PERFORMED BY DESSERT FINANCE FOR AMA IN THE RED ROOM

RED ROOM

INITIAL DISCLAIMER

Dessert Finance provides due-diligence project audits for various BSC projects. Dessert Finance in no way guarantees that a project will not remove liquidity, sell off team supply, or otherwise exit scam.

Dessert Finance does the legwork and provides public information about the project in an easy-to-understand format for the common person.

Agreeing to a project audit can be seen as a sign of confidence, and is generally the first sign of trust for a project, but in no way guarantees that a team will not remove liquidity ("Rug Pull"), sell off tokens, or completely exit scam. It is ultimately your responsibility to read through all documentation, social media posts, and contract code of each individual project to draw your own conclusions and set your own risk tolerance.

Dessert Finance in no way takes responsibility for any losses, nor does Dessert Finance encourage any speculative investments. The information provided in this audit is for information purposes only and should not be considered investment advice.

Social Media – Final Thoughts & Suggestions for Improvement

Overall the team seems to be active across multiple social media platforms. We found a healthy amount of activity on Twitter and Telegram.

We were able to locate the twitter for the lead developer however there does not appear to be a dedicated twitter account for the core project. The subreddit was lacking content however this appears to be a fairly new project so we expect that to change over time.

A discord was found in the whitepaper however appears to be inactive at this time.

Suggestions for Improvement

1. Have a pinned post on the WeatherBalloon subreddit describing the project and its goals.

2. Consider adding an official WeatherBalloon Twitter (the one we found appears to be the developer)

3. Consider adding WeatherBalloon Facebook page.

4. Consider using discord or removing it from the whitepaper to avoid confusion.

Top Token Holders

At the block number indicated on the cover page of this report, 44.5% of the supply appears to be burned. The largest holder is the PancakeSwap liquidity pool,

Dessert Finance only issues this report based on the attacks or vulnerabilities that already existed or occurred before the issuance of this report. For the emergence of new attacks or vulnerabilities that exist or occur in the future, Dessert Finance lacks the capability to judge its possible impact on the security status of smart contracts, thus taking no responsibility for them. The smart contract analysis and other contents of this report are based solely on the documents and materials that the contract provider has provided to Dessert Finance or was publicly available before the issuance of this report (issuance of report recorded via block number on cover page), if the documents and materials provided by the contract provider are missing, tampered, deleted, concealed or reflected in a situation that is inconsistent with the actual situation, or if the documents and materials provided are changed after the issuance of this report, Dessert Finance assumes no responsibility for the resulting loss or adverse effects. Due to the technical limitations of any organization, this report conducted by Dessert Finance still has the possibility that the entire risk cannot be completely detected. Dessert Finance disclaims any liability for the resulting losses.

Dessert Finance provides no guarantees against the sale of team tokens or the removal of liquidity by the project audited in this document. Even projects with a low risk score have been known to pull liquidity, sell all team tokens, or exit-scam. Please exercise caution when dealing with any cryptocurrency related platforms.

The final interpretation of this statement belongs to Dessert Finance.

Dessert Finance highly advises against using cryptocurrencies as speculative investments and they should be used solely for the utility they aim to provide.
