## INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

# DessertDoxxed

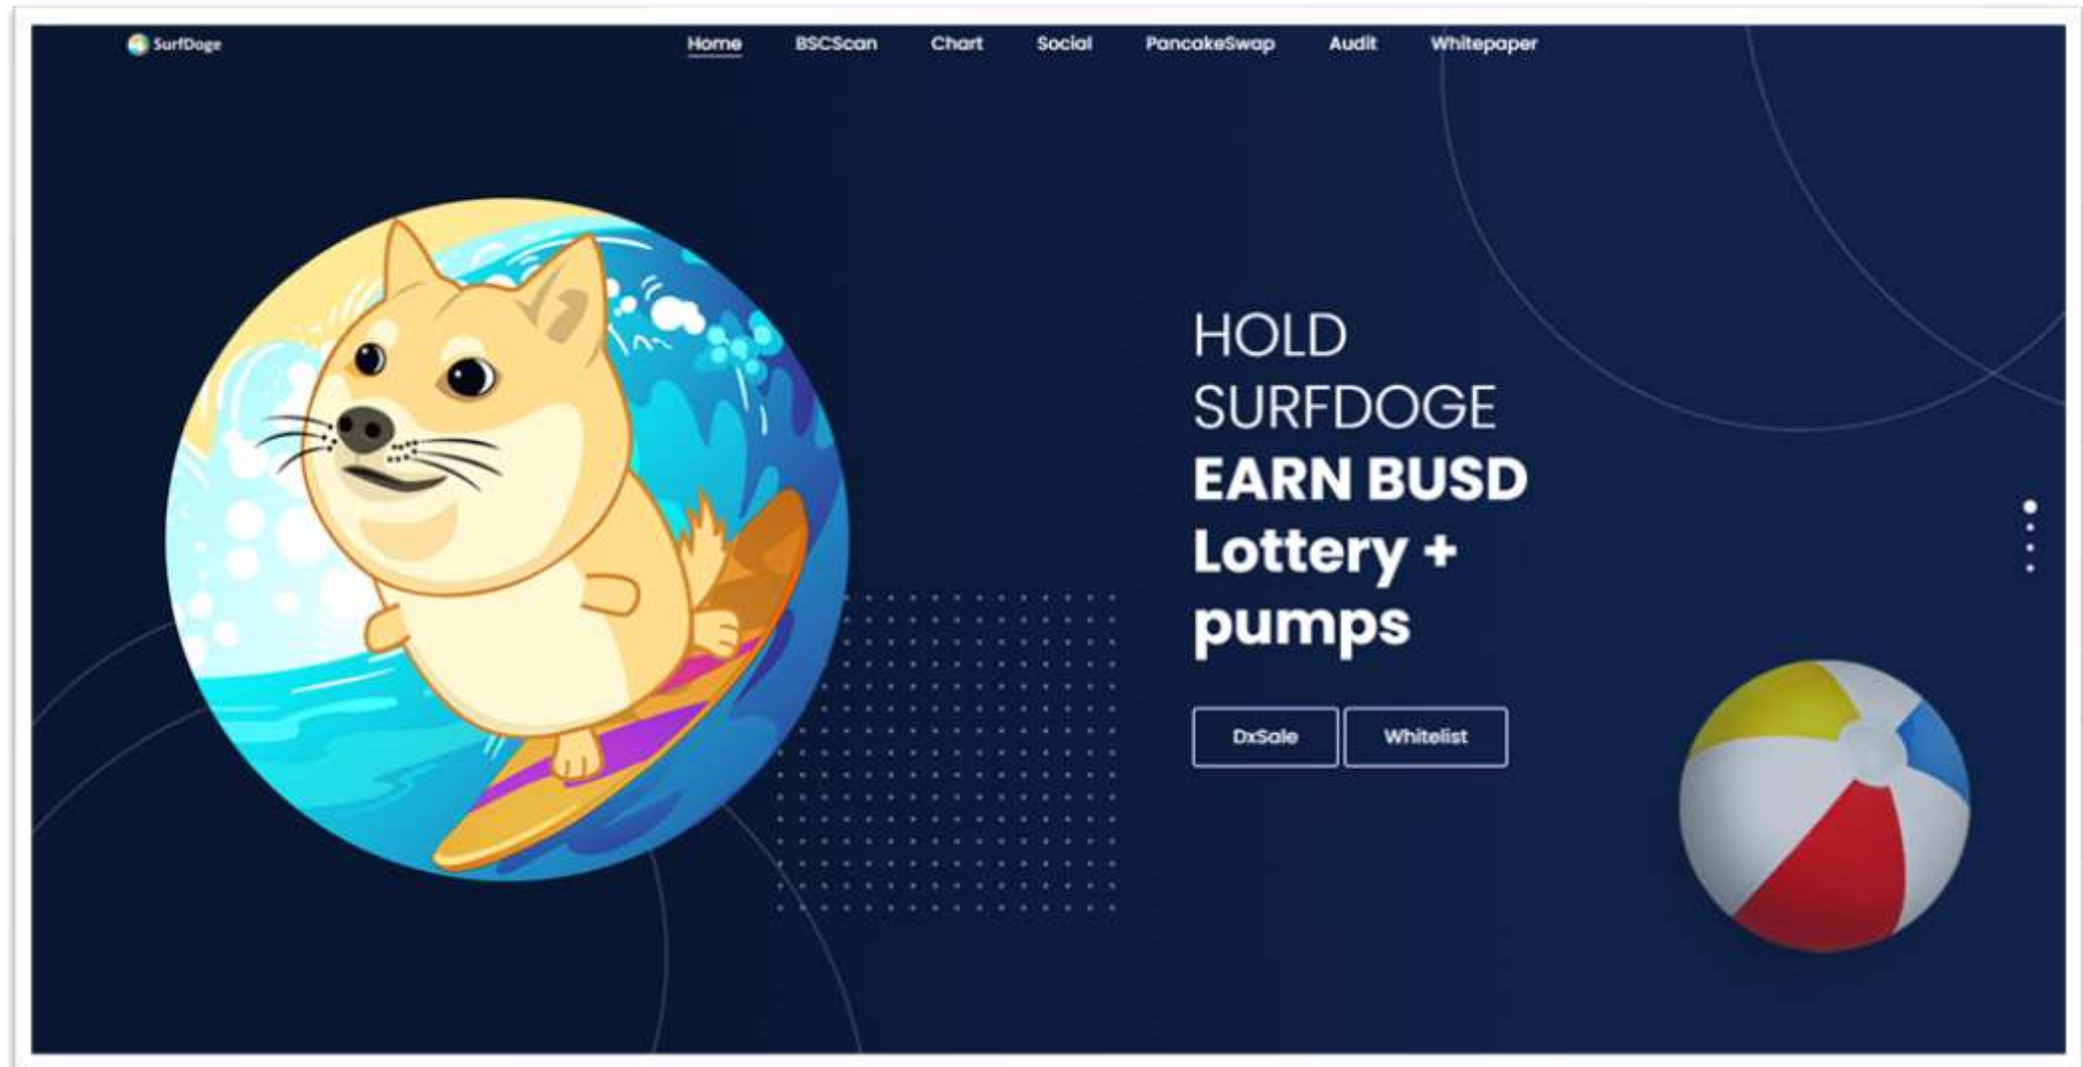

DessertDoxxed is a service offered by Dessert Finance that allows projects to do a private face reveal matched with an I.D to allow founders / team members to privately Doxx themselves to us. This allows an added layer of security to the projects team but also allows an added layer of confident to project supporters.

*✓ The founder of this project has been DessertDoxxed*

# Website Part 1 – Overview

[www.surfdoge.io](http://www.surfdoge.io)

Above images are actual snapshots of the current live website of the project.

Website was registered on 08/05/2021, registration expires 08/05/2026.

✓ This exceeds the 3 year minimum we like to see on new projects.

## Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

The website contained a JavaScript error\*. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

✓\**Resolved*

## Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

One JavaScript error was found. No issues with loading elements, code, or stylesheets.

