INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to an audit in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), remove liquidity slowly, sell off tokens, quit the project, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

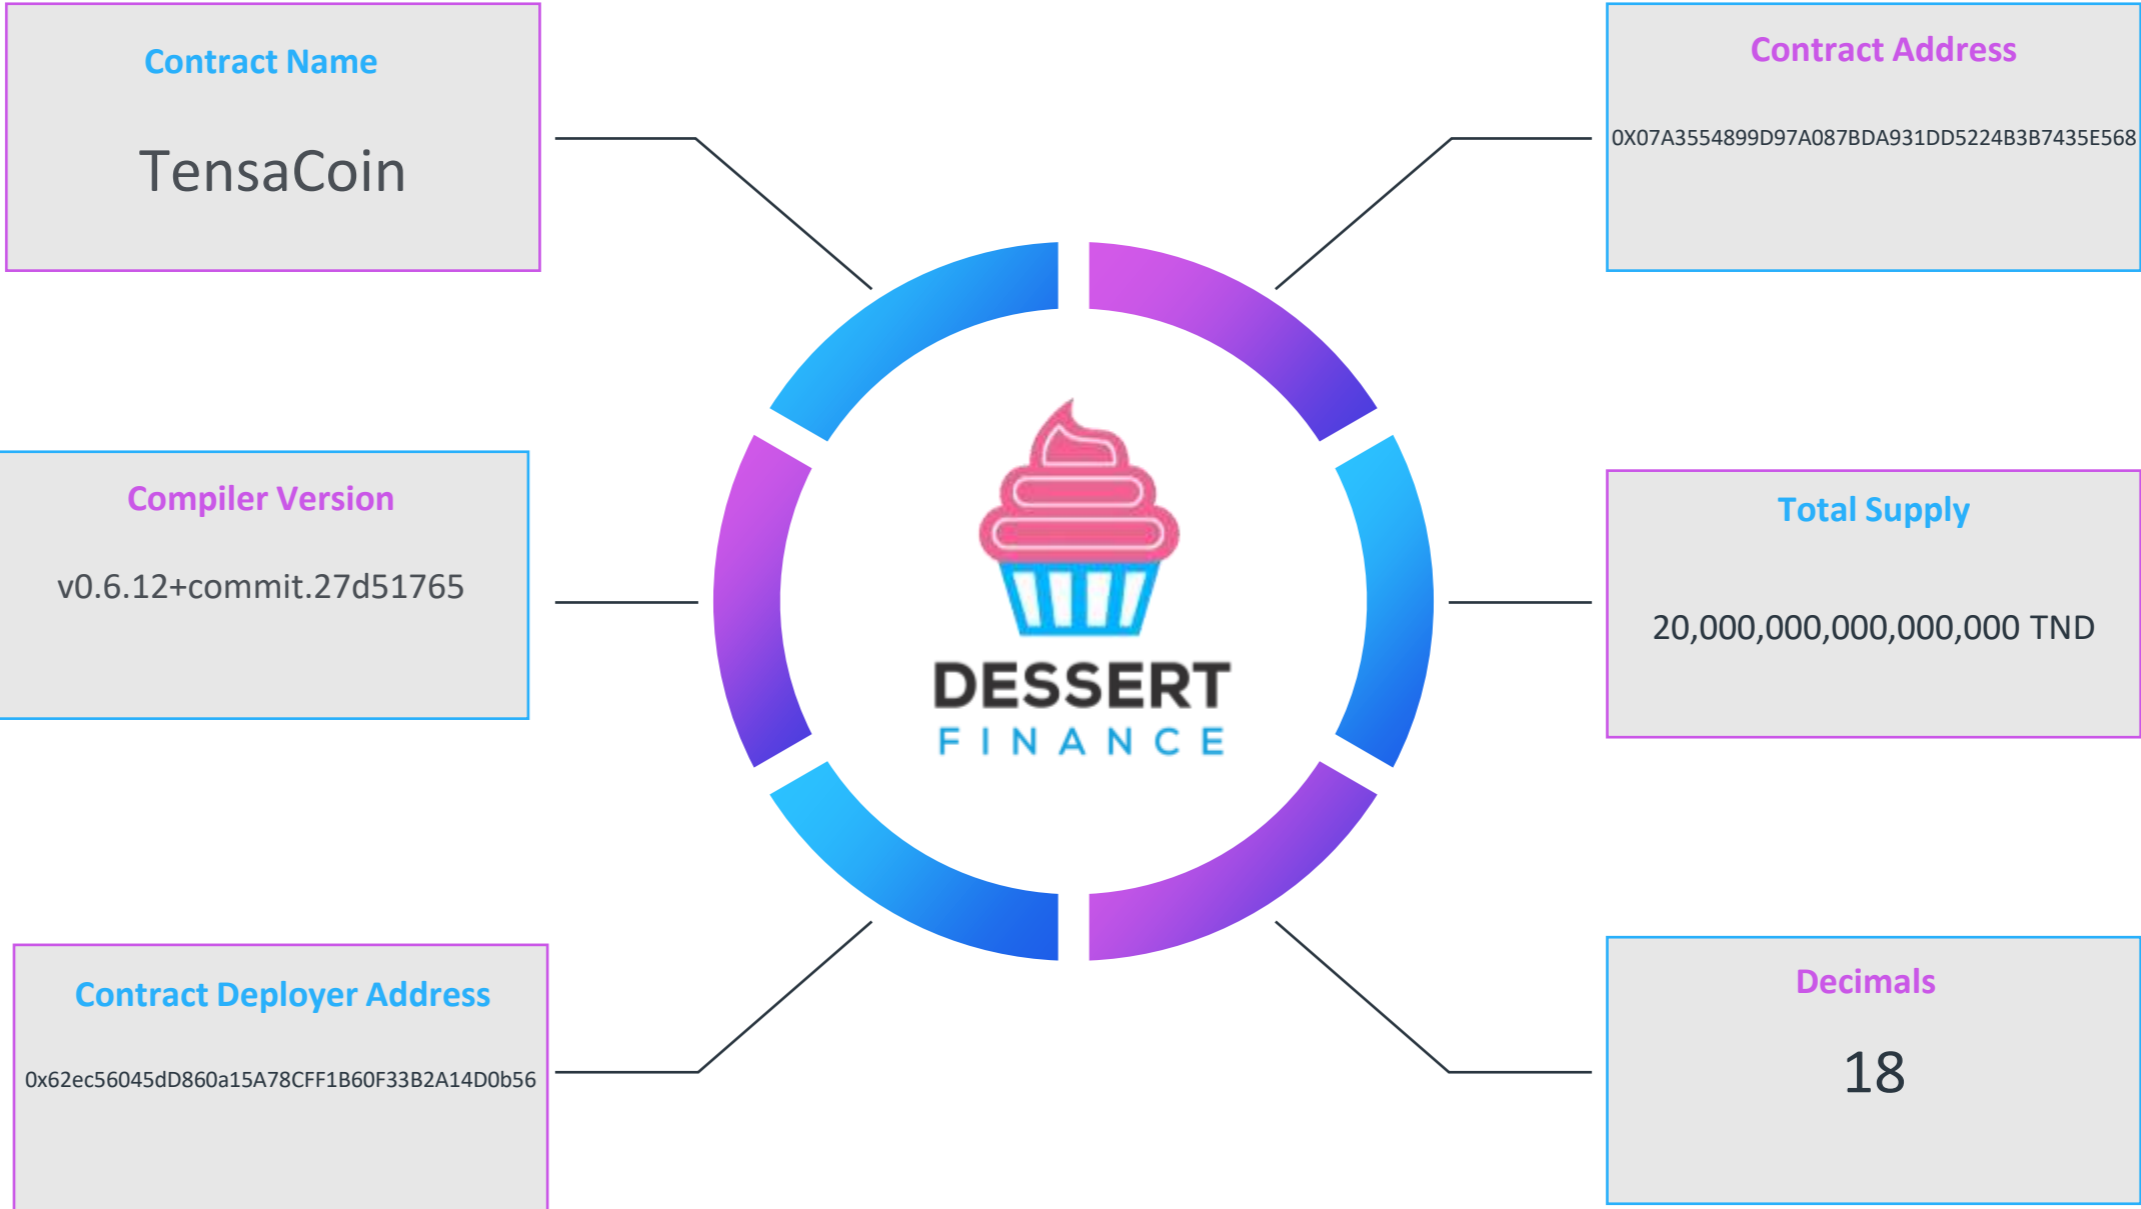

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice. Dessert Finance does not endorse, recommend, support, or suggest any projects that have been audited. An audit is an informational report based on our findings, We recommend you do your own research, we will never endorse any project to invest in.

Contract Code Audit – Token Overview

BEP-20 Contract Code Audit – Overview

Dessert Finance was commissioned to perform an audit on TendaCoin (TND)

```
pragma solidity ^0.4.11;
import "https://github.com/OpenZeppelin/openzeppelin-contracts/blob/master/contracts/token/ERC20/ERC20.sol";
contract TendaCoin {
    ERC20 public token;

    function TendaCoin(uint256 _initialSupply) external {
        token = new ERC20("TendaCoin", "TND", _initialSupply);
    }

    // Returns the amount of tokens owned by 'account'
    function balanceOf(address account) external view returns (uint256);

    // Moves 'amount' tokens from the caller's account to 'recipient'
