Harmony Audit

Performed at block **25164221**

PERFORMED BY DESSERT FINANCE
FOR CONTRACT ADDRESS: `one1cpuaqwz5j2kz6r5fegrecxrd6u00fxc7atp9xp`

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to an audit in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), remove liquidity slowly, sell off tokens, quit the project, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

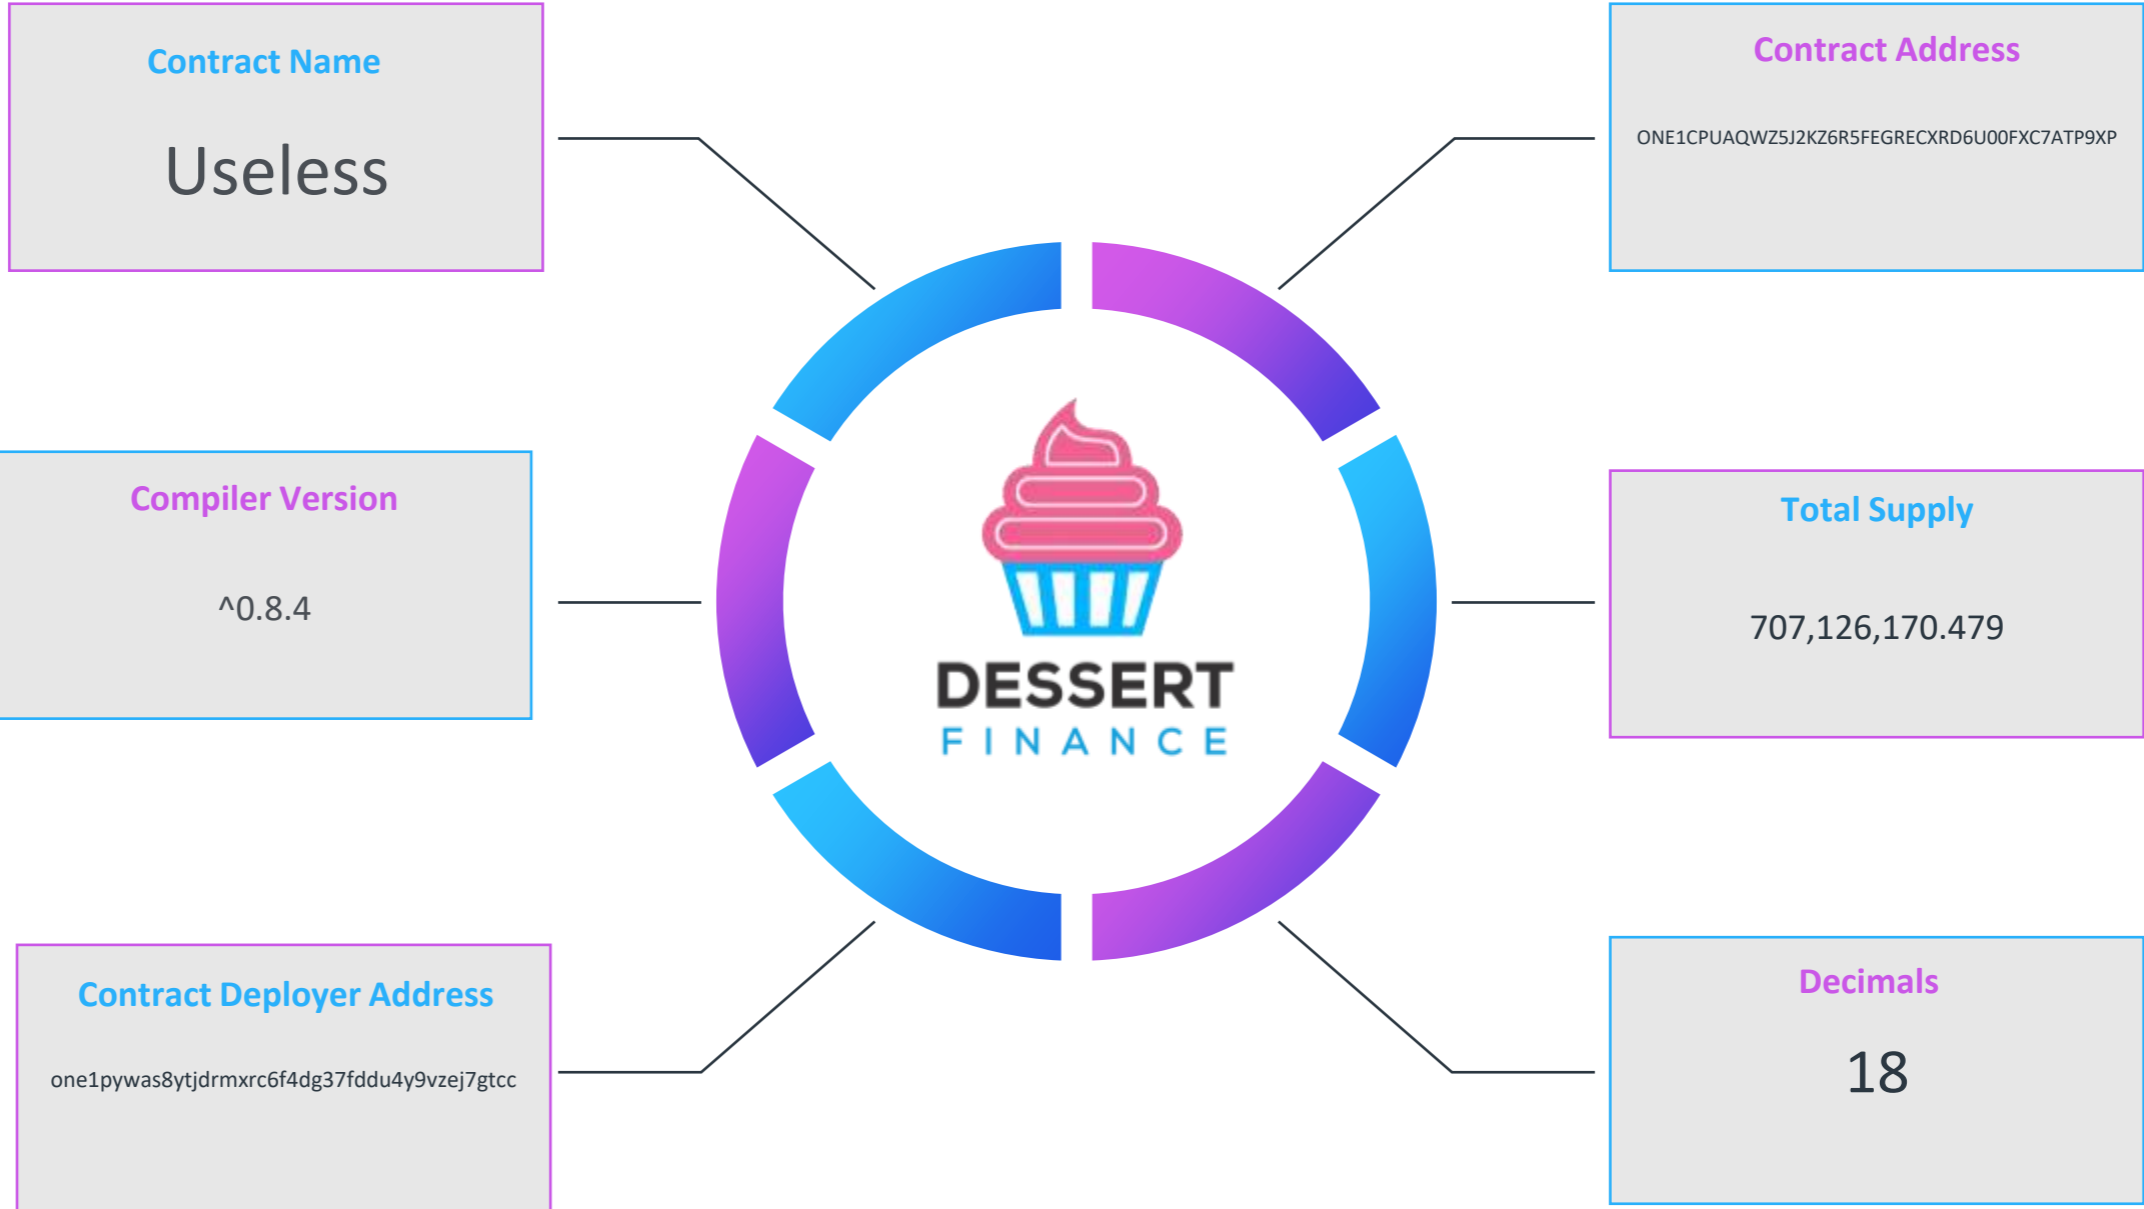

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice. Dessert Finance does not endorse, recommend, support, or suggest any projects that have been audited. An audit is an informational report based on our findings, We recommend you do your own research, we will never endorse any project to invest in.

