, Reddit, Discord and Facebook. All social media channels had a healthy amount of activity. There is also a link for Instagram on the website but this does not redirect to any account.

It is important to note that there is an 13% tax on EVERY transaction including buys and sells. 5% goes to buybacks, and 2% is distributed to the token holders, 3% is to provide liquidity, and 3% is sent back to the team for marketing.

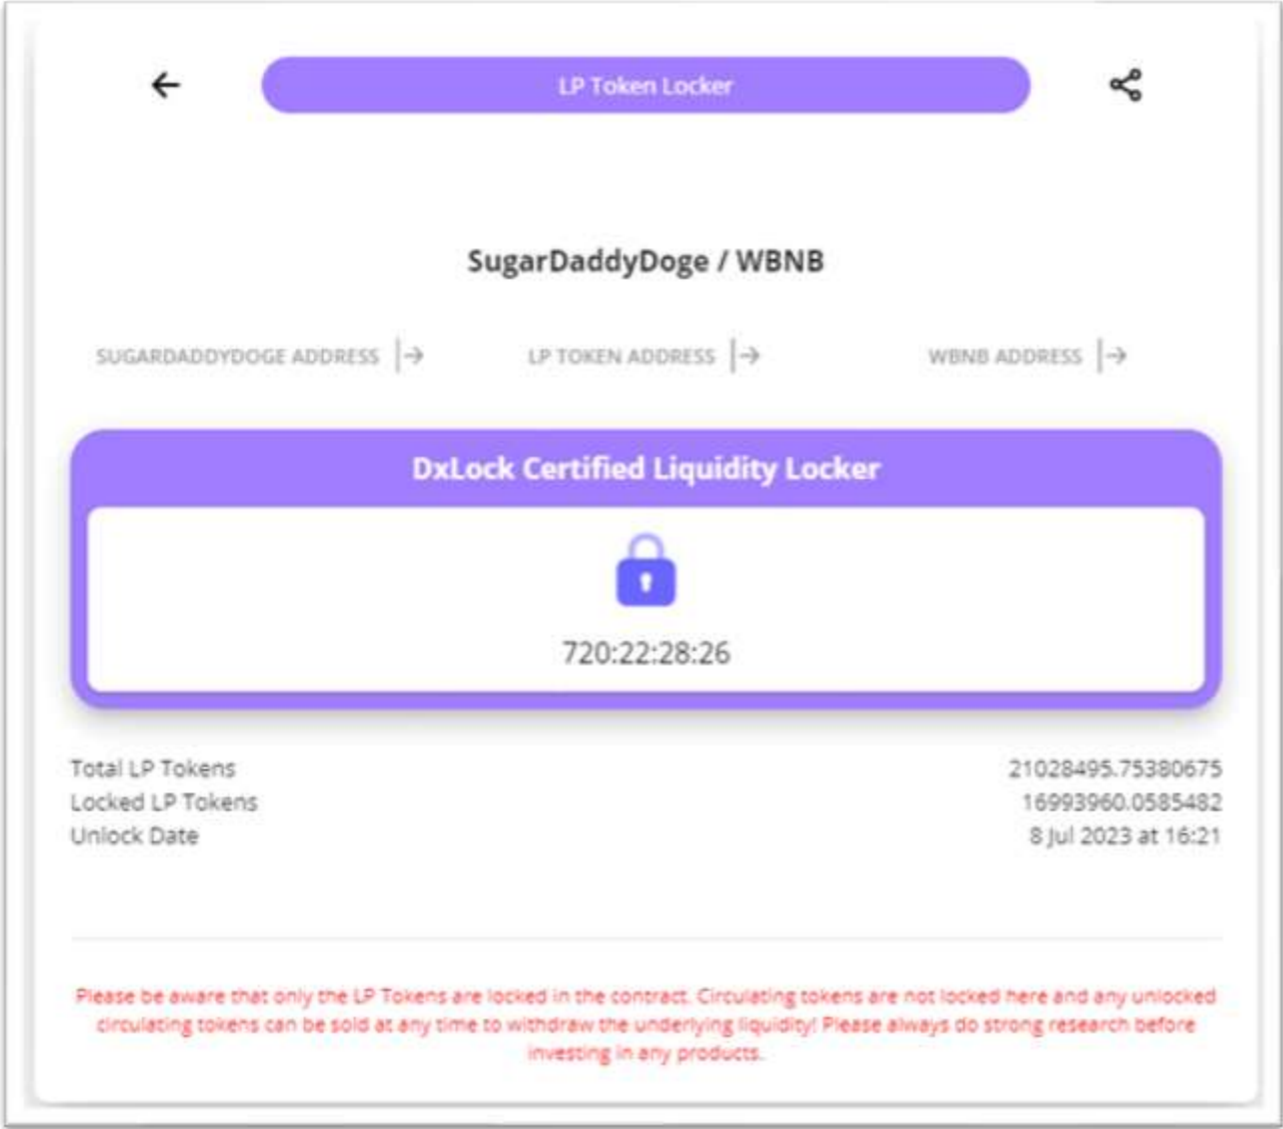

Dev token lock & vesting schedule along with liquidity lock evidence has been sent to Dessert Finance and is attached on the following page.

Suggestions for Improvement

1. Update Instagram link on the website
2. Update domain registration to 3+ years

LP & Token Transparency

LP Token Locker

Top Token Holders

The top token holders at the time of the audit are shown below.

[Click here to view the most up-to-date list of holders](#)