    // Returns a boolean value indicating whether the operation succeeded.
    // Adds a [Transfer] event.
    function transfer(address recipient, uint256 amount) external returns (bool);

    // Returns the remaining number of tokens that 'spender' will be
    // allowed to spend on behalf of 'owner' through [transfer]. This is
    // zero by default.
    // This value changes when [approve] or [transferFrom] are called.
    function allowance(address owner, address spender) external view returns (uint256);

    // Approves 'amount' as the allowance of 'spender' over the caller's tokens.
    // Returns a boolean value indicating whether the operation succeeded.
    // WARNING: When changing an allowance with this method without the prior
    // call to revoke any previous allowance by other means, this may
    // result in the spender's allowance to be set to zero.
    // Event: [Approval]
    function approve(address spender, uint256 amount) external returns (bool);

    // Moves 'amount' tokens from 'spender' to 'recipient' using the
    // allowance mechanism. 'amount' is then deducted from the caller's
    // allowance.
    // Returns a boolean value indicating whether the operation succeeded.
    // Adds a [Transfer] event.
    function transferFrom(address spender, address recipient, uint256 amount) external returns (bool);

    // Returns the caller's 'value' tokens from the account ('from') to
    // another ('to').
    // Note that 'value' may be zero.
    event Transfer(address indexed from, address indexed to, uint256 value);

    // Returns the caller's allowance of a 'spender' for an 'owner' is set by
    // a call to [approve]. 'value' is the new allowance.
    event Approval(address indexed owner, address indexed spender, uint256 value);

    // ERC20 wrapper over solidity's withdraw operation with added overflow
    // checks.
    // Arithmetic operations in solidity wrap on overflow. This can easily result
    // in bugs, because programmers usually assume that an overflow raises an
    // error, which is not the case in solidity.
}
```

Contract Address

0x07a3554899D97a087Bda931Dd5224B3B7435E568

TokenTracker

TendaCoin (TND)

Contract Creator

0x62ec56045dd860a15a78cff1b60f33b2a14d0b56

Source Code

Contract Source Code Verified

Contract Name

TendaCoin

Other Settings

default evmVersion, None

Compiler Version

v0.6.12+commit.27d51765

Optimization Enabled

No with 200 runs

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on BSCScan.