Contract Code Audit – Token Overview

Contract Code Audit – Overview

Dessert Finance was commissioned to perform an audit on Useless (USE)

```
pragma solidity 0.8.4;
interface IERC20 {
    function totalSupply() external view returns (uint256);
    function symbol() external view returns (string memory);
    function name() external view returns (string memory);
    /**
     * @dev Returns the amount of tokens owned by 'account'.
     */
    function balanceOf(address account) external view returns (uint256);
    /**
     * @dev Returns the number of decimal places.
     */
    function decimals() external view returns (uint8);
    /**
     * @dev Moves 'amount' tokens from the caller's account to 'recipient'.
     * Returns a boolean value indicating whether the operation succeeded.
     * Emits a {Transfer} event.
     */
    function transfer(address recipient, uint256 amount) external returns (bool);
    /**
     * @dev Returns the remaining number of tokens that 'spender' will be
     * allowed to spend on behalf of 'owner' through {transferFrom}. This is
     * zero by default.
     * This value changes when {approve} or {transferFrom} are called.
     */
    function allowance(address owner, address spender) external view returns (uint256);
    /**
     * @dev Sets 'amount' as the allowance of 'spender' over the caller's tokens.
     * Returns a boolean value indicating whether the operation succeeded.
     * IMPORTANT: Beware that changing an allowance with this method brings the risk
     * that someone may use both the old and the new allowance by unfortunate
     * transaction ordering. One possible solution to mitigate this race
     * condition is to first reduce the spender's allowance to 0 and set the
     * desired value afterwards.
     * https://github.com/ethereum/EIPs/issues/20#issuecomment-26314729
     * Emits an {Approval} event.
     */
    function approve(address spender, uint256 amount) external returns (bool);
    /**
     * @dev Moves 'amount' tokens from 'sender' to 'recipient' using the
     * allowance mechanism. 'amount' is then deducted from the caller's
     * allowance.
     * Returns a boolean value indicating whether the operation succeeded.
     * Emits a {Transfer} event.
     */
    function transferFrom(address sender, address recipient, uint256 amount) external returns (bool);
}
```

No

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on Harmony Block Explorer.

Contract Code Audit – Vulnerabilities Checked

Vulnerability Tested	AI Scan	Human Review	Result
Compiler Errors	Complete	Complete	✓ Low / No Risk
Outdated Compiler Version	Complete	Complete	✓ Low / No Risk
Integer Overflow	Complete	Complete	✓ Low / No Risk
Integer Underflow	Complete	Complete	✓ Low / No Risk
Correct Token Standards Implementation	Complete	Complete	✓ Low / No Risk
Timestamp Dependency for Crucial Functions	Complete	Complete	✓ Low / No Risk
Exposed _Transfer Function	Complete	Complete	✓ Low / No Risk
Transaction-Ordering Dependency	Complete	Complete	✓ Low / No Risk
Unchecked Call Return Variable	Complete	Complete	✓ Low / No Risk
Use of Deprecated Functions	Complete	Complete	✓ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
State Variable Default Visibility	Complete	Complete	✓ Low Risk
Deployer Can Access User Funds	Complete	Complete	✓ Low / No Risk

The contract code is **verified** on Harmony Block Explorer.

The vulnerabilities listed above were not found in the token's Smart Contract.

Contract Code Audit – Contract Ownership

Contract Ownership has not been renounced at the time of Audit

The contract ownership is not currently renounced.

We have placed the contract owner address below for your viewing:

[one1pywas8ytjdrmxrc6f4dg37fddu4y9vzej7gtcc](https://etherscan.io/address/one1pywas8ytjdrmxrc6f4dg37fddu4y9vzej7gtcc)

The address above has authority over the ownable functions within the contract.

This allows the owner to call certain functions within the contract. Any compromise to the owner wallet may allow these privileges to be exploited.

We recommend:

- Establishing a Time-Lock with reasonable latency
- Assignment of privileged roles to multi-signature wallets

Contract Code Audit – Owner Accessible Functions

Function Name	Parameters	Visibility	Audit Notes
changeOwner	address newOwner	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
withdraw	address token	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
withdrawONE		external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setBuyFeeRecipient	address recipient	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setTransferFeeRecipient	address recipient	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setSellFeeRecipient	address recipient	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
upgradeDistributor	address newDistributor	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setUselessSwapper	address newUselessSwapper	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
registerAutomatedMarketMakerPair	address liquidityPool	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
unRegisterAutomatedMarketMakerPair	address liquidityPool	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setFees	uint _buyFee, uint _sellFee, uint _transferFee	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
setRewardsExempt	address account, bool isExempt	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
DisableIngressTaxation	address account	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
EnableIngressTaxation	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
DisableEgressTaxation	address account	public	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.
EnableEgressTaxation	address account	external	onlyOwner modifier is detected. Owner can call this function if the contract is not renounced.