Failed to load resource: the server responded with a status of 404 () [block.png:1](#)

✓ *Resolved*

# Website Part 4 (GWS) – General Web Security

## SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: surfdoge.io

Issued by: R3

Valid Until: 11/03/2022

## CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

/
Welcome to Surfdoge!
www.surfdoge.io

Revert statements and events are kept to a minimum to preserve bytecode size!
For debugging transactions it's useful to use https://txmover.ly/

Safemath library not needed -> automatically added to solidity version 0.8.
https://docs.soliditylang.org/en/v0.8.4/080-breaking-changes.html
/
pragma solidity ^0.8.2;

interface IBEP20 {
    function totalSupply() external view returns (uint256);
    function balanceOf(address account) external view returns (uint256);
    function transfer(address recipient, uint256 amount) external returns (bool);
    function allowance(address owner, address spender) external view returns (uint256);
    function approve(address spender, uint256 amount) external returns (bool);
    function transferFrom(address sender, address recipient, uint256 amount) external returns (bool);
    event Transfer(address indexed from, address indexed to, uint256 value);
    event Approval(address indexed owner, address indexed spender, uint256 value);
}

pragma solidity 0.8.2;

abstract contract Context {
    function _msgSender() internal view virtual returns (address) {
        return msg.sender;
    }

    function _msgData() internal view virtual returns (bytes calldata) {
        return msg.data;
    }
}

pragma solidity ^0.8.2;

interface IReceivesBogRandV2 {
    function receiveRandomness(bytes32 hash, uint256 random) external;
}