BEP-20 Contract Code Audit – Vulnerabilities Checked

Vulnerability Tested	AI Scan	Human Review	Result
Compiler Errors	Complete	Complete	✓ Low / No Risk
Outdated Compiler Version	Complete	Complete	✓ Low / No Risk
Integer Overflow	Complete	Complete	✓ Low / No Risk
Integer Underflow	Complete	Complete	✓ Low / No Risk
Correct Token Standards Implementation	Complete	Complete	✓ Low / No Risk
Timestamp Dependency for Crucial Functions	Complete	Complete	✓ Low / No Risk
Exposed _Transfer Function	Complete	Complete	✓ Low / No Risk
Transaction-Ordering Dependency	Complete	Complete	✓ Low / No Risk
Unchecked Call Return Variable	Complete	Complete	✓ Low / No Risk
Use of Deprecated Functions	Complete	Complete	✓ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
State Variable Default Visibility	Complete	Complete	✓ Low Risk
Deployer Can Access User Funds	Complete	Complete	✓ Low / No Risk

The contract code is verified on BSCScan.

The vulnerabilities listed above were not found in the token's Smart Contract.

Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

[0x62ec56045dd860a15a78cff1b60f33b2a14d0b56](https://www.etherbase.net/etherbase-wallet/address/0x62ec56045dd860a15a78cff1b60f33b2a14d0b56)

The address above has authority over the ownable functions within the contract.

This allows the owner to call certain functions within the contract. Any compromise to the owner wallet may allow these privileges to be exploited.

We recommend:

- Establishing a Time-Lock with reasonable latency
- Assignment of privileged roles to multi-signature wallets

Contract Code Audit – Owner Accessible Functions

Function Name	Parameters	Visibility	Audit Notes
renounceOwnership		public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
transferOwnership	address newOwner	public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
lock	uint256 time	public virtual	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromReward	address account	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
includeInReward	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
excludeFromFee	address account	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
includeInFee	address account	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setTaxFeePercent	uint256 taxFee	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setLiquidityFeePercent	uint256 liquidityFee	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setMaxTxPercent	uint256 maxTxPercent	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setSwapAndLiquifyEnabled	bool _enabled	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.

The functions listed above can be called by the contract owner.

If contract ownership has been renounced there is no way for the above listed functions to be called.

Contract Code Audit – Mint Functions

This Contract Cannot Mint New TND Tokens.

We do understand that sometimes mint functions are essential to the functionality of the project.

A mint function was not found in the contract code.