The functions listed above can be called by the contract owner.

If contract ownership has been renounced there is no way for the above listed functions to be called.

Liquidity Ownership – Locked / Unlocked

Locked liquidity information has been found.

* * * * *

Dessert Finance was able to confirm that 4/6 doxxed team members are required to sign off to remove any liquidity via multisig contracts.

Harmony Multisig LP Transactions can be seen below

Contract Code Audit – Mint Functions

This Contract Cannot Mint New USE Tokens.

We do understand that sometimes mint functions are essential to the functionality of the project.

A mint function was not found in the contract code.

Contract Transaction Fees

At the time of Audit the transaction fees (“tax”) listed below are the fees associated with trading. These fees are taken from every buy and sell transaction unless otherwise stated.

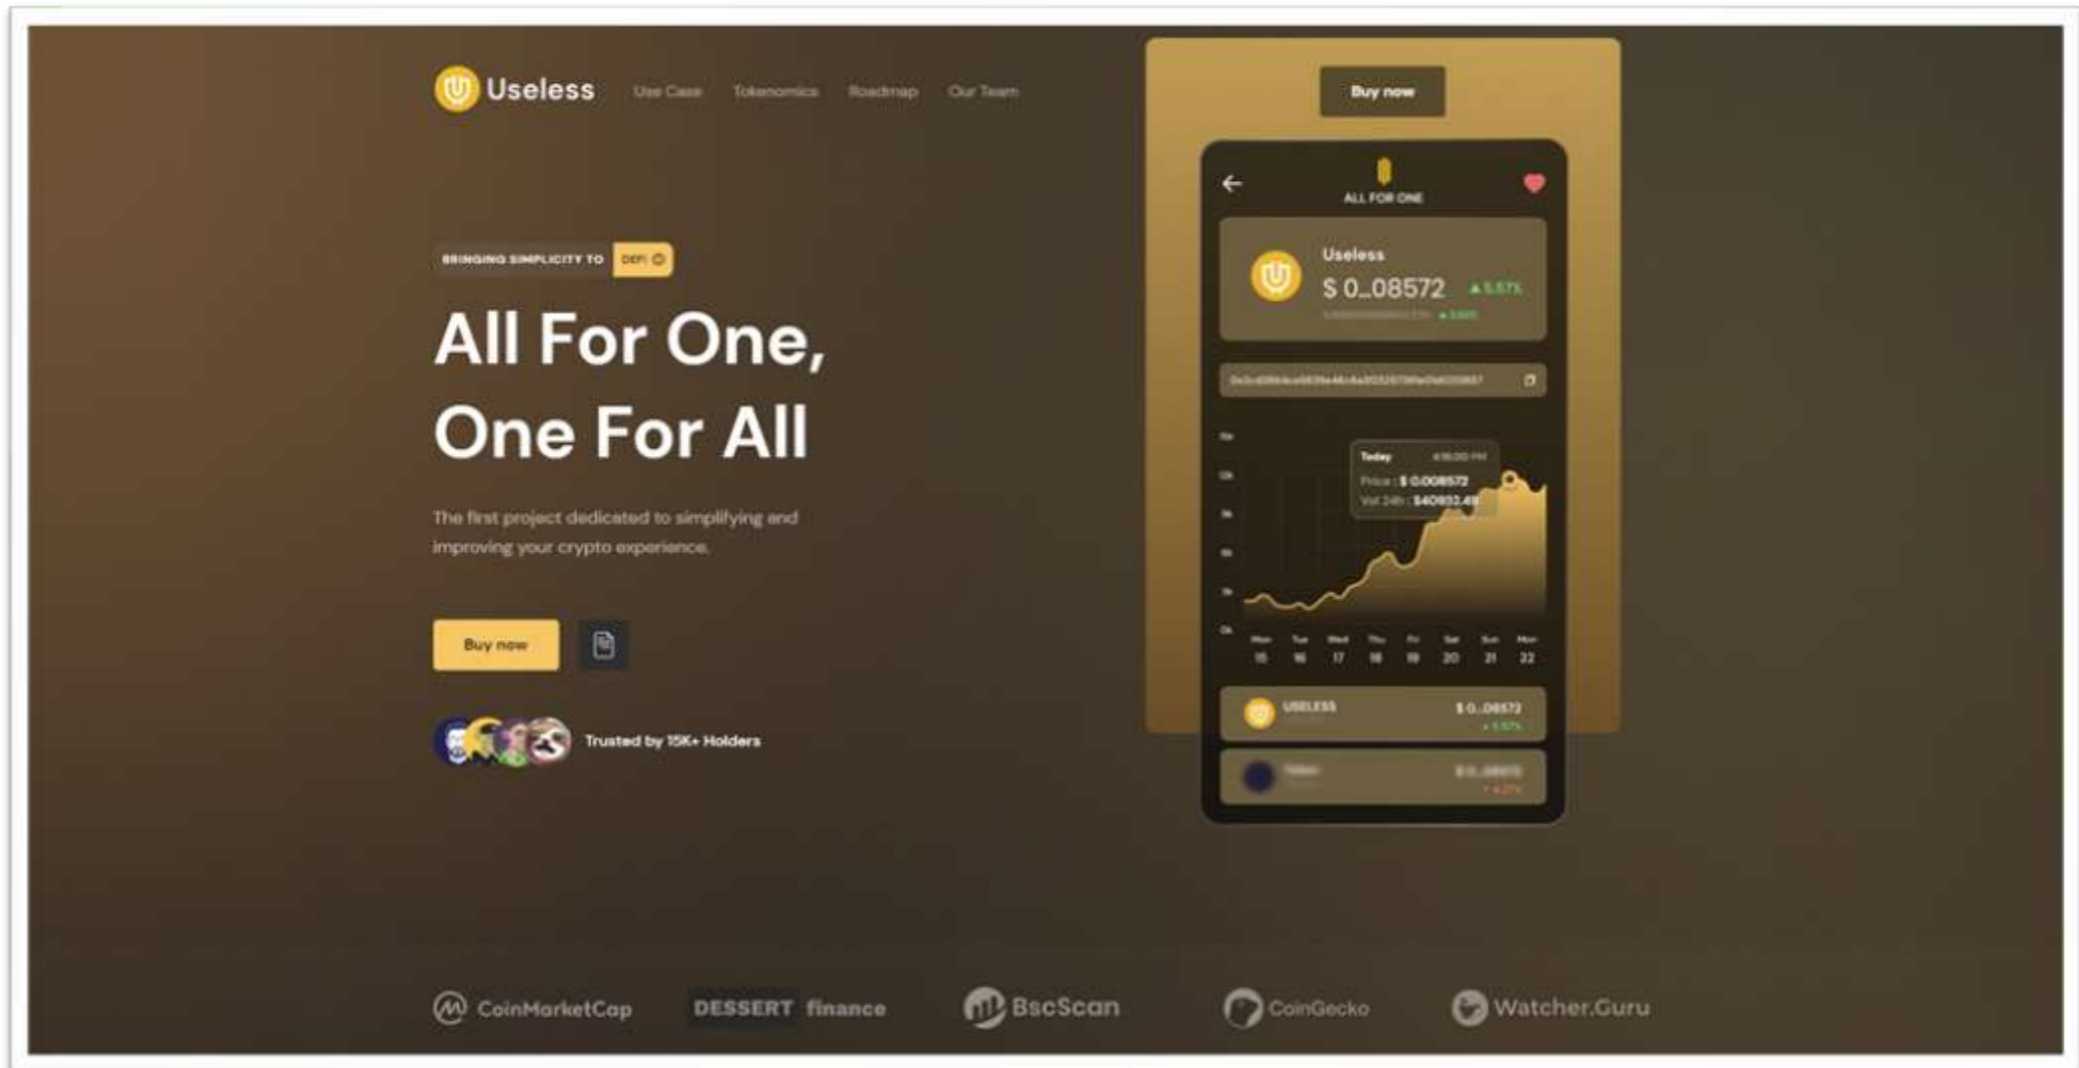

Introducing (side-)tokenomics for a healthy growth

Trading \$USE on \$ONE will occur a 3% tax.

Taxes are used to stabilize the liquidity pool of the token over time, provide stable coin rewards and fund our marketing wallet for more exposure. The token is a central aspect of our ecosystem — it's used to connect it all together.

Website Part 1 – Overview

www.uselesscrypto.com

Above images are actual snapshots of the current live website of the project.

Website was registered on 05/27/2021, registration expires 05/27/2022.

