## INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

The contract code is **verified as a *Similar Match*** on BSCScan.

Common vulnerabilities were not found in the token's Smart Contract as shown above.

# Social Media

We were able to locate a vast variety of Social Media networks for the project including Twitter, Telegram, Twitch, Reddit, Tiktok, Discord, Facebook, Instagram, and YouTube. All links have been conveniently placed below.

✓ At least 3 social media networks were found.

# Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for the project. Social Media channels included Twitter, Telegram, Twitch, Reddit, Tiktok, Discord, Facebook, Instagram, and YouTube. All social media channels had a healthy amount of activity. Trident went above and beyond to maximize social media exposure.

It is important to note that there is an 12% tax on EVERY transaction including buys and sells. 4% goes to providing liquidity, 3% is distributed to the token holders, 3% goes to partnership and development costs, and 2% is dedicated to oceanic restoration partners. At first glance it appears as there is a 10% fee, upon further investigation on the website, we uncovered the additional 2% fee for charity further below.

As this is a project with a charity aspect, we would like to see a letter from a charity providing proof of origination of donations or social media posts by the charities made as an added layer of transparency to let users know that their money is going where it should. At this time we have no reason to suspect any misuse of funds, ***this is simply suggested best practices for cryptocurrencies with charity aspects.***

## Suggestions for Improvement

1. Add contact email to website
2. Update domain registration to 3+ years

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.