SugarDaddyDoge Top 100 Token Holders

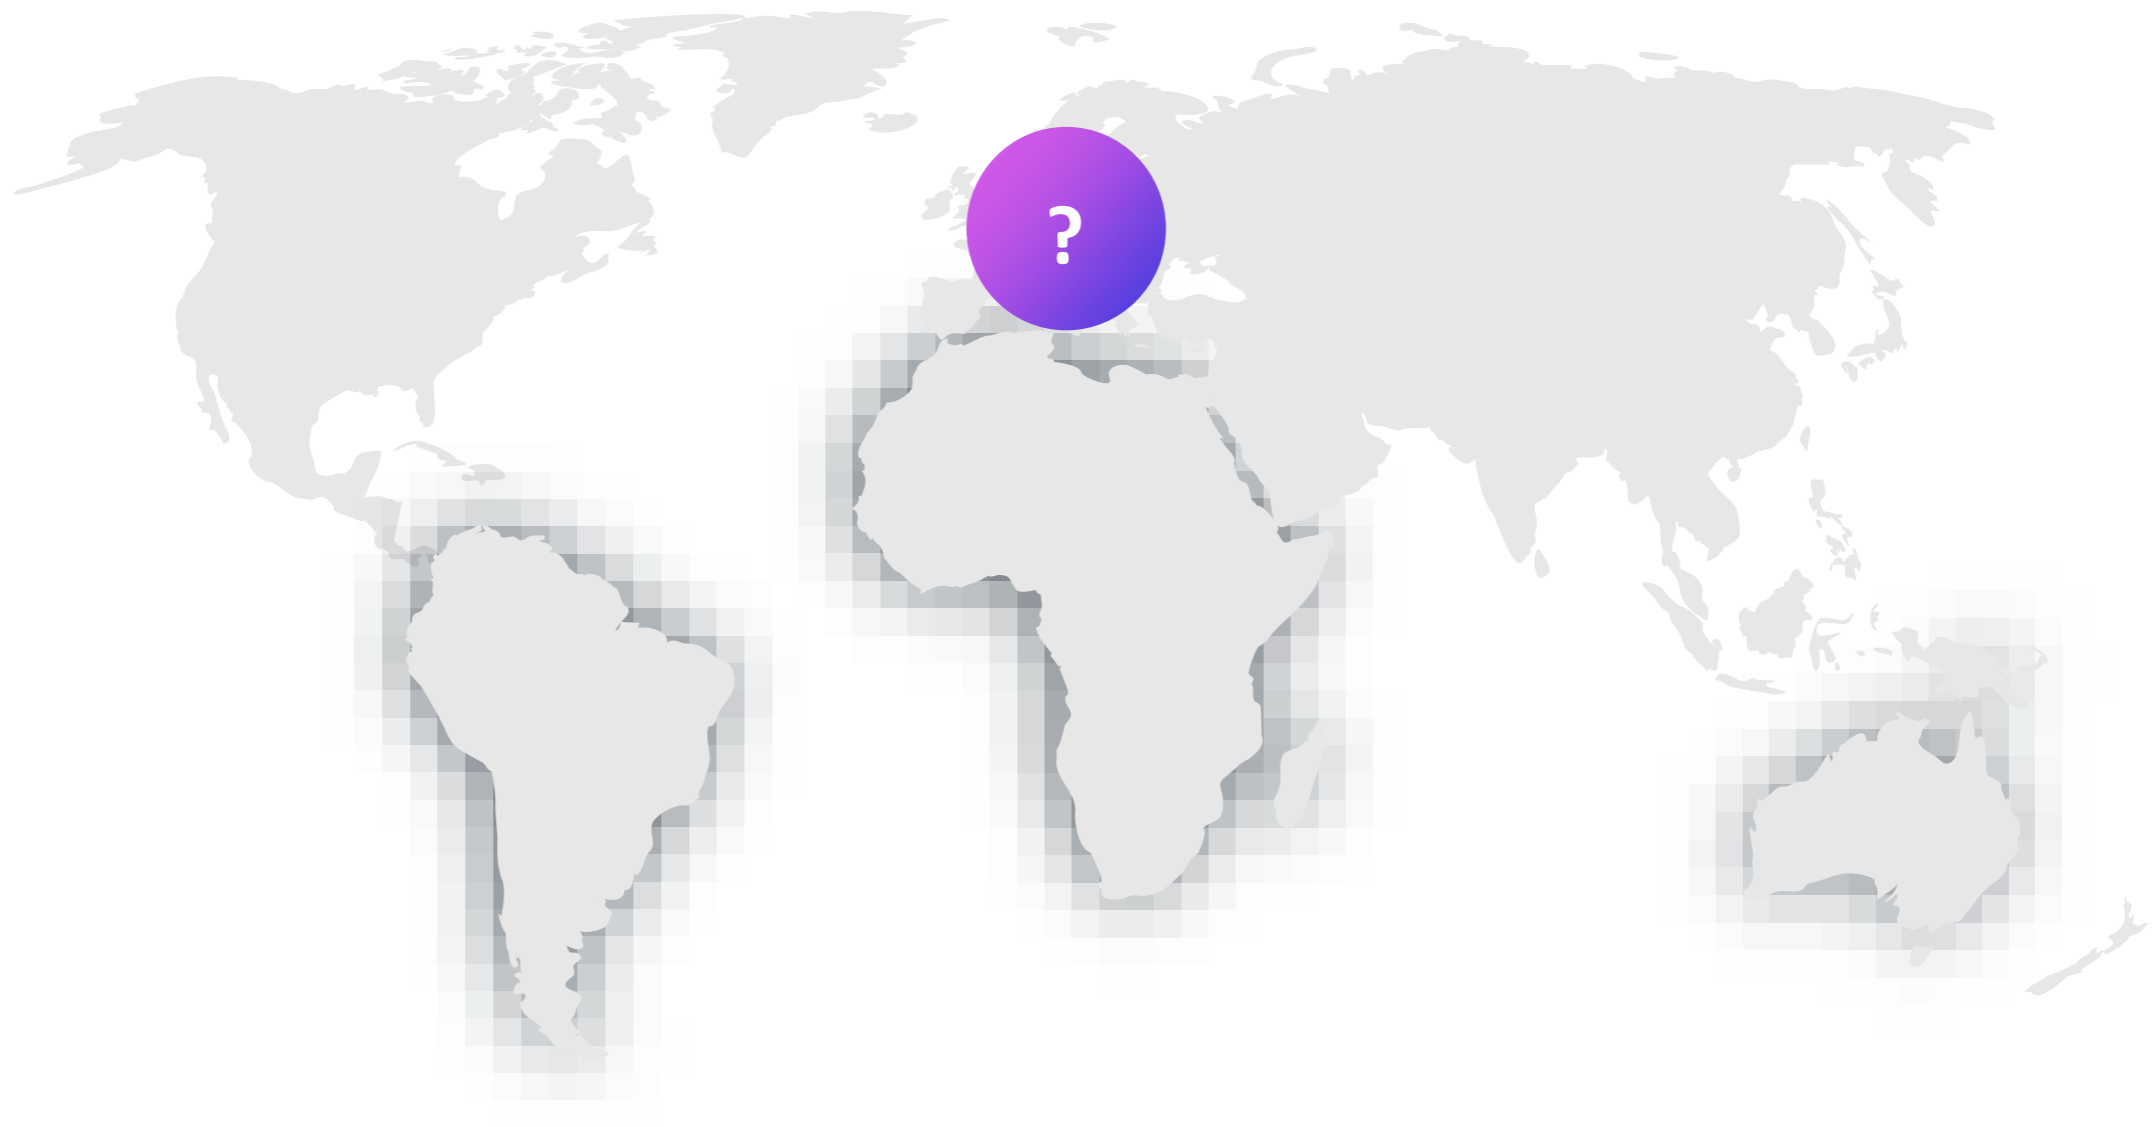

Source: BscScan.com

1. [0x2d045410f002a95efcee67759a92518fa3fce677](#)– the top token holder was a contract holding 15.92% of the total supply.
2. [0x85dbddd195499c5c8277f2d3d31bf7bbc2c65030](#)– the 2nd largest holder was a wallet containing 14.75% of the supply. This is the buyback wallet.
3. [0xce081e7390097ec4cb84926f398d22223586ca07](#)– the 3rd largest holder was a contract containing 12.42% of the supply. This is PancakeSwap’s liquidity pool.

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.

Team Overview

✓ The projects founder has been DessertDoxxed with an ID.

The founders Linkedin profile can be found [here](#).

the Creator

Meet Mia

Mia K. Ekta is the creator of the Sugar Daddy Doge token. She has a vision for meme coins to provide passive income, utility, transparency & security to investors. That's why she has doxxed, with complete transparency from the onset & is always available to her community on the voice chat or via DM.

Mia is a successful entrepreneur who has built many successful start ups in Digital Marketing and Consulting space, with firms based in the United States. She holds a graduate degree in Physics & is passionate about capturing new markets & business innovation.