X This meets the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ✓ No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

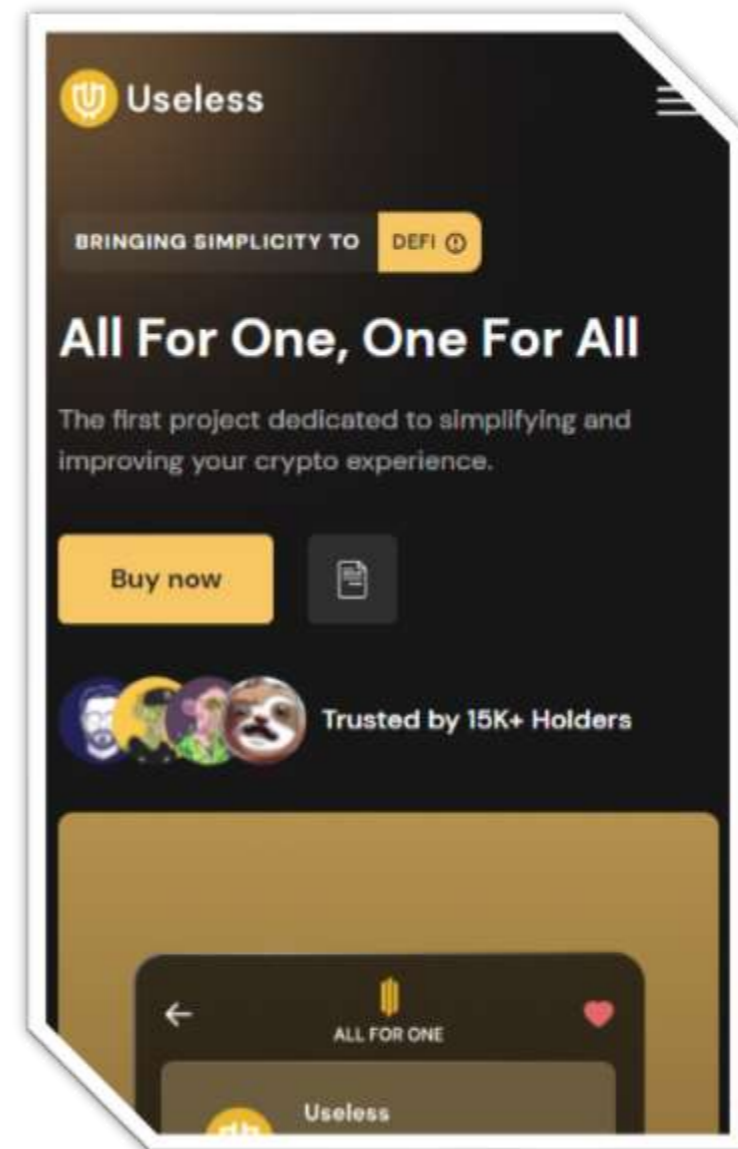

The website contained no JavaScript errors. No typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets.

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: uselesscrypto.com

Issued by: Amazon

Valid Until: 12/2/2022

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

Contact

N/A

SPAM / MALWARE / POPUPS

No malware found

No injected spam found

No internal server errors

No popups found

Domain is marked clean by Google, McAfee, Sucuri Labs, & ESET

Social Media

We were able to locate a variety of Social Media networks for the project.

All links have been conveniently placed below.

