

VICE WRLD (VICE)

BEP-20 Audit

Performed at block **10638644**

PERFORMED BY DESSERT FINANCE

FOR CONTRACT ADDRESS: **0xeea06fc74182b195f679f31d735d95ee502f03f3**

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove *all* liquidity (“Rug Pull”), sell off tokens, or completely exit scam. There is also no way to prevent private sale holders from selling off their tokens. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Website Part 1 – Overview

www.viceworld.com

Above images are actual snapshots of the current live website of the project.

Website was registered on 05/16/2021, registration expires 05/16/2022.

X This does not meet the 3 year minimum we like to see on new projects.

Website Part 2 – Checklist

- ✓ Mobile Friendly
- ! No JavaScript Errors
- ✓ Spell Check
- ✓ SSL Certificate

The website contained one minor JavaScript error. No major typos, or grammatical errors were present, and we found a valid SSL certificate allowing for access via https. We were able to find a few minor typos, specifically in the whitepaper.

No additional issues were found on the website.

Website Part 3 – Responsive HTML5 & CSS3

No issues were found on the Mobile Friendly check for the website. All elements loaded properly and browser resize was not an issue. The team has put a considerable amount of thought and effort into making sure their website looks great on all screens.

No severe JavaScript errors were found. No issues with loading elements, code, or stylesheets. One minor JavaScript error was found and has been pasted below.

```
✖ Failed to load resource: the server responded with a status of 404 ()  
MyIodon-Medium.otf:1  
false index-1114b08...is:1
```

Website Part 4 (GWS) – General Web Security

SSL CERTIFICATE

A valid SSL certificate was found. Details are as follows:

Offered to: viceworld.com

Issued by: Go Daddy

Valid Until: 05/16/2022

CONTACT EMAIL

A valid contact email was found on the official website. Contact email is listed as shown below:

0x0000000000000000000000000000000000000000000000000000000000000000
pragma solidity ^0.8.2;
interface IERC20 {
    function totalSupply() external view returns (uint256);
    /**
     * @dev Returns the amount of tokens owned by 'account'
     */
    function balanceOf(address account) external view returns (uint256);
    /**
     * @dev Moves 'amount' tokens from the caller's account to 'recipient'
     * @dev Returns a boolean value indicating whether the operation succeeded.
     * @dev Emits a [[Transfer]] event.
     */
    function transfer(address recipient, uint256 amount) external returns (bool);
    /**
     * @dev Returns the remaining number of tokens that 'spender' will be
     * allowed to spend on behalf of 'owner' through [[transferFrom]]. This is
     * zero by default.
     * @dev This value changes when [[approve]] or [[transferFrom]] are called.
     */
    function allowance(address owner, address spender) external view returns (uint256);
    /**
     * @dev Sets 'amount' as the allowance of 'spender' over the caller's tokens.
     * @dev Returns a boolean value indicating whether the operation succeeded.
     * @dev IMPORTANT: Because changing an allowance with this method brings the risk
     * that someone may use both the old and the new allowance by re-entrance.
     * @dev Transaction ordering, see available solution to mitigate this race
     * condition in the first commit the spender's allowance to 0 and set the
     * desired value afterwards.
     * @dev https://github.com/ethereum/EIPs/issues/209#issuecomment-267545729
     * @dev Emits an [[Approval]] event.
     */
    function approve(address spender, uint256 amount) external returns (bool);
    /**
     * @dev Moves 'amount' tokens from 'sender' to 'recipient' using the
     * allowance mechanism. 'amount' is then deducted from the caller's
     * allowance.
     */
}
```

- ✓ Integer Underflow
- ✓ Integer Overflow
- ✓ Correct Token Standards Implementation
- ✓ Timestamp Dependency for Critical Functions
- ✓ Unexposed Private Transfer Function
- ✓ Transaction-Ordering Dependency

Code is truncated to fit the constraints of this document.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on BSCScan.

Common vulnerabilities were not found in the token's Smart Contract as shown above.

[The code in its entirety can be viewed here.](#)

The contract code is **verified** on BSCScan.

Common vulnerabilities were not found in the token's Smart Contract as shown above.

Social Media

We were able to locate a vast variety of Social Media networks for the project including Twitter, Telegram, Facebook, and Instagram. All links have been conveniently placed below.

[Twitter](#)

[Telegram](#)

[Facebook](#)

[Instagram](#)

✓ **At least 3 social media networks were found.**

Social and Web – Final Thoughts & Suggestions for Improvement

We were able to track down multiple social media channels for the project. Social Media channels included Twitter, Telegram, Facebook, and Instagram. All social media channels had a healthy amount of activity.

It is important to note that there is an 8% tax on EVERY transaction including buys and sells. 4% goes to marketing and development, 3% is distributed to the token holders, and 1% is reserved for charity.

As this is a project with a charity aspect, we would like to see a letter from a charity providing proof of origination of donations or a social media post tagging the project made as an added layer of transparency to let users know that their money is going where it should. At this time we have no reason to suspect any misuse of funds, this is simply suggested best practices for cryptocurrencies with charity aspects.

Suggestions for Improvement

1. Create plan to receive a donation origination letter from charities that are being donated to or social media post mentioning the project by the charity.