interface IBogRandOracleV2 {
    // Request randomness with fee in BOG
    function getBOGfee() external view returns (uint256);
    function requestRandomness() external payable returns (bytes32 assignedHash, uint256 requestId);
}
```

- ✓ Integer Underflow
- ✓ Integer Overflow
- ✓ Correct Token Standards Implementation
- ✓ Timestamp Dependency for Randomness
- ✓ Unexposed Private Transfer Function
- ✓ Transaction-Ordering Dependency

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on BSCScan.

Common vulnerabilities were not found in the token's Smart Contract as shown above.

# Social Media

We were able to locate Social Media networks for the project including Twitter, Reddit, and Telegram. All links have been conveniently placed below.

[Twitter](#)

[Telegram](#)

[Reddit](#)

✓ **At least 3 social media networks were found.**

# Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down social media channels for the project. Social Media channels included Twitter, Reddit, and Telegram. All social media channels had a healthy amount of activity.

It is important to note that there is an 14% tax on EVERY transaction including buys and sells. 4% goes to providing liquidity, and 4% is distributed to the token holders in BUSD, 2% is intended for a lottery which will be distributed to 10 token holders, 2% will be distributed back to the development team to be used for marketing purposes and 2% will be sent back to the team for continual work on the project.

This project is being audited before launch. We expect many things to change post-launch. Please review the links on all the pages to make sure that the most up-to-date information is being reviewed. Dessert Finance conducts the audit at or prior to the block number written on the cover of this report.

## Suggestions for Improvement

1. Fix Javascript error on website ✓ *Resolved*