Team Overview

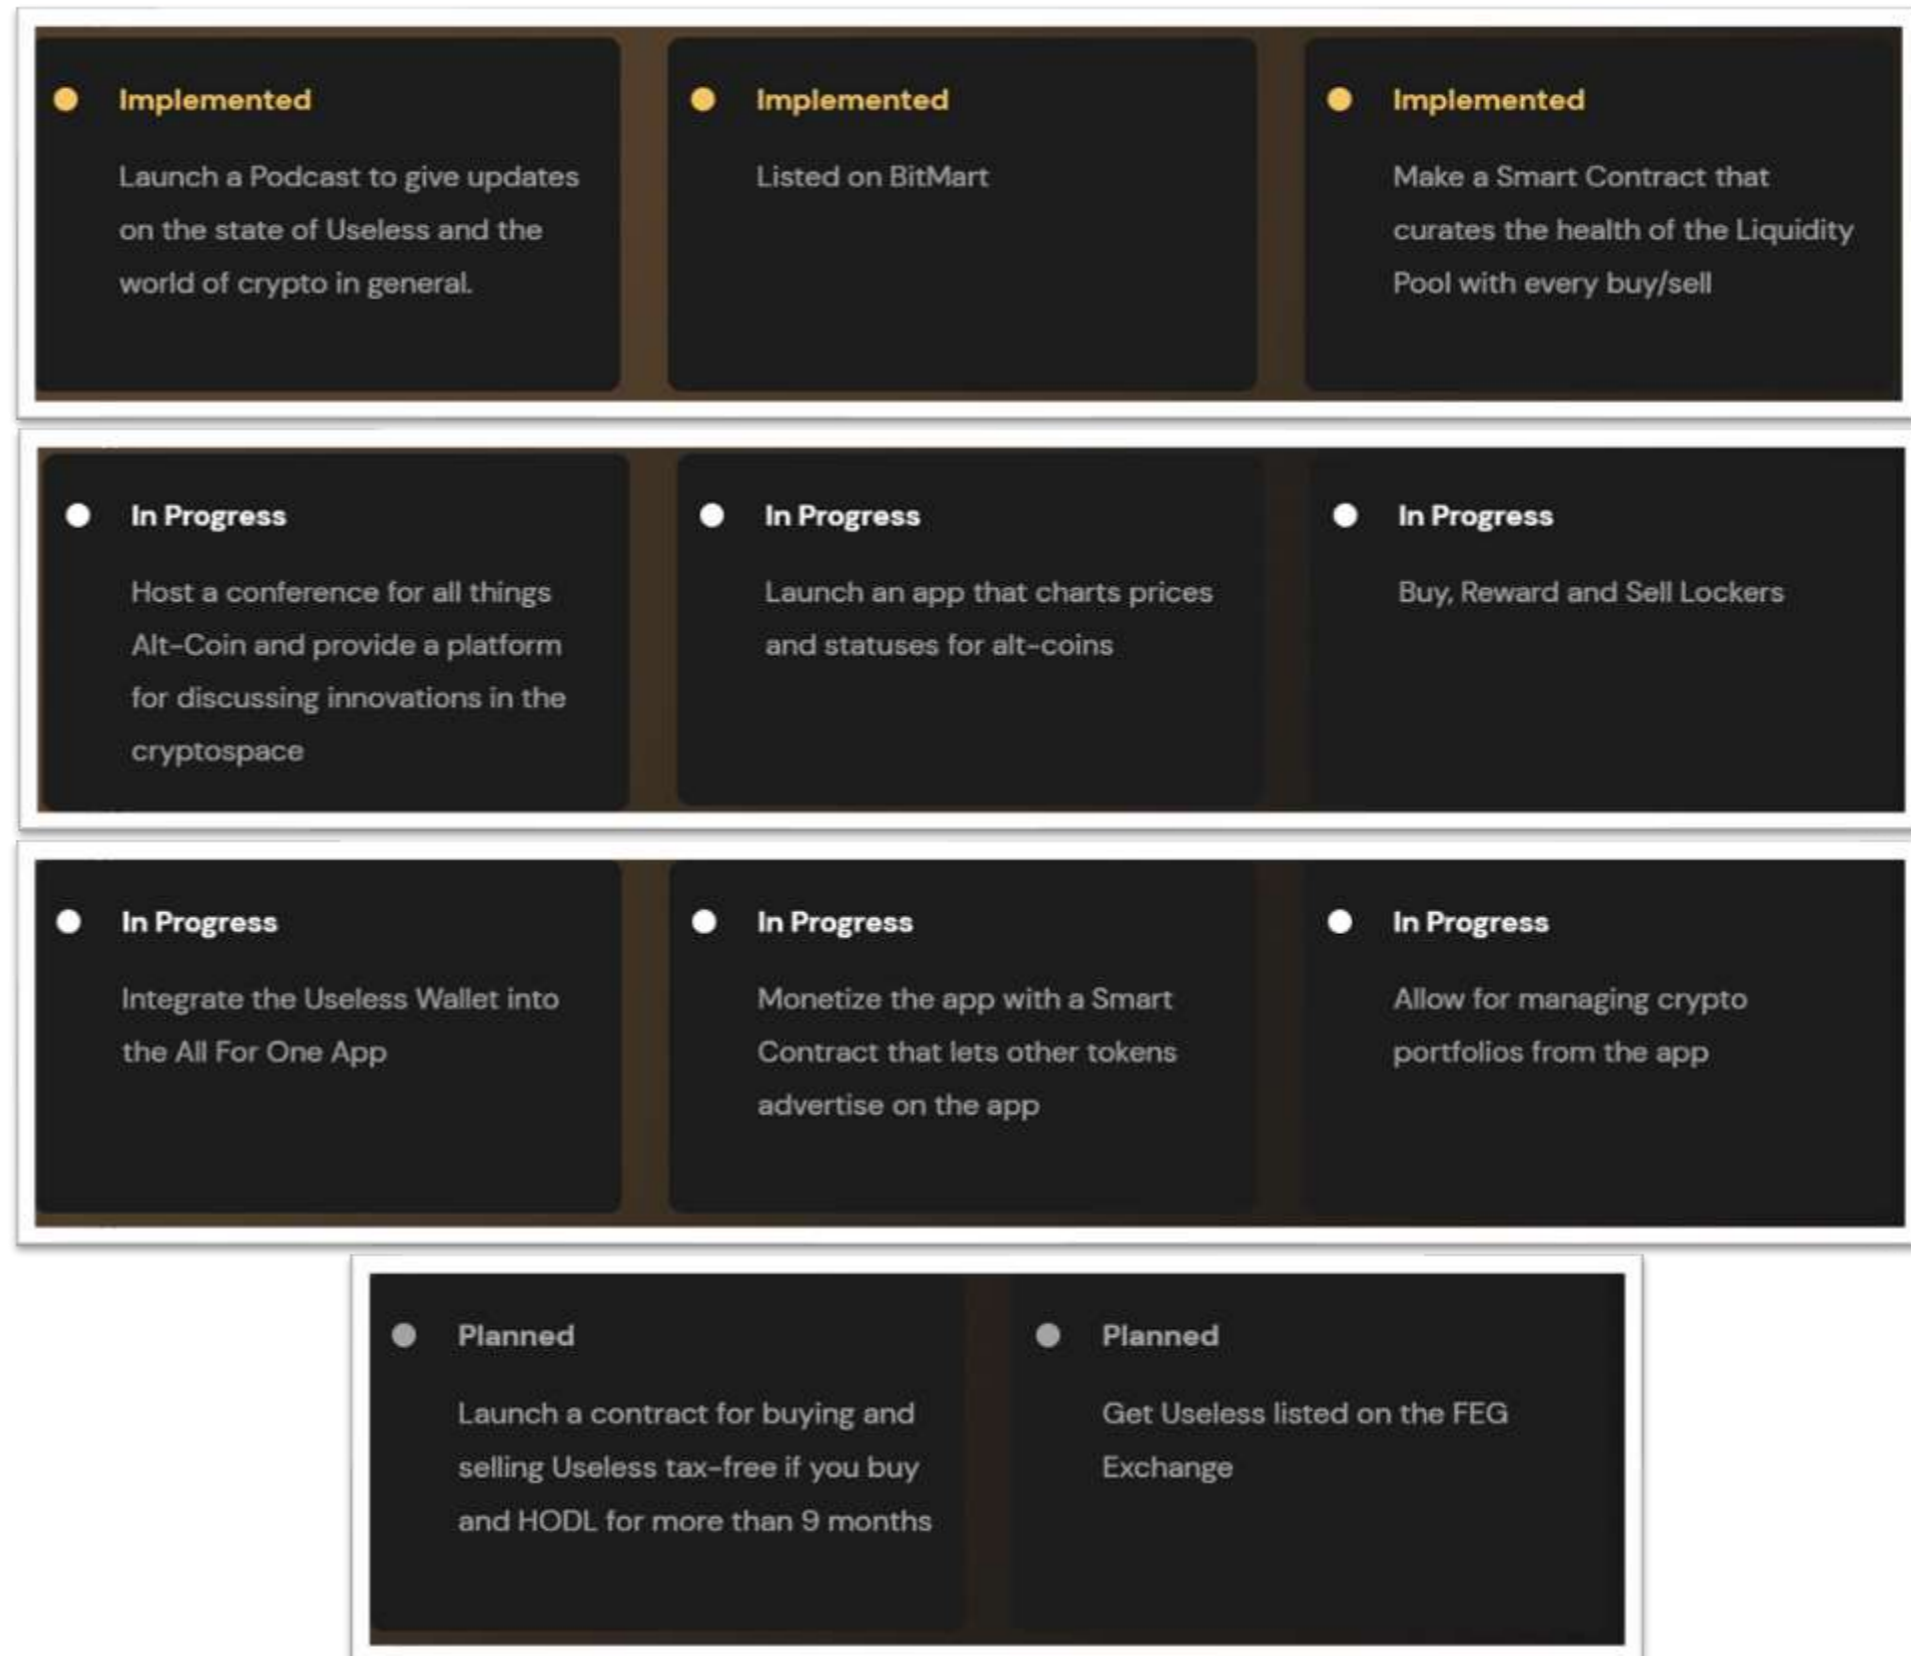

The following information about the team was found on the project's website.

The image displays a team overview grid with six members arranged in two rows of three. Each member's profile includes a headshot, their name, title, and social media icons for Twitter, Instagram, and LinkedIn. The background of the grid is dark brown, and the photos have a yellow and white geometric pattern.

Roadmap

A roadmap was not found on the official website.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You