2. Update domain registration to 3+ years

Top Token Holders

The entire supply was found in one wallet at the time of audit. As this project is in pre-launch stages, we expect this to change. Please use the link below to find the most up-to-date token holders.

OTHER ACCOUNTS

0x1c3578cecd197ce40519962d6ab6bccaa2387f94

Location Audit

We were able to identify England/Wales as the primary location for the project based on the incorporation documents.

Team Overview

We were able to find team information on the website. It has been pasted on this page for convenient viewing.

JORDANNA FOXX
CEO/FOUNDER

The VICEWRLD revolution is led and founded by British adult actress and dominatrix Jordanna Foxx. \$VICE is the first and only token that is sex worker led. Jordanna along with the #VICEARMY are on a mission to reclaim sex work whilst simultaneously creating a safe platform and supporting the fight against exploitation.

MR VICE
CRYPTO MARKETING MANAGER

VICEWRLD has a hybrid marketing team. The crypto marketing side is run by Mr. Vice. He has worked on multiple projects on the BSC and Polygon chain as a marketing manager. His experience in crypto, together with his interest in the adult industry niche will make a perfect combination to get \$VICE known all across the cryptocurrency ecosystem.

THE CRYPTO ANT
BUSINESS AND RISK MANAGER

Our International Man of Mystery! The Crypto Ant is the VICEWRLD business and risk management lead and is based in West-Africa. Ant is a former British Paratrooper who now advises global organisations on their business and risk management strategies. He holds a first class BA(Hons) Degree in Security and Risk Management, and is currently working towards an MBA.

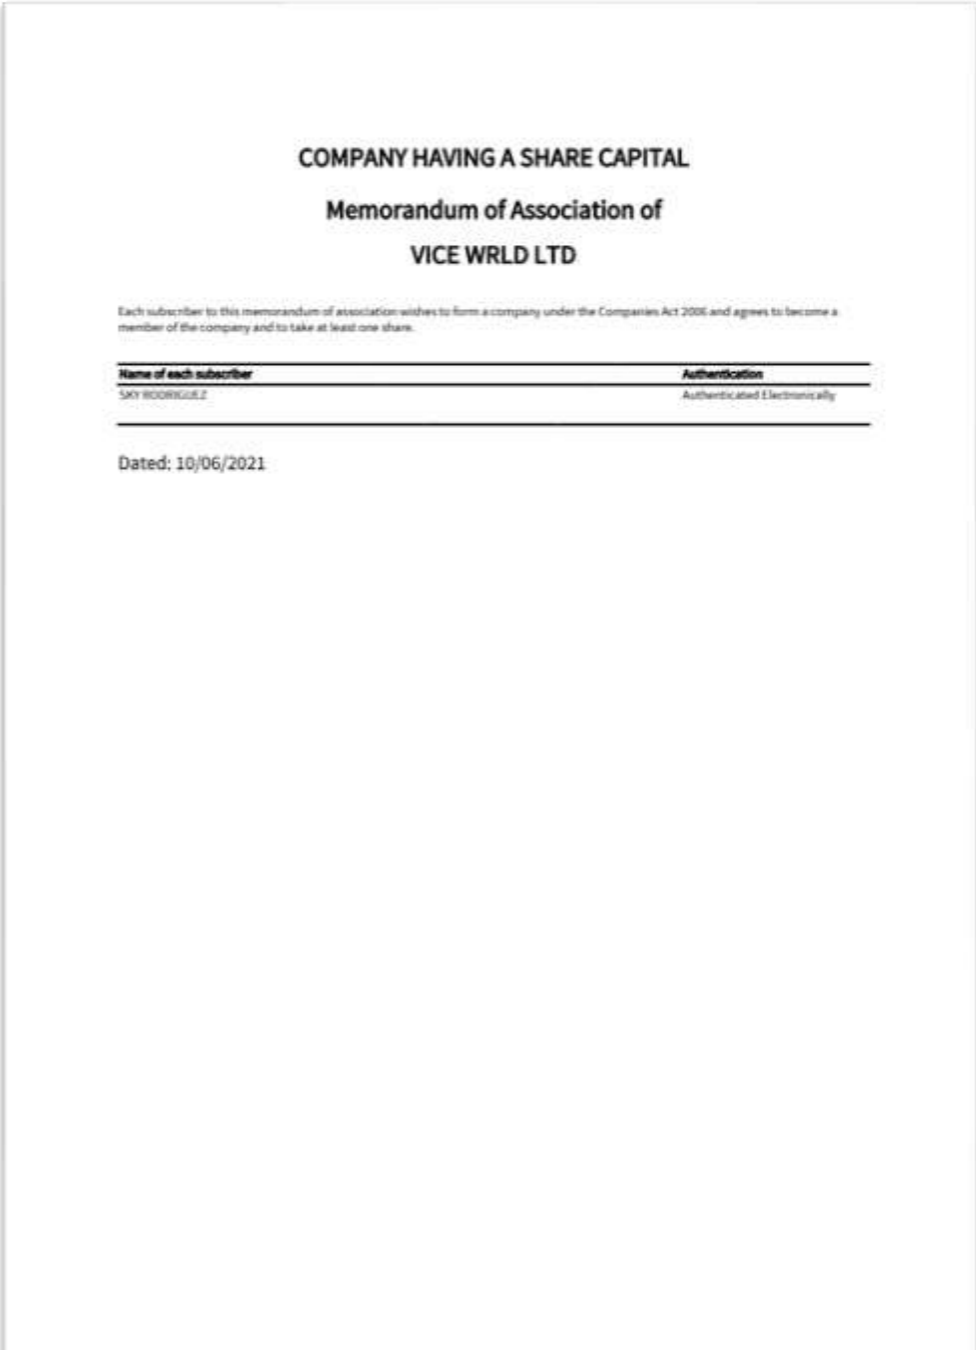

BLOCKCHAIN B
CLASSIC MARKETING MANAGER

Adam known by his handle "Blockchain B", has brought his zest to the marketing roles he has enjoyed on the Binance Smart Chain by bringing a mindset of out of the box thinking, tempered by experience in what works and doesn't.

Although he covers the "classic marketing" sector of Vicerworld his focus is anything but; consisting of bringing Vicerworld to the mainstream.

Potential Signs of Risk

Dessert Finance has decided to omit this page with the presence of [incorporation documents](#) and a public team. This does not mean this is a risk-free project.

Potential Signs of Confidence

TEAM HAS BEEN VERY RESPONSIVE IN ADDRESSING QUESTIONS

TRANSPARENT FEE STRUCTURE

TRANSPARENT MARKETING ALLOCATION

TRANSPARENT REDEVELOPMENT FEES

SSL CERTIFICATE WAS FOUND AND VALID

ACTIVE SOCIAL MEDIA PRESENCE

The above listed are the top 6 confidence indicators of the project. These are by no means assigning the project as a confident project. Every project will have the top 6 confidence indicators posted. It is crucial to note that some may be more important than others.

Roadmap

A roadmap was found on the official website, we have conveniently placed it on this page for your viewing.

Disclaimer

The opinions expressed in this document are for general informational purposes only and are **not intended to provide specific advice or recommendations for any individual or on any specific investment**. It is only intended to provide education and public knowledge regarding BSC projects. This audit is only applied to the type of auditing specified in this report and the scope of given in the results. Other unknown security vulnerabilities are beyond responsibility. Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.

Thank You

DESSERT FINANCE PROJECT AUDIT HAS BEEN COMPLETED FOR VICE WRLD (VICE). 1 DSRT HAS BEEN SENT TO AUDITED PROJECT'S CONTRACT ADDRESS FOR VERIFICATION OF THIS AUDIT AT BLOCK NUMBER: **10638644**