She has incorporated purposeful token utilities which continue to incentivize investors. She integrated & innovated the popular tokenomics being used on Decentralized Tokens in the BSD or Binance Smart chain network and executed them with complete transparency.

It is difficult to find trust & transparency in the De-Fi space, however Mia is doxxed, intends to register Sugar Daddy as a legal entity in the US and everyone in her community feels secure with her at the helm. Mia built a strong organic community, that is expected to grow massively. Her ideas are long-term as well as short-term, to keep attracting investors and she intends to go towards mass adoption.

Potential Signs of Risk

1 YEAR DOMAIN REGISTRATION

PROJECT HAS COMMON USE-CASE
(REFLECT TOKEN)

The above listed are the top 2 risk indicators of the project. These are by no means assigning the project as a risky project. Every project will have the top risk indicators posted. It is crucial to note that some may be more important than others.

Potential Signs of Confidence

1

TEAM HAS BEEN VERY
RESPONSIVE IN
ADDRESSING QUESTIONS

2

DESSERTDOXXED

3

MULTIPLE AUDITS PLANNED

4

SELF IDENTIFYING MEME

5

SSL CERTIFICATE WAS
FOUND AND VALID

6

ACTIVE SOCIAL MEDIA PRESENCE

The above listed are the top 6 confidence indicators of the project. These are by no means assigning the project as a confident project. Every project will have the top 6 confidence indicators posted. It is crucial to note that some may be more important than others.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

Insight of what DaddyDoge's future has to bring

Roadmap

The roadmap is presented as a central vertical line with four boxes of tasks on either side. The top box on the left contains three checked items and one unchecked item. The bottom box on the left contains four unchecked items. The top box on the right contains four unchecked items. The bottom box on the right contains four unchecked items.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You

DESSERT FINANCE PROJECT AUDIT HAS BEEN COMPLETED FOR SUGARDADDYDOGE (SUGARDADDYDOGE). 1 DSRT HAS BEEN SENT TO AUDITED PROJECT'S CONTRACT ADDRESS FOR VERIFICATION OF THIS AUDIT AT BLOCK NUMBER: **9248790**