# Top Token Holders

The entire supply was in a few wallets at the time of audit. We expect this to change as the project goes through initial distribution phases. Please use the link below to view the most up-to-date holder information.

[Click here to view the most up-to-date list of holders](#)

### SurfDoge Top 100 Token Holders

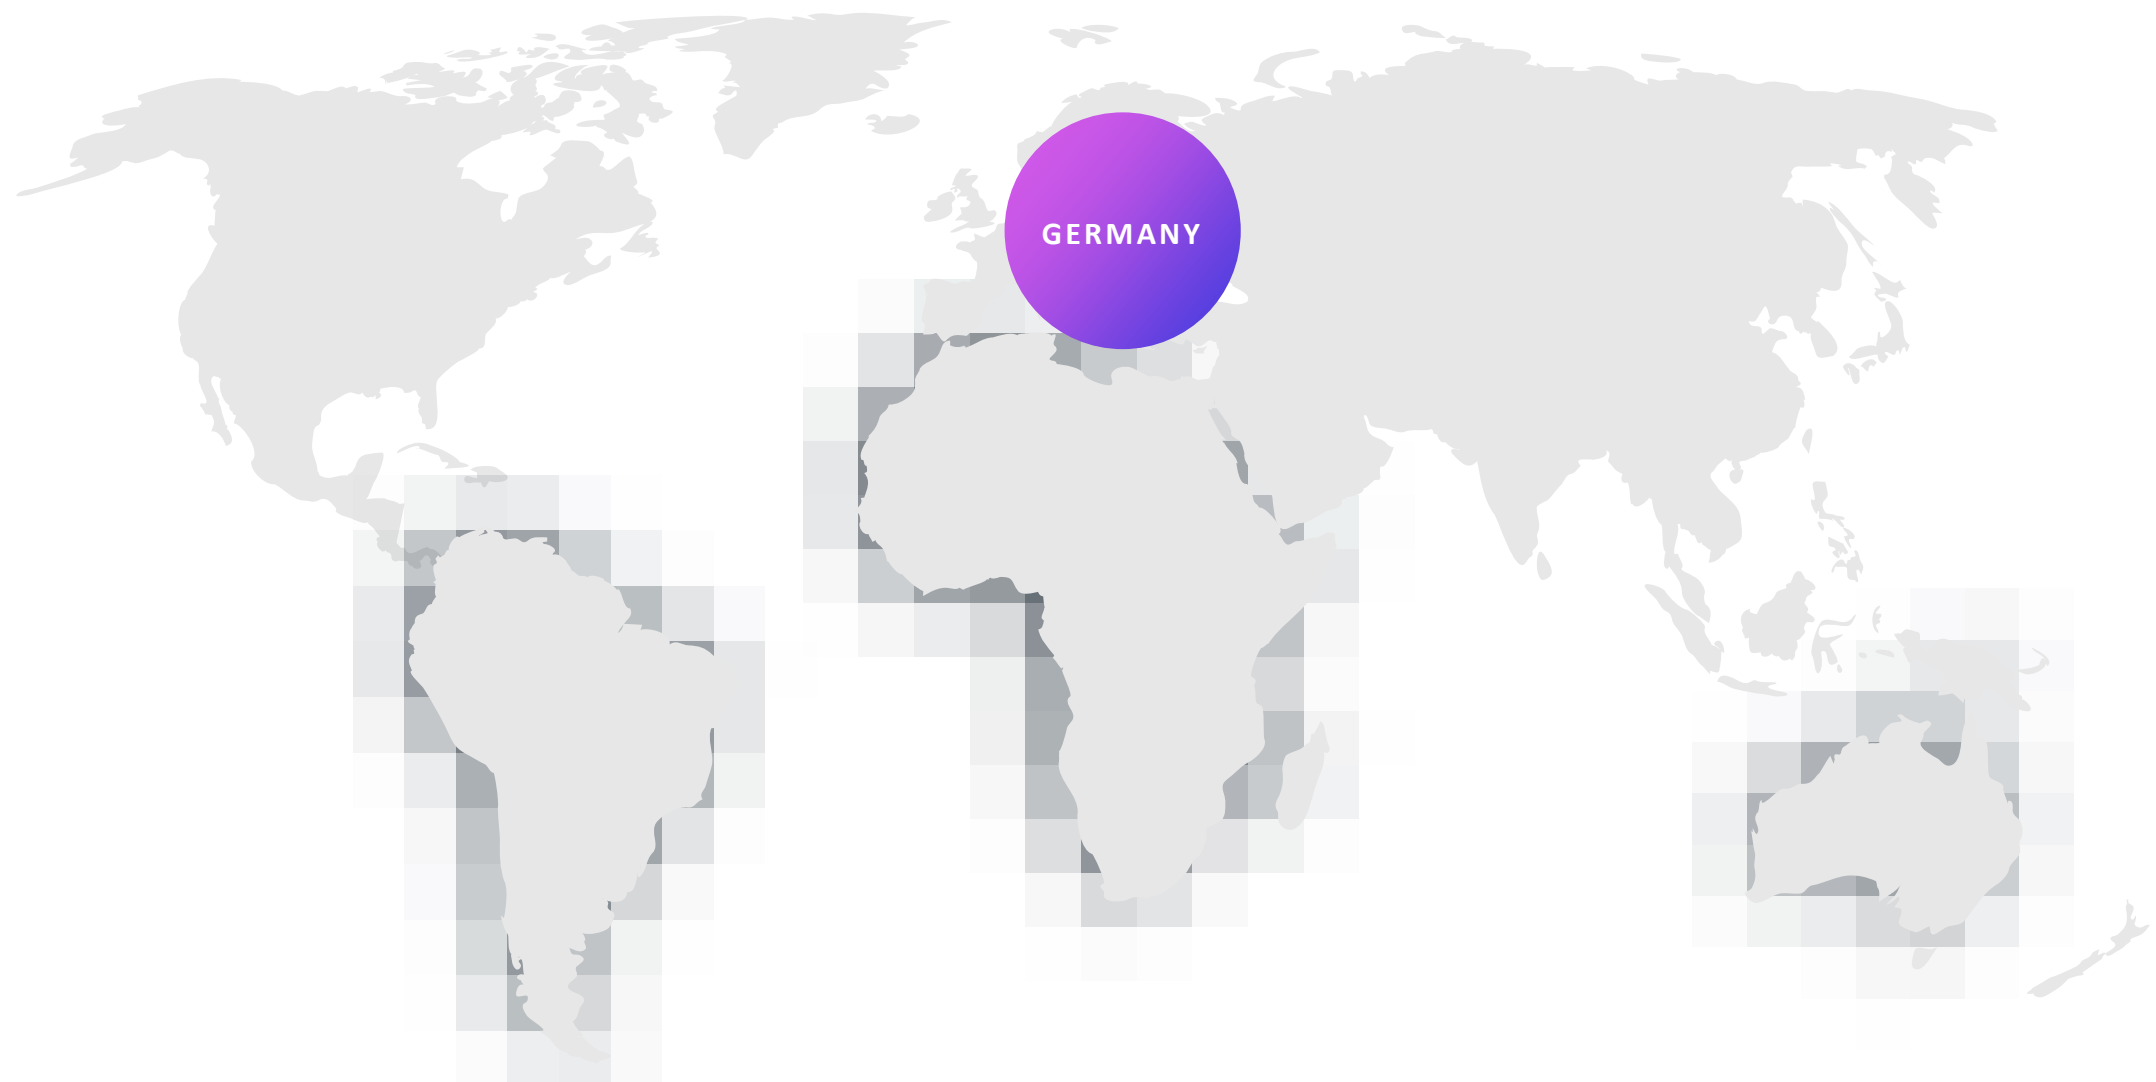

Source: BscScan.com

## Location Audit

The primary location for the project has been declared to be Germany.

# Team Overview

Team information was found in the whitepaper and has been shown below. The project founder has been DessertDoxxed with a valid ID .

## 14. Team

The core team consists of 3 members:

- Sebastian, the dev (doxing video in telegram)
  - Computer science student from Germany
  - The main dev on the project

- Matthew
  - Computer science student from Switzerland
  - Handles social networks, marketing, sweepwidget and helps with aspects of the smart contract
- Chris
  - Web developer and designer
  - Created the banners and other material, helps with promotions and will create a reward tracking DAPP

We also have an extended network of people who are either happy to work on the project or are payed to work on the project.

# Roadmap

*A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.*

## 12. Roadmap

August - prelaunch:

- Desertswap + soken audit
- Airdrop
- PooCoin banners

August - postlaunch:

- Fast track Coingecko and CoinMarketcap
- Aggressive marketing campaign
- Coinzilla Banners
- SurfDogeSwap, staking and farming platform
- PooCoin verified banners
- DAPP for tracking earnings + lottery winnings

September:

- Launching on other chains (KuCoin, Polygon)
- CertiK audit
- Exchange listing
- CoinPayments integration for payments

# Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

# Thank You