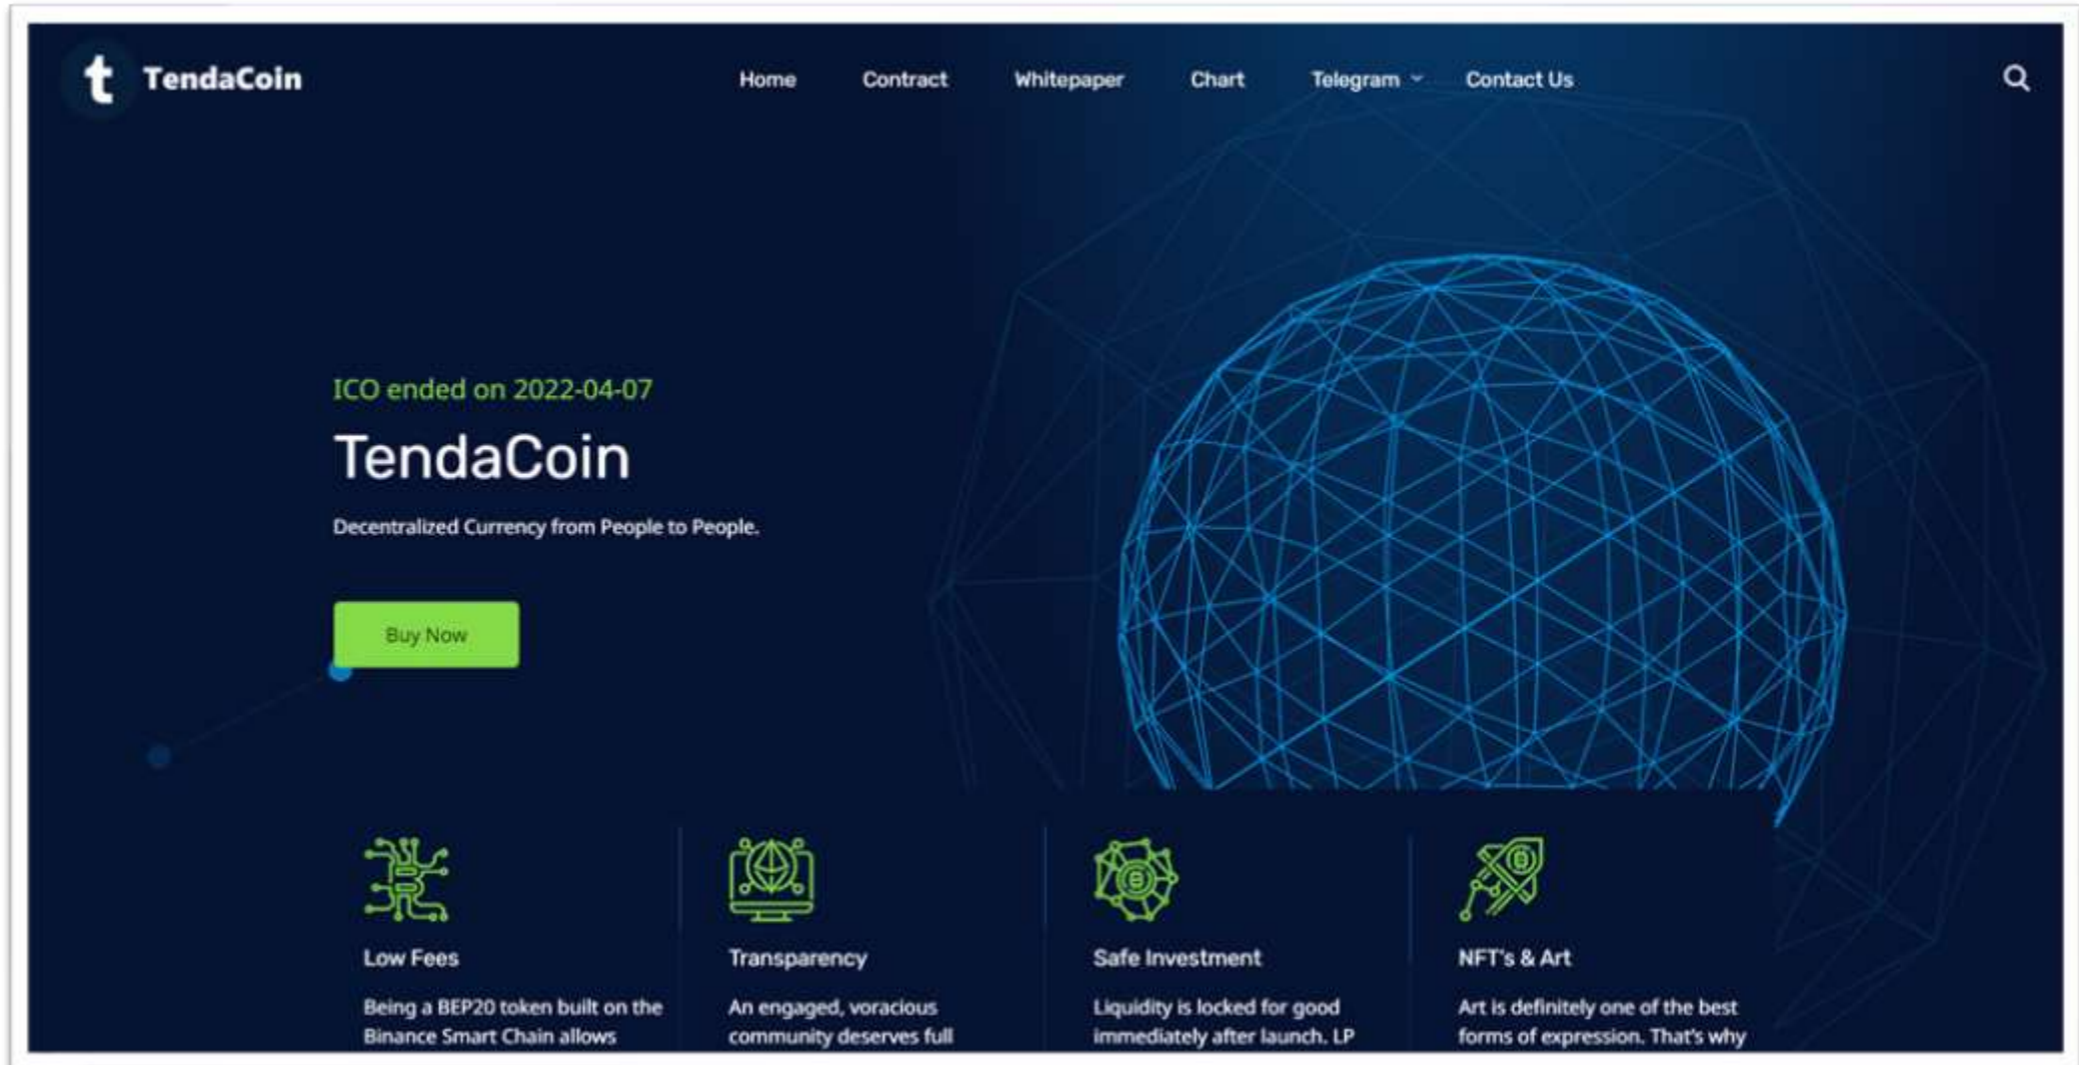

Contract Transaction Fees

At the time of Audit the transaction fees (“tax”) listed below are the fees associated with trading. These fees are taken from every buy and sell transaction unless otherwise stated.

20 QUADRILLION TOTAL SUPPLY 20% of the \$TND supply was seeded as liquidity & 15% goes straight into our Black Hole Algorithm.	4% TRANSACTION FEE 1% Holder Rewards, 2% Auto Liquidity, 1% Burn Wallet	ANTI-WHALE FEATURE No wallet holds more than 2% of token supply. Sells are restricted to less than 5% of the total supply	15% BURN AT START 15% burned at start for help to grow \$TND

Website Part 1 – Overview

www.tendacoin.com

Above images are actual snapshots of the current live website of the project.

Website was registered on 01/24/2022, registration expires 01/24/2023.

X This meets the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: tendacoin.com

Issued by: Cloudflare Inc

Valid Until: 02/26/2023

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

[Contact](mailto:contact@tendacoin.com)

contact@tendacoin.com

SPAM / MALWARE / POPUPS

No malware found

No injected spam found

No internal server errors

No popups found

Domain is marked clean by Google, McAfee, Sucuri Labs, & ESET

Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

[Twitter](#)

[Telegram](#)

[Telegram](#)

[Instagram](#)

✓ **At least 3 social media networks were found.**

Top Token Holders

The top token holders at the time of the audit are shown below.

[Click here to view the most up-to-date list of holders](#)

Rank	Address	Quantity (Token)	Percentage
1	Legion Network: Vesting	4,911,834,545,844,380.04807749238241875	24.5592%
2	Null Address: 0x000...dEaD	3,053,363,090,205,760.569015318728800985	15.2668%
3	Hotbit 2	1,479,965,672,913,780.680539216170325858	7.3998%
4	0xe66e3a026b1a4b39ed35ed18d755795eb51d1d39	567,700,659,823,681.710854128366302013	2.8385%
5	TendaCoin: TND Token	352,137,718,049,678.315379714698568717	1.7607%

Location Audit

We were unable to identify a primary location for the project at this time or a location has not been declared.

Team Overview

We are unable to find any information about the team on the website at this time. Projects may choose to stay anonymous for a myriad of reasons.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You
