## INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove ***all*** liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

# Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for the project. Social Media channels included Twitter, Telegram, Reddit, Instagram, and YouTube. All social media channels had a healthy amount of activity.

It is important to note that there is an 6% tax on EVERY transaction including buys and sells. 3% gets burned (removed from circulation), and 3% is distributed to the token holders.

As this is a new project, the token allocations are as follows: 40% of the supply is burned right away. 10% of the supply is meant to be for Mike Tyson. This wallet is to remain untouched for 1 year. 5% of the supply is reserved for marketing, 14% is allocated to the team in 7 wallets which are to remain untouched for 1 month. Finally, 1% is for promoters.

We have reached out to the team to ask what will happen to Mike Tyson's wallet if the coins are not claimed – we were told these coins are meant to be donated to a Charity Hospital.

## Suggestions for Improvement

1. Update domain registration to 3+ years

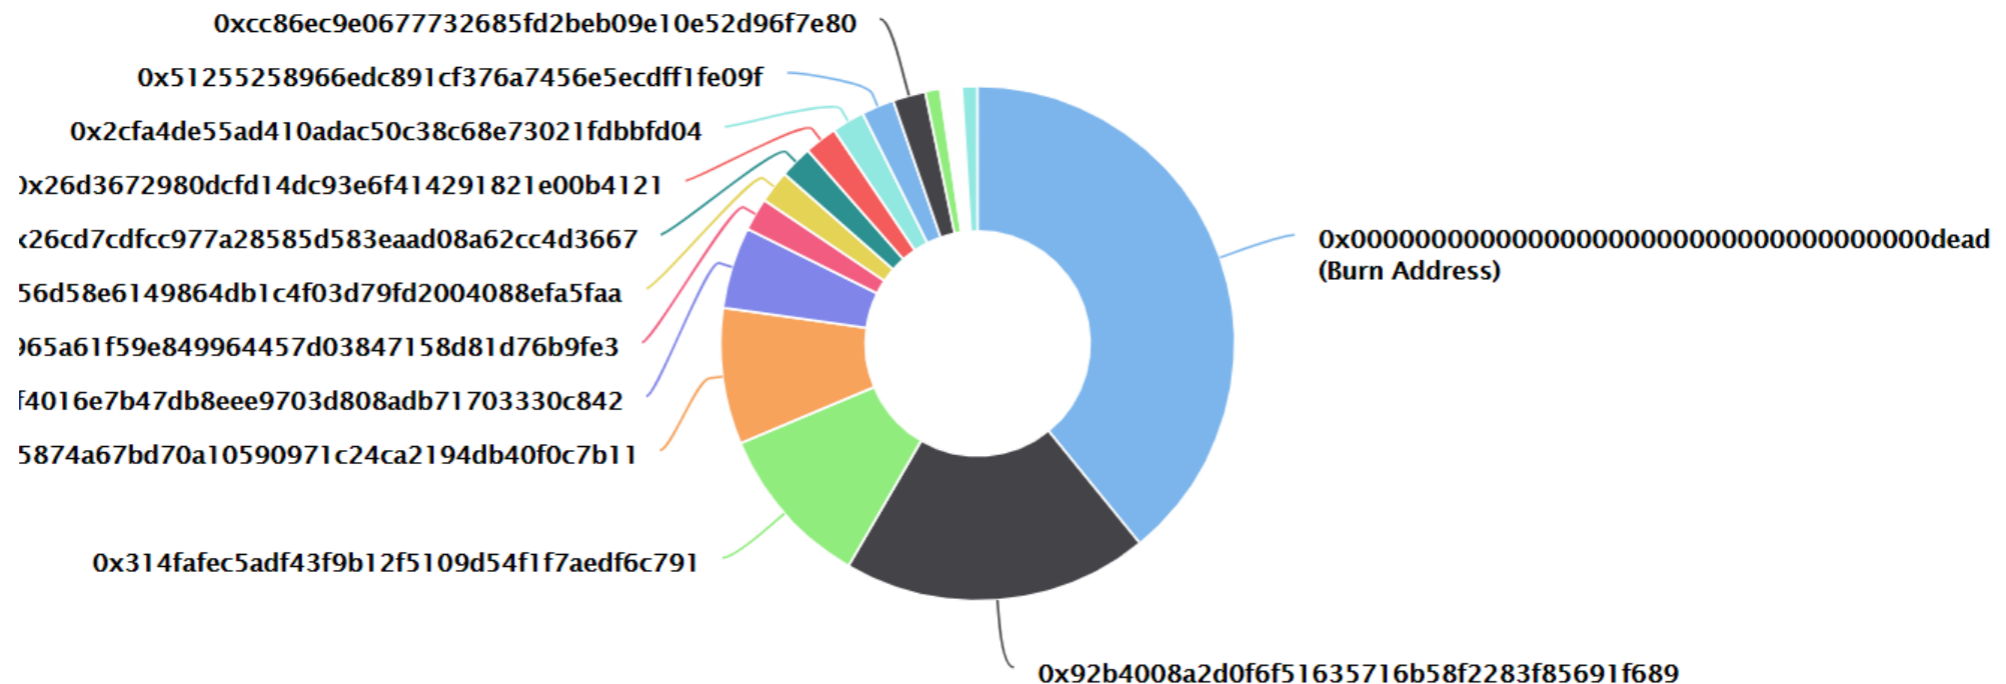

# Top Token Holders

2. [0x92b4008a2d0f6f51635716b58f2283f85691f689](#) – the 2<sup>nd</sup> largest holder was a contract containing 19.23% of the supply. This is the [pre-sale liquidity contract from Unicrypt](#).
3. [0x314fafec5adf43f9b12f5109d54f1f7aedef6c791](#) – the 3<sup>rd</sup> largest holder was a wallet containing 10.2% of the supply. ## MUTUAL NON DISCLOSURE AGREEMENT

### TYSONCOIN

#### Overview

**Nondisclosure agreements** (also called **NDAs** or confidentiality agreements) have become increasingly important for businesses of all sizes, serving as the first line of defense in protecting inventions, trade secrets, and hard work. These agreements are used when at least one person is sharing confidential information with someone else, and protect the immediate and future privacy of that disclosed information. Once signed, a nondisclosure agreement allows for open dialogue between parties, creating an environment in which information can be discussed freely and the true objectives of the meeting or relationship can be achieved (once the agreement is signed between all **7 owners**, this will become fully adaptable to all of the liabilities and trust among all owners).

Mutual nondisclosure agreements (tokens distribution to all owners, wallets are locked but semi locked where owners can unlock their wallet anytime as the lock feature was never in the codes) should be used when both parties will be sharing confidential information, as when the owners are considering the unlocking of their wallets on the 31st, should all join ZOOM meeting and unlock by turns.

This information is to be kept secret among all owners, and mutual agreement needs to be respected.

#### Disclaimer
